London: LONGMAN, GREEN, & Co., Paternoster Row.

MARSHMAN'S LIFE OF GENERAL HAVELOCK.

Now ready, in 1 vol. 8vo. with Portrait, price 12*s.* 6*d.*

MEMOIRS OF MAJOR-GENERAL SIR HENRY HAVELOCK, K.C.B. By JOHN CLARK MARSHMAN.

"ALL the events deserving of record to the close of the career of this true soldier and great and good man, are clearly and vividly narrated by Mr. Marshman."—*Naval and Military Gazette.*

"WRITTEN without any affectation in style or sentiment, the narrative is in our opinion interesting throughout. The biographer of Havelock has much of the eloquence which belongs to sincere and necessary statement, rising unconsciously into unadorned poetry, from the Dantesque exhibition which he gives of striking characteristic realities."—*Spectator.*

"THIS biography is the production of a scholar and a gentleman, and does full justice to the great qualities and noble career of the hero whose life and death it celebrates."—*Observer.*

"IT is at once a very able and a very interesting work. .....The book, which will add greatly to Mr. Marshman's literary reputation, is likely to enjoy an extensive popularity; and it derives additional value from the author's thorough acquaintance with all the historical events with which the career of Havelock was associated."—*Overland Mail.*

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

Now ready, in thick 8vo, price 7*s.* 6*d.*, Vol. XVII. of

THIERS' HISTORY OF THE CONSULATE AND THE EMPIRE OF FRANCE UNDER NAPOLEON. Translated from the French. The late Mr. Colburn's authorised library edition in 8vo. large type.

This interesting volume, upon which the author has lavished immense labour, details the momentous affairs after the battle of Leipsic; the invasion of France, the campaign of Brienne and Montmirail, the first abdication of Napoleon, and the entrance of Count d'Artois into Paris; terminating by a general survey of the greatness and faults of the imperial reign. As this volume contains double the amount of matter of the previous ones, which were publised at 5*s.* each, the publishers are compelled to charge it 7*s.* 6*d.* Vol. 18, which will complete the work, is in preparation.

WILLIS & SOTHERAN, 136, Strand, W.C., and all booksellers.

RECENT WORKS.

NEW ZEALAND; PAST AND PRESENT—SAVAGE AND CIVILIZED. By ARTHUR S. THOMSON, M.D., Surgeon-Major 58th Regiment. Second Edition. Maps and Illustrations. 2 vols. Post 8vo. 24*s.*

"Dr. Thomson's narrative is clear, concise, and comprehensive, and conveys a very complete and exact idea of the country, the climate, the natural history, the people, the language, &c. It is rare indeed to get so intelligent and satisfactory an account of any land."—*Quarterly Review.*

II.

MADAGASCAR; DURING THREE VISITS, including a Journey to the Capital, with Notices of the Natural History, and of the present Civilisation of the People. By REV. W. ELLIS. 5th Thousand. With Portrait and Illustrations. 8vo. 16*s.*

"The friends of the London Missionary Society may be fairly congratulated on the wonderful popularity of Dr. Livingstone's work. It has conveyed ideas of our work amidst the heathen—of its civilising results, and its spiritual successes—into quarters where the achievements of Evangelical enterprise had before been little known. That another work, by another of our missionaries, should issue from the press, within little more than twelve months afterwards, bidding fair to rival its predecessor in celebrity, is matter for even greater surprise, and still more grateful congratulations. Mr. Ellis is a brave, adventurous man."—*Evangelical Magazine.*

III.

SOUTH AFRICA; MISSIONARY TRAVELS AND RESEARCHES; including a Sketch of Sixteen Years' Residence in the Interior, and a Journey from the Cape to Loanda, &c. By the Rev. DAVID LIVINGSTONE. 30th Thousand. Portrait and Illustrations. 8vo. 21*s.*

"Geographical discoveries are with Dr. Livingstone the prelude to missionary exertions."—*Christian Observer.*

"Dr. Livingstone is an invaluable pioneer, both to civilisation and Christianity."—*Christian Remembrancer.*

IV.

DANIEL WILSON, BISHOP OF CALCUTTA; HIS LIFE, LETTERS, AND JOURNALS. By his Son-in-Law Rev. JOSIAH BATEMAN, M.A. Third Thousand. Portrait and Illustrations. 2 vols. 8vo. 28*s.*

"Bishop Wilson could not pass from the stage of life without a strong desire being awakened, not merely to see the very last of him, but to trace out the course of his life, and, if possible, to detect the mainsprings by which the whole man was set in action, impelled and controlled. This constitutes the real value of these volumes, and, we are bold to say, they will disappoint none of their readers."—*Christian Observer.*

MAJOR HODSON'S TWELVE YEARS OF A SOLDIER'S LIFE IN INDIA. Edited by his Brother, the Rev. GEORGE H. HODSON, M.A.

London: JOHN W. PARKER & SON, West Strand, W.C

Digitized by Google

SHOULD THIS BE NOTICED by the DESCENDANTS OF OFFICERS, who were ENGAGED IN INDIA during the STORMING OF SERINGAPATAM in 1799 and 1799, the Writer takes leave to state that, at the above period, he served as an Officer in the Honourable East India Company's Navy, and was engaged in conveying troops from England and the Cape to Madras as a reinforcement to the Indian Army at the above siege, and has every reason to believe that he is now the only survivor who was mixed up in the above, and at the death of the Sultan Tippoo Sahib. The Commanders were Generals Harris and Sir David Baird. The object of the writer in making this public is this: after all his struggles and dangers in all parts of the globe, in India, China, Africa, &c., he now, at his advanced age, finds himself living on a very slender income. Should this meet the eye of the descendants of those who served at the above siege, and fortune has favoured them with abundance, the Writer need not add that a small addition to his exchequer would now be truly acceptable. Reference, if required, to HUGH FLEMING, Esq., Secretary to the Board of Commerce, York Buildings, Manchester.—9th May, 1860.

WANTED, an ORDERLY ROOM CLERK. Apply, enclosing testimonials, &c., to the ADJUTANT 2nd Stafford Militia, Richmond Barracks, Dublin.

2ND DEVON VOLUNTEER RIFLE CORPS. —WANTED immediately, for the above Corps, a PERMANENT SERGEANT. He must be a good drill, and hold a Hythe Certificate. He will be required to take charge of the arms of the corps, and to assist in keeping the practice returns. Excellent quarters will be provided in the same building with the armoury, and adjacent to the drill ground. Applications, stating terms, to be addressed to JAMES HAWKER, Esq., Secretary, Plymouth.

TO RECENTLY-DISCHARGED SOLDIERS WITH PENSION.—WANTED, for the City of Bristol Rifle Volunteer Battalion (10 Companies), TWO PERMANENT SERGEANTS. They must be good Drills, and able to produce certificates of competency. Apply by letter, stating terms and qualifications, to Captain A. M. JONES, Orderly Room, Bristol Rifle Volunteer Corps, Bristol.

SIX-FEET VOLUNTEER GUARDS (32d Middlesex). — GENTLEMEN of the standard height and upwards are invited to JOIN this corps. Drill at St. George's Barracks. Address to the Secretary, 38, Conduit Street, W.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS, PIMLICO DISTRICT.

HEAD QUARTERS—29, Upper Belgrave Place, S.W.

Members' Names, and Subscriptions and Donations received at the above address, every day between the hours of 8 A.M. and 6 P.M. The Adjutant will also be in attendance every Monday, Wednesday, and Friday, at 11·30 o'clock, A.M., to transact the current business of the Corps. Members drill every morning from 8 till 11, and on evenings from 7 till 9, at the Carlton Ride.

GROSVENOR, Lieut.-Colonel.

LONDON IRISH RIFLE VOLUNTEERS. —A General Meeting of the members of this corps will be held on Thursday Evening next, 17th inst., at Hungerford Hall, at Half-past Seven o'clock precisely. Marquis of Donegal in the chair.

WILLIAM O'CONNOR, Hon. Sec.

7, John Street, Adelphi, W.C.

BY a strange perversity it has happened that we owe the latest suggestions for the improvement of our infantry organisation to a cavalry officer; and the question may fairly be asked, whether Lord Lucan might not have found an equally wide field for reform, and a subject upon which he might have had the advantage of greater practical experience, in his own branch of the Service. There are some to whom it may occur to inquire whether our cavalry system is so perfect as to be susceptible of no improvement, and whether there are no points in which men like Lord Lucan, who understand what it is, could suggest changes for the better in its organisation. Sir De Lacy Evans is inclined to think that it occupies only the third rank in point of excellence among the various arms of our Service; and Sir John Burgoyne has placed on record his opinion, that in this important element of an Army we are considerably behind most other nations of the continent. Whatever be the value or truth of such notions as these, one thing at least is certain—that, while in every other arm the last ten years have produced a long continued series of improvements, scarcely any reform of importance has been applied to our cavalry during the same period. Our system of fortifications is undergoing considerable modifications, the better to adapt it to altered circumstances of attack; our artillery is rapidly being completely revolutionised; our infantry have been armed with a weapon, whose destructive power is ten times that of their old arm; and the soldier now receives a scientific instruction in the formerly neglected art of killing his enemies. Every means is eagerly sought of increasing the power, cultivating the intelligence, and securing the efficiency of the individual. But, our cavalry remain much as they were twenty years ago; horse and rider go through the same old system of training, and the former still groans under his long-accustomed load of nearly twenty stone. It may be that the old system is the best that could be devised; and we may have reached a state of perfection beyond which no advance is possible. There may be, after all, a finality in the progress of discovery; and the old axiom, *non progredi est regredi*, may turn out to be a monstrous fallacy, long acquiesced in, but at length utterly exploded.

What seems strange, however, is, that all this should apparently be taken for granted, and that the presumed excellence of our cavalry system should be suffered to rest upon the traditions of the past, instead of being subjected to the test of practical experiment. There are no signs of active inquiry upon the subject, and little apparent desire for improvement: the present state of things is acquiesced in because it has always existed. The principles upon which we seem to act with regard to our cavalry would, if applied to other branches of the Service, have continued Brown Bess as the arm of the infantry, and have left our artillery in the undisturbed possession of their old field-guns.

What the *avenir* of cavalry will be under the altered conditions of warfare produced by fire-arms and artillery of long range and great precision, is perhaps one of the most puzzling problems of military science at the present day. There are those who go so far as to doubt whether the operations of this arm will have much effect upon the decision of future actions; but, without going to this length, most would be inclined to agree, that if cavalry are to retain their former importance, their mobility must be materially increased. Is there nothing which could be done towards the attainment of this object? A cavalry regiment is an expensive article: the cost of a dragoon to the country is very considerably greater than that of his dismounted comrade; and people may be inclined to ask whether we altogether get out of him the value of our money. Are the troopers upon which our dragoon regiments are mounted the best that could be obtained at the price, in a country which prides itself upon its breed of horses? Is the mode of training adopted with them such as to develop the powers of the animal to the utmost, and the treatment to which they are subjected that best adapted to preserve them in the highest state of efficiency? Is no improvement possible in the equipment of the rider? Can no method of instruction be introduced, tending to give to individual skill the greater importance which the infantry soldier is now taught to feel that it possesses? Can nothing be done to lighten the weight which weakens the energy and cramps the activity of the horse? These are questions which have been asked a hundred times, but as yet no practical answer has been given to them.

We are far from asserting that any such improvements are possible, but their impossibility has never hitherto been actually proved. There may be nothing radically wrong in a system which has produced a cavalry force that can perform exploits such as that witnessed in the charge of the heavy brigade at Balaklava; but our infantry had distinguished themselves before the Enfield rifle was put into their hands, and the reputation of our artillery was established long before an Armstrong gun had been forged. That a system is good cannot be urged as an argument against the possibility of its being made better. Our neighbours are wiser in their generation than we. One of the results of the late Italian campaign has been a determination on the part of Louis Napoleon to inquire into the possibility of improving the French cavalry system. It is said that changes have been already introduced, and the experience which is anticipated from an experimental cavalry camp on a large scale, to be formed during the present summer, will probably supply a basis for further improvements. In England, the country of horses and horsemen,—where, to use the cant phrase, everyone of us is born in the saddle,—it is strange that no action should be taken in this respect. The number of cavalry we maintain is smaller in proportion to our whole force than that of any other military nation in Europe; but this is of itself the strongest reason that the efficiency of the force we keep on foot should be brought to the highest possible pitch. With our natural advantages, our cavalry ought to eclipse that of any continental nation. But the race is not always to the swift; and if we stand idly still while others are laboriously pushing their way forward, we may find to our cost that the supremacy which ought to be ours has been stolen from us unawares. If men like Lord Lucan and other officers of experience were to devote their attention to the question of improving our cavalry system, they might find that their labour had not been spent in vain, and they might be able to do material benefit to a Service to which it is their pride to belong.

The Indian Navy is on its beam ends. It was in a bad way when John Company was in command, and occasionally fired guns of distress, though without producing any effect. Those little paragraphs in the Indian journals, reporting nautical deficiencies in bad grammar, were not calculated to arouse sluggish directors, who stopped their ears against real thunder. Moreover, nobody cared about navies in those days. How was it possible to create an interest for the tiny squadron of India, when the Royal Navy itself was foundering and excited no sympathy? It could be of little consequence that the Indian flat Keddywanee was short-handed, when the three-decker Neptune, or some other floating castle, was unable to move for months for want of a crew. As there was no appearance of war, an opinion prevailed that it was unnecessary to keep up a Navy, or, rather, our need of one was forgotten. Neglecting our wooden walls at home, and dispensing with a squadron in the English Channel, we were not likely to insist that an effective naval force should be maintained in the rivers and waters of a remote dependency. It was natural to regard the Indian Government as best competent to decide what it required in this way; and, in fact, it was not till the landing of our last Persian expedition at Bushire, an operation in which the Indian Navy took so prominent and honourable a part, that the importance of a local naval force was recognised. Meanwhile, the little fleet had materially shrunk in its proportions; and, growing smaller by degrees, soon reached the last stage of contraction. In this condition it was transferred with the army and territory of India to the Crown, and has thus become an integral portion of the national forces.

As its destiny seems now in suspense, two views of the question suggest themselves for consideration. Either we must maintain a local squadron, especially adapted to the navigation, and familiar with its peculiarities; or we must make an addition to the Imperial fleet, adequate not only to the service it has now to perform, and all that may devolve upon it in time of war, but also to the performance of duties wholly out of its sphere. It requires but a moment to show which is the easier and more practical course. In the one case we have a force ready at hand, constructed for the purpose, and trained and used to the Service; in the other, we must employ vessels of a totally different character in duties they were never designed to fulfil. Nor does this constitute the chief objection to the change. The waters of India, with the Red Sea and the Persian Gulf—the proper ground for a local Navy—all present a peculiar navigation, calling for familiar acquaintance with the prevailing winds, as well as the intricacies of the channels, and the varying depth of the water. We know Her Majesty's ships are required in these waters, and that they nobly discharge the onerous duties imposed on them; but they must not be burdened also with those which pertain naturally to an auxiliary force. Unfortunately the Indian Navy is now in such a crippled state that it could afford little support in hostilities, and, if war broke out, could only be employed for transport. Sir Charles Wood, who nearly stamped out the Navy of England, the largest in the world, found much lighter work in India, where he met with the smallest. Dispatching the business first, he came to the pleasure afterwards, evidently with undiminished relish; for, in the muster-roll of officers, we miss half the commanders, a large batch of lieutenants, and all the mates. There will soon be nothing left but the vessels; and we seem to see this Gulliver in the Bay of Bengal, dragging the little fleet after him to the shore, with the intention of making chop of it. The last returns show there are now three steam-frigates which have one lieutenant each instead of four, and three frigates in the happy condition of having none. A lieutenant is a *rara avis* on board screw-transports, which by the regulations ought to possess three; and mates, we may say again, no longer exist. There is thus a wide gate to promotion, as a midshipman no sooner completes his time than he becomes of necessity an acting lieutenant, and, in this capacity, may find himself first lieutenant of a ship. Chance may even elevate him into a commander; for no less than five vessels, which are allowed officers of this rank, are in charge of lieutenants. In fact, it only requires things to continue a short time in their present course for lieutenants and midshipmen to disappear as completely as mates, leaving no officers but commanders. The moment, therefore, may be considered to have arrived when the Government must decide whether the Indian Navy is still to be maintained, or swept from the face of the deep.

The Commander-in-Chief in India has directed that European regiments of infantry, and the European officers of native corps, of the Indian Army, shall be instructed in the great gun exercise, which is henceforth to form part of the drill during the cold season at all stations where guns and duly qualified instructors may be available.

THE ARMY.

2nd Dragoon Guards. Assistant-Surgeon Robotham is about to exchange into the 7th Dragoon Guards.

6th Dragoon Guards. Captain Curtis has arrived home from India in charge of detachments.

7th Dragoon Guards. Lieutenant Armstrong is ordered to rejoin at Sealkote from the convalescent depôt at Dhurmsalla. Assistant-Surgeon Shipton is about to exchange into the 2nd Dragoon Guards.

8th Hussars. Cornet Rawlins is on leave to Mussoarie to September 30.

ROYAL ARTILLERY.—The following general regimental order has been issued from the Adjutant-General's Office, Royal Artillery:—"Referring to the General Regimental Order of July 2, 1859, on the subject of allowances to officers commanding brigades, in lieu of postage and stationery, the Secretary of State for War has approved of the following arrangement, in place of that therein laid down, viz.:—Horse and Field Brigades—To the officer commanding, per battery, at home, 5*l.* 10*s.*; abroad, 3*l.*; to the paymaster, at home, 3*l.*; abroad, 2*l.* 10*s.* Garrison and depôt brigades:—To the officer commanding, per battery, at home, 4*l.* 10*s.*; abroad, 4*l.*; to the paymaster, at home or abroad, 2*l.* In regard to the postage and stationery required for the several artillery districts, Mr. Secretary Herbert has decided that the system which prevailed before the re-organisation of the regiment shall be re-introduced. In future, therefore, the stationery will be supplied in kind upon requisition, and the actual expense of postage will be defrayed by the public, an account thereof being kept in a pass-book, in accordance with the form prescribed for the military departments abroad, as laid down in War-Office Circular (144). The above rates are to commence from the 1st July next, and all claims will be adjusted in accordance therewith."

Brigadier-General Crofton, commanding Royal Artillery, China Expeditionary Force, arrived at Hong Kong from England on the 24th of March, accompanied by his staff. Lieutenant Hicke, R.A., has been appointed aide-de-camp.

ROYAL ENGINEERS.—Captain A. W. Durnford and Lieutenant E. T. Wynne, R.E., have each been granted a fortnight's leave of absence from head-quarters.

The reinforcements for the 26th Company of Royal Engineers at Bermuda left the Royal Engineer establishment Chatham, yesterday, for Cork, where they will embark on board the Arabia. Nine non-commissioned officers and 21 men of the Indian Engineers, who have completed a course of instruction at Chatham in sapping and mining and fortification, have left Brompton barracks for their depôt at Warley, preparatory to their embarking for Calcutta. It is the intention of the Indian Government to despatch a large number of the Indian Engineers to Bengal, Bombay, and Madras, in consequence of the whole of the Royal Engineers having been withdrawn from India.

MILITARY TRAIN.—The 1st battalion has arrived at Hong Kong, in the Simoom, with the following officers attached:—Major G. Cooper, Captains W. R. Gray, Goodall, Hornby, Willans; Lieutenants R. Bruce, Sewell, Jervis, Applin, Williams; Ensigns F. M'Kenzie, D. M'Mahon, Paymaster M. Reeve, Adjutant J. Briggs, Quartermaster W. Lambert, Surgeon O. C. D'Arcy, Veterinary Surgeon G. Fleming.

The 3rd battalion military train, in command of Major M'Court, encamped at Woolwich, have relieved the 2d battalion, Lieut.-Colonel Robertson, at Aldershot. Two troops left Woolwich on Wednesday, commanded by Captains Morrison and Woolridge, Lieutenants Keogh and Ramsay, and the remaining squadron, together with the head-quarter's staff, left on Thursday. The officers composing the staff and head-quarter divisions consist of Major M'Court, Captains Powel and McFarlane, Paymaster Willans, Quartermaster Salford, Lieutenants Keogh and Powell, and are accompanied by a train of 36 waggons.

Scots Fusilier Guards. The 200th anniversary of this regiment will be celebrated by a dinner of the officers, past and present, on the 19th of June, at which the Duke of Cambridge will preside, and a fête at the Crystal Palace on the following day for the non-commissioned officers and men. The committee for making the arrangements consists of Colonel Ridley, Colonel de Bathe, Lieut.-Colonels Brownlow Knox, M.P., Haygarth, Gipps, White; Majors the Hon. E. Gage, Lord Gerald Fitzgerald, and Captain Cecil Peel.

7th Fusiliers. Captain W. J. Cooper has passed in Hindostanee.

8th Regiment, 1st Battalion. Lieutenant Stebbing is on leave to England.

11th Regiment. The 2nd battalion are under orders to leave Aldershot for Shorncliffe Camp.

14th Regiment. Indiana arrived at Trinidad on the 19th of April with three companies of the 1st battalion of the 14th Regiment on board, to take the place of the detachment of the 49th Regiment.

20th Regiment. The 2nd battalion of the 20th Regiment, under the command of Lieut.-Colonel William P. Radcliffe, arrived at the Curragh Camp, on Saturday last, from Dublin, there to be quartered during the summer.

21st Fusiliers. The head-quarters of the 1st battalion has arrived at Barbadoes to be quartered. On the 19th of April two companies landed at Demerara, relieving a similar number of the 49th Regiment. Colonel Ramsay Stuart and Lieutenant Boycott have arrived in England on leave.

27th Regiment. Lieut.-Colonel H. Stapylton has arrived home from Calcutta on leave.

28th Regiment. Captain Messiter has leave to England.

29th Regiment. We lately announced the sad death of Ensign Everard of this Regiment at Sunderland. On Monday the funeral took place with military honours. A firing party with reversed arms, under the command of Lieutenant Forsyth, headed the column, followed by the band of the Regiment, playing the "Dead March in Saul." After them came the hearse, drawn by four horses, followed by a large number of officers, and the rest of the private soldiers in garrison. The High Street was completely crowded with spectators. The windows and doorways were also crowded, and it was estimated that there were upwards of 14,000 persons present on the occasion.

31st Regiment has arrived at Hong Kong. The following officers were with the 1st division:—Majors Swaffield and Eagar; Captains Mitchell, McGregor, Harcourt, and Christian; Lieutenants Deane, Gardiner, Jebb, Hamilton, and Danyell; Assistant-Surgeon Giraud; Ensign Wood.

39th Regiment. Colonel Munro and Lieutenant Smyth have arrived in England on leave from Bermuda.

41st Regiment. Two companies have arrived home from the West Indies in the Himalaya, and have joined the regiment at Aldershot. The following officers accompanied them—Major Bush, Captains Hill and Baird; Lieutenants Warner, Sadler, Brook, and Caulfield, and Assistant-Surgeon Abbott.

44th Regiment. 430 rank and file of H.M.'s 44th Regiment, with officers in charge, Colonels Brown and McMahon; Captains Hamilton, Walters, and Gregory; Lieutenants Raymond, Howorth, Browne, Pitt, and Hodson; Ensigns Roberts and Rennick; Doctors Baker and Kinahan; have arrived at Hong Kong.

49th Regiment. The head-quarters and ten companies have come home in the Himalaya, and proceeded to Aldershot to be stationed. The following are the officers with the head-quarters—Colonel Grant; Captains Beresford, Astley, Hopkins, Fitzgerald, Gibson, Scoones, and Madan; Lieutenants Creswell, Spratt, Cobham, Shirley, Fordyce, and Aldworth; Ensigns Henry, Hincks, and Holmes; Paymaster Mitchell; Surgeon Bewes, Assistant-Surgeon Calder, and Quartermaster Kerridge.

ROYAL MARINES.—The following General Order has been issued to the various divisions of the Royal Marines from the Admiralty:—"Admiralty, May 1, 1860. The Lords Commissioners of the Admiralty have been pleased to signify that soldiers who may have claimed their discharge from the Army under the Limited Enlistment Act, or obtained it by purchase or by a free discharge, and who shall enlist in the Royal Marines within two years of the date of such discharge, are to be allowed to reckon their former service in the Army towards pension on completing 21 years in the combined services. Each man must produce a certificate of good character from the corps in which he has served, and must be of the regulated standard height, and generally a desirable man for the Royal Marines.

54th Regiment. Lieutenant W. A. Galbraith is about to retire from the Service.

57th Regiment. Lieut.-Col. Inglis is on leave to England to the 31st of December next.

58th Regiment. This gallant corps was presented with new colours last Thursday week at Aldershot by General Knollys, commanding the division. The ceremony was very well arranged, and a great deal of animation was imparted to the same by the presence of a large number of ladies, staff officers, &c. In presenting the colours, General Knollys took occasion to pay a marked compliment to Colonel Bridge and the 58th, not only upon their past services, but upon the progress they had made since their return from New Zealand about a year ago; and Colonel Bridge on the part of the corps appropriately acknowledged the compliment, and expressed his belief that the regiment would be found equal to any service which it might be required to perform.

60th Rifles. The Governor-General publicly acknowledges in the *Gazette* the services of the 1st battalion of H.M.'s 60th Royal Rifles, under orders for England. The regiment landed at Bombay in October, 1845. In 1848 it went through the campaign of the Punjaub; was present at the capture of Mooltan; at the battle of Goozerat; and in operations against the tribes on the Peshawur frontier. It was at the siege of Delhi and Bareilly, and participated in the final operations in Oude. Lord Canning "assures its officers and men that the estimation in which their services are held by the Government of India confirms to the full the respect and admiration with which they are universally regarded."

62nd Regiment. Three officers and 56 men have left the depôt to join the service companies in Nova Scotia.

63rd Regiment. Three officers and 56 of this corps have also proceeded to join the service companies at Halifax.

70th Regiment arrived at Allahabad on the 24th of March on their way to the Presidency, 800 strong, with many women and children. On their arrival they found to their amazement and disgust that a telegram had just been received from the officer commanding the Benares Division recommending their detention till further orders. There are now three regiments of the line quartered at Allahabad; H.M.'s 70th and 75th, and the greater part of the 48th, including artillery, close on 2,700 European troops. Sickness is beginning to abate, but cholera is still prevalent. —Lieutenant Garsia is about to exchange into the 79th Highlanders.

73rd Regiment. Lieutenant Blyth has obtained eighteen months' leave to England.

77th Regiment. Lieutenant Knowles is on leave to England to 1st October, 1861.

79th Regiment. Lieutenant Duff exchanges regiments with Lieutenant Garsia, 70th Regiment. Brevet-Major Maitland is appointed Commandant of the Darjeeling Depôt.

81st Regiment. Lieutenant R. Swift is on leave from India.

88th (Connaught Rangers). Captain Henning and Lieutenant Watson have eighteen months' leave to England.

97th Regiment. Lieutenant Safford is appointed Instructur of Musketry to the regiment, vice Captain Annesley, resigned.

99th Regiment. About 700 of H. M.'s 99th Foot, in charge of Colonel Reeves, Captains L. R. Elliot, Dunne, and Ely; Lieutenants Kempson, Grenville, Harvey, Clayton, and Batchelor; Ensigns Stanford, Ward, and A. L. Walker; Lieutenant and Adjutant Black, Quartermaster Johnson, Surgeon R. C. Todd, Colonel Day, Majors Blamire and Dowbiggen; Captains Welman, and Dickenson; Lieutenants Atkinson, Browne, Gray, and Day; and Assistant-Surgeon McCartnay; have arrived at Hong Kong, and were immediately to go north.

Gold Coast Artillery. By the last accounts from the West Coast of Africa, we learn that Major Cochrane, who had been sent up the country by Governor Bird, to endeavour to settle the dispute between Attah and Ageman, the two kings of Aikim, had returned to Accra, without being able to effect his purpose. Captain de Ruvignes, of the Gold Coast Artillery, Military Commandant of James Fort, Accra, had also gone into the interior, with orders from the Government to put an end to the civil war between Attah and Ageman. Attah, it was said, had, after more fighting, defeated Ageman, and driven him into Aquamboe, to which place Captain de Ruvignes had hastened.

The following Circular Memorandum, addressed to general or other officers commanding districts or divisions at home and stations abroad, has been issued:—"It frequently happens that changes are introduced in the patterns and articles of military equipment before trials can be made in all the various climates and circumstances to which they may be exposed. His Royal Highness the General Commanding-in-Chief, therefore, desires that general or other officers commanding districts or divisions at home and stations abroad will forward to the Adjutant-General to the Forces, on the 1st of January and 1st of July in each year, full reports, in duplicate, on all newly-introduced articles of military stores, showing the date of receipt of each article at the station, the nature of the trial to which it has been subjected, the effect of climate, and any further remarks which personal observation and professional experience may suggest. The first report will include all articles introduced within the preceding twelve months.—By command, James Yorke Scarlett, Adjutant-General."

CLOTHING OF THE ARMY.—A code of instructions has been issued to the inspectors of Army clothing by Sir Benjamin Hawes, of which the following are the more important portions:—All stores from contractors, or purchased under special authority by the store officer in charge, will be received by the inspectors, in whose custody they will be during the inspection; the stores to be received on the receiving floors, and the inspectors to see that the clerk in charge of the floor is always present when stores are delivered, and that no delay takes place in passing them for inspection, or into the charge of the senior military store officer. Inspectors are to see that the supplies are properly compared with the patterns and specifications; and, as they have the means of checking and superintending the sub-inspectors and viewers, they will be held responsible for the quality of the stores which they pass into the Service. Every report of inspection is to be signed by an inspector and sub-inspector; on completion of an inspection they are to state clearly and fully the causes which have led to the rejection of any articles, and forthwith call upon the contractor to replace the articles. All communications with contractors are to be made by the inspectors, and sub-inspectors and viewers are on no account to be permitted to enter into any communication with contractors, except in the presence of an inspector. In the event of difference of opinion arising between the inspectors on any subject connected with the receipt and inspection of stores, a report is to be made by each to the War Office. In the event of an inspector having reason to disapprove of the decision of a sub-inspector, he will cause the latter to draw up a statement of his opinion, and his reasons for coming to that opinion, before he leaves the inspection buildings, which statement, together with the inspector's remarks, will be forwarded to the Secretary of State for War for decision. The inspectors to keep a daily record of inspections, and to transmit on the first of every month a return of all stores inspected, with the dates, showing when they were received from the contractors, with any explanation for the non-inspection of the articles therein enumerated, after the expiration of the thirty days allowed for inspection by the terms of the contract. When stores have been inspected the inspectors will give them over to the military store officer in charge, accompanied by a transit note in duplicate; the certificate for payment to be signed by one inspector and one sub-inspector, as regards quality and conditions of contract, and transmitted to the senior military store officer, who will certify that the articles have been taken in charge, and forward the document to the Accountant-General at the War Office. Whenever patterns are to be sent to accompany supplies, the inspectors are required to select and see that they correspond with the standard patterns; they will then affix their own seal to each article, and sign the label or certificate which is to accompany it when submitted for sealing to the War Office or Horse-Guards, as may be directed. The patterns, if approved, will be again sealed in the usual manner by the departmental officer, who will likewise countersign the label or certificate, and return it with the patterns. All sealed patterns and specifications will be in the custody of the inspectors, and all specifications descriptive of sealed patterns, are to be prepared by the inspectors, and each specification is to be signed by an inspector and a sub-inspector previous to being submitted for the approval of the Secretary of State for War."

PLYMOUTH.—The 10th Regiment is under orders for Aldershot, and the 55th Regiment is expected from Curragh to relieve them. The Depôt Battalion at the Raglan Barracks was inspected on Friday week.

PLYMOUTH GARRISON THEATRICALS.—A grand amateur performance took place on Monday evening last at the theatre, under the patronage of Major-General Hutchinson commanding the Western District, in aid of the race fund. The pieces performed were *Our Wife, or the Rose of Amiens*, and *Monsieur Tonson*. The usual birthday ball took place yesterday at the Assembly Room in the Royal Hotel.

Major-General E. W. Bell, lately appointed to the colonelcy of the 66th Regiment, has arrived in England from the West Indies. Major-General Bell, who has retired from the command of the forces at Jamaica, had been presented at a very influential meeting of the principal residents, with a farewell address, expressing their sorrow at his departure. "During his short period of administering the affairs of the colony," says the *Colonial Standard*, "he acquitted himself to the full satisfaction of the people at large, as well as to the parent Government, a happy termination which has rarely fallen to the lot of our Governors." General Taylor, his successor, arrived at Kingston on the 19th ult., and was received with the honours due to his rank and position.

Digitized by Google

Mr. Leitch, the inventor of the new breech-loading carbine, attended at Brompton barracks on Tuesday afternoon for the purpose of making some trials with his own weapon on the practising-ground attached to the Royal Engineer establishment. It was intended that there should be some competitive trials between Mr. Leitch and the Royal Engineers, the latter using the Lancaster rifle; owing, however, to the breech-loading rifle brought by Mr. Leetch not having been correctly sighted and adjusted, the competitive match was postponed. Mr. Leitch, however, carried out several experiments in firing at 500 and 900 yards, the results of which were very satisfactory. Upwards of 200 rounds were fired without a single instance of miss-fire or fouling, or the slightest escape of the powder gases manifesting itself.

A wrought-iron breech-loading rifled gun, the invention of Mr. Morgan, forwarded to the Royal Arsenal for experimental purposes, by order of the War Department, was on Wednesday subjected to the usual preparatory proofs, in presence of the Ordnance select committee. The weapon is rifled on a different principle from the guns of Mr. Whitworth or Sir W. Armstrong, and the shot is a bolt of 10 inches long. Several practical men anticipate great results from the experiments which will shortly be carried out.

The examination of candidates for admission to the Royal Military College, Addiscombe, commenced before the Council of Military Education on Wednesday, at the Royal Hospital, Chelsea, Major-General Rumley, the vice-president of the council, presiding, and the remaining members of the council being Major-General Portlock, Colonel Elwyn, Lieut.-Colonel Addison, and the Rev. Canon Moseley. The examination will extend over 13 days, ending the 1st proximo.

SHORNCLIFFE CAMP.

It is a matter of great complaint amongst the troops in the camp that there are so few places of amusement for the private soldier. Throughout the whole of it there is but one ball alley, and that is situated in the extreme corner, in the permanent barracks occupied by the Artillery, and therefore exclusively used by them. The extent of the camp requires at least three more—one for A and B ranges; one for C range, and one for D and E ranges; conveniences for skittles, cricket and other athletic games would also be a great boon to the soldiers, and could be prepared at a trifling expense. The obvious advantage gained by the improved health of the troops, if more attention was paid to these minor matters, need scarcely be dilated upon.

Her Majesty's birthday was celebrated on Friday (yesterday) at Shorncliffe, the whole of the troops being paraded at 12, when a royal salute was fired and a *feu de joie* by the infantry. The 2nd battalion of the 11th Regiment now at Aldershot are under orders for Shorncliffe, and will march for that camp as soon as the alterations in the hospital are completed, and the B range vacated by the patients who have been removed there whilst the alterations have been in progress.

COLCHESTER CAMP.

During the present week Major-General Hay, Inspector-General of the School of Musketry, accompanied by Deputy-Assistant Adjutant-General M'Kay, has paid a visit to this camp. Tuesday was devoted to the examination of the returns of the several classes in the 9th depôt battalion, under instruction in the use of the rifle; and on Wednesday the men of the battalion passed through a similar ordeal. Bodies of troops are frequently exchanged at Landguard Foot, where rifle practice has been carried on very satisfactorily; and the several depôts in the camp will be ready whenever called upon to furnish a very heavy draft of men for foreign service. The Government has purchased the Abbey Farm, Colchester, with a view to the extension and enlargement of the camp. The ground is a fine level field, of nearly 150 acres in extent, without either hedge or ditch, except at the boundary, and will make one of the best camp parades in England. There is also a space of about 12 acres, enclosed by a wall of prodigious strength, which might form the site of the new barracks. It is understood the increased accommodation will be for head-quarters of a regiment of cavalry, for two batteries of artillery, and an entire regiment of infantry.

The Army Gazette.

WAR OFFICE, PALL MALL, MAY 15.

Royal Regiment of Artillery—Second Captain Frederick Close to be Captain, vice William M. King, deceased; Lieutenant Robert Loftus Tottenham to be Second Captain, vice Close; April 17. The promotion of the undermentioned Officers to be antedated to 9th April, 1860, viz.:—Captain and Brevet-Major W. J. Bolton; Second Captain M. Tweedie. Brevet-Major James Sinclair to be Captain, vice Franklin, placed on the Supernumerary List; Lieutenant Richard O'Hara to be Second Captain, vice Sinclair; April 20.

Coast Brigade of Artillery—Second Captain John Sweeny to be Captain, vice Elliott, whose Commission has been cancelled; Lieutenant James MacGillivray to be Second Captain, vice Sweeny; April 12. Quartermaster-Serjeant John McLereon to be Lieutenant, vice MacGillivray; May 15.

BREVET.

Quartermaster William Elliott, having retired upon half-pay Royal Artillery, to have the honorary rank of Captain, under the Royal Warrant of 17th December, 1855; Nov. 4.

CHAPLAIN'S DEPARTMENT.

The name of the Chaplain of the Fourth Class, described in the *Gazette* of the 1st April, 1859, as the Rev. James Carey, is the Rev. James Carry.

The Commission of the Rev. Charles Moore, Chaplain Fourth Class, to bear date the 15th October, 1855, instead of 1st October, 1856, as stated in the *Gazette* of 18th January, 1859.

WAR OFFICE, PALL MALL, MAY 16.

The Queen has been graciously pleased to give orders for the appointment of Thomas Erskine May, Esq., Clerk Assistant of the House of Commons, to be an Ordinary Member of the Civil Division of the Third Class, or Companions of the Most Honourable Order of the Bath.

WAR OFFICE, PALL MALL, MAY 18.

The Queen has been graciously pleased to give orders for the following appointments to the Most Honourable Order of the Bath —

To be Ordinary Members of the Military Division of the First Class, or Knights Grand Cross, of the said Most Honourable Order, viz,:—

Admiral of the Fleet Sir John West, K.C.B.

Admiral Sir William Hall Gage, Knight, Vice-Admiral of the United Kingdom.

Admiral Sir Francis William Austen, K.C.B.
General Sir James Douglas, K.C.B.
General Sir George Scovell, K.C.B.
General the Lord Downes, K.C.B.
Admiral Sir Thomas John Cochrane, K.C.B.
Admiral Sir George Francis Seymour, K.C.B.
General Sir Frederick Stovin, K.C.B.
General Sir James Fergusson, K.C.B., and
Lieut.-General Sir John Bell, K.C.B.

To be Ordinary Members of the Military Division of the Second Class, or Knights Commanders, of the said Most Hon. Order, viz.:—

General the Hon. Henry Murray, C.B.
Lieut.-General Philip Bainbrigge, C.B.
Lieut.-General Thomas Erskine Napier, C.B.
Lieut.-General the Hon. Charles Gore, C.B.
Lieut.-General Edward Charles Whinyates, C.B.
Lieut.-General Samuel Burdon Ellis, of the Royal Marines, C.B.
Vice-Admiral Arthur Fanshawe, C.B.
Vice-Admiral Provo William Parry Wallis.
Lieut.-General George Judd Harding, C.B., and Rear-Admiral Robert Lambert Baynes, C.B.

THE INDIAN SERVICE.

WAR OFFICE, PALL MALL, MAY 18.

The Queen has been graciously pleased to give orders for the following appointments to the Most Honourable Order of the Bath:—

To be Ordinary Members of the Civil Division of the Second Class, or Knights Commanders, of the said Most Honourable Order, viz.:—

Frederick James Halliday, Esq., late Lieut.-Governor of Bengal.

Sir Robert North Collie Hamilton, Bart., late Political Agent in Central India.

Major-General Richard James Holwell Birch, C.B., Secretary to the Government in India in the Military Department.

Colonel Peter Melvill, Secretary to the Government of Bombay in the Military and Naval Departments; and

Lieut.-Colonel Herbert Benjamin Edwardes, C.B., Commissioner of Peshawur.

WAR OFFICE, PALL MALL, MAY 18.

2nd Regiment of Dragoon Guards—Quartermaster Benjamin Holloway, from the 13th Light Dragoons, to be Quartermaster, vice Rae, who exchanges; May 18.

5th Dragoon Guards—Thomas Burton Henry, Gent., to be Cornet, by purchase, vice FitzPatrick, promoted; May 18.

6th Dragoon Guards—William Thomas Erskine Bookey, Gent., to be Cornet, by purchase, vice Pereira, promoted; May 18.

3rd Light Dragoons—Cornet Samuel Barrett to be Lieutenant, by purchase, vice Lowe, who retires; May 18.

8th Light Dragoons—Lieutenant Frederick Swindley, from the 12th Light Dragoons, to be Lieutenant; May 18.

13th Light Dragoons—Edward Charles Starkey, Gent., to be Cornet, by purchase, vice Huddlestone, promoted; May 18.

15th Light Dragoons—Quartermaster William Rae, from the 2nd Dragoon Guards, to be Quartermaster, vice Holloway, who exchanges; May 18.

16th Light Dragoons—Sergeant-Major James Fuller to be Quartermaster, vice George Lamb, who retires upon half-pay; May 18.

Royal Artillery—Surgeon Thomas Rhys, from the 77th Foot, to be Surgeon, vice Elliott, appointed to the Staff; May 18.

Military Train—James Archer Harris, Gent., to be Ensign, by purchase; May 18.

Scots Fusilier Guards—Lieutenant and Captain the Hon. Hugh Annesley to be Captain and Lieut.-Colonel, by purchase, vice the Hon. John Strange Jocelyn, who retires; Ensign and Lieutenant Charles William White to be Lieutenant and Captain, by purchase, vice the Hon. Hugh Annesley; Charles Adolphus, Earl of Dunmore, to be Ensign and Lieutenant, by purchase, vice White; May 18.

5th Regiment of Foot—Lieutenant Netterville John Barron to be Adjutant, vice Lieutenant Charles Sutton, who resigns the Adjutancy only; May 18.

10th Foot—Surgeon Henry Bowles Franklin, M.D., from the Staff, to be Surgeon, vice Dr. Gordon, C.B., promoted on the Staff; May 18.

22nd Foot—Lieutenant Charles Tucker, to be Captain, by purchase, vice Goff, promoted, by purchase, to an Unattached majority; Ensign Henry James Oliver, to be Lieutenant, by purchase, vice Winthrop, promoted; Staff-Surgeon Robert Beresford Smyth, M.D., to be Surgeon, vice Carey, appointed to the Staff; May 18.

25th Foot—Captain George Robertson, from the 95th Foot, to be Captain, vice Gordon, who exchanges; May 18.

27th Foot—Ensign Albert Dixon, to be Lieutenant, without purchase, vice Macpherson, deceased; April 29. Samuel Yates Worthington, Gent., to be Ensign, without purchase, vice Dixon; May 18.

30th Foot—Lieutenant Nathaniel William Massey, to be Captain, by purchase, vice Gubbins, who retires; Ensign Pelham T. Pelham, to be Lieutenant, by purchase, vice Massey; May 18.

31st Foot—Ensign Isaac Parsons, to be Lieutenant, by purchase, vice Andrew Hamilton, who retires; May 18.

32nd Foot—Lieutenant Henry Samuel Hall, from the 94th Foot to be Lieutenant, vice Strachan, who exchanges; Ensign William Goad, has been superseded, being absent without leave; May 18.

34th Foot—Ensign Andrew George Walker to be Lieutenant, by purchase, vice Watson, who retires; May 18.

35th Foot—Ensign James Johnston Twining, from the 3rd Foot, to be Ensign, in succession to Lieutenant Revell, deceased; May 18.

46th Foot—Lieutenant John Fleming Whitmore Mullen, from the 86th Foot, to be Lieutenant, vice John Spencer Churchill, who exchanges; May 18.

50th Foot—Lieutenant Francis Charles Hill to be Captain, without purchase, vice Ramsay, deceased; March 16.

60th Foot—Major Robert B. Hawley to be Lieut.-Colonel by purchase, vice Pretyman, who retires; Captain Randal Joseph Fielden to be Major, by purchase, vice Hawley; Lieutenant Francis V. Northey, to be Captain, by purchase, vice Feilden; May 18.

77th Foot—Staff Surgeon Henry Higgins Jones, M.D., to be Surgeon, vice Rhys, appointed to the Royal Artillery; May 18.

86th Foot—Lieutenant John Spencer Churchill, from the 46th Foot, to be Lieutenant, vice John Fleming Whitmore Mullen, who exchanges; May 18.

94th Foot—Lieutenant James Strachan, from the 32nd Foot, to be Lieutenant, vice Hall, who exchanges; May 18.

95th Foot—Captain Thomas Edward Gordon, from the 25th Foot, to be Captain, vice Robertson, who exchanges; May 18.

97th Foot—William Francis Wheble, Esq., late Captain Berks Militia, to be Paymaster, vice Smith, appointed Paymaster 25th Foot; May 18.

Rifle Brigade—Charles James Herbert, Gent., to be Ensign, by purchase, vice Palmer, promoted; May 18.

1st West India Regiment—Ensign Henry Hopewell Smith to be Lieutenant, by purchase, vice Dobie, promoted; May 18.

UNATTACHED.

Captain Trevor Goff, from the 22nd Foot, to be Major, by purchase, May 18.

HOSPITAL STAFF.

Deputy Inspector-General of Hospitals, James Edmund Williams, to be Inspector-General of Hospitals, vice Dr. Gibson, C.B., appointed Director-General of the Army Medical Department; May 4.

Surgeon-Major John Clark, M.D., to be Deputy Inspector-General of Hospitals, vice Williams; May 4.

Surgeon Thomas Carey, from the 22nd Foot, to be Surgeon, vice Jackson, deceased; May 18.

Acting Assisstant-Surgeon Merrick Lloyd Burrows to be Assistant-Surgeon to the Forces; April 30, 1858.

BREVET.

Lieut.-General Sir Hugh Henry Rose, G.C.B., to have the local rank of General in the East Indies; May 18.

Major-General Sir William Mansfield, K.C.B., to have the local rank of Lieut.-General in the East Indies; May 18.

Brevet-Major George Robert Pole, half-pay Unattached, Staff-Officer of Pensioners, having retired upon half-pay, to be Lieut.-Colonel in the Army, the rank being honorary only; May 18.

Captain William Young, on half-pay, as Paymaster of a Depôt Battalion, to have the honorary rank of Major; Feb. 1.

Quartermaster George Lamb, half-pay 16th Light Dragoons, to have the honorary rank of Captain under the Royal Warrant of the 17th December, 1855; May 18.

Memorandum—Brevet-Lieut.-Colonel Henry Augustus Strachan has been permitted to retire from the service by the sale of an Unattached Majority, he being about to become a settler in Canada; May 18.

NEW RIFLED CANNON.

We extract the following from the *Morning Post*, which holds rather heretical notions on the matter of artillery:—

Messrs. Fawcett, Preston, & Co., the well-known Liverpool engineers, have just brought to a close a series of most interesting experiments with a new rifled gun, constructed under the direction of Captain Blakely, Royal Artillery. The object has been to ascertain the weight of shell, charge of powder, and nature of rifling best adapted for firing at one ship from another with a gun of a weight suitable for our present line-of-battle ships. Captain Blakely had a strong opinion that the very long projectiles used by Sir William Armstrong and Mr. Whitworth were not so well calculated as shorter ones to do mischief at reasonable ranges, because the latter leave a cannon with so much greater initial velocity. Experiment, so far, has justified his opinion, for from a cannon only 8½ feet long, and only weighing 48 cwt., he has been able to project shells of 58lb. weight to a distance of upwards of a mile and a-half with only 5 degrees of elevation, beating Mr. Whitworth's 80-pounder solid-shot gun, weighing 84 cwt., by 100 yards at the same elevation. As Captain Blakely's gun is 6 inches in bore, and Mr. Whitworth's only 4½, the initial velocity of the shells from the former must have been vastly superior, and their advantages at shorter ranges still greater than at the distance chosen for experiment. We understand that the gallant captain has challenged Mr. Whitworth to a match. We hope this is true, and that the challenge will be accepted, for the result would throw much light, not only on the question of cannon, but also on one of equal importance—the best size for the bore of rifled muskets. If Captain Blakely's views are correct, it would be a great error to arm the whole infantry of the line with muskets of small calibre, of extreme accuracy, no doubt, at 900 or 1000 yards, but not so deadly at ranges from 50 to 300 yards as the present Enfield rifle. The shells fired on the late occasion were on a principle invented by Mr. Bashly Britton, the body of the shell being of cast iron, a leaden ring being soldered to its base. They are peculiarly adapted for muzzle-loading cannon, entering the bore with the same facility as the old round shot, and the lead filling the grooves as in the Minié rifle. The cannon was of course built on Captain Blakely's own plan, tube within tube, for which he claims a patent, and on which our readers may remember that he insists on asserting Sir William Armstrong's cannon to be built, and on which there can be no doubt Mr. Whitworth's large 80-pounder is built.

ARMY PAYMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In looking over the new Warrant for barrackmasters, dated 7th February last, I find that they are divided into four classes. The fourth had from 8*s.* to 10*s.* 6*d.*,* and the third from 12*s.* to 15*s.* having relative military rank as captain. The second class, with pay from 16*s.* to 19*s.*,* have the relative rank of major, as also the first class, with pay from 1*l.* 1*s.* to 1*l.* 5*s.** The paymaster in receipt of 17*s.* 6*d.* a day has only the rank of captain. It is not understood upon what principle these invidious distinctions are made, more particularly as it deprives the latter officer of certain barrack advantages, or of the increased allowance for lodgings, &c. The importance of his responsibilities surely argue in his favour. He cannot attain this pay until after ten years' commissioned service as a paymaster, or, if promoted from the ranks until after twenty years' aggregate service, of which ten years' as a commissioned officer on full pay, and five years of them shall have been as a paymaster; and as the surgeon, of 10 years' service on full pay (or on promotion, should this period of service not be already completed) attains the relative rank of major on appointment, it suggests an anomaly that the former officer should alone have his service depreciated in position by a comparison with the various changes recently made in the relative ranks of the several departments connected with the Army. Old military paymasters feel this acutely. A LOOKER-ON.

ARMY ASSISTANT-SURGEONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I wish to invoke your powerful aid for a body of public servants who have already benefited much by the faithful representations you have made of their grievances. I allude to the medical officers of the Army.

The point which I now wish to draw attention to is, the hardship which the senior assistant-surgeons on the staff at home experience by the uncertainty in which they are kept on their return from abroad as to their stay in Great Britain, and the system of sending them a second or perhaps a third time on foreign service, while there are assistant-surgeons only a short time in the Army, who have never been out of England.

A good arrangement could be made (without being in the least detrimental to the Service) by which staff medical officers on their return to England might be insured at least three years at home, by sending the assistant-surgeons lately appointed to take their turn abroad before their elder brethren were again called upon for foreign service. By the regulations, an assistant-surgeon coming to England, having completed his tour of foreign service, is placed on the roster for service abroad before a young officer who may be gazetted perhaps the same week that he returns home. There are at present many assistant-surgeons at home stations who only returned from abroad last year, but who are now in expectation of an order to prepare for embarkation, while there is a still larger number of young officers appointed in 1859, who are kept at home because the dates of their appointments are subsequent to the return home of their seniors.

I take the present opportunity while a new Director General is being installed in office (one from whom the department expects much, and whose appointment has given universal satisfaction), to request that you will bring this matter before his notice. I am, &c., NEMO.

* The maximum attained after five years' service in the particular class.

CAVALRY EXPENDITURE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am sure there are many old officers and others who would be deeply indebted to you if you would be kind enough, in your now valuable and sterling military gazette, to prominently put before the public authorities some few remarks which I am about to make on the present extravagant cavalry system of messing, &c., and the means to obviate them, should they meet your approbation; and, perhaps, such may have considerable weight with you, when I inform you that I am an old officer of between thirty and forty years' full-pay service in every quarter of the globe, both in the cavalry and the infantry.

In the first place, I must remark that His Royal Highness the Duke of Cambridge has, within the last few years, appointed to cornetcies in the cavalry many sons of old officers and others, who, of course, cannot afford to give their sons but very very little beyond their pay, and I maintain His Royal Highness has acted most wisely in putting these young men into this branch of the Service, who *must remain* in the Service and identify themselves with it for the greater portion of their lives; and I am sure, sir, you will agree with me the duke has exercised a wise judgment in this instance, when I bring to your notice that our cavalry regiments for many years had been a sort of toy for fast-going and crack young men, who entered the Service solely to spend a few years in it, never dreaming of a campaign or serving out of the United Kingdom. How miserable an exemplification there was of this! I have only to instance the Crimean war, when the resignations and to retire, I have understood, were numberless. My object now is to point out the inevitable ruin that must unavoidably be the fate of those young men I have alluded to, if some immediate steps are not at once taken by the Commander-in-Chief to save them from the vortex of extravagance into which they are unavoidably and irretrievably plunged by the reckless whims and freaks of commanding officers, especially in some corps which I could detail. The kindness of heart of the duke is proverbial, and I am sure any suggestions of a feasible nature would engage his attention. I would, therefore, submit that the following rules, if carried out, might be beneficial to the cavalry at large.

No. 1. In the cavalry of most of the continental armies one charger is deemed sufficient for the subaltern. I believe I am correct in mentioning France, Austria, Prussia, Sardinia; and we all know what a splendid body of cavalry most of those powers have. Moreover, it would be a saving to the country, and enable the Government to abolish the present charge of 8½*d.* per diem, which is felt by all as a heavy and unfair pressure.

2. Young officers, on joining, should be exempted from paying fees to riding-masters and others, many of which press hard on the young officer of restricted means.

3. The messing should be established at an uniform and moderate rate, never exceeding 2*s.* per diem; of course French cooks, cookery, &c., would be excluded. Still, I am confident a good plain dinner could be procured for that amount, and quite suitable for the son of any English gentleman.

4. Let the present Regent's Allowance be appropriated to the reduction of the mess expenditure, and not to the drinking, as at present. No officer should be obliged to pay for wine if he do not wish to drink it, such a rule being objectionable and unjust.

5. There should be a reduction in the band and mess subscriptions, extra ones at the option of commanding officers entirely abolished; in fact, commanding officer on no account to be permitted to exact or even countenance any irregular fee or subscription.

6. No particular days for mess guests should be set apart, but officers permitted to ask friends at any time. This system, I understand, was adopted by one of the finest regiments in the Service, and, I hear, works well, viz. 17th Lancers.

7. No officer to pay more to his servant or batman than the sum *expressly* laid down by Her Majesty's regulations.

8. Officers' chargers to be fed and cared for by the Government, and the 8½*d.* charged against the officer to be withdrawn.

Such, Mr. Editor, is an outline of what I think might prove highly beneficial to the Service, and which, if imperatively enjoined by His Royal Highness the Commander-in-Chief, would, I have no doubt, obtain the most satisfactory results, and save many a young man from impending ruin whose means are totally inadequate to support the present extravagant system.—I am, sir, &c.,

AMOR JUSTITIÆ.

"PUNCH"—PEAKS AND STRIPES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I venture to trouble you, in your capacity as editor of a journal especially devoted to Naval and Military matters, with the following few lines.

In the *Punch* of last Wednesday I met with a paragraph headed, "The Fool's Finger in the Army," alluding to a recent order from the Horse-Guards relative to an alteration of the forage caps and overall stripes of officers of cavalry, &c., the writer of which paragraph animadverts in very strong terms upon the author of this alteration, saying, "Who is this oaf whose fingers are afflicted with a chronic itch to play with officers' caps and breeches?" Somewhat harsh language this for any one to use in reference to a subject with which, by his own words, I can prove the gentleman thus writing to be anything but thoroughly acquainted. He says, for instance, "The change in the stripes will cost the officer a new pair of overalls." This, I beg leave to say, is simply absurd, and at once shows the writer's ignorance of the matter he has in hand, for the stripes are not a portion of the overalls, but are sewn on after they are made, and can be removed or renewed at any time. Touching on the respective merits of cloth and gold stripes, he observes that the cloth are cheaper. Granted, they are so at the outset, for cloth stripes, if for non-leathered overalls, would cost about 8*s.* the set, if for leathered, 6*s.*, while gold stripes for the former would cost about 2*l.* 15*s.*, for the latter, 2*l.* 2*s.* But it appears to me that the question is not so much one of primary cost as of ultimate use and durability. A set of cloth stripes will not last much if any more than a year, while gold ones will last from three to four at the least, with fair wear and tear; and for overalls used for mess, &c., where they are not exposed to weather or rough usage, I may safely say that they will last still longer. Added to this, when one side is faded they can be turned without costing the owner of them a new pair of overalls, and will look nearly as good as new, in fact, gold stripes will wear well everywhere, save where the friction of the sword hilt or of the short sling of the sword-belt causes them to fray; finally, they accord better, and look more uniform with the lace of the stable jacket than cloth stripes would; that, however, may be of little consequence,—so much for the gold. Now for the cloth stripes; and the most advantageous point of view in which to take them is, I think, in the case of the 6th Carabineers, 13th Light Dragoons, and 17th Lancers, who wear them of white cloth, or of buff, which once cleaned is the same thing. These can be cleaned with pipeclay, and have a neat appearance; and the pipeclay, if it happen to touch, as it must do more or less, in the cleaning, the blue cloth of the overalls, will not change its colour; in fact, tends rather to clean than injure it. This is the brightest side of the question; but only regards three regiments. The rest of the Cavalry service, excepting of course the Household Brigade, would have to wear yellow cloth; this must be cleaned with chrome yellow—at all times a nasty material, and requiring careful application, added to which, after a little time, it will turn the blue of the overall cloth in the immediate vicinity of the stripes into a seedy green; and however carefully it may be laid on, this cannot always be avoided. Scarlet may perhaps be suggested as a better colour; but that will not clean at all, and will change from bright scarlet to a dull crimson wherever mud touches it, making a patchwork affair of the stripe. Even wet has its effect upon it, as may easily be seen by looking at a hunting coat that has seen any service; and some mud, such as that at Aldershot, would stain it beyond redemption; and cloth stripes, no matter of what colour, will wear where the sword rubs, equally with, if not more, than gold. So I venture to think that cloth for gold would be no exchange for the better; and when we come to take into consideration the short time cloth stripes will wear, the trouble of cleaning them, especially on a march, where places convenient for painting and drying them in may not be always handy, and also the necessity of carrying a paint-pot about with one, the advantages of gold stripes, which, though they may be more costly at first, will last much longer, and need but light brushing to remove the mud from them, must be apparent in all their superiority. With regard to the removal of the peaks from the forage caps, I can only say that I believe it to have afforded most general satisfaction. I myself know of one regiment in which one officer only would wish to retain them. Their removal takes twelve or fifteen shillings off the expense of the caps, and as to inconvenience from the sun, I can say for myself that all the glare in my eyes will not be half so unpleasant as the heat to my forehead which that piece of patent leather used to attract. Again, the peaks used to get limp and greasy from the perspiration from the forehead, and would then bend, and losing their shape would look more than ever unsightly; they also added more than most people would imagine to the weight of the cap, and the inconvenience of packing it, so that the peak should not get bent out of shape. I think I may venture to say that if the votes of all the officers affected by these changes could be collected, the majority in favour of gold stripes and no peaks would be very great. How is it by the way, if peaks are so necessary for comfort, that one never hears of an officer of hussars wishing to wear one? The writer of this paragraph also says, "These changes cannot have emanated from the Commander-in-chief, but from some agency of foolishness mysteriously at work in the Army in all matters which relate to dress." Surely the Duke of Cambridge is not the man to suffer any change to take place in Army matters, great or small, without his sanction and due consideration.

I am, &c.,

LIGHT DRAGOON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I wish to lay my humble complaint before you. I have till recently been a useful member of military society, ay, and I flatter myself not altogether an unornamental one; but on the 1st of May I was degraded and discarded for no reason, but by an arbitrary order dictated by the Spirit of Nonsense. In plain words I am the peak of and off a forage cap belonging to a bold dragoon. Hitherto I had been of much service and comfort to my master. In winter I preserved his eyes from wind, snow, and rain; in summer from the glare of the sun. So useful was I found that when Common Sense commenced her rule, set up by sad Crimean experience, I was ordered to grow somewhat larger; this I willingly did, to the increased comfort of my master. From that time till April I enjoyed a prominent position on his brow, when just as summer is approaching out comes the order to degrade me. What can be the reason?—but reason is the wrong word. What can be the cause? Surely my master's eyes are worthy of care, and I know his are neither better nor worse than the eyes of the swells of the household cavalry; and yet my cousin, who is attached to the cap of cornet and sub-lieutenant the Hon. Mount Milkinsop of the Brigade, has confidentially informed me that he is not coming off, a special clause having been inserted in the order in favour of these favoured ones. A very weak little reason was given the other night in the House, in answer to a question from the gallant De Lacy Evans who took me up, that I am an incumbrance to my master on the march, and cannot be well folded up in his holster. Fudge! Room is found for much less useful articles than myself. If they must cast something, why don't they cast the good-for-nothing but handsome sabretache, that only frets and teazes the already overweighted poor horse.

Now look at our noble Volunteers, they are equipped by common sense, and in a degree by private enterprise. My brethren are found useful to them. I shall leave myself in your hands; you know you yourself have derived advantage and comfort from me, therefore do what you can to reinstate me. It has been said that officers prefer the cap *sans* peak. They don't; there may be a few dandies who think they look hussar-like and dashing, and are willing to sacrifice comfort to appearance, but the respectable old heavy who has seen service prefers utility to appearance. I am &c.,

A MOURNFUL PEAK.

TARDY REWARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Several years have now elapsed since the ears of all Christendom were stunned by the alarming intelligence from India; and every civilised person beheld with admiration the heroic efforts of that little "band" who stemmed the first tide of that "slaughter breathing" mutiny.

Havelock's despatch written after the action at Bitoor, led many a man to believe that what was "due to their constancy, bravery, and patient endurance, would not be forgotten by a grateful country." Had he lived to have witnessed the dissolution of the Company's army, and the recent wholesale slaughter on board the Tasmania, he must have regretted ever having penned such a despatch.

A great portion of the Company's army who have served, through the late mutiny, and have taken their discharge, have re-enlisted into the line, and are daily expecting some compensation for past services. For every war heretofore in India, the troops have received a general batta, but it seems to be quite forgotten that there was a little "band" who in 1857 gained for themselves the proud but empty appellation of the "savers of India!" I think six months batta would not be thrown away upon men who have earned for themselves such a proud distinction. If any of your correspondents could give me any information as to when there is any probability of the Lucknow prize money being issued, it would very much oblige yours, &c., SPECTAMUR AGENDO.

COOKING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If my letter to you of the 5th inst. had any "colouring," of which I am really unconscious, it certainly is not of the hue which Captain Grant supposes. I am equally innocent of "official" position and "official" prepossessions; but, as an Englishman, I love fair play; and I have been apt to associate the *suppressio veri* with the *suggestio falsi*.

Captain Grant now virtually admits what the conversation of Friday night last in the House of Commons brought out still more fully, that "Army cooking" has not been shelved by the present or preceding Governments, but has been the subject of inquiry and experiment for some time past; that Mr. Sidney Herbert, of whom he complains, has been one of those most active in the matter; and that the real question in dispute has not been the principle, but the amount of compensation. He says the Barrack and Hospital Commission have presented no report yet, as I supposed; and I can only say, in reply to this, that it is high time they did so, and that some Member ought to ask "the reason why."

Here, then, I might leave the matter; but as Captain Grant asks me a question, I must try to answer him. He says, "If this be true"—that others had exposed the system previously—"why was such a wretched system adopted at Aldershot?" I reply, not for want of knowing better, not for want of suggestions, but from that "official" obstructiveness, that fatal *vis inertiæ*, common to all departments, and of which the War Department has at least its full share. Through this triple brass, impermeable to any unprofessional assault, Captain Grant at last succeeded in forcing a breach: a result mainly due to the energetic and persevering employment of social influence, military interest, and ample pecuniary resources: and for this result he deserves, and has received, public gratitude and applause. What further reward he should have I do not pretend to say: 500*l.*, I own, seems too little, but 20,000*l.* strikes me as far too much; or, at least, if it is just enough, other public benefactors have been grievously underpaid.

And the principle of proportioning the reward to *possible* savings, not to *actual* ones, is at least a novel one, and rather startling to weak nerves.

But, after all, sir, the personal question is of minor importance compared to the great fact that concerns us all—that we really have a War Secretary who cares for the soldiers' comfort and well being, and who is earnestly looking into all that concerns them. It will be your duty, sir, and your pleasure, to keep him well up to the mark, and to second his efforts by your powerful pen.—I am, &c.,

ALIQUIS.

A review of the troops at Woolwich by the Duke of Cambridge took place on Thursday, and notwithstanding the unfavourable state of the weather a large number of persons assembled on the Common to witness it. The arrival of His Royal Highness, at half-past one o'clock, was announced by a salute from a field battery, and he was received at the garrison by a staff of officers, comprising Major-General Sir J. Scarlett, K.C.B., Adjutant-General of the Forces; Major-General Sir R. J. Dacres, K.C.B., commandant at Woolwich; Major-General Bloomfield, C.B., Inspector-General of Artillery; Brigade-Major Shaw, Colonel Bingham, Deputy Adjutant-General; Colonel N. T. Lake, C.B., Lieut.-Colonel De Rinzy; Lieut.-Colonel Henry, of the riding-house establishment; Captain Freeth, Deputy Assistant-Quarter-master-General, &c. After reviewing the troops, His Royal Hghness inspected the Horse Artillery and batteries; a series of evolutions took place, but in consequence of the continued rain the order for firing was countermanded, and the force returned to quarters at four o'clock.

Lord Clyde will return to England by the first steamer in June from Calcutta.

A disturbance at Peshawur respecting taxes, but founded on a misapprehension, has been greatly exaggerated by the newspapers. All is quiet, and the people satisfied. So states an official telegram received from Lord Canning, dated April 24.

Her Majesty's birthday was yesterday celebrated with the usual ceremony and rejoicings.

[ADVERTISEMENT.]—Our readers have only to send their address to A. N. PEARIER, 77, Regent Street, London, W., and they will receive free by post the 105th Edition of "THE INVALID'S OWN GUIDE," or natural restorer, without medicine or expense, of perfect digestion, strong nerves, sound lungs, and refreshing sleep, to the most enfeebled, effectually removing indigestion (dyspepsia), nausea and sickness, debility, nervousness, palpitation, cough, asthma, incipient consumption, dropsy, constipation, flatulency, diarrhœa, dysentery, biliousness, fevers, sore throats, catarrhs, colds, noises in the ears, rheumatism, gout, impurities, eruptions, hysteria, neuralgia, irritability, sleeplessness, acidity, palpitation, heartburn, headache, despondency, cramp, spasms, sinking, fits, bronchitis; also children's complaints. Accompanied with numerous successful cures, which had resisted all medical treatment, and been abandoned as hopeless.

THE NAVY.

ADMIRALTY, MAY 12.

PROMOTIONS AND APPOINTMENTS.—First-Class Assistant-Engineers W. Stacy to the Ajax, for service in the Rainbow; G. H. Beaton to the Fisgard, for service in the Racehorse; J. Gee to the Fisgard, for service in the Cormorant; R. Evans to the Bacchante.

Second-Class Assistant-Engineer J. Moysey to the Asia, for service in the Blazer.

Acting-Third-Class Assistant-Engineers J. Hook and J. M'Garaham to the Melpomene.

Paymaster A. L. Eversfield to the Mersey.

Clerk H. T. Seale to the Victory.

Assistant-Clerk J. J. Hoar to the Excellent.

MAY 14.—Paymaster W. J. R. Hall to the Bacchante.

Acting Third Class Assistant-Engineer H. Lanchester to the Asia, for temporary service in the Stork.

MAY 16.—Captain G. T. Gordon to have the good service pension vacant by the promotion of Captain R. T. Stopford to the rank of rear-admiral.

Lieutenant C. G. Lindsay, to the Marlborough.

MAY 17.—Masters T. Pounds to the Hecate; F. Inglis to the Trafalgar; and H. T. Ley to the Diadem.

Paymaster J. W. W. Green to the Hecate.

Vice-Admiral Sir B. Reynolds, K.C.B., whose period of service as Commander-in-Chief at Plymouth expired on 4th inst., it is understood, will be succeeded by Vice-Admiral Fanshawe, C.B., on the return of that officer from the Mediterranean, where he will be superseded by Vice-Admiral W. Fanshawe Martin.

Advice, Second Master M. Raymond, left Plymouth on Wednesday for Queenstown.

Albatross, 12, has been completely broken up by the hired shipwrights at Chatham, and the alterations and improvement of No. 1 dock, where she has been lying for some time, will be immediately commenced by the Government contractors.

Algiers, 91, screw, Captain G. D. O'Callaghan, is under orders to go to Portland from Spithead.

Anson, 91, screw-frigate, laid down at Woolwich, about eighteen months since, is now under the hands of the caulkers, and will be launched in a few weeks.

Archer was at Lagos on the 10th of April.

Arethusa, 50, sailing frigate, in dock at Chatham for the purpose of being converted into a screw steamer, is nearly ready for the stern portion to be launched the distance she is to be lengthened, and the shipwrights have commenced laying the ways for that operation.

Argus, screw coast-guard vessel, sailed from Portsmouth yesterday for the westward, with the broad pendant of Commodore Yelverton at the main.

Ariel, 9, screw, will go out of Portsmouth harbour this morning to Spithead, for the purpose of testing her machinery.

Arrogant. By the last accounts from the West Coast of Africa, we learn that the natives of Quittah were in a most rebellious state, and Her Majesty's ship Arrogant (Captain Edmondstone) had left Cape Coast Castle for the south on the 9th of April, having on board a party of soldiers, for the purpose of increasing the Governor's force at Quittah, and suppressing the outrages which were being daily committed by the natives.

Bacchante. Vice-Admiral W. Fanshawe, the new commander-in-chief for the Mediterranean station, was conveyed on Saturday by Sprightly, Master-Commander George Allen, to the Bacchante, 51, screw, at Spithead, when the gallant admiral hoised blue at the fore and saluted the flag of the port admiral, which was duly acknowledged by Victory. Bacchante shortly after steamed out to sea.

Bann, J. Wells master, got up steam on Tuesday, and went outside Plymouth breakwater to try her machinery; she returned to Hamoaze, and was then taken alongside Keyham yard. Her engines answer well. An accident, unfortunately, occurred during the trial. A labourer, John Parker, belonging to the Keyham Works, was on board in attendance on a party of fitters from the yard.. The engineers were employed below in repairing some defects under the immediate orders of Mr. Ward, inspector of machinery, and, to effect the object desired, it became necessary to turn the paddlewheels, which several men attempted to do with handspikes through a hatchway in the paddle-box. While so engaged, the engine was suddenly set in motion, thereby causing a heavy blow on Parker's face from the handspike he was using, and forcing him down on the paddlewheel, which seems to have made at least one revolution before he was rescued. Parker's nose was fractured and depressed, and he has received extensive wounds on the face and head and thereby lost much blood. He is now in the Naval Hospital at Stonehouse, and there are hopes of his ultimate recovery.

Banshee, at Constantinople, has been placed at the disposal of the Duke de Brabant by Sir H. Bulwer. The Duke de Brabant left for Syra in her on the 30th of April.

Barossa, screw-corvette, recently launched at Woolwich, is now fast approaching completion, and is to be got ready for service with all despatch.

Bombay, 84, line-of-battle two-decker, has arrived at Chatham, from Devonport, in tow of the African and Adder steamers, to be docked and converted to a screw steamer. The Bombay is a substantially-built East India teak ship, and was constructed at Bombay for the Government some years since. She will go into dock next spring tides.

Brune, Commander Lodder, was about to accompany a deputation of Lagos merchants to try and quiet disturbances between the chiefs in the interior, which interfered very much with trade at the departure of the last mail from the west coast of Africa.

Bullfinch. H.M.'s gun-boat Bullfinch has been engaged in making trials at the measured mile in Stokes Bay with a portable screw propeller, patented by Mr. Thomas Eastman, R.N., Southsea. The following are the results of the last three trials:—

	MEAN PITCH.	REVOLUTIONS.	SPEED.	LOSS BY SLIP.	Screw. Diam. 6 feet.
February 25	7 ft. 3 in.	132	8·	15·3 per ct.	
March 30 ...	6 „ 3 „	154	8·2	13·7 „	
May 3.....	5 „ 6 „	165	8·3	7·3 „	

This propeller professes to have almost perfect freedom from vibration, and to reduce considerably the consumption of fuel and the wear and tear of engines.

Carnation, 60-horse power, Lieutenant Godfrey Taylor in command, tender to the guard-ship of steam ordinary at Sheerness, steamed up to Woolwich arsenal on Saturday to exchange her armament, and ship the experimental Whitworth gun about to be submitted to competition off the coast of Shoeburyness. An appropriate gun-carriage, ordered to be constructed in tne carriage department of the arsenal to facilitate the experiments, will be ready for mounting to-morrow.

Cormorant, 4200 horse-power, first built by contract at the establishment of Messrs. Wigram and Co., Blackwall, has been taken into No. 4 dock at Chatham, in order to be thoroughly surveyed. In consequence of the disclosures which have recently taken place with respect to the condition of the contract-built gun and mortar vessels, instructions have been given for the survey to be of the most searching character. The Cormorant has been built to replace the screw gun-vessel of the same name destroyed in the attack on the Peiho forts, in China.

Cossack was at Jamaica, about to proceed to Bermuda.

Devastation, steam-vessel, is now undergoing extensive repairs in dock.

Doris was at Gibraltar on the 12th inst.

Duncan, 101, screw. In the steam-basin at Portsmouth receiving machinery.

Emerald, Captain A. Cumming, arrived at Jamaica from Antigua on the 13th of April, with Rear-Admiral Sir Alexander Milne, K.C.B., and sailed again on the 21st for Colon. She was due at Bermuda on the 15th of this month.

Euryalus. It is reported that after the Euryalus has been to the Cape of Good Hope and Gibraltar, she will return to England, when His Royal Highness Prince Alfred will leave her for the St. George.

Falcon is cruising on the south part of the Gold Coast.

Firebrand. A disturbance took place on board the Firebrand, in Portsmouth Harbour, on Tuesday evening, between two marines, and the result was that one died from the injuries he received in the encounter. The origin of the quarrel has not been ascertained.

Gladiator was at Greytown when the last West India mail left.

Gorgon was at Jamaica when the last mail left.

Hannibal was at Malta on the 8th inst.

Hecate, commissioned this week for the surveying service in Australia, requires able seamen and petty officers.

Hermes was at Sierra Leone on the 21st of April.

Hibernia was at Malta on the 8th inst.

Himalaya has arrived at Spithead, yesterday morning, from the West Indies, with troops. She is expected to proceed to Devonport (reported to pay off), having some rather extensive defects to make good in her machinery. She has also carried away one of the blades of her Griffiths' propeller.

Hydra arrived at Trinidad on the 24th of April, with the Bishop of Barbadoes on board.

Immortalité, 51, screw, has been undocked from No. 7 dock at Portsmouth, on the completion of her coppering to her present draught.

Impregnable. A court-martial was held on Saturday, on board the Impregnable, guard-ship, at Devonport, on George Summers, a supernumerary A.B. of the first class, borne on the books of the Impregnable, for using insubordinate and provoking language to John Peakall, ship's corporal of the Impregnable. The prisoner was sentenced to receive 48 lashes, to be imprisoned for six calendar months with hard labour, and to be degraded to a second-class A.B.

Lapwing was at Gibraltar on the 12th inst.

London was at Malta on the 8th inst.

Marlborough was at Malta on the 8th inst.

Mars, 80, screw, Captain J. N. Strange, is under orders to proceed to Portland from Spithead.

Medusa, 4, paddle steam-vessel, Commander Bowden, recently returned from the slave preventive service on the west coast of Africa, was paid off on Thursday, and the crew granted six weeks' leave of absence.

Mersey, 40, got up steam on Saturday, at Spithead, to warm her engines.

Melpomene, 51, Captain J. F. Ewart, flag of Admiral Martin, from Portsmouth, put into Plymouth Sound on Sunday afternoon, and sailed in the evening for the Mediterranean.

Mohawk was at Gibraltar on the 12th inst.

Nelson, 91, screw. In the steam-basin, Portsmouth, fitting her machinery. It is expected that she will get up steam in a few days.

Nile, 90, Captain Edward K. Barnard, which left Plymouth on the 15th of April, with Lady Milne, for Bermuda, had not been seen by the Himalaya, which has just arrived home from that station.

Orion, Captain Frere, 15 days from Malta, arrived at Gibraltar on the 5th inst., cruised for some time in the bay, and steered for the Straits towards the afternoon, finally leaving for England at 4 p.m. She brings home naval and military invalids, soldiers' wives and children, and was under canvas, being unable to steam from defects in her machinery. She arrived at Plymouth on Tuesday.

Perseverance, 2, troop-ship, is receiving a coating of composition in No 8 dock at Portsmouth.

Philomel, gun-boat. In the steam-basin at Portsmouth. This vessel, recently constructed by White and Cowes, is undergoing the usual official examination previous to receiving machinery.

Pluto, Lieut.-Commander C. H. Simpson, was paid off at Woolwich on Saturday, and the crew granted the usual term of absence.

Prince of Wales, 120, screw. In the steam-basin at Portsmouth receiving machinery.

Princess Royal, 91, screw. This ship is now out of the hands of the shipwrights and in the hand of the painters. On her arrival from the Mediterranean it was found that she was rotten in many places, particularly her stern, nearly the whole of which has been taken out and rebuilt with English oak and Moulmain teak. It is reported that although she is now almost a new ship afloat, she has still much wood in her amidships, about the wake of her boilers, that ought to have been replaced with sound and seasoned timber. It is expected that she will be undocked on the 21st inst.

Racer left Jamaica on the 24th ult. for Havannah.

Rainbow, screw gun-boat, steamed out of Portsmouth yesterday to Spithead to test her machinery, preparatory to proceeding to Queenstown as tender to the Ajax steam coast-guard ship at that port.

Ranger, 5, screw steam schooner, is expected to call at Spithead on her way down channel from the eastward.

Recruit was at Malta on the 8th inst.

Redwing. It is stated that the tremendous recoil from the Armstrong gun during recent trials on board the Redwing gun-boat renders it imperatively necessary that some other form of carriage should be substituted for the one at present in use, should the smaller class of gun-boats be armed with these weapons. The greased wad that was introduced for the purpose of cleansing the gun when fired, is said to have remedied the matter to a certain extent, but the fouling of the gun is still very great.

Renown was at Malta on the 8th inst.

Royal Albert. Admiral Sir C. Fremantle, K.C.B., in command of the Channel Squadron, struck his flag on board the screw steam-ship Royal Albert, 121, at Plymouth, on Wednesday at sunset. The ship will undergo a trial of machinery at sea as soon as she can be got ready; her crew have been paid wages and granted leave of absence.

Royal William. Steam was got up on board the Royal William, 91, at Devonport, on Tuesday, by the contractors, to try her machinery.

Scourge was at Gibraltar on the 12th inst.

Sharpshooter is cruising on the south part of the Gold Coast.

Skipjack was the only ship-of-war at Bermuda on the 3rd instant. She was being stripped.

Spitfire left Fernando Po for Lagos on the 29th of March.

St. George, 99, at Plymouth, will be put in commission shortly.

St. Jean d'Acre was at Malta on the 8th inst.

Styx was about to proceed to Barbadoes with detachments of the 49th Regiment.

Sutlej, 51, screw. In the steam-basin at Portsmouth taking in machinery.

Swift, sailing brig, has been taken into the basin at Devonport dockyard to be fitted as a mooring vessel for Malta.

Termagant. Letters of the 31st of March last have been received from Valparaiso, from the Termagant, Captain Hall. She had a pleasant passage from Montevideo, through the Straits of Magellan. All well. She proceeds up the coast to Vancouver's Island.

Terrible, Captain Glasse, C.B., arrived at Gibraltar on the 11th, 5½ days from Plymouth.

Topaze, 51, screw steam-frigate, Captain the Hon. W. S. Spencer. Letters have been received from Vancouver's Island, dated March 28. The Topaze anchored in the harbour of Esquimault on the 19th of March. Five months and one week from Plymouth, 130 days at sea, and 28 at anchor. She touched at Madeira, Rio, Valparaiso, and Honolulu, Sandwich Islands. There are no soldiers at the island excepting the Royal Engineers and Royal Marines.

Torch, 4, fitting for the first-class steam reserve, is masted and rigged, and is now shipping her stores. This vessel is nearly completed, and will be ready to take her place in the reserve on the 31st instant.

Trincomalee, 24, which is being fitted at Chatham dockyard as a training ship for the Naval Coast Volunteers, is ordered to be furnished with the following armament:—Main deck, ten 32-pounders, each of 50 cwt.; and six 8-inch guns, each of 52 cwt.

Triton was at Sierra Leone on the 21st of April.

Trusty. The iron-cased floating battery has been towed from Chatham to the Nore in order to be in readiness for the experiments the Government have directed to be made upon her with the newly-invented long-range Whitworth gun, under the direction of Colonel J. W. Mitchell, R.A., and the Ordnance Select Committee. The Whitworth gun is to be placed on board one of the boats belonging to the Cumberland, 70. On the occasion of the last experiments on the Trusty with the Armstrong gun the injuries inflicted on that floating battery were of the severest character, the wrought-iron plates, which are several inches in thickness, being in many places completely riddled by the shot, some of which passed completely through the vessel, and all striking her with the most telling effect.

Valorous. Captain Aldham has protested against Miramon's late attack on Vera Cruz. He says:—"This mode of warfare is both barbarous and unusual, contrary to the customs observed by civilised nations, opposed to every sentiment of humanity, and unworthy of a Christian soldier."

Victoria, 121. The indicated horse-power of this three-decker, when under steam on the 6th inst. at the measured mile in Stokes Bay, amounted to 4,290 horse.

Victoria and Albert, Royal paddle-yacht, Captain Hon. J. Denman, completed her repairs alongside Portsmouth dockyard on Thursday evening.

Viper was at Lagos on the 10th of April.

Virago, 6, paddle, Commander M. B. Dunn, arrived at Spithead yesterday morning from the eastward.

Wanderer, 4, screw gun-vessel, which was recently inspected at Chatham dockyard, and found to be in a very rotten and defective state, was towed on Saturday afternoon to Sheerness by the Adder, steamer, Mr. Munchin acting second master, to be docked and repaired.

PEMBROKE DOCK YARD.—Much alarm and dissatisfaction has been created in the minds of the men in this yard by orders having been received on Monday last for the discharge, *without pension*, of six men, whose services were for periods varying from twenty to twenty-two years, and two of whom had during that service suffered severe injuries, one having broken his leg, and the other lost a couple of toes. It appears to us to be a most arbitrary proceeding, and worth inquiring into, thus to cast men adrift in their old age penniless, after having expended their prime in Government employ.

The two rotten mortar-boats, numbered 30 and 32, have been entirely broken up by the shipwrights at Chatham; but, owing to the defective state they were in, very little of the timber will be fit to use for ship-building purposes. No orders have yet been received from the Admiralty relative to the breaking up of any more of the mortar-vessels found defective.

Arrivals and departures at Singapore of Her Majesty's steam and sailing transports with troops for the China war, since 20th of March, 1860:—March 20, transport-ship Burlington, from Calcutta; sailed for Hong Kong, March 25, with troops, in tow of Her Majesty's Indian Navy steamer Berenice. Transport-ship Elizabeth, from Calcutta; sailed for Hong Kong, March 25, with troops, in tow of Her Majesty's Indian Navy steamer Berenice. Transport-ship Zuleika, from Calcutta; sailed for Hong Kong, March 24, with horses of the Royal Artillery. Transport-ship Bosphorus, from Calcutta; sailed for Hong Kong, March 24, with head-quarters of Her Majesty's 19th Regiment. March 21, Berenice, Indian Navy, from Galle; sailed for Hong Kong, March 24, with 7 officers and 317 men of the Royal Artillery. March 22nd, Her Majesty's gun-boat Reynard, from Penang, with ship Alfred in tow, from Calcutta, with 14 officers and 392 men, 2nd battalion of Her Majesty's 60th Regiment. Her Majesty's ship Centaur, from England, with gun-boat Cockchafer in tow; sailed for Hong Kong, March 25, with ships Alfred, Hougomont, and Indomitable in tow. March 24, transport-ship Hougomont, from Calcutta; sailed for Hong Kong, March 25, in tow of Her Majesty's ship Centaur. Transport-ship Indomitable, from Calcutta; sailed for Hong Kong, March 25, in tow of Her Majesty's ship Centaur. March 26, Her Majesty's ship Ringdove, from Penang, with ship City of Poonah in tow. His Imperial Majesty's ship L'Entreprenante, from Brest, with 14 officers and 1300 men, *en route* for China. March 27, transport-ship Michigan, from Madras, with 8 officers and 260 men of the Royal Artillery. March 29, transport-ship Winifred, from Calcutta, having on board 6 officers and 418 men. Transport-ship Statesman, from Madras, with troops; sailed for Hong Kong, March 31, in tow of Her Majesty's ship Esk. Transport-ship Iskander Shah, from Calcutta, with troops; sailed for Hong Kong, March 31, in tow of Her Majesty's ship Esk. April 1, transport-ship Forerunner, from Madras, having on board Major Hackett and detachment of Her Majesty's 44th Regiment. His Imperial Majesty's steam-frigate Girondé, from France, having on board Colonel O'Maley and 102 battalion troops. April 3, Her Majesty's Indian Navy steamer Sydney, from Calcutta, towing ships Eranee and Lady Ann, with 196 men of Her Majesty's 87th Regiment. Her Majesty's steamer Magicienne, from Penang, towing ship Minden, from Calcutta, with troops. April 4, transport-ship Matilda Atheling, from Calcutta, having on board Major Cobbe and 233 men of Her Majesty's 87th Royal Irish Fusiliers. Transport-ship Brandon, from Calcutta, with troops. Transport steamer Australia, from Calcutta, with troops.

On Monday a plank fell, end on, on a labourer at work under the Glasgow, 51, screw, building at Portsmouth. The poor fellow was so seriously injured that he died yesterday morning. The same day two labourers fell from a stage, and one was so severely injured that he had to be sent to Haslar Hospital; but the other was enabled to be conveyed to his own home.

Tuesday's *Gazette* gives notice that preparations are now being made for the intended distribution of a moiety of the proceeds of certain Chinese piratical junks, captured on the 11th of May, 1853, by Her Majesty's ship Rattler, as made known to the Lords of the Admiralty on the 22nd of March, 1860, only.

Extract of a letter dated April 2nd, 1860. "The Commander-in-Chief, Sir Alexander Milne, in his splendid temporary flag-ship, *the Emerald*, in which he left Bermuda, on the 19th ult., on his first visit, or tour of inspection of the West India Station, first called at Antigua on the 27th, and left again on the 28th, after amusing our sable fellow-subjects, and others on the spot, with the spirited play of our gay band, by giving their books and instruments an airing on the terra firma of the dockyard, when off we started for the "Flora del Occidente," *alias* Barbadoes, whose loyal inhabitants offered their thriving little island to the Prince Regent as an asylum, and where a week's stay admitted of a fuller display on the reciprocity system which was intercepted by the death of Mr. Foord, the resident American consul;—the funeral, of course, attended by the governor, admiral, and general, and staffs, besides a private muster of "British cousins," as in duty bound, to swell the cortège. We found the Styx steamer here last from Antigua; and three days afterwards the Hydra, from Bermuda, brought the admiral's mails from Antigua. The Perseverance, with part of the 14th regiment, all well, arrived at Antigua on the 24th from Gibraltar, and sailed the same evening after coaling for Jamaica. The little skipjack goes to Bermuda to refit, having suffered much in overawing the refractory Orinocans. We start again on the 4th for Grey Town, calling at Jamaica and St. Domingo, at which latter place 'tis said affairs are looking fairer than formerly, since the popular President so housted the "sable monarch," Soulouque; so that we shall be too late "to attend court," and witness the capital fun some of the more lucky ships had that visited there before us, in the grotesque aping of "Nigger doing Buckra lebby and de drawing-room for de ladies," unless the President does something in that way, after the fashion of his contemporary, at the White House, a little further north-west."

The gunboats have been the subject of several conversations in parliament this week. The Admiralty organ in each House has declared that the Government are considering whether they cannot take legal steps against the contractors.

The Navy Gazette.

ADMIRALTY, MAY 14.

Retired Rear-Admiral John George Aplin to have the rank and title of Retired Vice-Admiral from the 2d inst., in pursuance of the Order in Council of the 7th May, 1858.

ADMIRALTY, MAY 15.

NAVAL KNIGHTS OF WINDSOR.—The Lords Commissioners of the Admiralty do hereby give notice to such Lieutenants in her Majesty's Navy, as are desirous of being recommended for the appointment of Naval Knight of Windsor, under the will of the late Samuel Travers, Esq., that they must apply at this office on or before the 26th day of June next, when they will be informed of the nature of the certificates and testimonials which are required to show that they come within the meaning of the said will, which expresses that they "are to be superannuated or disabled Lieutenants of English men of war," and shall be single men, without children, inclined to lead a virtuous, studious, and devout life: to be removed if they give occasion for candal.—C. PAGET.

THE MEDITERRANEAN.

MALTA, 12th May. Her Majesty's screw line-of-battle ship, Hannibal (bearing the flag of Rear-Admiral G. R. Mundy, C.B.), left our port on the 5th inst. for a cruise.

Her Majesty's screw line-of-battle ship Neptune, Captain F. A. Campbell, arrived on the 8th with despatches from the fleet, and left again a few hours after to join those which are cruising off the island.

Her Majesty's screw steam-corvette, Scylla, Captain Lambert, proceeded on the 8th to Messina.

Her Majesty's screw gunboat, Boxer, left on the same day for Tripoli.

The Russian screw line-of-battle ship, Gangaud, with the flag of Rear-Admiral T. Nordman, sailed on the 10th inst. for Nice, to convey, it is said, the Empress Dowager of Russia to Genoa.

On Friday last, the 4th inst., the officers of the garrison gave their last performance for the season to a very fashionable and crowded house. The first piece was *Still Waters run Deep*. Captain Fisher, Captain Drake, R.E., and Captain Graham, R.B., as usual sustained the leading characters, and were ably assisted by Mr. Glyn, R.B., Captain Walker, 22nd Regiment, Mr. Grant, 15th Regiment, Mr. Kerr, R.B., Mr. Egerton, R.B., Miss Cali (whose acting was very good), and Miss Mary Waters.

A meeting composed of chaplains belonging to the Mediterranean fleet, was held last week in Valetta, the Reverend T. W. Clarke presiding. The Reverends H. Alexander, T. H. Knapp, R. Price, B. Ring, and E. Pemberton, were also present. It was resolved to form a clerical society for mutual benefit and for the more efficient discharge of the duties of the sacred office. The Venerable Archdeacon Le Mesurier was unanimously chosen honorary president, and the Reverend B. Ring, honorary secretary. The further detail of the proceedings was of a purely professional nature, and related principally to the importance of establishing a Sunday evening service for sailors on shore; and such other special services as might be deemed advisable.

THE DEFENCES OF PORTSMOUTH.

A most able and interesting lecture was delivered last week at the United Service Institution by Colonel Shafto Adair, the subject being the "Defences of Portsmouth." The chair was occupied by Sir John Burgoyne, and there was an unusually large attendance of members of both branches of the Service. The first point to which the gallant colonel directed attention was the defences of Portsmouth as a maritime arsenal. He pointed out the position of Fort Monckton, the Blockhouse, the forts at Southsea, and other forts commanding the channel. The Blockhouse Fort he regarded as the "key" of the harbour. It was necessary, he said, that one or more of the existing forts should be supplemented by smaller batteries, which would be available in case of an attack by gunboats and vessels with small draught of water. The position which he proposed for these additional forts was on Southsea Common, some distance inland, and so placed that their fire would strike almost 500 yards from the beach. If any attack were made by an enemy it would probably be by means of gun-boats, as in case of the memorable attack of the Mosquito fleet on Fort Monckton at the time of the review of the fleet at Spithead by Her Majesty. The forts which he had suggested would meet any attempt of that description. Passing from this view of the defences of Portsmouth, Colonel Adair next dealt with Portsmouth as a naval fortress, and in that case the Isle of Wight would be regarded as a formidable out-work, or a work thrown out beyond the main ditch. The various defensive works round the island were pointed out, and the most important battery at the Cliff end, which commanded the entrance to the Channel, was minutely described. He stated that he accompanied the Defence Commissioners on a visit of inspection to this point, when they were afforded practical proof, after twenty rounds fired from a gun, that there was no foundation for the rumour that the fort was unsafe, or the guns unserviceable. If some heavy guns were placed in position here, the number of land forces necessary for the defence of the island would be one-third less than are now required. At several councils of ministers held in the time of Elizabeth, the necessity of fortifying this and other points of the Isle of Wight was strongly insisted on by Essex, Burleigh, Carew, North, and others, and it was about this time that the works called "sconces," from the "scondite," of the Italian engineer, were erected in that part of the country. For the land defences of Portsmouth there are the works on Portsdown Hill, and the line of the Elson forts. Such, however, is the progress made in the science of projectiles, even since the commencement of these new works, that it is now necessary to construct other forts in advance, in order to compel the removal of the breaching power of an enemy's force, if they should obtain a landing upon any point to the east of Portsmouth. A range of 9000 yards has recently been obtained in the experiments at Southport, the distance from Ryde pier to the centre of the Portsmouth Dockyard is but 8000 yards, so that additional defences become necessary with every extension of the incendiary range of projectiles. The Elson forts are so constructed, that if any one of them should be captured, its fire would not enfilade the other. The most important defences of Portsmouth and Portsea would, he thought, in the event of hostilities, be upon the water-line. The objection as to the difficulty and expense of manning extensive lines of defences, Colonel Adair met by stating that great assistance would be derived from the services of the various Volunteer corps. When in attendance on the Queen at the reception of the Volunteers, he could not help thinking as he saw those 2000 right good soldiers pass before the Sovereign, of the promise which they gave for the future. Colonel McMurdo had told him that he saw a few days since an advance of 1500 Volunteers in line, who marched as well as any regular troops. There are already 14,000 Volunteer artillerymen in the country, who with a very little training can be made of great service in connection with these defensive works. The last point of view in which he treated Portsmouth was as forming a most valuable basis of military operations. If an attack were made it would be concentrated in its character and delivered for the purpose of reaching London. To meet such an attempt, he recommended that the whole of the South of England, from Dover to Plymouth, should be formed into one military district with three divisions each of 15 battalions of infantry, five of them being the regular army, the remainder militia and volunteers; two batteries of artillery and a proportion of cavalry. A line of railway runs through the whole of this district, and 30 locomotives would be sufficient to move the whole of any one division. The district would require for defensive purposes, in order to arrest the progress of an invading army, 37 principal stockades or fortified positions, 72 posts for pickets, principally along the line of the Downs, and 18 small batteries to defend positions, or on the rivers. The advice of Lord North given at the Council of Elizabeth's days is equally applicable to the present time. "If the enemy is permanently planted, let him be blocked up with 'sconces,' or fronted with a great army giving him little rest."

The address was listened to with great attention, and the lecturer was warmly cheered in various parts of his very clear and lucid explanations.

Sir John Burgoyne in proposing a vote of thanks said that several of the suggestions of the gallant colonel had not only been considered, but were about to be acted upon by the Government.

ROYAL NAVAL ENGINEERS.

Proposed Regulations respecting the appointment, rank, examinations, and pay of Royal Naval Engineers:—

A candidate must not be less than 21, nor more than 28 years of age, unless he has served at sea in the merchant or other service for a period of not less than two years, in which case he may be admitted up to the age of 30. He must be in good health, free from impediment of speech, defect of vision, or other physical imperfection, and must present himself for examination at the Naval College, Portsmouth; he must produce indentures or certificates of not less than four years' servitude in a steam factory, as well as testimonials of good conduct and practical abilities.

He will be examined in the presence of the captain, and inspector of machinery of the steam ordinary on the following subjects, viz.:—

Writing English from dictation. Arithmetic, embracing a thorough knowledge of vulgar and decimal fractions. History of the steam-engine, including the various causes which have led to the invention of the principal parts, names, and uses of every part, and the construction and general principles of engines and boilers. He must also possess a knowledge of mechanical drawing. Candidates acquainted with any foreign language will have the preference. On passing he will be appointed by order as a "sub-assistant-engineer," and take rank with second master.

When a sub-assistant-engineer shall have served at sea in Her Majesty's Service for a period of four years, or three years in the case of those who may have served at sea prior to their entry into the Royal Navy, he shall receive a commission as "assistant-engineer," provided he passes an examination on the following subjects, viz.:—

Management of engines and boilers—The principles of expansion of steam, and the nature and use of the indicator—Algebra, as far as quadratic equations—Euclid, first four books—Mechanics—Laws of heat, and natural philosophy, generally, as exemplified in the action and working of engines and boilers. He will also be required to produce drawings of details of machinery, or boilers of some ship in which he may have served.

If in England, the examination to be conducted as in the case of first entry; but, if abroad, by the Inspector of Machinery of the Fleet, or two chief engineers, in the presence of the captain, or if the ship in which he is serving be on detached service by the chief engineer in the presence of the captain. In the case, however, of those who pass abroad, acting commissions only will be given, and candidates shall present themselves for examination at the Royal Naval College within three months after their arrival in England, and passing, to be dated back. All acting assistants failing to pass on the first examination to lose three months' time. At the expiration of another three months, they are to present themselves again for examination, but on failing to pass, to lose three months more time. Any acting-assistant rejected after his third examination, which may be granted at the expiration of another three months, not to be allowed to present himself again, and to lose his acting rank.

No assistant-engineer to be eligible for promotion to chief engineer until he shall have served at sea for a period of four years as an assistant, and shall have passed such examination as their lordships may deem necessary.

No chief-engineer to be eligible for promotion to inspector of machinery, until he shall have served eight years as chief.

No inspector of machinery to be eligible for an appointment as "deputy-inspecting-engineer of dockyards" until he shall have served two years as an inspector of machinery.

All 1st class assistants on the present scale to be considered as assistant-engineers, taking seniority from the completion of four years sea-time from their original entry in Her Majesty's Navy.

All acting 1st assistants, and all 2nd and acting 2nd class assistants to be eligible to pass for the new scale, and on passing, if within twelve months after date of this order, to take seniority as assistant-engineers from the completion of four years from original entry. If beyond a period of twelve months to take seniority from time of passing.

All others to be considered as sub-assistants, and to take seniority from date of original entry.

Assistant and sub-assistant-engineers to be gun-room officers. Assistant-engineers, when placed in charge, to receive 1*s.* per day additional pay, and be allowed to mess in ward-room.

The senior assistant in all ships to be allowed a cabin.

Sub-assistants to wear the undress uniform of assistant-engineers; all others to have uniform corresponding to their rank.

The widows of assistant-engineers to be entitled to a pension of 40*l.* per annum. But pensions to the widows of assistant-engineers, when killed in action, or that have suffered other violent death in the execution of duty, and pensions to assistant-engineers for wounds and share of prize money, to be regulated according to rank as at present.

When assistant-engineers are actually engaged in executing necessary repairs to the steam machinery of other vessels than the one to which they are appointed, they shall receive extra pay according to the following rate—

Digitized by Google

Sub-assistant-engineers	2*s.* per day.
Assistant-engineers under five years standing	3*s.* ,,
Assistant-engineer above five years standing	4*s.* ,,

All time served at sea after date of commission as assistant-engineer to count for full and half-pay.

SCALE OF RANK AND PAY.

Title.	Rank.	Service.	Full pay per diem.	Half pay per diem.
			s. d.	*s. d.*

Engineers to take rank with other officers according to the date of commission.

NAVAL FUNDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have read the communication of "Medicus" on the above subject, which appeared in your last week's impression; and I must confess to considerable surprise on learning that the abolition of this fund was in contemplation. What! are the medical officers now so well provided that they can afford to scatter to the winds the magnificent capital they thus possess of 66,000*l.*, or are they mad?

Let me tell them a story, ay, "an ower true tale." Up to 1833 we paymasters (or "pursers," as we were called then) were receiving, as our emoluments, an eighth of the value of all provisions, &c., issued by us in victualling H.M. ships; but we entered into an agreement with the Admiralty, by which we were only to receive tenths instead of eighths, the balance to be kept a strict account of, and when it became a big pile it was to be divided among us. Happy mortals! The pile indeed became big, but no division ever took place, and here are we, fools that we were, robbed of all our money; we often envied the medicoes their fund; they had been wise in their generation; they were not like the stupid pursers who trusted the Admiralty to collect a fund for them, but set about doing it themselves; and now that they can boast of such a heap of money as nearly 75,000*l.* (including a compassionate fund for their orphans) we are told that five-sixths of them have conspired to play "ducks and drakes" with it. Go on! we shall applaud; and when you have reduced yourselves to our state, we can commiserate each other.

We are told by "Medicus" that many of the corps object to contribute their shilling a week to the support of the fund, and therefore want to demolish it altogether. Why, what is a shilling a week? Nothing as compared to what we engaged to pay towards raising a fund for our class, and we did it willingly. A friend of mine told me the other day that the amount docked from his balance bills during the seven years he was purser of two frigates was 1200*l.*, and that the next vessel he had being a first-rate and a flagship, his loss during that commission (three years) was nearly 1000*l.* How many "shillings" will that make? And yet let me tell the doctors that all their shillings go to a good purpose, while ours have been entirely lost.—I am, &c.,

A PAYMASTER, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Why should your correspondent in your last issue wish to perpetuate the nuisance of the contribution to the "Naval Supplemental Fund" from unwilling contributors? or how can anyone now entering the Service be required to pay for the jobbing iniquity of its former managers; to make good their misappliances in granting the then widows 40*l.* per annum, contrary to the simplest rule of interest, and any longer to make good the deficit from former dishonesty by forced contribution? Moreover, your correspondent states simply what is not fact; for the first information that I, in common with many others, received regarding the existence of this fund, was the deduction therefor from my first "quarterly bill," *nolens volens*. Three-fourths of the members have long ago emphatically declared their want of confidence in this fund,—the married officers in assuring their lives on much more favourable terms in private offices, and the rest with them in unanimously petitioning to be relieved from all compulsory contributions in future, even by forfeiting the sums already for years contributed. Let then those who so prefer contribute till "doomsday" to such a prosperous fund, but do not, pray, add additional inducement, sir, to candidates for the Naval Medical Service, by telling them that they must throw so much of their daily pay into the consuming fire of the Medical Supplemental Fund, especially as they have on Saturday for the first time heard from a First Lord's lips, the memorable maxim laid down by a naval captain, and indorsed by his grace, that naval assistant-surgeons must compete, and unsuccessfully, for cabin room with captains' stewards, and instead of wearing, like the chaplains (and other professional gentlemen) a plain professional black coat, must needs by the same high authority clash in the question of uniform, amongst others, with naval engineers—a class of officers no doubt for the most part good and true, all of whom must have been educated as mechanics, not professionals, and many of whom it is stated were merely "locomotive" drivers previous to the scurry of the Crimean War. I am afraid, sir, the time is at hand when, as in the military service, the "civilian element" must be invited to share the administration of the Naval Medical Department, if only to infuse new life into the Service, and remove the "dead lock of red tapeism."—I am, &c.

RETRO, RETRORSUM.

THE MILITIA.

The Royal Berks Militia assembled at Reading on the 4th inst., and in fair numbers, although being one of the Mediterrancan regiments, a large number of foreign service men, whose term of five years had expired, took their discharge. The regiment is still far under its quota, but there is no doubt whatever, if that care is displayed by the authorities of the regiment which the public service has a right to expect, the "Royal Berkshire" will quickly complete its required number. The regiment is being carefully drilled.

The West Essex Militia are to be reviewed on Monday at Chelmsford, and the members of the neighbouring Volunteer corps have been invited to take part in the proceedings. The Essex Rifle Militia are also about to be inspected at Colchester by Colonel Wood, Commandant of the camp at that place.

The East Kent Militia are under orders to proceed to Canterbury from Portsmouth on the 11th proximo, for the purpose of being disembodied.

The 2nd Royal Lanark Militia, at Aldershot, are ordered to proceed to Glasgow Barracks, and are to be disembodied between the 8th and 15th of June.

On Friday week the Lancashire Hussars, troops of which have been formed in the Ashton, Lathom, St. Helens, and Newton districts, were reviewed in the spacious park at Garswood Hall, the residence of their Lieut.-Colonel, Sir R. T. Gerard, Bart., by Colonel Wilbraham, who expressed high approbation of the condition of the regiment.

The 2nd Lancashire Rifles were reviewed at Liverpool by General Douglas, who expressed himself much pleased with their state of efficiency.

The 7th Lancashire Rifles Militia, under the command of Lieut.-Colonel Madocks, were inspected on Saturday week by Major-General Douglas, who expressed his satisfaction at their efficiency. The regiment assembled at Bury on the 23rd ult. for 27 days' training, and since then the recruiting has gone on most satisfactorily.

The Royal Sherwood Foresters (Nottingham Militia), under the command of Colonel Mellish, will assemble at Newark, for 28 days' training, on Wednesday next.

The Royal Sussex Artillery Militia will be detached from the depôt at Lewes on Wednesday next for several days, for the purpose of carrying on heavy gun practice with shot and shell at a floating target from the lower battery at Newhaven. The guns are 68-pounders. We understand the range will be about one mile. The adjoining pier will be an admirable spot to enable spectators to witness the result of each round. We are enabled to state that since the assembly on the 30th ult., the general conduct of the men has been particularly orderly and correct. The training will terminate on Saturday, the 26th inst.

The Worcestershire Regiment have now undergone a fortnight's drill at Worcester, and have much improved in their exercise. The full complement of men on the books of the regiment is 850, and of these only 38 are absent, except men whose absence is accounted for by sickness or other satisfactory reason.

The 2nd West York Regiment of Militia will assemble at York on the 4th of June next for 27 days' training.

The 4th West York Regiment of Militia, under the command of Captain Pollard, will assemble at Leeds on the 4th of June for 27 days' training.

The 6th West York Regiment of Militia, will assemble at Halifax on the 4th of June for 27 days' training.

The Militia Gazette.

WAR OFFICE, PALL MALL, MAY 15.

Royal Bucks King's Own Militia—Lieutenant John Stratton Fuller to be Captain, vice the Hon. Florance George Henry Irby, Captain of 4th Bucks Rifle Volunteers.

Royal South Gloucester Light Infantry Regiment of Militia—Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commissions held by the following Officers:—Captain Swinburne Fitzhardinge Berkeley, Captain Conway Whithorne Lovesey, Ensign Robert Clayton Daubeney.

5th Regiment of West York Militia—William Edward Frere, Gent., to be Lieutenant, vice Henry Broomhead, resigned; April 16.

Resignation accepted by her Majesty's Lord Lieutenant of the County of Cornwall.

Cornwall Rangers Militia—Lieutenant Edward C. Sterling has received permission to resign his commission.

WAR OFFICE, PALL MALL, MAY 18.

West Essex Yeomanry Cavalry—Cornet William Davis, Jun., to be Lieutenant, vice Clifton, resigned; May 10.

3d Regiment of the Duke of Lancaster's Own Militia—Ensign Thomas Grimshaw to be Lieutenant, vice Henry Powys, resigned; Ensign William Gardner Bird to be Lieutenant, vice John Brophy, resigned; May 13.

Queen's Own Royal Regiment of Glasgow and Lower Ward of Lanarkshire Yeomanry Cavalry—Stewart Souter Robertson, Gent., to be Cornet, vice George Coates, deceased; May 5.

Royal London Militia—Daniel Harrox Bennett, Esq., to be Lieutenant, vice Augustus Henry Garland, promoted; George Thomas Oldfield, Esq., to be Lieutenant, vice Miles Fisher Monckton, superseded; Edward Sharp, Gent., to be Ensign, vice Frederick Richard Fortnum Keats, promoted; Robert Harding Evans, Gent., to be Ensign, vice Thurlby Smith, promoted; May 16.

Royal Bucks King's own Militia—William Rose, Esq., to be Assistant-Surgeon, vice Peter Wharton Hood, Gent., resigned.

Royal South Gloucester Light Infantry Regiment of Militia—Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign John Maurice Bernabo in the above Regiment; acceptance dated May 12th.

Prince of Wales' Royal Regiment of Renfrew Militia—Lieutenant Henry Dunlop to be Captain, vice Anderson, resigned; March 5.

1st or Royal East Middlesex Regiment of Militia—Ensign William Albert Dixon to be Lieutenant, vice Plummer, promoted; April 23.

5th or Royal Elthorne Light Infantry Regiment of Militia—Ensign Edward Chapman to be Lieutenant, vice Campbell, promoted; Feb. 8. Percsy Francis Bulkeley, Gent., to be Ensign, vice Battley, promoted; April 7.

THE MILITIA AND RED-TAPEISM.

(*From the Cork Reporter.*)

A few posts back we gave a specimen of the watchfulness with which the officials at Head Quarters look after the interests of the country in general, and the militia in particular. The City of Cork artillery mustered, nearly a week since, for drilling, some 300 strong; but when assembled in Elizabeth Fort, it was found no provision had been made for the most essential portion of the men's equipment, namely—shoes, socks, and stocks. We need scarcely say that the men joining, knowing that shoes should be provided, took with them the worst they had, or could borrow for the purpose. After a few days their officers, getting impatient at the delay occasioned by the want of supplies, had the men assembled for drill, when it was found a large number were shoeless altogether; the remnants they had on being but an incumbrance, the men had discarded them altogether. What was to be done? In order to maintain the high character this fine regiment had attained, it was decided to form a bare-foot squad, and, the fittest portion of the ground being selected, to work they went, and there the curious may now behold the primitive drill of—we shall not say how many unstocked and unshod servants of Her Majesty. But now to the sequel. On Saturday the hitherto irritated countenances of the officers seemed to have relaxed almost to a smile of forgiveness for the blundering, when it was announced that Government stores had arrived, and the orderly-room was beset with the officers of every rank to have their men at once supplied; and, as the packages were undone, each eager disciplinarian claimed a priority—and of what? Oh, reader, think of it! First came tumbling out a regiment of pocket-knives; next was exhumed a series of parcels, which on opening were found to contain in perfection the military regulation white glove; and, to wind up the contents, came an endless number of tin cases for the use of this gallant corps. Just imagine a white-gloved, tin-cased, pocket-knived regiment of militia, without either shoe or stocking, and you can realise the condition of the Cork City Artillery, and form some idea of the disgust of the officers and discontent of the men. Through some official bungling of red-tapeism the regiment, too, has mustered so strong, that they have been obliged to pitch ten tents on the ramparts to give them accommodation.

CLOTHING OF THE MILITIA.—Misunderstandings having arisen regarding the instructions issued from the War Office on the subject of clothing for the disembodied Militia, Earl de Grey and Ripon has caused amended instructions to be issued, in which commanding officers of disembodied regiments are informed that "it should be clearly and positively understood, with regard to the small necessaries enumerated, that men, whether on the permanent staff or enrolled volunteers, who have been or should have been present at a previous embodiment or training for however short a period, will only be provided with boots, shirts and socks by the public, unless they have been re-enlisted for a new period of service subsequent to the commencement of the training in 1859. The men not entitled to the small necessaries at the public expense will, however, only be required to supply themselves with such other necessaries as they have been hitherto in the habit of providing at their own expense. All however, who have been enrolled since the end, or re-enrolled since the commencement of the training of 1859, and are now present, or may hereafter be present, for their first training since enrolment or re-enrolment, will be entitled to a full complement of small necessaries.

SUPERHEATED STEAM IN THE ROYAL NAVY.—At a lecture delivered yesterday at the United Service Institution, the Honourable Mr. Weatherhead, member of the Senate of the United States, explained the mode in which, by order of the Admiralty, super-heated steam had been applied to the Rhadamanthus and several other of Her Majesty's ships, as well as those of the Royal Mail and other steamers. Mr. Weatherhead stated that he had found the steam given off by ordinary boilers from water in a state of violent ebullition was charged with a great quantity of water, which materially affected its power; but that by mixing with it steam heated to a temperature of between 500 and 600 degrees, these particles of water were evaporated, and the dry steam becoming moistened in the process, could be used with great advantage in marine engines, and without the risk of destroying the packing and cylinders, as was the case when superheated steam alone was used. The increased temperature of the steam was obtained without expense from the waste heat from the furnaces in the chimney; and when combined in the manner decribed, it would effect a saving of one-third in fuel and water, entirely prevent "priming," and create a better vacuum; and was so perfectly under control, that any degree of pressure required could be obtained with perfect safety. The Governments of England, the United States, and France had investigated the subject, and found that the mixed steam possessed a working power of from 30 to 50 per cent. over ordinary steam. Captain Fishbourne occupied the chair, and an interesting discussion followed the lecture, in which there was a general concurrence of opinion in favour of the plan proposed by the honourable lecturer.

The Garibaldi expedition to Sicily seems to wear a successful appearance, and will doubtless give rise to grave events throughout Europe. According to what we have learnt, Sicily is by this time in a flame, and not only the island, but also Calabria and the Abruzzi. The course of events has been pretty much as follows:—On the night of the 5th inst. the expedition set out for Genoa, Garibaldi having seized two steamers belonging to a private company. The force amounted, it is said, to 2000 men, and after making, it would seem, somewhat of a detour to avoid the Neapolitan cruisers, it reached the coast of Sicily, and landed at Marsala on the 11th, pushing on to Calata Fimi and Alcamo where the insurgents are now concentrated. The reports connected with the landing are very contradictory. An official despatch from Rome, dated May 14, says that two Neapolitan frigates have sunk the steamer Lombardo and captured the Piemonte, while from Turin it is reported, under date of the 16th, that the Piemonte had not been captured. It seems likely, however, that these two steamers must have fallen into the hands of the Royalists, and, indeed, it is probable that Garibaldi will look with unconcern on any such event. He, of course, merely used them to get to the island; the notion of sending them back for reinforcements is absurd. Garibaldi and his 2000 men will be merely the neucleus round which the insurrectionary levy of the island is to be gathered: he must have made up his mind to depend wholly on native assistance, and to conquer the Bourbons by the aid of their own subjects and perhaps of their own soldiers.

VOLUNTEERS.

METROPOLITAN.

CIVIL SERVICE RIFLE VOLUNTEERS.—Honorary Colonel His Royal Highness the Prince of Wales.—On Wednesday afternoon last an interesting ceremony took place at Somerset House, the occasion being the presentation by the Audit Office, or 1st Company of the Civil Service Rifle Volunteers, of a gold watch and chain, of the value of 25*l.*, to Sergeant Chase, 1st Battalion Scots Fusilier Guards, in recognition of his services as their drill sergeant. The company mustered in full force, and the watch and chain, together with a complimentary address on parchment, were presented to him by Captain Hawker, the senior officer. Three cheers were given for the gallant sergeant, who expressed his thanks in a soldierlike and manly manner. The ceremony was most gratifying to all who witnessed it, and showed how well the services of Sergeant Chase have been appreciated by the corps.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS.—On Saturday last the above regiment assembled in Westminster Hall, and were formed in square by their colonel, the Earl Grosvenor, to receive a presentation of a very handsome silver bugle, from the Lady Constance Grosvenor, who has always evinced the greatest interest in the welfare of the regiment; and after a few appropriate remarks from the colonel, the regiment conveyed its acknowledgments of this gratifying testimonial by repeated rounds of cheering. The regiment proceeds to-day by rail, with the Inns of Court, the London Scottish, the London Irish, &c., and other regiments, forming the 3rd brigade, to Wimbledon Common, at 5 o'clock, for their first field day.

LONDON IRISH.—A general meeting of the members of this corps was held on Thursday evening at Hungerford Hall, Lieut.-Colonel the Marquis of Donegal in the chair. The noble Marquis congratulated the members on the daily increase of the strength of the corps, as well as on the perfection in drill made by those he was in the habit of seeing when he attended parade. He exhorted them to persevere in the diligence already observed, and also to exert themselves in getting recruits, for he was anxious to see the corps muster six or eight hundred strong. He was pleased to state that their funds are in a very prosperous state. Shortly they will be required to assemble before the Queen in Hyde Park, and he hoped they would make an appearance on the occasion second to no other corps in the metropolis. Mr. Montgomery read the report of the finance committee, from which it appeared that the receipts since the middle of December last, when the corps was established, amounted to over 1200*l.*, including 70*l.* received that day, whilst the total expenditure, including the furnishing apartments in John Street, Adelphi, amounting to 45*l.*, and a gratuity of 30 guineas to the late Hon. Secretary, Mr. Dempsey, was 320*l.* A vote of thanks, with three hearty cheers to the noble Marquis, terminated the proceedings. It is very agreeable to remark that the meeting was one of a most harmonious character, and was addressed by Lord Otho Fitzgerald, Mr. Samuel Lover, Mr. M. J. O'Connell, Dr. O'Connor, Captain Jones, &c.

DEVONSHIRE.

The members of the three corps of Plymouth, Devonport, and Stonehouse, to the number of about 250, were paraded on the Hoe, on Wednesday evening, from seven till eight o'clock. Major Duperrier, of the 2nd Devon (Plymouth), commanding. The Plymouth corps were the first on the ground, next the Stonehouse, and last the Devonport. Capt. Bewes, of the 2nd Devon, intends proceeding to Hythe this week, and during his absence the major will continue the morning drills at six o'clock on Tuesday, Wednesday, and Friday mornings.

HAMPSHIRE.

SOUTHAMPTON.—The Volunteers of this town have been managed so badly for the last three months that everything, excepting a small drill, came to a stand. We are now happy to say there was a large muster of Volunteers last evening. By the order of the colonel (Colonel Grimes), and under the directions of Major Lacy, acting-adjutant, five companies marched from their drill-room to the town-hall, headed by their fine band; and in the presence of the mayor (Frederick Perkins, Esq.), and several magistrates, and a large collection of fair ladies, there were some 314 Rifle Volunteers sworn in. The arrangements were good, and the swearing in did not occupy more than two hours; Colonel Grimes addressed the Volunteers in an appropriate speech, and the proceedings of the evening terminated with three hearty cheers for the Queen. The Marquis of Winchester has changed the name of the Southampton Rifle Volunteers to 2nd Hants. The uniform decided on, and which has been approved by the Lord Lieutenant, is a dark grey, with green facings and a broad green stripe down the sides of the trousers, with an appropriate cap.

2ND HAMPSHIRE ARTILLERY VOLUNTEERS.—A very numerous and respectable meeting of the members of the above corps was held a few days since at the Crown Rooms, Portsmouth. It was proposed by Mr. T. White, of Landport, and seconded by Mr. Frost, of Southsea, that "Dr. Miller, of Gloucester House, Southsea, be honorary surgeon to the corps," which proposition was carried unanimously. It was then proposed by Mr. Couch, of Her Majesty's dockyard, and seconded by Mr. A. Besant, of Portsea, that "Mr. Joseph F. Allnutt, of Mile End, be honorary assistant-surgeon to the corps"—carried unanimously also. The members then appointed a Finance and a Clothing Committee. It was further proposed that artizans and working-men be admitted as members, and entitled to retain possession of their uniform by the payment of a deposit of 10*s.*, and a weekly payment of 1*s.* 6*d.*, until the value of the uniform and yearly subscription be paid for. The contract price for the uniform, including all accoutrements, being 3*l.* 12*s.* 6*d.*, and the yearly subscription 7*s.* 6*d.* Daily drills will take place in a short time. Major Hall having received his commission from the Lord-Lieutenant of the county, the uniform may be ordered by the members immediately the clothing committee have made the necessary arrangements.

5TH HANTS VOLUNTEER RIFLES.—A placard has recently been circulated, dated Head-Quarters, Portsmouth, stating that "Two companies having been completed, immediate arrangements are being made for the formation of a third." The corps, as far as its present numbers are concerned, is progressing in efficiency. An excellent band has been organised under a regimental band-master, and it will appear on parade at the weekly drills. The two companies already formed are full, and all members joining for the future will be posted to the 3rd company, and will have the advantage of commencing drill together. Every facility is afforded to members who cannot conveniently pay for their outfit at once. The uniform, which is very simple and inexpensive, will be found to all members, on application to the council, on payment of 15*s.* per quarter.

KENT.

WOOLWICH ARSENAL.—The united force of Artillery and Rifle Volunteers formed at Woolwich, for the protection of the arsenal, exceeding 1500 men, being now fully equipped, assembled on Saturday for the first time in command of their respective commanding officers, Colonel Fullom, Colonel Anderson, and Colonel Parkyn. Each battalion, accompanied by their own band of 14 instruments, mustered in front of the department to which they belong, and, having performed a few preliminary movements, marched past.

BLACKHEATH.—On Wednesday evening an interesting meeting of the ladies and residents of Blackheath and Lee took place in the grounds of Captain R. H. Farnall, at Lee, for the purpose of witnessing the presentation of a silver bugle to the 3rd Company of Kent Volunteer Rifles, and which had been subscribed for by the ladies of the neighbourhood. The ceremony of presentation was performed by Mrs. W. S. Shove, who delivered a speech on the occasion. Captain Farnall returned thanks; and three cheers having been given for Mrs. Shove and the lady subscribers, and three cheers for the Queen, the proceedings terminated.

LANCASHIRE.

Early in June a grand Volunteer demonstration is to be held at Aintree, near Liverpool, on which occasion a silver bugle will be presented to the Liverpool Volunteer Artillery.

THE CUNARD COMPANY'S VOLUNTEERS.—The 11th Lancashire Artillery Volunteers (Cunard Company's Corps), Lieutenant-Colonel MacIver commanding, were on Wednesday inspected at Huskisson Docks, by Lieutenant-Colonel Morris, Inspector of Volunteer Artillery. The corps was put through several movements, and was highly commended by Lieutenant-Colonel Morris and the officers present for its efficiency.

MIDDLESEX.

WEST MIDDLESEX RIFLES.—At a meeting of the council of the above corps, presided over by the Lieut.-Colonel Lord Radstock, it was unanimously resolved—That Captain Compton, the senior captain, should be nominated and recommended to the appointment of major to the corps, and that Captain Torrens, late of the 23rd Welsh Fusiliers, be nominated captain of the 1st company, in the place of Captain Oliphant, resigned. A communication was read from the directors of the Great Western Railway, in reply to an application from Lord Radstock, consenting to erect a temporary platform at the junction with the West London Railway on Wormwood Scrubs, close to the practice-ground of the corps, and stating that trains should run at convenient periods, to be determined on, at the nominal fares of 2*d.* second class and 4*d.* first class, or return tickets 3*d.* and 6*d.* This liberal arrangement of the railway company will place the practice-ground of the corps within half an hour's march from head quarters. The butt and other buildings are now in progress, and will be completed in less than a month. It has also been determined to hold brigade field days at Wormwood Scrubs with the South Middlesex, Queen's Westminster, St. George's, and other rifle corps of the metropolis. The directors of the railway company will run special trains on such days for visitors at the same fares as the Volunteers.

SURREY.

FIRST SURREY RIFLES.—An unfortunate difference in this corps was brought before the House of Commons by Colonel French on Thursday evening. He asked the Secretary for War whether he had any objection to lay upon the table copies of any communication made by Lord Lovelace, the Lord-Lieutenant of the county of Surrey, to the War-Office in relation to the charges made by Lieutenant-Colonel Bouchier against Captain Rouse, of the 1st Regiment of Surrey Rifle Volunteers? Colonel Bouchier was not able to recommend for promotion to the majority the senior officer, Captain Rouse. Immediately that was known, Captain Rouse called a meeting of his company, and made every exertion to prevent the promotion of Lieut.-Colonel Bouchier. A communication passed between the Lord-Lieutenant and Captain Rouse, and the former, in utter defiance of all the rules and regulations in such cases, communicated directly with Captain Rouse and other officers inferior in rank to the Lieut.-Colonel, who afterwards wrote to the Lord-Lieutenant, complaing that he was communicating with officers of inferior rank, and observed that even copies of his letters had not been sent to him. Lieut.-Colonel Bouchier on obtaining a knowledge of what was going on, felt it his duty to prefer certain charges against Captain Rouse. Lord Lovelace, in reply, said "that the charges which he (Lieutenant-Colonel Bouchier) had intimated against Captain Rouse did not prove that his conduct was mutinous, insubordinate, and subversive of good order," and added, "assuming the charges to be correctly stated in your letter, I cannot see that there was any impropriety in his proceeding, and therefore I do not feel warranted in taking any further steps in the matter or in submitting it to the Secretary for War."

Mr. S. Herbert said all that he knew was that certain charges had been sent to the War Office against Lieut-Colonel Bouchier, and accordingly they were referred to three officers, who reported that they were established, and consequently, Lord Lovelace called upon him to resign his command. With respect to the charges against Captain Rouse, he had no knowledge of them, for the Lord-Lieutenant had not thought it right to forward them to the War-Office.

Colonel North said he hoped the right hon. gentleman would call upon the Lord-Lieutenant to report this matter to the War-Office.

6TH SURREY RIFLES. This battalion was inspected last Saturday at Esher by Major Drummond Stewart, who was highly gratified with the appearance of the men. They have been steadily at drill since last September, and the way they wheeled and marched did great credit to their gallant captain, Sir Henry Fletcher, Bart. The practice-ground has a range of 800 yards. The committee intend holding a general meeting for the purpose of augmenting this corps, and have offered a prize of a fifteen guinea Whitworth rifle: Sir Henry Fletcher has also given a twelve-guinea rifle; and the subalterns a ten-guinea cup, to be shot for in August. It is also intended to have foot-races and other sports. Altogether, this corps bids fair to become a popular one; and the South Western Railway have determined to issue cheap return tickets for the convenience of those members who reside in London.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, MAY 15.

Tower Hamlets Rifle Volunteers (No. 2)—The Rev. William McCall to be Honorary Chaplain; May 8.

7th Oxfordshire Rifle Volunteer Corps—William Wemyss Methven Dewar, Esq., to be Lieutenant; Charles Jacob Bullock Marshall, Esq., to be Ensign; May 12.

1st or Penllyn Company of Merionethshire Rifle Volunteer Corps—John Williams, Gent., to be Honorary Assistant Surgeon; Alfred Mortimer Stubbs, Gent., to be Paymaster.

2d City of London Rifle Volunteer Corps—George Andrew Spottiswoode to be Captain; William Spottiswoode to be Lieutenant; Richard John Courtney to be Ensign; May 16.

10th Durham Rifle Volunteers—John Joicey, Esq., to be Captain; Nathaniel Clark, Gent., to be Lieutenant; George Bolton, Gent., to be Ensign; Henry William Watson, Gent., to be Honorary Assistant-Surgeon; the Rev. John Mathwin to be Honorary Chaplain; May 12.

1st. Cumberland Artillery Volunteers—James Dees, Esq., to be Captain Commandant; Charles Fisher, Gent., to be First Lieutenant; Robert Jefferson, Gent., to be Second Lieutenant; May 7.

Memorandum—The 1st (Carlisle), 2nd (Whitehaven), 3rd (Kenwick), 4th (Brampton), 5th (Penrith), 6th (Alston), 7th (Workington), and 8th (Cockermouth) Corps of Cumberland Rifle Volunteers have been united in a Battalion for administrative purposes, with a Staff consisting of one Lieutenant Colonel and one Adjutant. The Battalion is numbered as the 1st in the said county of Cumberland, but each of the corps composing it will retain its present number and designation in the County Force.

Memorandum—The 1st (Kirkby Lonsdale), 3rd (Kendal), 4th (Windermere), 5th (Ambleside), and 6th (Grasmere) Corps of Westmoreland Rifle Volunteers have been united in a Battalion for administrative purposes, with a Staff consisting of one Lieutenant Colonel and one Adjutant. The battalion is numbered as the 1st in the said county of Westmoreland, but each of the corps composing it will retain its present number and designation in the County Force.

City of Bristol Rifle Volunteer Corps—Boddam Castle, Esq., to be Captain: John Pomersy Gilbert, Gent., to be Lieutenant; Thomas Barnes, Gent., to be Ensign; May 14.

Dumbartonshire Rifle Volunteers—1st Battalion—Captain John Murray Gartshore to be Lieutenant-Colonel; Sir George Hector Leith, Bart., to be Major; May 7.

Memorandum—1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, and 10th, Companies of Dumbartonshire Rifle Volunteers have been formed into a Battalion, to be called the 1st Battalion of Dumbartonshire Rifle Volunteers.

Renfrewshire Artillery Volunteers—3d Company—John Neill, jun., Gent., to be Second Lieutenant, vice Arbuckle, resigned; May 16.

1st Nairn Artillery Volunteers—Alexander Findlay, Esq., Lieutenant-Colonel, late of the 3d West India Regiment, to be Captain; Donald Macleod, Gent., to be First Lieutenant; Alexander Mann, Gent., to be Second Lieutenant; April 14.

1st Nairn Rifle Volunteers—Augustus Clarke, Esq., to be Captain; Archibald Campbell, Esq., to be Lieutenant; James M'Pherson, Gent., to be Ensign; April 14.

6th Kincardineshire Rifle Volunteers (Netherley)—Horatio Ross, Esq., to be Captain; Mr. Robert Walker to be Lieutenant; Mr. George James Walker to be Ensign; May 7.

[Advertisement.]—Mappins' Rifleman's Knife, 12s. each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by Mappin Brothers, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

The Volunteer Service Club has been opened. The premises consist of those rooms formerly occupied by the Guards Club, and lately by the Thames Yacht Club, in addition to the grand saloon and grand staircase of the Wellington, and billiard-rooms, &c. Members will be liable for their annual subscriptions only, which, for members residing within a radius of 60 miles, is to be six guineas; and, for members residing beyond that limit, 3 guineas. There will be no entrance fee.

Captain Kennicott, of the 1st Company Cinque Ports Artillery Volunteers has received from the War Department seventy-five carbines (old pattern) for the use of the company in carbine drill, and four swords for the sergeants. Drill will be commenced forthwith at the Folkestone Battery, where the company have been exercised in great gun drill for some weeks past, and in which the men have attained considerable efficiency. The company are now waiting an inspection by the field-officer appointed for that purpose, previously to being exercised in shot and shell practice.

Lieut.-Col. Percival, late of the British German Legion, having been appointed Captain of the 5th Company Cinque Ports Rifle Volunteers, has assumed the command of the corps, and is actively engaged in promoting the drill of the company, which bids fair to become an efficient body of men. The uniform adopted is one precisely similar to that of the Victoria Rifles. By the standing orders recently issued the company will have to assemble every Thursday morning for dress parade from 7 to 8 o'clock. This very unusual time for dress parade, particularly for Volunteers, has taken the company by surprise, they imagining that it would take place, as in almost all other corps, in the evening. It is to be hoped the arrangement will be altered to suit the wishes of the majority of the corps.

THE VOLUNTEERS ON GUARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The answer to your correspondent "Centurion," who complains of not obtaining admission to Holland Park is a very simple one. The Volunteers obeyed their orders. All in uniform, or who were known to belong to any branch of the Service, were passed in; and had "Centurion" been himself on duty, he would have found that to admit everybody who called himself an officer in mufti, or an honorary member of some Volunteer corps, or a gentleman, would have practically amounted to withdrawing the guard. As to discourtesy, there was none; but if a "Captain in Her Majesty's Regulars" imagines that crowds are to be kept off by bland gentlemen in white kid gloves, he is much mistaken.

I hope it was not "Centurion" who attempted to force the guard.

One who was There.

VOLUNTEER DRILL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—After the letter from Colonel Lysons which lately appeared in your paper, the Volunteers can no longer be in doubt as to "which is the right Drill-Book?" It is to be regretted that the letter was not published many months ago, as the Volunteers have been victimised by a set of book-makers, who, by judicious puffing have made the public believe that they are infallible authorities on the subjects on which they write. One gentleman in an advertisement actually cautions Volunteers against buying the Government Manual, and recommends his own compilation as the only safe guide! Is it not surprising, sir, that the Assistant Adjutant-General should still be allowed to hold his appointment, after having been condemned by so great an authority as the author of "The Rifle, and How to Use It?"

I am, &c., Cutbore.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Feeling convinced that I am but one among thousands of Volunteers who enter the drill-room or parade-ground with a strong feeling of regret that we have not previously been made aware of the new movements it may be intended to put us through, I have ventured to trouble you with this letter, in order to bring the matter under the special notice of the officers commanding corps of Volunteers. The simple course which I think should be taken is this:—Several days before each drill, the commanding officer should inform his subalterns of the intended movements, and they again should communicate with the sergeants attached to their subdivisions, while a placard placed in the drill-room or other convenient spot, should call the attention of the private members to the parts and sections of the "Drill and Rifle," or field exercise instruction books, where the evolutions it is intended to put them through are described. A new movement thus prepared for would be comparatively easy of accomplishment, and the after comparison of theory and practice would, most probably, enable the Volunteer, on the second trial, to go through it without any hesitation or difficulty. Members unavoidably absent could, by the means pointed out above, greatly compensate themselves and their corps for their absence; and there is no doubt that they would do so, for one of the first questions an absentee now meets you with is "Well, did you do anything new last night?" and, upon this, usually follows an explanation more or less clear, according as the Volunteer who was present apprehended what had been done.

Trusting that you will either insert this letter, or, what would be far better, urge in your own way the adoption of some such course as I have pointed out, I am, sir, &c.,

M. O. O.

A VOLUNTEER FLEET!

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Will you allow me to give a practical suggestion, and, moreover, to make a practical offer? If the Government will agree to send to Liverpool one of the condemned gunboats, which, though possibly not fit for foreign sea-going service, would answer very well for our river use, I will undertake to provide a crew of Volunteers from my ship-yard, consisting of ship carpenters and riggers, who, under proper instruction, will very soon be able to work the guns and the boat. I can also provide engineers who will work the engines and see that they are kept in proper order. I believe if my offer be accepted it will be followed by many others engaged like myself in the shipping trade. Thus, sir, we should soon have a right earnest Volunteer Naval movement. Of course the Government should provide the materials to keep the boats in fair repair; and I do not think I am going too far when I say I should be surprised if when I appealed to my proposed crew of ship carpenters and riggers, and engineers, they did not, one and all, volunteer their labour to keep the vessel in repair. It would be of course necessary that there should be a gunnery instructor on board, and an A. B. who would act as ship-keeper.

Occasional help and instruction from the gunnery ship at Liverpool might be of use. Details, however, can be easily settled, if the principle of my suggestion be approved, and my offer accepted.—I am, sir, &c.,

Ship-yard, Liverpool. Josiah Jones, Jun.

ENGINEERS OF THE NAVY WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Month after month, the masters, engineers, and paymasters waited, with a patience truly surprising, for the reforms which a liberal (?) Secretary had voluntarily admitted they were justly entitled to. How their patience has been rewarded and their claims satisfied by the noble lord, who so freely censured his predecessor for neglect, may be judged of by the letters you have already published from masters and paymasters. Will you kindly permit me, an engineer, to join in the chorus?

The Admiralty confess to a difficulty in obtaining a sufficient supply of engineers for our rapidly-increasing steam navy, and that the difficulty is not a trifling one is proved by the very large proportion of indifferent candidates they accept, and the paltry deceptions practised by the Admiralty agents when they meet with an eligible victim.

The difficulty arises from two causes—insufficiency of pay, and the very anomalous and undefined position which engineers occupy. The Warrant does not even touch the latter grievance, and the former is considered removable by an increase of 2*d.* per day to Third, 7*d.* per day to Second, and 4*d.* per day to First Assistants.

What may be expected for 4*d.* is usually considered as very unsatisfactory, and I believe the Admiralty will not prove an exception to the rule. So much for assistants.

Chief Engineers on promotion are insulted with an increase of 6*d.* per day, but, and here doubtless the liberal Admiralty were astonished at their own munificence—they are allowed to count towards full and half pay positively four years out of a possible servitude of more than thirteen; and they are still to rank with, but after, masters, who also rank after the lieutenant, who may possibly be under twenty years of age, and of only one day's standing.

In your Gazette of April 14 you say that "an alteration has been effected in the rank of Inspectors Afloat." If it has, it is only another specimen of the way in which engineers are obliged to push themselves through any ambiguous circular to a position which may or may not have been intended for them. Certainly I cannot see in the late Warrant any direct reference to the rank of engineer at all, inspectors afloat, or others; and there are numbers of our kind executive friends who will decide that it effects no such alteration. Unfortunately, although your paragraph may take the common-sense view of the affair, the Army and Navy Gazette is not an authority with the Admiralty.

From the amount of indignation which the appearance of their lordships' circulars has caused, it is evident that much more must be done before the claims of the various classes can be considered as settled.

Trusting that you will kindly insert the foregoing remarks as an evidence that the engineers also are greatly dissatisfied at the late Warrant, I am yours, &c.,

A Naval Engineer.

Royal Geographical Society.—A very crowded meeting of this Society was held on Monday evening; the Earl De Grey and Ripon, President, in the chair. Among those present were Sir Roderic Murchison, Lord Ashburton, the Danish Minister (M. de Bille), Admiral Van Dockum, Generals Portlock and Monteith, Sir Thomas Phillipps, Sir Thomas Fremantle, Sir Charles Fellowes, Governor Edward Eyre, Sir Justin Sheil, Sir E. Belcher, the Right Hon. J. Stuart Wortley, the Earl of Sheffield, Captain J. Falbe, of Copenhagen; the Hon. Mr. Buchanan, United States Minister in Denmark; Mr. J. Bigelow, U.S.; Count Strzelecki, Mr. Croskey, Mr. J. Crawfurd, Mr. Saward, Mr. Le Breton; Captains Robinson, Murray, R.N., Harrison Walker, and Allen Young, R.N.; Mr. Monckton Milnes, M.P., Mr. Warre, M.P., Mr. Danby Seymour, M.P.; Drs. Rae, Hodgkin, Bigsby, Bright, Bennett, Ogle, Shea, Dobie, W. H. Russell; Major Stewart, Mr. Lionel Gisborne, Mr. A. Keith Johnson, Mr. Oliphant, Mr. St. Leger, Hon. G. Barrington, Mr. Howard, United States; Messrs. Forrester, White, and Gassiot. Messrs. Rowland F. Jermyn, Thomas Michell, and B. Coulson Robinson were presented upon their election. Colonel James Molyneux Caulfield, the Rev. J. W. Clarke, Captain J. A. Grant, Lieut.-Colonel Edward Mackirdy, Lieutenant Everard Milman, Captain Moncrieffe, Captain John Pook, Mr. Alfred Denison, Mr. Edward M. Elderton, Mr. Thomas Fraser, Mr. Henry Kendall, Mr. Augustus Henry Smith, Mr. John Templeton, and Mr. Robert Walker, M.D., were elected Fellows. The papers read were:—1. Mr. Thomas Hopkins, Alderman of Manchester, "On a Possible Passage to the North Pole." The author proposed that an attempt should be made to reach the Pole by proceeding to the north, between Spitzbergen and Nova Zembla. He presumed that as Parry met with a southerly current in the meridian of Spitzbergen, that one in a contrary direction will be found farther to the east, and from the prevalence of south-westerly winds asserts that it is his opinion high land will be found in the neighbourhood of the Pole. 2. Colonel T. P. Shaffner then read an interesting paper on "The North Atlantic Telegraph, *vid* the Faröes, Iceland, and Greenland," which gave rise to some discussion. The statements of the paper were exceeding bold, particularly as regarded "soundings;" but Mr. Lionel Gisborne, who raised some objections founded on magnetic considerations, failed to substantiate his opposition.

THE REGENT'S ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The letter of your 52nd Correspondent reminds me of the reply of Voltaire on the petty triumph of his priestly *critics* over his occasional errors in chronology.

I received the letter from Sir C. Napier in 1848, or 1849, had the pleasure to be personally known to him, and he was the honoured guest of my nearest relative upwards of a week soon afterwards.* But let that pass. It does not signify a rush to the point at issue whether Sir Charles were a teetotaller, or I talk teetotal twaddle. Suffice it to say, I am not, and never was, what is called a teetotaller, which is, I think, in most instances, a merely spasmodic attempt at temperance. The question before us is the justice and propriety of applying the Regent's Allowance to the messing instead of the wine, and thus enabling the poor, ill-paid subaltern, equally with your recusant teetotaller, to obtain its benefit.

The grant is at present a practical solecism. It is given with the avowed intention of enabling him to do so; and it is equally matter of notoriety that none but the senior officers, or those possessed of private resources (at all events in the regiments of infantry) enjoy the boon. I assert that in my time, and I believe it to be the case now, that at least one-half or two-thirds of the officers habitually abstain from the Regent's Allowance, not as twaddling teetotallers, but because they cannot afford to pay the extra money requisite to enable them to drink the same. The money thus saved goes into the mess-fund, and is laid out eventually in ornaments for the mess-table; so that the poor subaltern pays practically a double mess-subscription. Her Majesty's regulations in my time most judiciously gave power to the commanding-officer to lower the mess subscriptions when the mess-equipments were complete. I admit that such a step is generally impracticable; but that is no reason why in any case all extra support should not be administered with the strictest equity, and not be derived from indirect injustice.

I am, &c., G. O.

* I quoted from memory, and the figures may be inaccurate, but the moral facts I stated are correct.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

ROYAL GEOGRAPHICAL SOCIETY.—The ANNIVERSARY will be held at Burlington House on MONDAY, the 28TH INSTANT, at 1 p.m. The DINNER will take place at the Freemason's Tavern at 7 p.m. precisely. The President, the Earl de Grey and Ripon in the chair.

MR. ALBERT SMITH'S MONT BLANC IS NOW OPEN EVERY NIGHT (but Saturday) at Eight o'clock; and TUESDAY and SATURDAY AFTERNOONS at Three o'clock.—Stalls, 3s., (which can be taken at the Box-office, Egyptian Hall, daily from eleven till five); area, 2s.; gallery, 1s.

"EASTWARD HO!" and "HOME AGAIN!"—These two interesting Pictures, painted by HENRY O'NEIL, Esq., A.R.A. (representing the Departure of Troops for War and their subsequent Return), are now being EXHIBITED TOGETHER, for the first time in London, at 191, Piccadilly, from Ten till Six daily, admission Sixpence.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

EXHIBITION OF HOLMAN HUNT'S PICTURE OF "THE FINDING OF THE SAVIOUR IN THE TEMPLE," commenced in July, 1854, is now ON VIEW at the GERMAN GALLERY, 168, New Bond Street, W., from Nine till Five. Admission, One Shilling.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.
"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.
Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.
The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.
Patentees—RUDALL, ROSE, CARTE, & CO., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4 4 0
Tenor Drums, 20 inches, transparent heads	2 7 0
Brass Side Drums, 14 inches	1 8 0
Regulation Drums, brazed shell, as supplied to the Army	2 2 0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2 5 0
Oak (polished) Side Drum, 14 inches	1 5 0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0 8 6
D or E flat ditto	0 6 6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1 1 0
No. 2, Light Infantry Model	1 8 0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

NOTICES TO CORRESPONDENTS.

Does "AN OLD PENINSULAR" cite the cases in his letter that, by publishing them, an effect will be produced which shall tend to counteract the curious influences which, he declares, have made "the British Army a byword on the continent?"

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 19, 1860.

Mutinous fleets in the Channel and Mediterranean, a profusion of rotten gun-boats built to order, brand-new liners already shaky in the stern-posts, together with long lists of unemployed and discontented naval officers, and all for the small charge of 12,802,200*l.* Such would be the statement the representative of the Admiralty would be obliged to make to the Commons, did he take the advice recently offered to him by an ex-First Lord when he naïvely urged the expediency of telling the truth, at least in the case of the gun-boats; thereby exemplifying the bent of the official mind, namely, that, generally speaking, the duty of the Commons was to find the money, and not to be inquisitive as to the result.

With a delicate regard for the extreme sensitiveness of the nation, we have no longer ugly names for ugly things; mutinies become emeutes; rotten gun-boats are merely defective; mortar-boats, unfit for firewood, are consigned to oblivion; shaky liners are not to be mentioned; naval officers are notorious grumblers, and a garrulous press causes an infinity of harm; hard-working public servants must not be calumniated; pious contractors are not to be sacrificed to fraudulent workmen; and, above all things, Government inspectors cannot be suspected of making things pleasant.

But when Goldner's potted corruption had been condemned in all quarters of the globe, and an Arctic expedition had returned, whose existence had been perilled by its issue, there were yet not only Admiralty apologists found for the fraudulent contractor, but he received a subsequent contract for 1,000,000 lbs. more of what had been amply proved to be only the offal of Wallachian slaughter-houses, and which gave rise to the emphatic remark of *Punch*, "That where there was so much corruption, he thought there must be a little bribery."

Now, the least that could be expected from an expenditure of eleven millions of money on a marine would be, that the materiel should be efficient, that the personnel should be well disciplined and contented; and if not, whose fault is it?

The nation, who are ready to vote any sum for an efficient Navy: or those in whom they blindly trust for an efficient and honest expenditure?

The past experience of the Admiralty demonstrates: that they never tell the truth but by accident or the disingenuous answers of an inexperienced official; that by their patchwork system they have created cumbrous lists of officers they cannot employ; that the men, from their continued broken faith, have long since ceased to believe in them; that the merchant seamen doubt the honesty of their proclamations; prize-money, that silver hook, with which to secure sailors, has become a myth—that which is due for the Black Sea and Baltic, for Canton and the Peiho, being still unpaid; that they have alternately coerced and alternately petted the men, at one moment encouraging them to take the bit in their teeth as regards leave, and the next sending a hundred to Winchester for attempting the same thing; that they have disgusted the officers, who now do not know whether to obey the Lords above them, or the crews beneath them; and have finally succeeded in making the marines mutiny, who hardly know whether to allow themselves to be knocked down on sentry, or whether they will be supported if they resist.

Finally, with all branches of the Service unwilling and discontented; with the patronage of the Navy vested and farmed by a few amphibious families, with an unparalleled lavish expenditure, and the most unsatisfactory results—what is to be done?

Are we to pour more millions into the lap of these, the temporary dispensers of the nautical patronage of the country, who dwell in a sepulchre which will not even take whitewash; or shall we have a Committee of the Commons to inquire into the so-termed government of the Navy, with a view of remodeling that irresponsible system at present represented by the Admiralty Board, Whitehall?

Not very long ago some public economist, more zealous for retrenchment than discriminating as regards the means of bringing it about, proposed the abolition of the colonelcies of regiments. He did so on the ground that they were sinecure appointments, and that the public got no value whatever for the 1000*l.* a year which each of them cost. The proposition was, however, scouted by the public; and its author apologetically retreated from it, when it was explained that these offices were in reality the first-class rewards of distinguished service, that they were conferred upon general officers in the evening of life, in recognition of gallant deeds, and of good service rendered to the state in their younger days, and that beyond its intrinsic value there was a grateful appropriateness in the form of the reward, inasmuch as it often was made the means of placing old officers at the nominal head of regiments in which they had their first commissions, or the uniform of which was, in bygone times, associated with the dangers and the triumphs in which they had borne honourable part. The zealous economist blushed when he was asked to read the record of the achievements of these old officers, when he saw before him, told in simple words, the story of forlorn hopes led, of maimed limbs and hideous gashes which did not prevent their owners struggling on to the point of victory. The defence of the institution was complete.

If we were obliged to argue the question now against any rigid disciple of the late Mr. Hume, we fear we should have but little to say. The Member for Lambeth would only have to mention the word "Grey" to dispose of any argument not based upon the most specious grounds. In the appointment of General Grey an outrage has been committed upon every real soldier in the Army, and an act of direct injustice done to every general officer upon the list who has good service to show. Although the appointment is not alone of its kind, yet it is the worst; because, though General Arbuthnot, General Beresford, and General Breton have no war services to show, they were yet serving as soldiers, and the two latter were, at all events, undergoing the risks and inconveniences of tropical service at the time of their appointment. We do not say, as long as there are generals or even colonels on the list who have distinguished themselves before the enemy, that this plea amounts to a justification. It is only a palliation which removes the case of these officers some two or three degrees from that of General Grey, who has not worn a soldier's coat for about a quarter of a century, and who has discharged no duties more associated with the calling of a soldier than those of Equerry to Her Majesty, and Private Secretary to His Royal Highness the Prince Consort.

We have not read in public, or heard in private, one word in justification of this unfortunate affair. It has indeed been suggested to us that General Grey was the senior on the list of those officers from among whom the colonels of regiments are selected. He is so; but his seniority is fictitious; for owing to his rapid rise to the rank of lieutenant-colonel, to which in his day the ascent was steady and unbroken, General Grey stands before men who were fighting in the Peninsula as captains and field-officers when he was in his nurse's arms. But this pretence of an argument about seniority is at once disposed of. In the same *Gazette* with General Grey, Sir John Inglis was posted to the colonelcy of his old regiment, the 32nd. Now, Sir John Inglis is so junior that he has not yet even been placed upon the fixed establishment of General officers, and he has been selected over the heads of some ninety who are his seniors, both on the list and as regards their whole period of service. If the seniority excuse, therefore, be of any value, it only serves to convict the Horse Guards of gross injustice in the cases of Sir John Inglis, Sir James Schoedde, Sir Hugh Rose, Lord Clyde, and Sir John Pennefather, who have been taken very much out of their turn to fill colonelcies. Seniority, no doubt, has been generally held of some account in disposing of regiments, but it was in the case of officers of pretty equal standing, or who had good war service to show. In such a case, seniority has been made the deciding point, although, like General Grey's, it might be seniority on the list, not real length of military service. But this seniority theory, unless in cases of this kind, where claims are nearly balanced, and something must be thrown in to turn the beam, is unwholesome and unjust. Between long and distinguished service in the field and service at Court, it is needless to say that it ought not to be entertained for one moment.

Digitized by Google

A very near and very distinguished relative of General Grey advocates the absolute control of military affairs by a responsible minister; because otherwise the great maxim of the constitution might be violated, which tells us that the king can do no wrong. Like Earl Grey we should be sorry to see any act done in the name of the Crown for which some minister, responsible to Parliament and to the country, could not be called upon account; and we cannot believe that the highest personage in the realm, who has always shown such graceful consideration to those who fight the battles of the country, would allow any partiality for a faithful respected member of her household to be made the means of inflicting a wrong upon old soldiers who have maintained the honour of the British arms all over the world.

The 3rd Buffs, of which General Grey has been appointed the colonel, is a historic regiment. It is almost the oldest in the service, and in the brilliant "procession of victories," recorded on its colours, the names of "Albuhera," "Punniar," and "Sevastopol," attest the nature and variety of its services during the present century. Surely, in giving it a head, an officer could have been selected who, if not identified with the corps, might yet be associated with some of those great achievements of which it boasts. There is no difficulty in finding one on the list. General Orlando Jones "embarked for the Peninsula in 1808, and served through the whole of that and the following campaigns without having been absent from his duty for a single day." General John Cox wears ten clasps, and the record of his services with the old 95th reads like a complete list of all the gallant deeds that were done from the first landing of a British soldier in Portugal to the occupation of France. Like him General Jackson bears on his breast ten clasps for his Peninsular service; General M'Pherson wears eight of the same honourable distinctions, besides memorials of active service with Sir Charles Napier in Scinde and at the head of a brigade in the Crimea. General George Bell has six clasps for the Peninsula, was highly distinguished during the rebellion in Canada, has the Indian medal for Ava, and was wounded in command of a brigade in the Crimea. General Macarthur has seven clasps for the Peninsula, and much colonial service. Generals Freke Williams, Pringle Taylor, Macdonald, Wright, Sir Thomas Franks, Sir Edward Lugard, Lockyer, Sir Robert Garrett, have all done valuable and distinguished service as soldiers; but when the colonelcy of the 3rd Buffs was vacant, General Grey, who was junior in the Army to almost every one of them, and who had no service beyond the ordinary routine, was selected for a military reward in preference. It is high time that Parliament and the country should be told whether or not the colonelcies of regiments are intended as rewards for distinguished military service. If they are, it behoves us to see that they are not diverted, as in the case of General Grey, from their proper purpose. If not, it is clearly the duty of Parliament to abolish them, for in that case they are simply 135 needless sinecures.

While the spirit of insubordination, which has lately manifested itself in some of Her Majesty's ships, has awakened misgiving as to the quality of our seamen, there has been a succession of courts-martial on naval officers, which appear to have attracted little attention. The officers of the Navy, as a body, have indeed by the honourable discharge of their duties, not to speak of their intrepidity and devotedness, so won the confidence of the country, that naturally a few instances of default make no unfavourable impression. This vast force has been mustered, like our gun-boats, in haste and from every quarter; and that it should include some very ordinary seamen and two or three indifferent officers, a little unseasoned timber and a sprinkle of short bolts, is no marvel. A few blemishes in the gun-boats would have been excused: it is their utter rottenness that has brought them to grief. Our fleets, on the contrary, minister at once to our power and our pride. We see them grow every day in strength and efficiency, and know they are making a corresponding advance in organisation and discipline. The interests of the Service, particularly under the new conditions that have been introduced, claim the greatest care in carrying out these objects; and, above all, it must be remembered that their attainment depends on the temper, judgment, and example of the officers.

By the exercise of such influences, the famous Sir Alexander Ball brought to the highest state of discipline a crew composed of the dregs of the Irish seaports; so powerfully impressing them by his conduct, that when he was once compelled to inflict corporal punishment, the offender, after receiving the castigation unmoved, went in tears to ask his pardon for having driven him to such a step. Late courts-martial have brought out that, in some ships, punishments are now not only inflicted without judgment, but are not even entered in the official returns. In the Siren, there seems to have been a general disorganisation, extending from the cabin to the forecastle, and setting every man's hand against his shipmate. The commander absents himself for several days; the first lieutenant orders irregular punishments, taking care they are not recorded in the register; the quartermasters get drunk; a midshipman behaves with a freedom that would have astounded Mr. Midshipman Easy; the commander and the first lieutenant have a difference, which in America would certainly have produced a "difficulty," and here leads to the first lieutenant being kept ten months under arrest, while every word he has dropped in the ward-room among his brother officers, and "over a glass of grog," is raked up to found charges against him; and the officers are all rendered distrustful of each other, making the vessel, in short, what in nautical phraseology is described as "hell afloat." The upshot of the embroglio is, that Lieutenant Graves, the first lieutenant, is brought to a court-martial, and receives a reprimand; while no blame is imputed to Commander Balfour, who, as he is said to have good friends at the Admiralty, will doubtless soon be in a position to carry on the same system in another ship.

The Lynx, a steamer on the Cape station, is worthy to pair with the Siren, and, indeed, presents a state of things more characteristic of an American merchantman than a British ship of war. By the last mail we learn that her commander, Lieutenant Henry Berkeley, had been brought to a court-martial for his alleged brutal treatment of the crew, and that the surgeon and the paymaster were to be tried for drunkenness. The court-martial on Lieutenant Berkeley reads like a chapter in "Two Years before the Mast." The gallant officer's code for maintaining discipline was extremely simple, comprising only a word and a blow. The boatswain on board this happy craft seems to have had no vocation, or, at any rate, not to have been overworked; for Lieutenant Berkeley, according to the charges brought against him, was his own lictor, seizing one man by the throat, giving another a kick, and throwing something at a third—one Jack Pann, whose head was broken thereby. This, however, as he was a Krooman, and the skulls of that race are proverbially thick, seems to have been considered so improbable, that the charge was declared not proven. After an investigation, extending over eight days, Lieutenant Berkeley was found guilty of having transgressed the Admiralty regulations by inflicting irregular punishments, and carrying them out without warrant, and, as the penalty of his offence, was sentenced to "be reprimanded, and admonished to be more careful in future."

Naval jurisprudence is evidently in need of a fillip, if fairly expounded by these courts-martial. It would seem to be based on the old-fashioned notion of having one law for the commander and another for the crew, considering

> "That in the captain's but a choleric word
> Which in the soldier is flat blasphemy."

But the balance is struck the other way by the public, who throw the greater odium on the superior. Everyone knows how easy it is for a sailor, by an oversight, by a little excess in his potations, or a little delay on shore, to commit a breach of discipline, and that no such offence goes unpunished. Who would establish a more lenient code for the cammander? It cannot be pretended that the same rigour has been exercised in the case of Lieutenant Berkeley. We are told, the sailor should be ruled with a hand of iron in a glove of velvet, but the hand was ungloved on board the Lynx! Nevertheless, Lieutenant Berkeley, who is found guilty of abusing the power intrusted to him, is not removed from his command, but remains in charge of the crew he is declared to have ill-used, and some of whom have given evidence against him. Of course he laughs at the reprimand, which, in fact, is only a phrase, being never carried further; and he may be indifferent to the good opinion of his superiors while he possesses the Berkeley interest at the Admiralty. But such cases, in the long run, provide their own remedy. They throw more light on the interior of the Navy than any Royal Commission; and the Balfours and Berkeleys, by the disorders they occasion, are the pioneers of reform.

We have had occasion more than once to point out the extreme credulity of our contemporary the *Moniteur de l'Armée*, in believing reports invented by some special mechanism in reference to occurrences in India, where the *Moniteur* persists in thinking we are still fighting formidable bands of rebels. Very lately, however; M. Baudouin, who is the high priest of these delusions, and who works the mechanism to which we have alluded, took occasion to fortify his assertions by pretended references to "My Diary in India," written by the Special Correspondent of the *Times*, during the rebellion, in which the words and sense of several passages were either purposely garbled or ignorantly perverted with the view of showing that English officers and soldiers, as a body, approved of the acts of cruelty of which some of the native troops were guilty, and of an isolated instance of barbarity which was reprobated and condemned wherever it was known. The author, on seeing these remarks, wrote to M. Baudouin, calling his attention to the real facts of the cases which he cited, and hoped that some attempt would have been made to rectify the errors he pointed out; and he took occasion to observe that war—above all, a war of castes and races—is followed, if not attended, *pari passu* by acts not approved of by Christianity or civilisation, as Marshal Pelissier, Duke of Malakoff, could testify from his African experiences. M. Baudouin has not replied to that letter, nor has any attempt been made to correct the misrepresentations which he inserted in the *Moniteur de l'Armée*.

In another column will be found a letter signed Josiah Jones, Junior, which we recommend to the attention of our friends at home and abroad. On the latter the hint will not be lost. We wish we could impress the matter with equal force on the Admiralty. Mr. Jones is a Liverpool shipbuilder, and in his letter he makes a proposal to the Admiralty, which is most creditable to his public spirit, whether my lords accept it or not, and which is also indicative of the energy and force which prevail amongst our race, although many a *μαντὶς κακῶν* is crying "Woe! woe! unutterable woe is your portion!" from morning till night. "Give me one of your old gun-boats or a new one that's not fit for sea" (alas! my lords have many of them and to spare!), says Mr. Jones, "and I'll provide a crew of Volunteers for her who shall work the guns and the gun-boat; who shall keep the latter in repair, and who shall act as engineers and take care of the engines. All I ask from Government is one A.B. as a shipkeeper, and a gunnery instructor with such help as you can lend us. I'll find the men!" That is well said, Mr. Jones. There my Lords of the Admiralty, there is the keel laid of a Volunteer fleet, or of a Volunteer unpaid reserve, if you like to go on with the rest of the craft! Mr. Jones tells us he thinks many others engaged in the shipping trade will follow his example. A letter will find him by the simple mechanism of the post, and we sincerely hope that the offer thus made will be accepted, or that some notice will be taken of it by those who are deeply interested in contributing every element of strength to the naval forces of Great Britain at this moment, which shall result in forming a Volunteer Service for our ports and rivers in addition to the existing organisation, and its *arida nutrix* the Royal Reserve.

We have heard Mr. Ricardo's name mentioned for the Chairmanship of the Royal Commission to inquire into the cost of building our ships. It is stated that "My Lords" do not find it an easy matter to select the professional members of the Commission.

We understand that the tendency of the recent evidence taken before the Committee on Military Organisation is strongly in favour of vesting the supreme authority over, as well as the responsibility for the conduct of the military administration in the Secretary of State, assisted by competent professional advisers in the shape of a Board like the Admiralty.

Sir Hugh Rose is formally appointed Commander-in-Chief in India, with effect, from yesterday; and Sir William Mansfield becomes Commander-in-Chief at Bombay from the same date.

The Queen's Birthday has been made the occasion of a large batch of promotions and new appointments to the Order of the Bath, which appear in the *Gazette* of last night. Among them are several members of the United Service, as well as many Indian officials, who rendered valuable service during the recent crisis in the East.

VOLUNTEER SERVICE CLUB.—The inauguratory dinner of this club, which has been recently established for the especial use of members of the Volunteer Service (whether officers or privates), took place last evening at their new club-house in St. James's Street, a building possessing unrivalled appliances for the purposes of a club, and singular advantages of situation, with a world-famous reputation arising from its former appellation of "Crockford's." The club has been launched under the auspices of a Committee which includes all the leading members of the Volunteer Service. The club already numbers more than 300 members.

RED FACINGS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your Correspondent "G." asks by whose permission certain Volunteer corps have assumed the red facings, which he asserts are the especial distinction of royal regiments. In the firstplace, let me inform "G." that if he had carefully studied his Army List, he would have found that blue, and not red, is the colour of the facings of royal regiments of infantry—*vide* the 1st, 2nd, 7th, and 42nd Regiments, &c., all of which have blue facings, while the 33rd and 53rd, which are not royal regiments have red facings. In the second place, let me inform him that the Lord-Lieutenant of each county determines the uniforms of all Volunteer Corps in his county.—I am, &c., RED FACINGS.

THE STATE OF THE SERVICES.

No. 1.—DESERTION.

The numerous desertions from the Army and Navy force upon us a reconsideration of the terms upon which we expect both arms of the Service to be maintained in efficiency. We must not forget that both Services must rely upon volunteers to keep up their strength, and that therefore to be on a healthy footing they must be popular. Nor must we overlook the fact, that a great advance in civilisation has ameliorated the condition of the Army and Navy, as well as the other institutions of the country. Soldiers and sailors have neither the rough privileges of former days, nor are they subjected to such harsh and arbitrary treatment. It may even be said that it is entirely a man's own fault if now he is subject to flogging; but while the generally well-behaved are thus secured against the chance of extreme punishment for occasional offences, at the same time no general latitude is allowed, either by the civil magistrate, or in either branch of the Service, for brutal conduct which, in days not very remote, would have been winked at, as almost to be sanctioned under the usual licence conceded to soldiers and sailors.

Such being the case, the irregular members of society the scapegrace—the ne'er-do-weel, and drunkard—have no longer the same inducements as formerly to enter the Army or Navy. The country cannot rely upon many recruits from this source; and, to say truth, the Service is better without them. Every attention is now paid to the elevation of the character of our soldiers and sailors, to their mental improvement, their professional advancement, their religious and moral well-being. They are expected to join the Service on rational grounds, with the promise of kind treatment and good pay, with reward and promotion for merit, and pensions for length of service; and not that they may give a lawless swing to vicious habits, and live what was madly sung as "the short and merry life" of the soldier or jolly tar. It is for these short-and-merry-lifed fellows only that the halberds and triangle are still sometimes heard of.

But it may be said that these bad and irregular characters still exist to a considerable extent in the Army and Navy; so much so, that even flogging has been evidently unwillingly retained as still a necessity for their correction. This must be admitted to be true. Indeed, this fact, and the numerous desertions to which we have already adverted, have together contributed to guide us to a conclusion as to what is defective in our present system. In our opinion, we have yet retained certain temptations to bad fellows to become soldiers and sailors—and sometimes both in turn for a time. We have omitted to render the Queen's Service so really well-paid and advantageous in other respects, that to be obliged to leave it would, of itself, be regarded as a severe punishment.

We know not how long a soldier's pay has been "a shilling a-day," or less. Certainly the pay of the soldier, though improved, has not been increased in proportion to the rise of wages among intelligent artisans. The wages of agricultural labourers, it may be said, have, however, been kept low, and from that class a great proportion of our red coats are raised. True, but the soldier soon changes from the clod-hopper, not merely in his gait and demeanour, but in his mental condition and qualifications for earning more; and no man who knows and feels he is underpaid will ever be content. The sailor, too, in a Queen's ship, is notoriously paid at a lower rate of wages than merchant seamen. So, in order to make amends for the low rate of wages in the Queen's Service afloat and ashore, a system of bounty-money has been adopted to tempt men to leave the more profitable walks of labour, and by which they are induced to enlist in haste, to repent at leisure, and—desert. "Springes to catch woodcocks," baits for gudgeon, temporary bribes to induce foolish men to make a permanently bad bargain,—anything, in short, but an advantageous and rational engagement, will serve to describe such a system! Discontent and desertion are simply its natural corollaries; and we suppose the only thing that will be attempted to be urged in its favour is its economy. But on this point also we shall venture to join issue with its advocates. If cheap, it would still be objectionable: but it is not even cheap, as we shall endeavour to prove. Even were it so, upon a short-sighted estimate of the actual cost per man per annum, that would not now recommend it; because the result is, at the present moment, the Services are not very popular; and if in the hour of trial our Navy fails, a dark day will it then be for England, and for the whole civilised world.

We cannot hope to deal with a question of this complicated nature in an article or two. We cannot denude it of its dull character in some respects. But the importance of the subject and our character as a Service journal will justify our going into the matter thoroughly, nay, renders this to be our duty.

In the first place, then, as regards Bounty Money. What are its notorious effects, as seen every day? Under the influence of drink a labouring man is tempted by the bounty to join the Militia, and he and his boon companions have a jolly spree in getting rid of the easily acquired treasure. After a short experience, however, of an empty pocket, of drill, and the hardships—as the untrained victim is apt to regard the restraints—of military discipline, he begins to grumble at his trade, and he finds companions in grumbling. They feel they have made a bad bargain; that they really earned more before, or might have done so. They are now tied for years to one low rate of pay, and a dull routine of duties; and they bethink them how to escape from their position. They feel they have been done by the recruiting sergeant, and those who induced them to take the bounty and helped them to drink it. Can they not in turn do the sergeant? They desert; slip off by rail to a distant county, and don an old suit of plain clothes; but being without character and out of employment, they naturally think again of bounty money, and "go in" for the Regular Army. Again, after that they desert, and try the Marines, or enter the Navy as landsmen, getting bounty at every step—already so corrupted by this abominable system, that they never will make either good soldiers or sailors.

Every day naval and military officers have in the course of their professional duties to report on such cases, which are only discovered by accident, through some comrade or sergeant crossing the culprit and unveiling his course of fraud. Some, again,—and perhaps really better men—go right away and are never apprehended, after waking up to the bad bargain they have been led into, and after having undergone an expensive training at the cost of the country. In such cases too the man's kit or gratuitous clothing is disposed of, and he has generally besides incurred some debt, before he makes his *congé;* and thus, we venture to maintain, this system of low wages, with bounty and numerous desertions, is a prodigal and expensive system in fact, and anything but economical.

And not only are men thus tempted to enter the regular Army, the Militia, and the Navy by means of bounty; but to demonstrate more fully that this is in fact a system of deceptive kidnapping, not merely is the volunteer himself thus bribed, but a sum is paid to crimps for kidnapping him, called "Bringing Money," the disreputable and immoral tendency of which must be manifest upon the mere mention of the fact and the slightest reflection.

We conclude our present consideration of this most important subject by asking a simple question. Might it not be worth while for England to pay her soldiers and sailors so well, and to offer such other advantages in the Services, upon which depend the very salvation of the country and the hope and existence of the world's freedom, as to render these Services fair fields for the best of our labourers and artisans deliberately to choose to enter? Let the Horse Guards and Admiralty do away with the irregularities of the Services as far as they can, and place them upon a rational basis; and we venture to predict that the irregularities still too prevalent on the part of the soldier and sailor will also in due time disappear. When dismissal from Her Majesty's Service becomes as real a punishment to the common sailor and soldier as it is to their officers, then, and then only, we venture to predict, will desertions almost cease; and then, and then only, shall the country obtain full value for the thirty millions per annum we are now content to pay to keep up our Army and Navy.

RETIRING ALLOWANCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Previous to the decision of the Retired List by the Board of Admiralty, I address you these few lines to deal with as you may deem fit.

It is certainly a fortunate escape for the Service, so far as Sir John Pakington's scheme of retirement is concerned, that it never took place. To sacrifice 9000*l.* out of 15,000*l.* for the admirals who are already well paid, would have been monstrous in the extreme; whilst it is well known that the junior officers, viz. commanders and lieutenants, are the suffering body, many of whom can scarcely keep their heads above water upon the pittance allowed them.

It has been stated, that active service is to be the main point considered as to the scale of retirement; but what I would particularly wish to draw your attention to is this,—that if officers have been continually applying for the same (which I doubt very much), whether such has been officially recorded at the Admiralty.

It is no fault of theirs that a want of red-tapeism should have debarred them from their turn upon active service, and which ought not to make them suffer in a double capacity, viz., that of losing their servitude upon active service and full pay, and secondly, to lose in the scale of retirement because they had not been so employed.

It reminds one of the old adage of knocking a fellow down and kicking him for falling.—I remain, &c., AJAX.

NAVAL EDUCATION AFLOAT.

It is a somewhat curious fact that the *materiel* of the Navy should absorb so much public attention at this moment, and that no thought should be bestowed upon the moral and intellectual culture of those who are destined hereafter to wield those gigantic engines of war that are becoming the wonder of the world. The haphazard system that prevails in all departments of the Admiralty is nowhere perhaps more conspicuously illustrated than in the total absence of provision for the education of the junior officers of the Navy. It is true that of late years a small groundwork of knowledge is attempted to be laid, by means of a training-ship established for the purpose at Portsmouth, but will any one pretend to say that six or twelve months' preparatory work on board the Britannia is sufficient training to afford to our young officers such a store of knowledge as will enable them to play their part with credit, as the future defenders of this mighty empire? Yet such is the lamentable fact that after a few months' probationary schooling on board the Britannia, the young cadets, at the age of fourteen or fifteen, are launched into sea-going ships, and must, in most instances, from that moment, trust to a bountiful Providence to supply them with the means of pursuing any system of instruction beyond what is comprised in practical seamanship, usually taught by the ship's boatswain or some such other functionary told off for that duty by the captain.

The following statement, if not a matter of general interest, will, at any rate, it is presumed, startle many whose sons and relatives are now serving in the junior ranks of the Navy, in all quarters of the globe:

By Admiralty rule it is ordained that every sea-going ship commanded by a post-captain shall carry a naval instructor as part of her complement. The duties of this officer consist, among other things, in preparing the midshipmen and the other junior officers for the several examinations which they must undergo periodically on foreign stations, as well as for the final ordeal which qualifies them for lieutenants or masters at the Royal Naval College.

The Admiralty have, by recent regulations, very judcially raised the standard of naval education, in order to keep pace with the improvements in all other professions. But, in so doing, they unfortunately lost sight of the obvious fact that it was worse than useless to resort to such a course, unless they were prepared, at the same time, to supply the junior officers of the fleet with adequate means to obtain the prescribed standard of information.

Four of these ships are flag-ships, viz., H.M.S. Edgar, flag-ship of Admiral Erskine; Bacchante, Sir T. Maitland, C.B.; Forte, Sir H. Keppel, K.C.B.; Arrogant, Commodore Edmonstone.

Eight of the ships are line-of-battle ships, each bearing an average number of twenty young officers, viz., acting mates, acting second masters, midshipmen, cadets, and masters' assistants, all supposed to be under the tuition of the naval instructor.

The fourteen other vessels are frigates and smaller ships, bearing each an average of ten subordinate officers, also supposed to be under daily instruction. Altogether 300 junior officers are at this moment deprived of the instruction the Admiralty are by their own regulations bound to supply them with.

If men cannot be obtained to fill the office of naval instructor, it is obvious that there is something wrong in the position assigned to them, and the general advantages connected with the appointment. They not unreasonably expect to be treated somewhat in the same manner as the chaplains of the Royal Navy. When the Naval College was abolished in 1836, and that class established a substitute, they were told that such should be the case; and even if such a promise had not been held out to them, in common fairness they deserve to be placed on that footing; were they so treated there would be no lack of men to fill the office. The universities could supply the Admiralty with ten times the number required, if they were granted fair treatment and fair play.

An attempt has been made to unite the offices of chaplain and naval instructor in one man. This answers fairly enough in small vessels; but experience shows that in line-of-battle ships and large frigates there is ample field and employment for both men. But even this effort has fallen far short of the desired object, and it by no means supplies the want of instruction afloat; for, as was above stated, three hundred junior officers of the fleet are at this moment deprived of that assistance the Admiralty by their own rules pledge themselves to afford them, as a means of prosecuting their studies, and of qualifying for the more difficult examinations they are now subjected to.

Such a state of things assuredly demands some inquiry; neither can it last much longer without seriously impairing the efficiency of a gallant profession, now more than ever looked up to by the country.

The naval instructors of the fleet have now and then raised their voice, and endeavoured to have their grievances remedied, but always without any successful result. Their last attempt in that direction was made a few months ago, a short time before the date of the February Warrant, which has conferred considerable advantages upon all the other classes of civilian officers of the Navy.

Two memorials were forwarded to the Admiralty simultaneously from Portsmouth and from the Channel Squadron, the latter being approved of, not only by all the captains of that squadron, but also by the Commander-in-Chief, Sir C. Fremantle, and by Rear-Admiral George Elliot, the Captain of the Fleet.

The Admiralty's reply was in its stereotyped form: "The memorialists' letter has been received and laid before their lordships."

It is hoped that the Admiralty will do more than read the memorialists' letter, if they are desirous of placing the Naval Education Afloat on a sound and wholesome footing. This result can only be obtained by considerate treatment of the men who are entrusted with the responsible duty of conducting the working of that department. Not only should past services be amply rewarded, but the highest incentives should be offered for continued efforts. These efforts are now flagging fast, and should be rallied, before it is too late, by some such boon as the Warrant conceded lately to the chaplains of the Royal Navy; the chief provisions of the warrant being these three:—

1. A retirement after fifteen years.

Digitized by Google

2. A reasonable amount of half-pay according to length of service.

3. Widow's pension varying according to length of service of the husband.

As regards their full-pay the naval instructors do not complain so much of the amount as they do of the source whence it comes. The five pounds annual deduction from the pupils' pay and added to that of the instructor, is a paltry mode of remunerating an officer, and establishes, so to speak, commercial relations between the naval instructor and his pupils, such relations being very undesirable.

MILITARY DEFENCE OF THE COLONIES.

The report of the Commission appointed to inquire into the principles which should regulate the defences of the colonies, has been published. The commission consisted of Mr. George A. Hamilton, Mr. John Robert Godley, and Mr. T. Frederick Elliot. The first two gentlemen sign the report, the third does not agree with it entirely, and appends a memorandum. The commissioners who sign the report say that the colonies of Great Britain may be said, speaking generally, to have been free from the obligation of contributing, either by personal service or money payment, towards their own defences—a state of things which they believe to have no parallel or precedent in the case of any other organised community of which the history is known. They enlarge a good deal on this; and then state the general principles on which they think alterations on the existing system should be based. These are to the effect that colonies should contribute to the expenses of their own defence. The commissioners propose to divide the colonies (so called) into two classes. The first class would consist of military posts, in which, for objects altogether independent of and distinct from the defence of the particular countries in which they are situated, the Imperial Government thinks it necessary to maintain garrisons. The second class would comprise all the rest of the colonies; that is, all those where troops are stationed primarily, if not exclusively, for the defence of the lives, liberties, and properties of their inhabitants. They propose that, as regards these colonies, the system of defence should be founded on two simple principles—colonial management and joint contribution at a uniform rate. The Imperial Government should call upon each colony to decide on the nature of its own defences, and the amount of its garrison, and should offer to assist it by bearing a share of the entire cost. It seems to the commissioners essential that this arrangement, if adopted at all, should be uniformly applied. If it were adopted, some colonies might choose to form a militia, or to have corps enlisted for local service, like *e. g.* the "Canadian Rifles." In these cases, they would organise and pay their forces as they might think fit, and the Imperial contributions would be paid into the colonial exchequer without further reference than would be necessary to satisfy ourselves that they were expended in accordance with the agreement. Other colonies might prefer being garrisoned by troops of the line, and paying their fixed share of the entire expense of such troops. In these cases, the Imperial Government would first consider whether it could spare them; and would assure itself that the number asked for was sufficient for its purpose, and not open to the objections which exist to small and scattered garrisons, and also that the force would be adequately provided for as regards pay, allowances, and barracks; and it would only send the troops in case of there being no objection on any of these grounds. It would also be necessary to have a clear understanding that all troops so sent would be at the disposal of the Imperial Government, in case any emergency should require them to be withdrawn.

[The real defence of the colonies is the fleet. With the exception of a few military posts or possessions which, though called colonies, are in reality continents and dependent states, all our colonies would fall easily into the hands of an enemy who were masters of the sea and had forces afloat for operations against them. What could General Breton, with 1500 men in the Mauritius, do against his neighbours of Bourbon, with their inexplicable concentration of 15,000 soldiers close at hand, if we lost the command of the ocean? We regret that there was no military man on the Commission. Gentlemen who have tied up many bundles of papers relating to military matters with red tape, and who have docketed and pigeon-holed many Army Returns, are apt to think they understand military questions better than scientific officers. The French are raising local battalions in Senegal and elsewhere,—a small Sepoy Army—and it is just at this moment our commissioners call upon the colonies to decide what their defences are to be; first warning them that they must contribute to the expenses at a uniform rate. Surely it is the duty of the Imperial Government to ascertain from its professional servants what defences are necessary in case of war for colonies, which must be regarded as portions of the Empire. But of what use is it for the colonies to determine of what their defensive force is to consist, when the Imperial Government has to consider first if it can spare the troops at all; secondly, if the number is sufficient; and thirdly, if the force can be properly accommodated. Above all, what is the value of a defence which may be reduced to "—n," if "an emergency requires them to be withdrawn." The report appears to us rather vague and unsatisfactory, though we do not question the value of the financial considerations, or dispute the general principles on which the defences of the colonies are to be regulated. Whether the colonists will be as well contented we cannot say. If Government mean to act, they should do so as speedily as possible, for a state of change is always a condition of weakness.]

The directors of the Great Eastern have at length finally arranged for the "first trip," which, it is announced, will take place from Southampton to New York on the 9th of June. The passengers on this occasion will be limited to the first class, of whom a certain number only will be taken.

THE GUN-BOATS.

(From the Mechanics' Magazine.)

In confirmation of what we said last week upon the danger of employing unseasoned timber in steam-ships, we have the revelations, which have so startled some of our contemporaries, with regard to the condition of the gun-boats. No secret has been made of the matter so far as we are aware. Many months ago we stood under the bottoms of some of these vessels as they were stripped of their planking, and saw their frames covered with the fatal fungus. We knew the conditions under which the vessels had been built, and knew also that we must accept what we saw as the penalty of having neglected our Navy until we were plunged into a war which demanded that ships should be built at a moment's notice, and at any cost. It was absolutely impossible to construct these vessels of seasoned English oak; there was none to be had. The small store of timber which some of the largest builders had was speedily exhausted; and the Government had to decide whether they should insist upon the fulfilment of the contracts, which provided that no unseasoned timber should be used, and thereby practically stop the works, or connive at the use of unseasoned timber, and get their ships. The Government inspectors must of course have known what the consequences would be; but then the ships had to be obtained at any cost. This will be, we are convinced, the answer of both the Government and the builders to the charges of recklessness on one side and fraud on the other. As a general answer it will be held, we suppose, to be valid; but we cannot, nevertheless, acquit either party of all blame. We hold that the Admiralty was in error in insisting upon the construction of the frames of these vessels of English oak. Nothing can be better (or more expensive by the way) for a ship's frame than sound well-seasoned oak, such as was used in the Royal Dockyards in the olden time; hardly anything can be worse than the cheap stuff now used in the merchant yards, and called English oak. But routine says that the frame should be of English oak; so anything which bears an oak leaf is cut down to supply the enormous demand. In an article which appeared in our pages nearly twelve months ago, on "Timber for Shipbuilding," recommending the Government to introduce foreign timber more largely, we said:—"In the merchant service several kinds of foreign timber are admitted on equal terms with English oak. In the Government service it is not so. If we except Polish and Italian larches and pitch-pine, which are occasionally admitted in small quantities, the frames of all ships built in the homeyards are of English or Italian oak. We do not believe that there is the least necessity for this—but that, on the contrary, there are many and unanswerable reasons for discontinuing the use of oak timber of home growth, at least in the frames of ships, altogether." Speaking also of the kind of oak used by merchant builders, we said, "The timber which they can afford to use is small, and, to a great extent, spring-felled and unseasoned, and therefore subject to early and rapid decay." We cannot help thinking, therefore, that the Government authorities would have shown more wisdom had they ordered foreign timber to be used, instead of such worthless stuff of home growth as was at the command of the builders.

A great deal of the mischief, moreover, has evidently arisen from the presence of sap in the frame. This sap is, as our readers well know, the portion of the tree lying between the heart-wood and the bark, and through which the largest portion of the juices of the tree percolate. So long as life remains in the tree this is always gradually forming into heart-wood; but after the tree is cut down it undergoes no such change. In English oak, and in many other woods, it is brittle and spongy, and rapidly decays, engendering corruption in any timber adjacent to it. In the royal dockyards, therefore, it is always carefully removed, but as this removal causes the timber to appear smaller and less sightly, and as the quantity of sap-wood sometimes bears a considerable proportion to the whole size of the timber, the converter and workmen conspire to hide it from view beneath a coat of tar, choosing rather the probable ruin of the ship than the risk of having to provide another timber. Now, under proper and vigilant inspection, such malpractices would inevitably be discovered, and the Government officers are clearly chargeable with the neglect of their most important duty.

But not only is there bad timber in these vessels—there is slop-work, we are sorry to say, of the most shameful character. In boats built by the most eminent firms in England the safety of the vessel is staked over and over again by boring holes through the bottom for fastening the planking to the timbers, and then, to save the labour of driving a long tight bolt, simply plugging up the extremities of the hole by short pieces of bolt. This is a fraud which hardly any amount of care on the part of the Government officers could prevent. No man could tell by inspection whether or not there was a central part to the bolt of which he saw the head and point. Then, in addition to these "devils," as they are called, there are bolts driven into short holes, so that they have no clench on the inside, and are useless: also bolts of brass which should have been of copper; and various other devices for saving labour and expense.

We do not believe for one moment that these things are done in the interest of the contractor, or with his connivance. The fact really is that the men have an interest in slighting the work, and none in doing it well. They undertake to do a certain amount of work for a certain sum of money. If they do the work so well as to be out of pocket by the transaction, they get no thanks from the employer; and in all probability he never troubles himself to inquire whether the work is well or ill done. It is done, and in the stipulated time; and he considers that his part of the contract is fulfilled. Shipbuilding in the merchant dockyards, performed as it is by a set of careless, irresponsible men, under no effective supervision, and paid for by the piece, may be done cheaply, but we know that it is done disgracefully. We have had long experience in these matters; and we can assure our readers that it is mere folly to expect from the merchant dockyards, shipwrights' work in any way comparable to what is produced in the royal establishments. A high price is the defect of one system, bad work of the other; and it is just as vain to charge our eminent merchant shipbuilders with fraud, as to accuse the men who build our men-of-war of idleness and waste. The former are compelled to adhere to their system with all its disadvantages by the competition with which they have to contend; the latter, having no such influence, pursue the more costly system, which ensures strength and safety.

(From the Times.)

The following are the names of the gunboats at Haslar, with the names of their builders, the date of their launching, and the date of their being hauled up underneath the Haslar sheds.

REPAIRS COMPLETED.

H.P.	Names.	Builders' Names.	When Launched	When Hauled up.
60	Primrose	Pitcher, of Northfleet	May, 1856	Feb. 25, 1857
60	Prompt	Do.	Do. 1856	Feb. 11, 1857
60	Pheasant	Do.	Do. 1856	Feb. 9, 1857
60	Pickle	Do.	Do. 1856	Feb. 14, 1857
40	Fenella	Do.	Do. 1856	Feb. 11, 1857
40	Garnet	Do.	Do. 1856	Feb. 13, 1857
40	Handy	Do.	Do. 1856	Feb. 10, 1857
40	Hunter	Do.	June, 1856	Feb. 13, 1857
60	Rocket	Laird, Birkenhead	April, 1856	Jan. 13, 1857
60	Rose	Do.	Do. 1856	Jan. 10, 1857

NOT EXAMINED.

H.P.	Names.	Builders' Names.	When Launched.	When Hauled up.
60	Skylark	Pitcher, Northfleet	May, 1855	Jan. 30, 1857
60	Charger	Ditto	Nov. 1855	Feb. 28, 1857
60	Peacock	Ditto	April, 1856	Feb. 23, 1857
60	Beacon	Laird, Birkenhead	Feb. 1856	March 9, 1857
60	Redbreast	Ditto	March, 1856	Feb. 27, 1857
60	Raven	Ditto	Ditto	Feb. 16, 1857
20	Blossom	Ditto	April, 1856	Jan. 2, 1857
60	Fervent	Green, Blackwall	Jan. 1856	Feb. 24, 1857
60	Whiting	Wigram, Blackwall	Ditto	March 10, 1857
40	Ready	Briggs & Co., Sunderland	May, 1856	June 3, 1858
40	Thrush	Ditto	Ditto	June 2, 1858
20	Flirt	Joyce & Co., Limehouse	June, 1856	May 14, 1858
20	Midge	Young, Son, & Magnay, Limehouse	May, 1856	May 18, 1858
20	Tiny	Ditto	Ditto	May 17, 1858

In addition to the boats named above, the Angler and the Fancy have been hauled up on the slipway within the past month. Of the boats the repairs of which have been completed, little else can now be said but that their repairs have, with the exception of the Escort and the Earnest, been generally of a very extensive nature, and that it is now doubtful whether those first repaired have been done so effectually as they in reality required, as the suspicion of the officials at that time was not excited to any very great extent, and the orders for the investigations into the vessels' defects were only of a limited character. The latter portion of the 22 completed vessels were, however, more thoroughly searched, and, as a result of this, one of the last—the Pheasant—cost about 1400*l*.

The four vessels the repairs of which are suspended, offer the most striking examples at present in Haslar yard of the faulty construction of these craft; the Mackerel, perhaps standing No. 1 in this unenviable position, but closely waited upon by the Cherokee and the Caroline—the latter vessel famous by her short ends of copper bolts. The Swan bears the Caroline company in this latter respect, as one of the longest and most important bolts in her port bow has been found to consist of two short ends only. This robbery of the copper bolts has, no doubt, been committed by the workmen, as it would be preposterous to suppose that any master would place himself in the power of his workmen by serving them out short ends instead of full-sized bolts for their work. Of the boats not examined, the Ready, Thrush, Flirt, Midge, and Tiny, are the remainder of those boats which have never been coppered, and of which the 22 completed in their repairs form the other portion. The outside appearance of the Midge and Tiny is very favourable; but, judging from past experience, it will be impossible to form a correct judgment as to their condition until their planking is partially stripped off and their timbers exposed. The Flirt, Thrush, and Ready look as bad as they possibly can do, while their planking hangs on them. In the first-named of these three vessels the heads of the copper bolts are sunk to such a depth in the plank that there can be barely half an inch between the washer and the vessel's timbers. This complaint of short bolts (not short ends of bolts) has been pretty general in the boats which have been completed. Reverting to the condition of the planking of the vessels, the bow of the Flirt is, perhaps, the worst of the three; a stout walking-stick would knock it sheer off her timbers for six planks upwards from the keel. So bad is it, that where the officials of the yard have tested it the holes have been filled up with grease with an outer coating of tar to hide it from the public eye. The machinery of all these vessels is stated to be in fair condition. Maudslay and Field and Penn and Son were the contractors, and it can confidently be asserted that there was no scamping in the work of either firm.

OCCASIONAL THOUGHTS ON MILITARY SUBJECTS.

No 3.—ARMY EDUCATION.

(*Continued from p.* 231.)

Military education has been hitherto considered principally in its connection with the ordinary soldier, or with the groundwork on which the whole miltary fabric must, as a house on its foundations, rest. The school system provided for working out the mental culture of soldiers provides also for the education of their children, and enables them to gratify that natural desire which most parents feel to bestow upon their children a better education than they in their own childhood had the power of obtaining. The institution of Army Schoolmistresses has even extended these inestimable blessings to infants and to girls of more advanced age, so that the yearning after education, so characteristic of the age, can be as freely indulged by the soldier for himself and for his children as by any other member of society, be he high or be he low. What a touching spectacle has been lately afforded by the Ragged School of Shoreditch, where more than 1000 children of the very poorest inhabitants of that wretched neighbourhood have regularly assembled, under the decaying roof of a crumbling old house, and even persevered in their attendance until the police were obliged to interfere, the state of the house becoming so dangerous as to require its immediate removal. Whilst being pulled down, subscriptions have been set on foot in order to raise funds for the erection of a proper, though humble, school-house. What a striking contrast, indeed, was in this case exhibited between the poor, studying within walls which every moment threatened them with destruction, and the rich, pursuing their studies in the stately halls of our venerable grammar-schools or colleges. The soldier has been spared for himself and children the discomforts, the difficulties, and the dangers of studying under such circumstances; and, whilst he is always provided with a comfortable school-room, he might sometimes, when in a chapel school, be justified in feeling that he too is sharing in some of the luxuries of a university education. It may be asked, why are all these matters so much dwelt upon? The answer is, in order to impress on the minds of military officers that there is a strict parallelism between the civil and military educational movements. Fifty years ago there were men who boldly avowed their belief that it is dangerous to bestow education on the lower classes; and doubtless they would have thought it equally dangerous to bestow the advantages of university education in the middle classes.

Such men were so far wise in their generation, inasmuch as they foresaw that, whilst the classes below them advanced in mental culture, they too would be obliged to exert themselves in order to maintain their relative superiority. The respect once paid by the ignorant poor to rank, simply as rank, however unworthy, and however mentally untrained its possessor, is now more often feigned than felt. Can it be doubted that a similar result must be the consequence of the education now so freely and so generously bestowed on the non-commissioned officers and privates of our Army? Military discipline is doubtless sufficient to command obedience and apparent respect, irrespective of the qualities of either officer or soldier; but real and heartfelt respect will be only paid by the soldier to the officer, when he feels that he is his superior also in moral and in intellectual training. This will probably be considered by some an unpleasant truth; but it may be confidently affirmed that no real friend of social improvement, whether civil or military, will at the present day desire to arrest the progress of education amongst the lower and middle classes of society (the labourers, mechanics, and tradesmen in civil life, the soldiers and non-commissioned officers in the Army), in order to allow the higher classess, including military officers, to rest in mental sloth upon their oars. On the contrary, possessing as they do, by the bounty of Providence, so many advantages over their fellow-men, a few strokes of their oars would be sufficient to keep them in advance: the cry then should be, "Awake! to your oars! pull away!" The question is not now whether Oxford or Cambridge shall win the race, but whether the officer or the sergeant shall be the better man.

The superiority of its regimental system has long been the legitimate boast of the British Army; but there are probably few who have stopped to inquire how much of the merit of attaining that excellence is due to non-commissioned officers. The time, however, has come when it can no longer be tolerated that the officer, on whom the responsibility necessarily rests, should be obliged to trust to his sergeant for the accuracy of his company's accounts, and the regularity of the clothing, messing, &c., of his men. In fact, the officer must have to feel without a blush that though humble arithmetic is a link which connects him with every clerk in the kingdom, it is no less an essential element of his utility. Whether these ideas were ever present to the mind of the Great Captain, the Duke of Wellington, it is impossible to say; but this at least is certain,—that it was he, at once a soldier and a statesman, who first imposed upon the candidates for military service an educational test. It is irrelevant to go into an inquiry as to the actual intellectual training of the Duke himself; sufficient is it that a man so clear-headed and so strong-minded recognised by this one official act that, in his opinion, education was as useful to the officer as to the civilian; whilst the great advancement in the education of the private soldier has now rendered absolutely *necessary* what then, perhaps, appeared only *desirable*. The scheme of examination at that time laid down for testing the education of the candidates must be also considered the work of the Great Duke, as having been approved and sanctioned by him. It comprised the following subjects:—

History—Grecian, Roman, French and English. General History, tested by 18 questions, of which 12 were required to be answered.

Geography. The modern geography of Her Majesty's dominions in every part of the globe, in addition to the capitals and principal rivers in other countries. The number of questions about the same (18), of which two-thirds were required to be answered.

English. Writing fron dictation.

Arithmetic. The four first rules, fractions, and logarithms.

Algebra. Four first rules and simple equations.

Languages. One of three, Latin, French, or German, at the option of the candidate. The French examination requiriug not only translations from French into English, but also from English into French.

Fortification. Outline of Vauban's First System—profile of the rampart and parapet.

It will be observed, therefore, that a qualification was required in seven subjects.

In this scheme the elements of a practical and scientific education were rendered obligatory by the requirement from all candidates of a certain amount of knowledge in mathematics; the elements of a literary education by the requirement of a similar amount of knowledge in geography, history, classics, a notion of these, German or French; and even those of a professional education so far as fortification is concerned by requiring that every candidate should be able to draw the first system of Vauban. The first two branches of study are evidently those which enter, more or less, into every form of liberal education, and no schoolmaster has a right to complain if he be required to mix them in fixed proportions so as to suit the wants of the members of a particular profession, be that profession the Church, the Bar, or the Army. The introduction of the third, or of a purely special subject, was apparently injudicious, more particularly as it was limited to the mere representation of one particular system, and not to the explanation of the leading principles of fortification, as no respectable schoolmaster could be expected to provide an efficient teacher for a subject so restricted, and hence the shadow was paid for instead of the substance. Had fortification and artillery been thrown boldly before the public in their integrity as sciences, the case would have probably been different, as there cannot be a doubt that masterships of military science at the great schools and professorships of the universities would have been then established, whilst military men of eminence would have come forward with pride to fill such honourable offices. A master of one of the most distinguished of our colleges, a man almost equally remarkable as a scholar, a mathematician, and a deep thinker, was once asked the question whether it would be possible to include military science in the college curriculum, and he at once answered "certainly, as every student after he had passed a prescribed stage in the ordinary college course might, without inconvenience, be allowed to branch off to the study of military science."

As a general rule it may be fairly asserted that a military college is the most fitting place for conveying or receiving military instruction, because everything which surrounds the student is here in harmony with the object of his pursuit, and he acquires not only military knowledge, but also military tastes and military habits. Still, however, there can be little doubt that lectures on Military Art or on Military History, if delivered by officers, or by men who have themselves acquired an experimental knowledge of war, would be valuable, even though they were heard in the hall of an ordinary school or college.

When the examinations were confided to the Council of Military Education they recommended the abandonment of the so-called examination in fortification as a mere technicality which exhibited nothing more than a slight acquaintance with line drawing; but retained all the other subjects and even added to them the experimental and natural sciences, which in civil education are now admitted as a special tripos in the universities, and are taught in many good schools.

Of all the subjects, however, two only are obligatory on all candidates; viz., mathematics and English, all the others being left as voluntary subjects to the choice of the candidates. The main stipulation required as a proof that a candidate has not only gone to school, but that he has acquired whilst there what every officer ought to know, and what every gentleman may be expected to have learnt, is that 1800 marks should be gained, of which 500 must be counted in the obligatory portion of mathematics out of 1200, and 200 marks in English out of 1200. To make up the remaining number of marks he has all the other subjects to select from, including the voluntary portion of mathematics, so that every taste is suited, and every system of education, whether purely English, foreign as to languages, mathematical, classical, or scientific, is consulted. So liberal a scheme of examination might have been expected to satisfy all excepting those who consider that ignorance is no disgrace, and that the object of passing many years at school is merely to make acquaintances and to become expert in school games.

The tone and substance of most of the objections brought forward would indeed be sufficient to warrant the belief that they only proceeded from such persons, were it not that noblemen, and even distinguished scientific officers, have appeared in the list of objectors. The cry was in the first place directed against the requirement of mathematics as one obligatory subject, though that formidable name includes only, so far as respects the obligatory portion, arithmetic, algebra up to simple equations, and the first three books of Euclid; whilst of the 1200 marks apportioned amongst the questions, the candidate is required to gain only 500 marks, or less than one-half, implying that even had he failed in his attempts to answer more than one-half the questions, he would still by his successful answering of the remaining smaller number have secured his qualification. The more advanced portion of mathematics, for which 2400 marks are allotted, is entirely voluntary; so that no one can deny that the doses have been accurately adjusted both to the babe in science and to the man. In English the obligatory minimum can be obtained by writing correctly from dictation, and by composing grammatically a brief letter or essay on some simple subject. Is there any one who can say that these requirements represent anything beyond the most moderate class of education, or more acquired knowledge than it is desirable that every officer should possess?

In every nation of Europe military education has always included mathematics as an essential element; and in no country has the instruction on that subject been carried to so high a point as in France. Is there any one who can say that the French officers have lost in their efficiency by being obliged to study comparatively hard, in order to obtain their commissions? And, further, can it be stated as a fact resulting from over study, that more officers of the French army are dependent for their vision on the use of glasses than is found to be the case in the English Army? But then it will be said by some that mathematics are more natural to the French than to the English; but what says Louis Figuier in his interesting work, "Les Applications Nouvelles de la Science à l'Industrie et aux Arts:" "Many persons pride themselves on knowing nothing of mathematics, and being unable to perform the simplest calculation. We shall not too sharply stigmatise this prejudice which is shared by many men of great merit, who do not, however, deny that a man may be good for something, even though he has a value for algebra, nor forget that over the door of his school of philosophy Socrates inscribed the words, 'None but a geometer shall enter here.' It is the result of the exclusive system of classical studies handed down to us from antiquity, and which has engendered in France that instinctive dread of mechanics, mechanism, and generally of everything which requires calculation." The universities of England are, therefore, now in advance of those of France, by having introduced a wider range of studies into the college curriculum, and no Englishman ought to be alarmed at being required to learn something more than school Latin and Greek, or endeavour to excuse himself by asserting, in the country of Newton and Adams, Dutton, Davy, and Faraday, Buckland, Sedgwick, Lyell, and Murchison, a national unfitness for other studies. The reverse is, indeed, proved by the facts stated in the published report of the Council of Military Education, which show that a deficiency in classics would, were they the obligatory subjects, cause far more failures than mathematics now do; and it may be added that at a recent examination, whilst mathematics and English slew only 18, the general total, which may be considered a fair criterion of the general education of the candidates, when tested on subjects of their own selection, slew 22.

Whilst, however, there seems no tangible reason to complain that some standard of education has been defined as necessary for candidates for commissions, it ought to be considered one of the most important duties of the Council of Military Education to watch over the examination papers and to preserve them from any taint of pedantry. Objections indeed have been urged against the questions either on the ground of their being mere displays of the reading of the examiner, of their being intended as puzzles for the examinee, or of their uselessness to a soldier.

An examination of the objections which have been urged against some of these questions will, it is believed, prove that the objections have at once mistaken the object of an examination, and most erroneously stated its consequence First a critic of considerable distinction thus observes on the following question in chemistry put by Professor Tyndall: "Can you explain the fact that the naked hand may be passed through a stream of molten iron without injury?"

"It certainly is not every one who could explain, much less desire to verify by proof, this remarkable experiment, which is more likely to be of use to a *Blacksmith* than to an officer."

Every one was not asked to explain it, but merely those who had voluntarily taken up chemistry as a subject, and even they were not obliged to explain it, as there were fifteen or more other questions, from answering a moderate number of which they could have exhibited their knowledge of chemistry. That the critic could not have explained the fact is manifest, as he does not appear to be aware that blacksmiths make horseshoes out of *hot, but not out of* molten iron, and hence that the experiment is not more likely to be of use to a blacksmith than to an officer, as neither would think of washing his hands in the liquid mass. When M. Boutigny came over to this country some years ago, and explained his theory of the "spheroidal form" of matter, proving, before the members of our universities, the possibility of plunging, without (a deduction from that theory) injury, the naked arm into boiling water or molten iron, he little thought that his fine speculations would be deemed worthy only of the consideration of blacksmiths. M. Boutigny's theory is now explained in every systematic course of chemistry, just as the ordinary properties of solid, liquid, and gaseous bodies have long been. Were there no other reason than that it dispels some of the mystery which has so long hung over the ancient system of ordeals, it would be a welcome addition to the knowledge of every educated gentleman; whilst, strange to say, the blacksmith has been, without knowing it, long benefited by its application to practice, for even the critic may have seen him when tempering steel spit upon the heated metal, and on observing the spittle, instead of fizzing off, assume the spheroidal form, the globule rapidly moving along the surface, rest satisfied that the required temperature had been attained. Some critics have, in like manner, seized upon a grammatical question, some upon a historical question, some upon a geographical question, some again upon a question set by the classical examiner, in every case making their own knowledge the standard of the knowledge of others, and forgetting that they themselves were not under examination, but candidates just fresh from schools and colleges, who might reasonably be expected to exhibit some proof that the years they had passed at school had not been so much labour wasted on a barren soil. It may be suggested to future critics that a fairer way of investigating the subject would be to give all the questions which have been set in any one examination, and then to state opposite each, "I never learnt to answer that," or the reverse, when at the close of the survey, it would be seen how far the standard of the critic's examination ought to be accepted as one suitable either to that of an officer or any other educated gentleman.

These remarks are peculiarly applicable to the recent complaints which have been urged in a public journal by one of the candidates at the late unfortunate examination. He directs his attack upon the examiner in history and geography, asserting that it is ridiculous to ask such questions, and upon the Council of Military Examination for allowing them to be asked. One of these questions referred to—the successive interferences of the Pope in the affairs of England; another, to the different characteristics of the Anglo-Saxon and Norman races; a third, to the bearing upon the national interests of certain Acts of Parliament, passed in the reigns of Charles I. and Charles II.; a fourth, to the requirement that the candidate should sketch on an outline map the boundaries of the counties of Wales. What can be said of the manner in which a gentleman must have learnt history and geography, who states that the three first questions are irrelevant to British history and ridiculous, and the fourth so difficult that it would even puzzle the examiner himself. Warmed, indeed, by enthusiasm, he declares that some candidates, perhaps himself amongst them,

Digitized by Google

were so shocked at seeing such questions put before them, that they at once gave up their papers in disgust; being, doubtless, too proud to answer the many easy questions when they could not answer the more difficult few. The young critic goes even further, for he boldly asks "What can officers have to do with Acts of Parliament?" Thus by anticipation contradicting Mr. Sidney Herbert, who, in his speech at the Royal Academy dinner, states as a material ground of satisfaction, that the officers of the British Army are not like those of other armies, separated as a class from their fellow-countrymen, but retain in every respect the feelings and characteristics of other English gentlemen.

The preceding observations have been made with the view of placing the question in its true light, and thereby disabusing the minds of some who appear to imagine that many most excellent candidates have been rejected merely because they could not answer some one particular question of, in their eyes, difficulty, and not, as was the fact, because having a large number of simple questions, they were unable to find any sufficiently easy to suit their limited capacities. Putting aside the two obligatory subjects, the candidates have a wide field of subjects, and an ample number of questions to select from. Having said thus much it may be added that, as the Civil Service Commissioners have not been free, so must the Military Council of Education not expect to be free from attacks; for, as the young critic observes, they are liberally paid for their services, and would deserve condemnation were they found neglectful of any of their duties, or deficient in integrity of purpose, or in impartiality of judgment.

J. E. P.

THE QUEEN AT ALDERSHOT.

One of the grandest field-days that has occurred for some time past at the Aldershot camp took place on Monday, in the presence of Her Majesty the Queen. The troops were ordered to parade at nine o'clock. The weather at this time appeared somewhat unpropitious, but shortly afterwards the clouds broke, and at ten o'clock the whole division marched out of camp in the direction of the Long Valley, and formed up in masses in the neighbourhood of Cæsar's Camp. They had not been long assembled when a royal salute from the heights announced that Her Majesty and the Prince Consort had left the Pavilion, and were on their way to the scene of operations. The Queen wore her usual military riding costume, and was mounted on a magnificent roan charger. She was accompanied to the ground by the Princess Alice and the Princess Helena and Beatrice, who rode in open carriages and four. There were in attendrnce on the royal party—the Duchess of Atholl, the Hon. Beatrice Byng, Lord Charles Fitzroy, Major-General the Hon. Charles Grey, Lieut.-Colonel Ponsonby, Major-General Knollys, the Hon. Sir J. Y. Scarlett, K.C.B., Adjutant-General; Major-General Sir R. Airey, K.C.B., Quartermaster-General; Major-General Lawrence, C.B., Brigadier-General Brook Taylor, Brigadier-General Russell, C.B., and a brilliant staff. As the Queen passed, the troops saluted in the usual manner; and the royal party having taken up their position so as to secure a commanding view of the Long Valley and other points of interest, the troops commenced their manœuvres under the immediate command of the Duke of Cambridge, who had arrived from London by an early train.

The programme for the day had been previously prepared by General Knollys, and the carrying out of the various details necessary for forcing the position of the assumed powerful force of the enemy gave occasion for a series of movements, in which infantry, artillery, cavalry, and engineers took part. The enemy was supposed to have effected a landing on the southern coast, and were on their march to the metropolis. Passing in the neighbourhood of the encampment of the Aldershot division, they had found it necessary to take up a strong position in order to repel an anticipated attack, and to be prepared in turn to attack the intrenchments of Aldershot. The Aldershot division moved forward in echelon of brigades, to drive the enemy from his post. It was suppposed that the enemy's left was in the greatest strength, and that upon this point they were prepared to meet the advance of the British troops. General Knollys, however, had received intimation, it is supposed, upon which he could rely, and moved his brigades in such a manner as to bring his greatest power on the weakest point of the enemy—the right. As the three brigades of infantry marched forward they were protected by the artillery, which, as soon as it got within range, opened fire on the right and centre of the supposed enemy. Several batteries also engaged on the left with a view of masking the real nature of the movement. The brigades subsequently deployed into line, and for some minutes kept up a most exciting rattle of file-firing and volleys, which were delivered with most magnificent effect. While the greatest amount of attention was being directed towards the enemy's right, it was necessary that the exposed flank should be protected, and this duty devolved on the two brigades of cavalry. Fortunately, the rain which had fallen prevented those clouds of dust which, on almost every other occasion of a grand field-day, have obscured these interesting evolutions, and every movement could be distinctly seen by the comparatively few persons who were present. The troops on the ground were:—Cavalry: 5th Dragoon Guards, 5th Lancers, 16th Lancers, and 8th Hussars, under the command of Major-General Scarlett. The infantry were formed in three brigades, the first consisting of the 2nd battalion of the 12th Foot, 1st battalion of the 16th, the 2nd battalion of the 17th, the 41st, and the 2nd Lanarkshire Militia, under the command of Major-General Lawrence, C.B.; the second brigade was formed of the 2nd battalion of the 11th, the 2nd battalion of the 18th, the 2nd battalion of the 21st, and the Tower Hamlets Militia, under general Brook Taylor; the third brigade consisted of the 2nd battalion of the 19th, of the 58th, the 86th, and the 1st battalion of the Rifle Brigade, commanded by Brigadier-General Russell, C.B. The artillery consisted of the A and F batteries, Horse Brigade, and 2nd, 5th, 6th, and 8th batteries of field artillery—in all, 42 guns.

After the review, the Queen and the royal party returned to the Pavilion, and, after luncheon, left for Farnborough, under a salute from the battery on the heights near the South Camp, returning at ten minutes past five o'clock to Buckingham Palace.

THE ORDER OF THE BATH.

In the House of Commons on Tuesday Sir H. Stracey moved for an address for copies for any correspondence which has taken place between the India Board and the Secretary of State for War, on the subject of officers recommended by the Governor-General of India and Lord Clyde for the Companionship of the Bath. It would be in the recollection of the House that a short time since he questioned the right hon. gentleman with reference to those officers who were recommended by the Governor-General and Lord Clyde for the Companionship of the Bath, and asked why they had not yet received the decoration. The right hon. gentleman then stated that the limits of the statutes had already been exceeded, and consequently that though he hoped before long new names would be inserted, he could not speak on the matter with any certainty. This answer being indefinite, and therefore unsatisfactory, he (Sir H. Stracey) had felt it to be his duty to put forward the motion he had done. He wished to ascertain from his right hon. friend when there was a prospect that those officers whom the Governor-General and Lord Clyde had recommended would receive the order. He understood that in 1841 the number of Companions of the Bath was 485, whilst at the present time they amounted to no less than 600. Considerable jealousy was also felt by old Indian officers, because the recent admissions to the order had been entirely confined to officers of the Queen's Army. The large amount of force commanded by Lord Clyde in India, since the mutiny, fully justified the number of recommendations which had been made. The hon. member concluded by moving the address.

Colonel Dickson seconded the motion. He was, he said, as anxious as any one to see that our brave officers of the Indian army obtained all deserved honour, but still he could not help thinking that the decoration of the Bath had recently been distributed with rather too much profusion. The correspondence, if produced, would prove the truth of this assertion.

Sir C. Napier thought that this year the old saying in the fleet, that there had been a great many more C.B.s than an A.B.s in the naval service, was true.

Mr. S. Herbert said that there had been no unfairness in the distribution of decorations in India. The local army had received 93 C.B.s against 90 in the Queen's service, although the officers in the latter were three times as numerous. The institutes having been revised in 1847, and 50 added to the order, admission was not so difficult as formerly, still the claimants were in excess of the stipulated number. With respect to the officers named in excess, their names had been taken down, and their cases would be attended to as vacancies took place. He objected to the production of the correspondence between departments, which ought never to be made public, as being confidential; and secondly, looking at the eagerness with which these honours were looked for, he did not think it right that official discussions respecting them should be made public. Under these circumstances he trusted that the House would refuse the motion.

The motion was negatived without a division.

[The House no doubt acted wisely in supporting the Government in their objections to produce the correspondence. There are many reasons why it would be inconvenient to do so. In regard to the honours of the Bath, there can be little doubt that an unwise liberality is likely to be followed by an unjust parsimony. There is a constant measurement of man against man, which is very harassing to the authorities. If A gets the C.B. at once, B is moved to apply for it. He has seen more service than A. True, A was at Delhi, but B was at Lucknow—he commanded a brigade in the hot weather while A was enjoying himself at Simla, &c. B therefore urges the Commander-in-Chief to recommend him, and puts in motion D and E, and many other initials of renown, who fight for the riband with tenacity, and urge all their friends "to go to the Duke," or "to move for papers," or "to ask Sidney Herbert," till, in sheer obstinacy, finding their legs unsteady in the torrent of applications, the authorities set their backs against a rock, and shout out "No" to all comers, be they who they may. We were well pleased to see Colonel Horsford gazetted to a well-deserved honour; and it would do no injustice if Colonel Kelly, of the 34th, who was associated with him, were also included among the K.C.B.s of this year's making.]

MEN'S BOY'S SERVICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Mr. Editor,—Your invaluable columns so often advocate what is right and just for the various classes of Her Majesty's servants, that I hope you will find room for these few lines, which I hope, sir, you will concur in.

Myself and thousands more were what were called underage, that is, between eighteen and twenty years of age; the consequence is, that many of us have to serve two years for nothing.

I for one served as well the first two years as ever I have since; and if I were invalided to-morrow, I should reap no benefit from that two years' service. Had I enlisted since August, 1847, at or for eighteen years, all my service would have counted as good service, and I might have had another bounty forsooth. We think, sir, that what was so generously conceded to men under the Limited Service Act, should be extended to the unlimited service men. I like Her Majesty's service, but I am getting older, and I sometimes think I shall not be able to serve twenty-three years, for I belong to a corps in which we are required to be as active the last day of our service as the first day—viz. the Royal Marine Artillery.

The subject I think, Mr. Editor, only wants a little consideration by those in authority, and who have already done so much for us, and who we believe will concede this, to us, great boon: viz. Men's Boy's Service.—I remain, &c.,

A SERGEANT R. M. ARTILLERY.

EXTRACT FROM AN UNPUBLISHED ARTICLE ON MOTIVES FOR DEFENCE.

"The Volunteer movement is so prominent a feature of the age we live in, that to allude to it in a few observations introductory to reflections on "Motives for Defence," was almost unavoidable. It is respectfully suggested to the many persons desirous of forming sound opinions on its utility, that they should acquire at least a good general view of the principles of war, including—for that has much to do with suddenness of attack (with a surprise which, by the people taken by it, is denounced, with truth, as treachery, but which history frequently extols as craft)—what Jomini calls "*la politique de la guerre.*" The number of persons who have addressed the public on this question of volunteering is large in comparison with the number competent to do so. There is some danger, also, that we may be talked into a state of gasconading security, and led to believe that the monarch whom we praise on the platform and denounce in conversation, has already been frightened by our national demonstration, and has, therefore abandoned his hostile policy. If that be really so, he is probably at least as much influenced by the restored might of our Navy as by the advertisements and statistics of the Volunteer movement. Highly as that is to be estimated considered as a burst of patriotism towards France, and as an auxiliary means of defence, it were unjust to Lord Derby's government to forget how different is the condition of our fleets to-day to what it was when the Tories took office in succession to Lord Palmerston. That Louis Napoleon has viewed with entire indifference the formation of our rifle companies is not to be supposed, nor does the writer agree with an experienced and distinguished officer in thinking them comparable to so much chaff and grain which must be thrashed and winnowed at Aldershot. What is doubted is, that the Emperor believes us capable of "improvising" them into an effective irregular army, which would co-operate with our regular one by compelling him to weaken himself by detachments. To show how this is to be done the instant that an invader shall land, is a lesson which none of the many spokesmen on the question have yet given. It is plain that more will be required than Light Infantry drill. There must be a Volunteer commissariat, waggoned and horsed. There must be a Volunteer paying department for those whose salaries may cease as soon as this business shall be suspended; for it will not do to rely on the patriotism of employers in all cases, or indeed on their ability, to continue the payment of salaries. Moreover, it will not do to rely on the Volunteers themselves to be their own caterers. Food must be procured, and consequently it must be paid for. One advantage indeed accompanying this new and unique force risen up in the country, is the comparative command of money of its members. Straggle as portions of it may occasionally, and dispersed as they will sometimes be on a sudden for some hours in a retreat following a demonstration, every company will probably have money enough to pay its way and transport when thus temporarily parted from its waggons and stores. Nevertheless, a public purse, so soon as the danger shall be imminent, must be found for the force. Credit must be opened with banks in all parts of the country by its paying department. Again, a place of rendezvous must be chosen the instant the Volunteers shall be required, and they must flock to it in twenty-four hours from all parts of the country. A Volunteer rifleman should, when it comes to this point, pass free by all the railways. Moreover, each company should take its own waggons and horses to the general point of rendezvous; its township or county, therefore, should be prepared to furnish these on the shortest notice. It would not be wise to depend on the War Department's making arrangements for the replacement of garrisons by the substitution of Volunteers; that would be to dispense both with our young depôt battalions, and with the new Rifle Corps, until the French in London should think right to forward the despatches. No: the Volunteers must concentrate immediately at the word of apreviously selected general wherever he may raise his flag; and he should be one that will know how to co-operate with the commander of the regular Army without depending on him for supplies. The general of Volunteers should be chosen at once; and, if he were a man of genius and vigour, it would not be indispensable that he should be an officer by profession. Lord Elcho is said to have rare latent abilities, and he has the advantage of youth and address. Lord Derby, however, or (if he be not too old) Lord Ellenborough, might do still better. The latter, indeed, has a military genius both instructed and experienced; and the only doubt is on the score of his aptitude to obey. It is, however, a popular and unfounded one, if we look to his military antecedents; for no statesman ever more cordially assisted and deferred to his general than the viceroy of India did to Sir Charles Napier. It is conceivable, moreover, that there might arise an emergency in which the knowledge to command, with the courage to disobey, might alone save the army from disaster. Any one of these three might, at all events, judiciously decline to avail themselves of the services of any member of the Horse Guards. The entire Volunteer force ought to be free of the departments. It should have departments of its own of the nature of agencies in all the great cities and munition and "necessary" producing districts. Officers on joining it should transfer their allegiance absolutely to its chosen commander; who should owe no obedience except to the commander of the regular Army. He should be in fact to that general what Beresford was to Wellesley. To this end, however, and to threaten the enemy's line of operations, it is plain that the Volunteers must advance and retreat as an army. The enemy will be little concerned about them should he think that they will only threaten him. They must show fight, and as soon as possible after he shall have landed, if only to convince him of his danger. This means that they must either take up a position with the intention of attacking the rear of his columns, and levying his supplies and tumbrils, should he presumptuously march by it; or it means a rapid and disguised advance to attack him on the road. A thorough knowledge of the country, then, an eye to the judicious use of a railway that would bring ten thousand riflemen round to the vicinity of his rear and supplies, to be able to oblige him to offer battle, yet to know how to refuse it at the last moment; to force

Digitized by Google

him to send out a great detachment, then to lead it a dance from his main body—are all things to be expected from the officers of Volunteers. To rendezvous punctually; if necessary, at midnight; to march unencumbered, detouring from the main body of the army by different roads across a difficult country, to an appointed place of rendezvous; arrived there to show front to the enemy, force him to halt; then to retreat, either eccentrically and dispersed, or zigzag and concentrated, with extraordinary rapidity at one time, slowly and obstinately at another—to apply to strategy, in fact, the principle of the Parthian tactics so suitable to the rifle; and, besides this, to hold a position with art, and to attack that of the enemy with equal cunning and courage, are all things to be expected of the Volunteers. The knowledge is to be acquired like that of everything else, partly by inquiry and reflection, partly by observation and habit. To the first our countrymen of every rank — but particularly those who have so loyally come forward—are cordially commended to give themselves without delay. That promotion to the highest posts will be open to the rank and file of the Volunteer force we take for granted. Equally we assume that the personal and departmental staff will be chosen without reference to the rank of captain or private sentinel. With a generous ambition, therefore, to stimulate them, and their patriotism and loyalty to sustain them, we have no doubt that the Volunteer Army, obedient, free from the military vices of marauding and drunkenness—educated, independent, and brave, and certainly not behind the regular Army in vigour of body and power to endure fatigue—may, in good hands, enact a decisive part in the conduct of the campaign, and not impossibly a brilliant one in the progress of the battle. This one thing we stipulate for, that the force be Volunteer; that the vigour and business-intelligence of Englishmen be brought to bear upon its organisation as an army, unfettered by the delays and restrictions of the Horse Guards or of the War Department; and that it lose no time in selecting its proper chiefs, who will so arrange the machinery, as that at the shortest notice the Army with its supplies may take the field. Inquiry and reflection on the principles and lessons of war are the two qualities which should now be put in use; observation, fruitful of experience, will be all the quicker, and military habits of alacrity and "*savoir faire*" are the more certain to be acquired with the occasion for their exercise, should foresight and forethought prepare the way for them."

NEWS FROM CHINA.

The following is extracted from a letter dated Headquarters, Hong Kong, March 29:—Now that we are at last installed, I am going to send you a little budget of news, which is, however, not of the interesting nature I could wish. To begin; there is a horrid rumour of peace; I do not believe it myself; because Lord J. Russell's instructions to Bruce specified a pecuniary indemnity, in the event of any delay having taken place in making an apology. Now, the Chinese will not part with any money and *selon moi*. The delay has taken place nine months; but, some of the best informed people say Bruce will be weak enough to accept a simple apology, if given before the 8th April, when the ultimatum expires. Whether the apology be given or no, Chusan will be occupied by us immediately after the 8th, and Sir Hope leaves on the 31st, with a brigade and a mountain battery for that purpose. The head-quarter staff remains behind, as there is a great deal to be done, much of which, *entre nous*, is caused by the staff themselves, which the good fellows individually are far too mercurial for work.

None of our artillery, cavalry, or siege train has yet arrived, while, except a part of the staff, the French are not represented here at all. General Montauban is at Shanghai, where the French are to organise. Our infantry keeps dropping in; the 44th, 31st, 99th are here, and the great bulk of our force will be landed and organised on the peninsular of Kowloon, opposite Hong Kong, which we have hired from the Chinese government. A military mandarin came over the other day to demand a year's payment in advance. By a perfect fluke, the governor of Aden managed to hire a screw steamer, the Impératrice, engaged in repairing the Red Sea telegraph, to take our second Armstrong battery from Suez, but still there was a delay of six weeks in Egypt. So much for Government arrangements; which I believe—and am not alone in the opinion—are now worse conducted even than in the Crimea; luckily the line is not so severe.

If the news I send you is scanty, it is because until the day fixed by the ultimatum has passed, no conclusive arrangements can be made. Admiral Hope is quite re-established, and is prodigiously active; more so, indeed, than many of us like, for he is thoroughly departmental, and would think himself insulted if anything were done without his aid being sought. I am almost inclined to admire Talleyrand's advice to one of his envoys—"*Surtout point de zèle.*" We certainly have too many cooks. The head-quarter staff is enormous—larger, I apprehend, than Napoleon's, on the invasion of Russia. Why now that the two armies are amalgamated there should be a seperate staff for H.M.'s Indian forces, I cannot conceive; but so it is; and everything else in the commissariat is immensely multiplied. The result is easily guessed—everybody writes to everybody else in triplicate; everybody puts his finger into everybody else's pie; and one longs for the days when a staff consisted of a very few very good hard-working men.

We are not yet aware whether any reply has been received to the ultimatum forwarded by the French and English Ministers to Pekin, but, as our preparations for warfare are proceeding with greater alacrity than before, I presume that if any reply has been received, it has not proved of a satisfactory character.

Hong Kong begins to present a more than usually bustling appearance, from the almost daily arrivals of transports and the excitement attending the disembarkation of large bodies of troops.

The Cawlon shore has been taken possession of, and is now occupied by one or two regiments which have pitched their tents there. Chusan has been occupied into a half-way house between the Peiho and Hong Kong.

With all that has been done, there is still a great deal to be done in the next six weeks, at the end of which our force ought to be in the Gulf of Pechili.

About a fourth only of the English force has arrived, and there is not yet a single French transport come; so that all our activity will be required to get things ready in time.

GREEN TIMBER.

It makes a great difference to the force of an assertion whether the speaker is a man of observation or not. We are indeed sometimes apt to be overpowered by bold and confident assurances, particularly when made in high places. Recently, however, there has been rather too much of this positive style in the House of Commons, indulged in by members who ought to be better informed before they dogmatise. Everybody knows by this time that we have a fleet of rotten gun-boats, for the subject has been canvassed throughout the land and discussed in the Commons. In the debates upon these "scamped" vessels much has been said about unsound timber; and Mr. Whitbread, as well as the Secretary for the Navy, have been called upon to answer some questions put to them very bluntly, having reference to the quality of the timber used in our national dockyards. We are assured from these respectable authorities that no one of our ships of war has been, or is at present, either being built or repaired with green timber. Here we join issue, and assert with equal confidence that almost all our recently-built lines-of-battle and frigates, as well as all our recently-converted lines-of-battle and frigates, have been built or converted with green timber. We specify the ships, for the benefit of any one desirous of obtaining further information upon this important subject:—

The Princess Royal, 91, a sound ship originally, was lengthened with green timber, and, although we now see the effect of using unseasoned wood, we are still repairing this ship again with green timber.

The Frederick William line-of-battle ship, launched the other day at Portsmouth, was originally constructed with sound oak timber, but she was lengthened and converted with green timber.

The Nelson, 90, screw, was originally built of sound wood, but she has been recently converted into a screw with green timber.

The Neptune, originally a 120-gun ship, was converted into a two-decker with green timber.

The Glasgow, 51. This fine-looking frigate, now in course of construction, has the whole of her afterbody built of green timber; and, as far as we are judges of sound timber, we should be very sorry to put her forebody to a severe test.

The Sutlej, 51. Splendid as this frigate looks, she is nevertheless a ship that has been lengthened with green timber.

The Marlborough, flag-ship, on the Mediterranean station, was also lengthened with green timber, and she is reported to be in a leaky condition.

The list might be extended; but the above ships are evidence sufficient to prove that sound seasoned timber is not to be found to supply the excessive demand that at present, and for years past, has existed for it. We would recommend members of the House of Commons to visit Portsmouth Dockyard, and examine the stock of seasoned timber (if they can find it), from which our present wants are supplied. They would be more likely to find a small stock of Italian oak; but which at the present rate of consumption will soon be gone. They would also find some "green heart," recently introduced into our naval yards for building purposes. This, and a cargo or two of Moulmein teak, is all we can find; perhaps some of our legislators may be more fortunate in their inspection. They may also enlighten the "House" as to the probable effect of the use of "green heart" timber, now being used with the water oosing out of it. Not that this moist state of the foreign timber is a defect, as far as we can learn; but it affords, at least, considerable scope for speculating as to the state this untried timber will retain after a few years' sea-service, and how it will stand in a ship of war.

A HARD CASE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In 1857, in consequence of the Indian Mutiny, I went with my regiment, the 6th, from the Cape to Calcutta, where it was my misfortune (but not my fault) to be tried court-martial and dismissed the Service, after nearly twenty-eight years' service in the same corps.

The charge against me was,—For conduct grossly insubordinate, highly unbecoming a commissioned officer, and subversive of military discipline, in having written a letter to Colonel Barnes, my late commanding officer. I of course pleaded "not guilty" of the charge.

The reason I wrote to Colonel Barnes was, when the 6th were ordered against Koor Syng and his followers at Sassaraum and Jugdespoor, Colonel Barnes sent me an order by the adjutant that I was not to go with my men, giving as a reason, because my name had appeared in the newspapers as promoted to the 15th, and on account of a letter which had been received about me. This letter was the decision of His Royal Highness the Duke of Cambridge (in a case submitted by me when in Africa against the manner I was treated by Colonel Barnes), and it was unfavourable to me.

At the time I received Colonel Barnes's orders, 26th April, my promotion was known at Calcutta for six weeks, during which time I did duty as usual with the 6th, and no attempt was made to remove me from it *until the decision* of His Royal Highness was received by Colonel Barnes.

Every one knows that the above reasons gave no authority to Colonel Barnes to leave me behind. So I at once sent the adjutant to say, as my name was not in General Orders at the time, that I wanted to go with my men, and in fact would be obliged to go as I was not in orders; in answer to which I soon received an order from Colonel Barnes that I was to go, in obedience to which I got ready; but that evening, about six o'clock, I received another order that I was *not* to go, and to give over my Company to Lieutenant Hole, which I did, and saw my old regiment start on service next morning.

I went about eleven o'clock to ask about a passage to England; and in a conversation with the Adjutant-General, learned that Colonel Barnes came to him the day before, and made a special request that I should be kept back. Colonel Otter then sent and borrowed the *London Gazette*, and had an extract of my promotion made out, which he gave to Colonel Barnes, which he would not have done but for Colonel Barnes's request; but Colonel Barnes said nothing of the orders he had given to me that morning at the fort about going and not going.

When I thus discovered that after he had decided I should go on service with my men, he went in this underhand way, unknown to any one, took steps to prevent me, and did so, I was naturally annoyed and indignant; so I wrote to him (*not being under his command*, as his act struck me off the strength of the Indian Army the day before), and gave him my mind on the subject.

I have shown that Colonel Barnes's original intention was, by his first order; that it remained unchanged was proved by the steps he took to carry it out in the evening; therefore, the mid-day order was an untruth when uttered, and only intended to deceive, which it did; and, the fact of his going to the Adjutant-General for authority to leave me behind showed his first order was unauthorised and illegal.

The court recommended me to Lord Clyde's consideration, as they expressed it, "on account of my long, faithful, and distinguished services."

In a letter to me, His Royal Highness remarked, "he was not unaware of my having performed good service on former occasions;" and in another letter terms them, "Services, on one occasion in particular, highly distinguished." I have high testimonials from Sir Harry Smith, written ten years ago, from Sir William Eyre, Colonel Pottinger, and others, down to my old pay-sergeant.

When I was struck off the strength of the Indian Army by Colonel Barnes's deed, pay and allowances ceased; my allowance from 1st to 26th April were withheld, to refund Queen's pay issued by the Company, from the date of my appointment to the 15th Regiment up to the 26th April. I, therefore, was without a pice in my pocket when placed in arrest. I was detained in Calcutta four months in arrest, was refused allowances of any kind, or quarters. I was obliged to live at Spencer's hotel as cheaply as I could during that time, and to borrow money from Messrs. Spink and Company to live on and pay my passage to England. Since I arrived in England, I applied to the Secretary for War for passage money, but was refused. I also applied to Calcutta authorities, and received some days ago an answer to my claim as follows:—"Inadmissible from the Indian Government, Major Mansergh having previous to his dismissal, and even to the date of the offence for which he was dismissed, ceased to belong to the Indian establishment. Vide G. O. Q. I., 25 April, 1858." This shows I was entitled to a passage from Her Majesty's Government before I wrote to Colonel Barnes; so, on receiving the above answer, I wrote again to the Secretary for War, gave the above extract, sent him my testimonials above referred to, and asked to have my claims considered, quoting from the Royal Warrant as follows, as my double grounds for applying:—

"The officer commanding on a foreign station may, however, when a necessity arising from the inability to provide his own passage shall be made apparent to him, use his discretion in ordering a passage to be provided at the public expense for an officer removed for misconduct, or dismissed the Service."

My case certainly would come under the head of the one described above, for I had no means to pay my passage. All the Queen's pay due to me as a major in the 15th, and a small sum saved at the Cape some years ago, was absorbed to meet the bills I gave Messrs. Spink and Co. for the money I borrowed. Though a major in the Army I was a beggar in Calcutta, but for them; and since my return to Ireland, but for the kindness of relatives, my home would have been the roadside ditch, my means of support what I could beg from door to door.

I have a wife and child at the Cape. I have not seen her since 1846, except for a few days on my return from India in consequence of threatened Kaffir war, and having gone to Calcutta, my wife and child are depending on her friends almost entirely for a home. I sent her the little I had of money some time ago, but, as far as human foresight can go, I may never see my family again, as I have no means to go to them, bring them to me, or give them a home if we were together.

This is all because I wanted to go with my men to the field, and Colonel Barnes prevented me doing that which I went from the Cape to do. My last answer from the Secretary for War is, "Your appeal has been considered, but he feels himself bound to adhere to his previous decision and to refuse to entertain your claim to passage-money home from India.—Bacon."

Who would not be a soldier!!!—I am, &c.,
J. MANSERGH.

Borris in Ossory, Queen's Co., Ireland,
23rd March, 1860.

THE PAY OF MASTERS, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the ARMY AND NAVY GAZETTE of 31st March, "J. M. K." refers to the pay of masters, and compares it with the pay of another class of officers, but he forgets to allude to the store-pay of masters, which makes an addition of 2*s.* 1*d.* to some, of 2*s.* 8*d.* to others, and of 4*s.* a day to those in first, second, and third-rates.—I am, &c.,
COMPLETE VIEW.

At the Marlborough Street Police Court, Elizabeth Jenkins, now of 23, Clifton Street, Notting Hill, formerly housekeeper to Sir Charles Napier, K.C.B., of 18, Albemarle Street, has been committed for trial for embezzling at various periods money to the amount of upwards of 200*l.* belonging to Sir Charles.

Obituary.

Major-General Henry Richard Wright, late of the Royal Artillery, died on the 8th inst. The deceased officer obtained his commission as second lieutenant in July, 1808, and saw active service in the Peninsula. He served in Spain from January, 1810, to the end of the year 1812; and was present at the defence of Cadiz, of Fort Matagorna, and of Tarifa. His commissions bore date as follows:—Second lieutenant, 6th July, 1808; lieutenant, 29th December, 1810; captain, 11th July, 1829; major, 1st November, 1842; lieut.-colonel, 9th November, 1846; colonel, 20th June, 1854; and major-general, 8th March, 1860.

DEATH OF A PROMISING OFFICER.—We have to record the death of Mr. Wm. Bird, late Barrack-Master of Fort William, Calcutta, which occurred on the 8th inst. at Dalkey, county of Dublin, at the early age of 30 years. The deceased entered the Bengal Artillery as a gunner upwards of twelve years ago, and when the late mutiny broke out in India he had attained the rank of staff-sergeant of his company, which was stationed at Benares. When the three native regiments at that station mutinied on the 4th of June, 1857, although at that time an invalid, he left his sick bed, and assisted in the defence of the station, for which he was publicly thanked by the late General Havelock on his passing through Benares on his march to Cawnpore. The deceased, with his battery, joined that veteran's force at the latter place on the 6th of August. On the 16th of the same month, he took part in the action fought at Bithoor, including the destruction of the palace of the Nana; also the action fought on crossing the Ganges on the 19th of September, 1857; the actions of Mungulwar, on the 21st; the Alumbagh, on the 23rd; and the ever memorable relief of Lucknow, on the 25th of September. He was afterwards besieged in the Residency till the 27th of November, 1857; from that period till the 7th of March, 1858, he was engaged under General Sir James Outram in repulsing the enemy's repeated attacks on our camp at Alumbagh. He also took part in the fourteen days' siege and re-capture of Lucknow. He next joined the Rohilcund division, and commanded half a battery of heavy guns at the attack on Royea; also in the action on the borders of Oude; the attack and capture of the cantonments and city of Bareilly, on the 5th, 6th, and 7th of May, 1858. In consideration of his services, he was rewarded with an unattached ensigncy in February, 1858; was honourably spoken of in despatches; appointed first-class barrack-master in June, 1859: which appointment he was forced to resign in February last, in consequence of declining health brought on through excessive toil and privations during the late arduous campaign, for which, had he survived, he would have received the Indian medal and clasps.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

DALBY—May 13, at Alverton, Penzance, the wife of Dr. Dalby, R.N., of a daughter.

	Andrew Lawrie, Esq.
	Captain Burgess.

(With power to add to their number.)

At a MEETING held at the United Service Institution, on the 8th of May, 1860.

His Royal Highness the Duke of Cambridge, K.G., G.C.B., in the Chair.

It was proposed by His Grace the Duke of Richmond, K.G., and seconded by the Earl of Ellenborough, G.C.B.;

That the late General Sir William Napier, as a soldier and a military historian, merited the admiration and gratitude of his country.

Proposed by General Sir John Burgoyne, Bart., G.C.B., and seconded by General Sir Thomas Brotherton, K.C.B.;

That he immortalised the glorious deeds of our army in Spain, Portugal, and France, by his History of the War in those countries—a history that no true soldier can read without instruction and advantage, and without being inspired by the heroic sentiments and spirit-stirring language of the author.

Proposed by General Sir Robert Gardiner, G.C.B., and seconded by Lieut.-General Sir Harry Smith, Bart., G.C.B.:

That a Subscription be immediately opened for the erection of a statue to the memory of the chivalrous soldier and unsurpassed military historian.

Propsed by His Grace the Duke of Richmond, K.G., and carried by acclamation:

That the best thanks of the Meeting be given to His Royal Highness for his gracious attendance and courteous conduct in the Chair.

London, May 15. A. LAWRIE, Hon. Sec.

Subscriptions are received by Messrs. Cox & Co., Craig's Court, Charing Cross; Messrs. DRUMMOND, Charing Cross; Sir CHARLES R. McGRIGOR, Bart., and W. McGRIGOR, Esq., 17, Charles Street, St. James's; ANDREW LAWRIE, Esq., 10, Charles Street, St. James's Square; the Secretary of the United Service Institution, Whitehall; and the City Bank, Threadneedle Street, London.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

CRICKET.—REGIMENTAL OUTFITTER.—JOHN LILLYWHITE'S CRICKET WAREHOUSE, 5, Seymour Street, Euston Square, London, N.W. Every article connected with British Sports may be had. Illustrated Lists of Prices post free. John Lillywhite has lately been specially appointed to supply several of H.M. Regiments at home and abroad.

CRICKET.—J. D. BARTLETT, Manufacturer of the Repercussive and Cane-handle Bats, which are acknowledged by our best Cricketers the best driving bats ever made. They have a beautiful spring in the handle, and are warranted not to break. Clubs, Schools, and Regiments supplied at reduced prices, wholesale and for exportation.—171, Waterloo Road, S.W.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

TO VOLUNTEER CORPS.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,

(and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

TEETH.—MR. ESKELL, SURGEON DENTIST, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (opposite the Polytechnic), London.—Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

YOUTH, BEAUTY, AND ARTICULATION.—Mr. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10*s.* per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10*s.* 6*d.* per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11*s.*, 22*s.*, and four quantities in one for 33*s.* Attendance daily, from 10 till 6.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY OF CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

THE ST. JAMES'S RESTAURANT, 69, REGENT QUADRANT, and 25, Piccadilly.—The most brilliant suite of Dining Saloons in London. Fashionably and centrally located for Families and Gentlemen.

Ladies' and Private Rooms overlooking the Quadrant for large or small parties.

A lofty and splendidly-appointed Smoking-room.

Hampers and bottles, 3*s.* per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

Just published, demy 8vo. price 7*s.* 6*d.*

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES, comprising the most recent Doctrines on the Subject. By JOHN HARRISON, F.R.C.S.

"The claim to a scientific character, which Mr. Harrison puts forward in favour of the subject of venereal diseases, will be found amply justified on a perusal of the work before us. In it the pathology of these diseases is so traced as to raise in the reader's mind a degree of interest which was scarcely to have been expected from such a subject. No matter what a practitioner's particular department of practice may be; no matter though cases of primary sores or gonorrhœa may never come under his care, some form or other of constitutional disease assuredly will. He should, therefore, be conversant with venereal disease. Mr. Harrison's work contains much information on the subject. To the practitioner, therefore, who wants merely a view of the most recent doctrines on the subject, it is not too long; to the student who wants practical instruction, it is not too short."—*Lancet*, May 12, 1860.

RECENT WORKS.

NEW ZEALAND; PAST AND PRESENT—SAVAGE AND CIVILIZED. By ARTHUR S. THOMSON, M.D., Surgeon-Major 58th Regiment. Second Edition. Maps and Illustrations. 2 vols. Post 8vo. 24s.

"Dr. Thomson's narrative is clear, concise, and comprehensive, and conveys a very complete and exact idea of the country, the climate, the natural history, the people, the language, &c. It is rare indeed to get so intelligent and satisfactory an account of any land."—*Quarterly Review.*

II.

MADAGASCAR; DURING THREE VISITS, including a Journey to the Capital, with Notices of the Natural History, and of the present Civilisation of the People. By REV. W. ELLIS. 5th Thousand. With Portrait and Illustrations. 8vo. 16s.

"The friends of the London Missionary Society may be fairly congratulated on the wonderful popularity of Dr. Livingstone's work. It has conveyed ideas of our work amidst the heathen—of its civilising results, and its spiritual successes—into quarters where the achievements of Evangelical enterprise had before been little known. That another work, by another of our missionaries, should issue from the press, within little more than twelve months afterwards, bidding fair to rival its predecessor in celebrity, is matter for even greater surprise, and still more grateful congratulations. Mr. Ellis is a brave, adventurous man."—*Evangelical Magazine.*

III.

SOUTH AFRICA; MISSIONARY TRAVELS AND RESEARCHES; including a Sketch of Sixteen Years' Residence in the Interior, and a Journey from the Cape to Loanda, &c. By the Rev. DAVID LIVINGSTONE. 30th Thousand. Portrait and Illustrations. 8vo. 21s.

"Geographical discoveries are with Dr. Livingstone the prelude to missionary exertions."—*Christian Observer.*

"Dr. Livingstone is an invaluable pioneer, both to civilisation and Christianity."—*Christian Remembrancer.*

IV.

DANIEL WILSON, BISHOP OF CALCUTTA; HIS LIFE, LETTERS, AND JOURNALS. By his Son-in-Law Rev. JOSIAH BATEMAN, M.A. Third Thousand. Portrait and Illustrations. 2 vols. 8vo. 28s.

"Bishop Wilson could not pass from the stage of life without a strong desire being awakened, not merely to see the very last of him, but to trace out the course of his life, and, if possible, to detect the mainsprings by which the whole man was set in action, impelled and controlled. This constitutes the real value of these volumes, and, we are bold to say, they will disappoint none of their readers."—*Christian Observer.*

THE FRENCH INVASION OF RUSSIA.

Now ready, with Plans, 8vo. 15s.

THE SECRET HISTORY OF EVENTS DURING THE FRENCH INVASION OF RUSSIA, AND RETREAT OF THE FRENCH ARMY IN 1812. By GENERAL SIR ROBERT WILSON, K.M.T., British Commissioner at Head Quarters of the Russian Army.

"Sir Robert Wilson was with the Russian army in 1812, and was treated confidentially by the Emperor Alexander; hence he was able to give a history of the *French Invasion of Russia*, which may be advantageously read after the narratives of Labaume, Segur, and others. It is the work of a soldier and a gentleman, who felt bound to record many things that reflect deep disgrace on many of the actors in that memorable campaign, and that is the reason of its publication having been so long delayed."—*Literary Churchman.*

"Sir Robert Wilson's book abounds in new and striking illustrations of events and incidents. He does justice to both parties in this war of giants. The world had never seen such a campaign of six months as this, honestly and fearlessly described by an impartial and perfectly competent witness. It is not to be read without many conflicting emotions of admiration, horror and disgust. There is abundance, too, of excellent instruction in the book."—*Athenæum.*

A VETERAN OFFICER, a Prussian by birth, who commanded a small corps in the British pay in the last war, and who is decorated for his services, finds himself in his 74th year in GREAT DISTRESS, without friends or employment. He is anxious to earn his bread if he can, and will take any engagement as a teacher of languages, or fencing-master; though, in the latter capacity, he can not do as much good as he could wish. But, meantime he is in want of the common necessaries of life. The Editor, to whom his case is known, thinks it is one in which some small assistance would be worthily bestowed; and contributions for "S." will be received at the ARMY AND NAVY GAZETTE OFFICE.

5TH DRAGOON GUARDS.—WANTED, a MESSMAN for the above Corps. Testimonials and estimates of prices to be forwarded to the President of the Mess, 5th Dragoon Guards, Aldershot, on or before the 20th inst.

WANTED for Three Months, by a Regiment stationed at Aldershot, a STEWARD or BUTLER, to take charge and general superintendence of the Officers' Mess. He must possess the highest testimonials, and be perfectly competent to drill the servants, and give instructions in everything connected with a well-appointed table. A liberal salary will be given. Apply by letter, stating terms, &c., to A. W. H., Post-Office, South Camp, Aldershot.

2ND DEVON VOLUNTEER RIFLE CORPS.—WANTED immediately, for the above Corps, a PERMANENT SERGEANT. He must be a good drill, and hold a Hythe Certificate. He will be required to take charge of the arms of the corps, and to assist in keeping the practice returns. Excellent quarters will be provided in the same building with the armoury, and adjacent to the drill ground. Applications, stating terms, to be addressed to JAMES HAWKER, Esq., Secretary, Plymouth.

TO RECENTLY-DISCHARGED SOLDIERS WITH PENSION.—WANTED, for the City of Bristol Rifle Volunteer Battalion (10 Companies), TWO PERMANENT SERGEANTS. They must be good Drills, and able to produce certificates of competency. Apply by letter, stating terms and qualifications, to Captain A. M. JONES, Orderly Room, Bristol Rifle Volunteer Corps, Bristol.

SIX-FEET VOLUNTEER GUARDS (32d Middlesex).—GENTLEMEN of the standard height and upwards are invited to JOIN this corps. Drill at St. George's Barracks. Address to the Secretary, 38, Conduit Street, W.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS, PIMLICO DISTRICT.

HEAD QUARTERS—29, Upper Belgrave Place, S.W.

Members' Names, and Subscriptions and Donations received at the above address, every day between the hours of 8 a.m. and 6 p.m. The Adjutant will also be in attendance every Monday, Wednesday, and Friday, at 11·30 o'clock, a.m., to transact the current business of the Corps. Members drill every morning from 8 till 11, and on evenings from 7 till 9, at the Carlton Ride.

GROSVENOR, Lieut.-Colonel.

7TH SURREY RIFLES.—The DRILLS of this Battalion are as follow:—Every Tuesday, Thursday, and Friday morning, from 6·45 to 8; and Mondays and Wednesdays, at 6·30 p.m., at the Sessions House, Newington. Battalion Drill on Saturdays, at 4 p.m., at Mr. Nesbitt's Ground, Kennington. The cost of the uniform does not exceed 5*l*. All applications for further information, &c., to be addressed to The Secretary, Head Quarters, 60, Blackman St., S.E.

MARCUS BERESFORD, Major Commandant.

Head Quarters, May 10, 1860.

CHRIST'S HOSPITAL.—A VOLUNTEER CORPS OF OLD BLUES, being in course of formation, gentlemen, educated in Christ's Hospital, desirous of joining, are requested to SEND their NAMES and ADDRESSES to the Hon. Secretary, pro. tem., Mr. JAMES KNIGHT SPRADBERY, Water Lane, E.C. Upwards of 50 names have already been received.

WHEN Sir John Pakington laid his Navy Estimates upon the table of the House of Commons, he electrified the country by explaining that a great increase in the votes had become necessary for the "reconstruction of the Navy." It sounded so like an exaggeration, men could not believe it to be a sober statement. The press took up the cry; and, for a time, the phrase became almost a byword with which to twit the Derby administration. The public only gradually came round to understand the import of the real facts, and that they too truly justified the language used. The Report of the Secret Committee on the Navy Estimates of England and France was published, and our deficiency in screw line-of-battle ships at last acknowledged. It was seen that the British Navy did indeed require an extensive "reconstruction;" and then the late First Lord of the Admiralty received the praises he deserved, from politicians of all parties, for the energy and boldness he had displayed in attempting to supply the defect without delay.

"Who is to blame? Who shall be hanged?" were then the questions asked, as they have again been recently put with regard to the rotten gun-boats. "Not I," says Sir Charles Wood; "for when Lord Derby came into office, his First Lord of the Admiralty actually reduced my estimates; though now, he admits, he requires all the money I asked, and even more." This Sir John Pakington could not deny; but he explained that the votes he proposed to reduce had nothing to do with building or reconstructing line-of-battle ships; and that he found nothing left on record by his predecessors to lead him to imagine our Navy was in such a wretched condition; that he had to find out all this for himself, as if the late Admiralty Board had been asleep. Thus challenged, too, Sir John went deeper into matters, and discovered that Sir Charles Wood had himself cut down the original estimates for shipbuilding prepared by Sir Baldwin Walker; and that the Surveyor of the Navy had laid submission after submission before the former Board, representing the absolute necessity for an increased number of screw liners, but without avail. This cutting down Sir Charles Wood denied, but he was convicted by his own handwriting upon Sir Baldwin Walker's papers, which Sir John Pakington first triumphantly shook at him in the House, and then handed to him across the table.

Are our statesmen aware that, upon the efficiency of the Navy depends the salvation of England, and perhaps the liberty of Europe? And if so, should the constant efficiency of our Navy depend upon that chapter of political accidents which places a Wood at the head of the Admiralty to-day, and a Pakington to-morrow, to be succeeded in turn by some other temporary First Lord? It was Sir Charles Wood's Board which perpetrated the criminal blunder, as regards the *personnel* of the Navy, of discharging our seamen wholesale at the close of the Russian War, including even those who only a year or two previous had engaged for "continuous service," under the system instituted by the Committee of Naval Officers which sat in 1852. Has our Navy no permanent interest that ought not to be tampered with, or rashly touched, by ephemeral Lords of the Admiralty? Is all—is everything—to be subservient to politics and party considerations? Is the system of manning the Navy, and of paying the Navy, to be ever unsettled by experimentalists and crotchet-mongers? And who with a grain of sense can suppose, that without some responsible person to study the matter gravely and diligently, and watch its every phase year by year, we shall ever arrive at anything but the fitful and ever-changing projects at present resorted to? The French have a system of manning and paying their Navy suitable for the people and their government, which succeeds, and in its way is perfect. The Americans are equally successful, though by very different means, adapted to a free people and a democracy; so successful, indeed, is their very simple and common-sense system, that more than three-fourths of their naval service is performed by the finest sailors in the world, attracted into the American ships from the stingy service of their own country. We are ashamed to say explicitly, what is however notorious, that the stingy country is England! We are poor enough, or shabby enough, and stupid enough, to drive our English "Hearts of Oak" away from our Navy by a paltry rate of wages, and a complication of promises which no sailor understands or believes.

But if there is an excuse for this blundering as regards the *personnel* of the Navy—which we do not however admit—there cannot be even the semblance of a justification for the want of some kind of permanency in providing the *matériel* of the fleet. Why was it left to any First Lord to have to reconstruct the Navy? Was the "Surveyor of the Navy" a mere cipher? Can he possibly be better now, though he is called "Comptroller?" Should not the state of things Sir John Pakington discovered have led our statesmen to consider the perils of such things being possible? We wish to consider the question also entirely apart from all personalities. It is the system that is chiefly and fatally wrong. What Sir Charles Wood did, or left undone, Sir John Pakington might himself have done or neglected, had he not come after him; and indeed, we know not which is worst, the possibility of leaving undone or the subsequent necessity for doing, by the one or the other. The Commander-in-Chief of the Army is a permanent officer, allowed to conduct and study his duties for years, though he deals with but a limited class of matters affecting the *personnel* of the Army. But neither for the manning and paying of the Navy, nor for the supplies of stores and the building of our ships, have we any but subordinate officers—merely nominal heads of departments—whose estimates of what is required are liable to be cut down or increased at the will and pleasure of short-lived and ever-changing Boards.

As to the want of line-of-battle ships, the quarter where the blame lay was clear. The First Lord had to decide a question of permanent importance upon temporary considerations, and thought he knew better than Sir Baldwin Walker, whose "submissions" to build more large vessels were quietly pooh-poohed. Or it may be the then Chancellor of the Exchequer pressed hardly upon the First Lord for some reduction of the Navy rates which induced him to decide against his better judgment. Such decisions are absolute and final, however serious may be their import. On one famous occasion, indeed, it may be remembered, that Sir Baldwin Walker waxed very bold and withstood political influence; that was not, however, to secure the country a sufficient number of line-of-battle ships, but only in a somewhat personal matter of patronage, to prevent a blacksmith, who had a sickly wife, being removed from Chatham to Portsmouth, where Mr. Stafford had allowed him to go, to be near the Isle of Wight! As a rule, no opposition is offered to their Lordships' decision, and no responsibility is supposed to rest with the Comptroller; for Sir James Graham's act of 1832, constituting the Board of Admiralty, placed the Surveyor under a political head—a Lord—whose duty it would be to take care that the Surveyor was duly subservient; the former Navy Board being in the habit of remonstrating, and sometimes successfully, against the fiats, it may be rash measures of the political Lords—a thing not to be endured by men of "administrative ability!" A Lord was in like manner placed over the Storekeeper-General, who now must obey orders. And so for many years the Navy Estimates have been reduced *ad captandum vulgus;* till now it seems we have not a seasoned stick of timber left in the royal dockyards! We say nothing of the officers who have filled the positions of Surveyor of the Navy and Storekeeper-General, if all this has been going on against their judgment, while they have been content to see the country's best interests go to wreck and ruin, and remain silent! But we think the sooner the Storekeeper-General of the Navy and the Surveyor or Comptroller of shipbuilding are made responsible officers, and to act together and with more effect, the better for the interests of England. Will the new Royal Commission be able to discover how far these officers are already responsible, and how far they may have been competent to see what was going on, and if they have done their duty in trying to withstand the economical Lords who have been placed over them since 1832?

We have now heard Lord Clarence Paget's confession and apology respecting the gun-boats. His Lordship has become expert in making easy and seemingly frank confessions. He has had more to say for the contractors than the contractors for themselves! They told the Admiralty, he says, that they had only unseasoned timber, and their lordships sanctioned its use! Strange, if true! Who told the Admiralty this? How many, and who among the contractors? Not Mr. Scott Russell, certainly, or the other contractors who wrote to the *Times* either challenging an examination of their work or blaming the hauling-up slips for the decay, all unaware that green timber had been sanctioned! If, then, only one or two of the contractors wrote to say they had no seasoned timber, why were they employed? And is there no difference between "unseasoned" timber, and the mere green stuff full of sap which it appears was freely used in building the boats? Was it the Board or the Surveyor of the Navy that decided that green timber might be used? Is it, further, true, that the "re-construction of the Navy," the lengthening of the large vessels, has been done with green and unseasoned timber? And was that, too, done with open eyes? Was it a Board decision, where the facts were honestly stated, or is it a blunder of another kind? One other question—Why all this precipitation in taking the gun-boats and mortar vessels to pieces? Is it to bar investigation as to the nature and extent of their defects? Is it to keep the workmen's hands in at this labour of knocking to pieces, which seems now a commoner operation in the Royal Dockyards than building ships? Had our workmen not better be employed in building new vessels with all despatch to take the place of England's rotten fleet?

In Lord Clarence Paget's speech, introducing the Navy Estimates in February last, he boasted how few heads are now at the Admiralty, speaking unwitting truth, like the Jewish high-priest when he prophesied. Only thirteen now—that is, six lords, five principal officers and two secretaries—as against forty-eight, when the Navy Boards existed; the salaries, too, of the Admiralty departments are only £90,000 as against £120,000 in 1821. But what if a few thousands added for head-work would have saved some millions wasted in blundering? What if a Navy Board would have preserved us a stock of seasoned timber, and prevented our building the gun-boats of green wood? Nay, a competent Board of Construction must surely have saved us the £5,000,000 wasted in cooking, altering, and patching vessels, about which Lord Clarence Paget was so very eloquent when in opposition, and as to which he is so eloquently silent now, although some millions must be added to this heavy amount of waste, on account of the building and unnecessary reconstructing having been done with sappy timber.

We are glad to hear seamen are beginning to be more alive to the advantages to be derived from joining the "Reserve." We have received satisfactory accounts from Hartlepool, where the hardy fellows employed in the coal and coasting trade are taking very kindly to the system. Let a similar spirit be infused into the maritime population of the neighbouring ports, and a body of men worth more than all the gatherings of the old press-gangs will be ready to our hand.

THE ARMY.

4th Light Dragoons, are about to move from Manchester to the Curragh.

7th Hussars. Captain Aytoun has arrived home from India.

Military Train. Two men are in custody at Aldershot, on the charge of having murdered a woman by throwing her into the canal on Saturday night last. It appears that the deceased was one of those "unfortunates" who infest the numerous soldiers' public-houses in the neighbourhood of the camp.—The 2nd battalion have arrived at Woolwich, and the 3rd at Aldershot.

1st Royal Regiment. A draft of 80 men of the 1st battalion is under orders for India.

5th Fusiliers. A draft of 210 of all ranks is ordered from Colchester to join the head-quarters of the 1st battalion in India.

6th Regiment, 1st battalion. A draft of 75 men from the depôt to the head-quarters in India.

7th Fusiliers. Lieut. Arnott has joined the depôt of the 1st battalion at Chatham.

8th Regiment. The 1st battalion of this gallant corps is shortly expected home from India, where it has served with distinction since 1846. It bore a conspicuous part in the suppression of the Indian mutiny, and was the first regiment that advanced to the assault of Delhi in 1857, led by Colonel Greathed. This distinguished regiment was present in the action at Bolundshuhur, the battle of Agra, the action at Dilkoosha, the relief of Lucknow under Lord Clyde, the battle of Cawnpore, and the action of Khudagunj. Owing to its numerous engagements the service companies have been greatly weakened, and the numbers much reduced, the strength of the 1st battalion being barely 500 bayonets. The depôt at Chatham is, however, very strong, and numbers nearly 500 men of all ranks, which will bring the regiment up to its strength.

18th Regiment, 2nd battalion. A correspondent writes: "People talk of doing away with flogging in the army. What would they do with such fellows as these, not worthy the name of soldiers? On Tuesday night, the 22nd, six of the 2nd battalion, 18th Foot, had been drinking with one of the 41st, who paid for what they had, and were proceeding to their barracks, when the whole six set on to the 41st man and kicked and knocked him about in a shameful manner; but pickets, as luck would have it, were coming that way, and secured the lot, and had to send the poor man to the hospital. The poor fellow had just returned from foreign service, and had served in the Crimea, and treated these wretches to beer, thinking he was amongst comrades and soldiers. Is flogging too good for such cowards? If they act like that to a comrade, how can they be depended upon to serve the Queen?"

19th Regiment. Lieutenant C. Jours Backas, Ensign Constance C. B. Tribe, and Ensign Henry Stokes are under orders for India.

20th Regiment. Lieutenant Charles Enys, Lieutenant Charles Henry Webster, Ensign Thomas A. Davies, and Ensign Zachary Macaulay are under orders for India. Lieutenant Archdall has joined the 1st battalion at Chatham.

23rd Fusiliers. Ensign A. Prichard Hutchinson and Ensign William Henry Adams are under orders for India.

24th Regiment. Lieutenant H. C. Marsack, Ensign William M. Brander, and Ensign H. F. Brouncker are under orders for India.

25th Regiment. The 2nd battalion which has just been formed will shortly move from Preston to Aldershot.

35th Regiment. Ensign William Paste and Ensign Winfred Tolson are under orders for India.

37th Regiment. A draft of 132 men is under orders to leave Colchester to join head-quarters in India.

38th Regiment. A draft of 93 men will shortly leave the depôt at Colchester for India.

43rd Regiment. Lieutenant Harry Gorton, Ensign Ernest Villiers, and Ensign Robert Mercer Tod are under orders for India.

Royal Marines.—On Wednesday, while the battalion of Royal Marines were under field drill, at Chatham Lines, the major in command ordered the men to stand at ease. A number of them threw themselves upon the grass to take advantage of the moment of repose, and among these was a private named Hamilton. This poor fellow, who belonged to the 93rd company, attempted to perform a somersault, when his bayonet slipped from the scabbard, and he alighted on its point. The weapon entered his side to the depth of nine inches, causing instantaneous death.

52nd Light Infantry. Ensign Edmund Pakenham, Ensign Vesey E. Knox, Ensign Edward Stewart Ker, Ensign Henry Frederick Barker, and Ensign Francis Edward Dowler are under orders for India. Ensign Powys has joined the depôt at Chatham on appointment.

53rd Regiment embarked at Calcutta for England, in the East India troopship Clarendon, on the 12th of April last, under the command of Lieut.-Colonel F. English, C.B., and the regiment may be expected to arrive at Gravesend in July. The 53rd has seen a great deal of hard service in India, where it has been stationed 16 years, having left England in August, 1844. It served in the Sutlej campaign of 1845-46, and was present at the decisive actions of Aliwal and Sobraon; it also served in the Punjab campaign of 1849, including the battle of Goojerat. The regiment also took part in the campaign of 1851-52 against the hill tribes on the Peshawur frontier. This regiment also bore a conspicuous part in the suppression of the Indian mutiny, and took part in the action of Khujwah; was present at the relief of Lucknow by Lord Clyde, the battle of Cawnpore on the 6th of December, pursued the Gwalior Contingent to Serai Ghat, was in the action of the Kalameddee and entry into Futtehghur, the storming and capture of Meangunge, the siege and capture of Lucknow, and in the subsequent hot weather campaign. Owing to its numerous engagements the 53rd has been very much weakened, and now numbers only about 400 men. The depôt at Chatham, however, is very strong, which will bring the companies up to their required establishment.

54th Regiment. A draft of 93 men from the depôt are under orders for India.

56th Regiment. A draft of 149 men are under orders for India.

73rd Regiment. Lieutenant W. Clarke, Ensign Bolton J. A. Monsell, Ensign Henry Synge, and Ensign Charles W. H. Richardson are under orders for India.

75th Regiment. Ensign Harry P. Dawson and Ensign Alfred S. Leatham are under orders for India. Ensign Vandeleur has joined the depôt at Chatham on appointment.

77th Regiment. Captain William J. Carden, Lieutenant Aubrey T. Butts, Ensign Oscar H. Blount, and Ensign Edward N. Mosley are under orders for India.

81st Regiment. Captain Stanley J. Lowe, Ensign Henry Maturin, and Ensign Robert John MacDonnell are under orders for India.

88th Regiment. Captain Riley is about to proceed to India with a draft of 167 men from the depôt.

91st Regiment. Ensign Wesley is under orders for India.

97th Regiment. A draft of 80 men is under orders for India.

The Adjutant-General, Sir James Yorke Scarlett, has issued a Circular Memorandum to the Army at home and abroad, dated the 14th instant, wherein it is stated that His Royal Highness the General Commanding-in-Chief desires it may be understood, "that no soldier who has been sentenced to the forfeiture of all advantages from future service is to be restored to the 'first class,' until after the expiration of one year from the date of his being relieved from the consequences of such sentence."

The examination of candidates for admission to the Royal Military College, Sandhurst, by the Council of Military Education, takes place at the Royal Hospital, Chelsea, on Monday, June 4, and will extend over the five following days.

The next examination of candidates for admission to the Royal Military Academy, Woolwich, is to be held before the Council of Military Education, in the Royal Hospital, Chelsea, on Saturday, the 30th proximo, and will terminate on the 14th of that month.

The examination of candidates for direct commissions, by the Council of Military Education, is appointed to commence at the Royal Hospital, Chelsea, on Wednesday, the 20th proximo, and will occupy six days.

The following General Order has been issued:—"Horse Guards, S.W., May 11, 1860.—All general and field officers returning from foreign service are requested to report themselves personally to the Adjutant-General, with a view to their being introduced to His Royal Highness the General Commanding-in-Chief, should he desire to see them.—By order of His Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General."

A General Order from the Horse Guards has been issued, in which His Royal Highness the General Commanding-in-Chief directs that the new pioneer tools recently issued to regiments by the Government are to be given a fair trial by commanding officers, who will report the result of such trials to the Duke of Cambridge.

The authorities at the Horse Guards have directed a board of Royal Engineer and other officers to be assembled for the purpose of making a survey and reporting upon the condition of the government stores at Purfleet, Tilbury Fort, and Chatham.

Lord William Paulet, Lieutenant-Governor of Portsmouth, has taken up his appointment, and has commenced his inspection of the several barracks and military positions of Portsmouth and its vicinity.

Deputy Inspector-General Gammie proceeded on the 14th inst. to assume the duties at Aldershot. Surgeon-Major Jopp, 36th Regiment, is performing the duties of principal medical officer in the Western district.

Chatham Garrison.—The utmost activity prevails at this garrison in making preparations for the dispatch of the reinforcements to India, the authorities having ordered nearly 1500 men of all ranks to be sent to Calcutta, Madras, and Kurrachee, from Chatham during the ensuing month. The whole of the troops selected for embarkation are thoroughly efficient in their drill, in addition to which they have undergone a complete course of instruction in the use of the Enfield rifle, and have also had the advantage of being instructed by the Royal Engineers in escalading operations. They may, therefore, be pronounced fit to take the field immediately on landing in India.

SHORNCLIFFE CAMP.

On the 18th inst. the whole of the troops at camp assembled on their respective parade grounds a little after 11 a.m., and from thence took up their position on the general parade ground in line in the following order:—A squadron of the 4th Dragoon Guards; a battery of Royal Artillery in open order for firing the salute; three other batteries in close column; a company of the Royal Engineers; the 90th Stirlingshire Militia; 2nd Royal Cheshire Regiment of Militia; the Antrim Militia Artillery; and the 4th battalion of the Military Train. General Mansel, attended by his staff, came on the ground about 11·45. Immediately as the clock struck 12 the saluting battery commenced and fired a salute of 21 guns, a *feu de joie* being fired by the troops at intervals of 7 guns; the whole line then presented arms, the colours were lowered and the band played the National Anthem, the drums and fifes beating the salute. The gallant general then took off his cocked hat and led three cheers for Her Majesty, which were joined in most heartily by the men. As soon as this was done, the line wheeled into open columns of companies, and marched past at slow and quick time, and in close columns. The Dragoons, Artillery, and Military Train marched past at a walk, and afterwards trotted past, the Artillery in columns of battalion. The marching past was excellent, and elicited warm approval from all present. The Infantry were then marched to their lines, and the Artillery went through the following movements, which were splendidly performed. The four batteries advanced in line, full intervals, action in front; they then retired by alternate batteries in action, re-formed line by batteries, left wheel quarter intervals, close column on the leading battery, formed line to the right on the left battery. The batteries then marched to their quarters in columns of subdivisions. The day was windy; but fortunately the rain kept off till the review was over.

The half-yearly inspection of the 2nd Cheshire Regiment of Militia took place on Monday the 21st, by General Mansel. The gallant general was pleased to express himself quite satisfied with the appearance of the regiment, and also with the manner in which they went through the evolutions they were exercised in.

The No. 3, or Grey, battery, under the command of Captain Mercer, marched from Shorncliffe, on Tuesday last, *en route* to Woolwich. The following was the detail:—5 officers, 1 medical officer, 26 non-commissioned officers, 188 men, 104 horses, 6 guns and ammunition waggons. The dismounted men went by railway. The battery will be relieved by the 9th battery, who are expected this day, and who bring with them a battery of 6 Armstrong guns. A very gratifying testimonial was presented to Sergeant John Fairfax, who is about joining the Coast Defence Brigade of Royal Artillery, after twenty years' service. The officers gave him a very handsomely bound miniature quarto bible, by Bagster & Sons, with the following inscription, "Presented to Sergeant John Fairfax, by the officers of No. 3 field battery 4th brigade, Royal Artillery, in consideration of his long and meritorious services in that battery. Camp, Shorncliffe, 1st April, 1860." The non-commissioned officers and privates subscribed together and purchased a very elegant silver snuff-box, with the following inscription on the lid, "Presented to Sergeant John Fairfax, by the non-commissioned officers and men of the 3rd battery, 4th brigade, R.A., as a mark of esteem, April, 1860."

The Antrim Artillery on Thursday last practised with the heavy guns at a buoy from Fort Twiss, and made some very good practice.

A spiteful and malicious outrage was perpetrated on Wednesday night last. Some scoundrels broke into the stable of Lieut.-Colonel Brown of the 4th Battalion Military Train, and cut off the manes and tails of three of the colonel's chargers. No cause is assigned for this wanton outrage, and it is to be hoped that the perpetrators will be discovered and severely punished. The staff-sergeants of the different regiments complain, and with great justice, of the very indifferent accommodation afforded in the quarters assigned them. A hut is divided into eight small rooms by wooden partitions running only about three parts up the rooms, so that the upper part of all the rooms communicate; this is objectionable, as no privacy can be enjoyed by any of the family who are compelled to reside cooped up in such straitened quarters. The consequence is that many are obliged to live out of the camp in lodgings, for which no allowance is made. It would be only a proper recognition of the value of that branch of the Service, which in the great war in the East was the only one that did not break down, viz., the regimental system, to afford them a little better accommodation when on camp or in quarters.

COLCHESTER CAMP.

The utmost activity prevails amongst the several depôts in this camp in preparing for foreign service the very heavy drafts ordered to India. These will include 1127 men of all ranks and several officers, whose names have not yet been remitted from the War Office. In addition, the 44th Regiment, now serving in China, will be strengthened by a draft of nearly 100 men from their depôt, who will be accompanied by Brevet-Major Faussett, Captain Fleming, and Ensign Maguire. The punishment of the lash, now so comparatively rare, has been resorted to in this camp this week; James Burns, a private in the 56th Foot, having received 50 lashes for the third desertion from his regiment. The character of the man is notorious, and he is a disgrace to the British Army.

The formation of a new and very enlarged camp, to which we alluded last week, is now fully determined upon, and although the details of the plans have not been made public, certain circumstances have transpired to lead to the opinion that it will be the locality of a corps of observation; and that consequently a much larger and more effective military force will be stationed in the new camp than was at first anticipated. The new buildings will undoubtedly be brick erections, which can be constructed at a less cost than the wooden huts that were built at an enormous outlay in a case of haste and emergency, and are already constantly needing some repairs. Nor is that the only objection to these temporary structures. The men are exposed to every variation of climate—the extremes of cold in winter and heat in summer—and this has been found by no means to conduce to their physical improvement. So that both upon the score of economy and the maintenance of the health of the men, erections of a more durable nature are preferable. The site which we announced last week as having been purchased is upon the highest ground in the vicinity of the town, has all the requisite means of thorough drainage, and an abundant water supply.

The Army Gazette.

WAR OFFICE, PALL MALL, May 25.

2nd Regiment of Dragoon Guards—Assistant-Surgeon John Noble Shipton from the 7th Dragoon Guards, to be Assistant-Surgeon, vice Robotham, who exchanges; May 8.

5th Dragoon Guards—Thomas Booth, Gent., to be Cornet, by purchase, vice Lee Mainwaring, promoted in the Coldstream Guards; May 25.

7th Dragoon Guards—Lieutenant Frederick Robert Cameron Crofton, from the 9th Light Dragoons, to be Lieutenant, vice Erskine, who exchanges; Robert Allan Smyth, Gent., to be Cornet, by purchase, vice Cleland, promoted; May 25. Assistant-Surgeon John Harrison Robotham, from the 2nd Dragoon Guards, to be Assistant-Surgeon, vice Shipton, who exchanges; May 8.

5th Light Dragoons—James Edwin Gwyther, Gent., to be Cornet, by purchase, vice Birch, promoted; May 25.

8th Light Dragoons—Francis Arthur Hutchins, Gent., to be Cornet by purchase, vice de Winton, promoted; May 25.

9th Light Dragoons—Lieutenant William Macnaghton Erskine, from the 7th Dragoon Guards, to be Lieutenant, vice Crofton, who exchanges; May 25.

13th Light Dragoons—Lieutenant George William Hayne, from the 15th Foot, to be Lieutenant, vice Henry Smithson Lee Wilson, who exchanges; May 25.

15th Light Dragoons—Cornet George John Hook Pearsen to be Lieutenant, by purchase, vice Bell, who retires; May 25.

18th Light Dragoons—Cornet James Clarke Hicks to be Lieutenant, by purchase, vice Weldon, who retires; May 25.

Royal Regiment of Artillery—Brevet-Major Samuel Clearcland to be Lieut.-Colonel, vice Wragge, retired on half-pay; Brevet-Major Henry Lynch Talbot to be Captain, vice Cleaveland; Lieutenant Hugh Chetham Lyle to be Second Captain, vice Talbot; May 2. Claudius Buchanan Piers, Esq., to be Paymaster; Brevet-Lieutenant Colonel Donald Stewart, late Major, half-pay Unattached, to be Paymaster; May 25. The undermentioned Quartermasters have been appointed to the Royal Artillery and not to the Coast Brigade of

Digitized by Google

Artillery, as stated in the *Gazettes* of 17th and 27th April, 1860, viz., Quartermaster Henry Behenna, Quartermaster David Hoge, Quartermaster Samuel Blair.

4th Regiment of Foot—Major Charles Nasmyth, from half-pay Unattached, to be Major, vice Dominic Jacotin Gamble, who exchanges; Captain Octavius Yorke Cocks to be Major, by purchase, vice Nasmyth, who exchanges; Lieut. John Clarence Boyce to be Captain, by purchase, vice Cocks; Ensign George Studdert to be Lieut. by purchase, vice Boyce; May 25.

7th Foot—Richard Spencer Hall, Gent., to be Ensign, by purchase, vice Ashton, apointed to the 4th Dragoon Guards; May 25. Henry Ferdinand Oakes, Gent., to be Ensign, by purchase, vice Harrison, promoted; May 26.

16th Foot—Lieutenant Henry Smithson Lee Wilson, from the 13th Light Dragoons, to be Lieutenant, vice Hayne, who exchanges; May 26.

16th Foot—Lieutenant James Davis to be Captain, without purchase, vice Arthur Platt, deceased; Ensign Arthur Edward Cooch to be Lieutenant, without purchase, vice Davis; May 12.

17th Foot—Captain David Latouche Colthurst to be Major, by purchase, vice Brevet-Lieutenant-Colonel John George Rawstorne, who retires; Lieutenant Archibal Hammond Utterson, to be Captain, by purchase, vice Colthurst; Ensign Edward Arthur Elgin, to be Lieutenant, by purchase, vice Utterson; May 25.

20th Foot—Ensign Charles A. Vernon to be Lieutenant, by purchase, vice Chapman, who retires; May 25.

21st Foot—George Henry Anderson, Gent., to be Ensign, by purchase, vice Blaksley, promoted; May 25.

23rd Foot—William Worsley Worswick, Gent., to be Ensign, by purchase, vice William Robert Murray, resigned; May 25.

24th Foot—Walter Sinclair, Gent., to be Ensign, by purchase, vice Pearson, promoted; May 25.

25th Foot—Francis Gerald Lees, Gent., to be Ensign, by purchase, vice Harvey, promoted; May 25.

28th Foot—Anthony Smyth, Gent., to be Ensign, by purchase, vice O'Brien, promoted; May 25.

31st Foot—Andrew Munro, Gent., to be Ensign, by purchase, vice Parsons, promoted; May 25.

34th Foot—Assistant-Surgeon George Smith, from the Staff, to be Assistant-Surgeon, vice Masterson, appointed to the Staff; May 25.

45th Foot—Paul Dane, Gent., to be Ensign, by purchase, vice Kershaw, promoted; May 25.

64th Foot—Ensign Warren Edward Evans to be Lieutenant, by purchase, vice Fowler, who retires; Ensign Charles Gooden Loveridge to be Lieutenant, by purchase, vice Floyd, promoted in the 25th Foot; May 25.

62nd Foot—Surgeon John Ewing, from the Staff, to be Surgeon, vice Tupper, deceased; May 25.

71st Foot—Ensign John Younger Allan to be Lieutenant without purchase, vice O'Malley, promoted; December 4. Quartermaster Robert Anderson to be Paymaster, vice Cartmail, retired upon half pay; May 25.

75th Foot—Lieutenant James Falkner from Quartermaster, 17th Foot, to be Lieutenant, vice Urquhart, promoted without purchase to an Unattached Company; Ensign Harry Philip Dawson, to be Lieutenant, by purchase, vice Falkner, who retires; Robert John Fitz-Gerald Day, Gent., to be Ensign, by purchase, vice Dawson; May 25.

80th Foot—Lieutenant Henry Hungerford St. Leger to be Captain, by purchase, vice Borrowes, appointed Adjutant of a Depot Battalion; Ensign Samuel Harrison to be Lieutenant, by purchase, vice St. Leger; May 25.

82nd Foot—Ensign Edward Snow Mason to be Lieutenant, by purchase, vice Henderson, who retires; May 25.

90th Foot—John Campbell, Gent., to be Ensign, by purchase, vice Handy, promoted in the 25th Foot; May 25.

94th Foot—Ensign Philip Robert Anstruther, to be Lieutenant by purchase, vice Chute, who retires; May 25.

Rifle Brigade—Arthur Arbuthnot, Gent., to be Ensign, by purchase vice Grant promoted; May 25.

3rd West India Regiment—John Robert Mather, Gent., to be Ensign, by purchase, vice Moore, promoted; May 25.

DEPOT BATTALION.

Captain and Adjutant Richard Roney to be Major, by purchase, vice John Lawrie, who retires; Captain Erasmus Borrowes, from the 80th Foot, to be Adjutant, vice Roney; May 30.

HOSPITAL STAFF.

Assistant-Surgeon Edward Masterson, from the 34th Foot, to be Assistant-Surgeon to the Forces, vice Smith appointed to the 34th Foot; May 25.

Assistant-Surgeon Greville Ewing Tait has been permitted to resign his Commission.

BREVET.

Major Samuel Edgar Owen Ludlow, Madras Engineers, to be Lieut.-Colonel in the Army; May 25.

THE REGENT'S ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have read with much pleasure the letter of "G. O.," in your journal, on the subject of the Regent's Allowance. Your correspondent calls it "a practical solecism;" but I venture to go farther, and to say that the intended beneficence of Her Majesty and of Parliament is not only rendered nugatory, but degenerates into an absurdity in its present form. I have a son in the Army who makes the same complaint at the present time as that which existed years ago, namely, that unless he expend a sum daily on a no doubt rational luxury he is unable to obtain the benefit of a royal boon. Your correspondent very justly despises the imputation of twaddle on a matter so seriously affecting all our pockets; and it appears to me to be much greater twaddle to groan over the small pay of a subaltern, and apply to Parliament to increase his pay, when it is in the power of the Commander-in-Chief virtually and substantially to increase the daily pay of the whole Army at home by applying the Regent's Allowance to the messing instead of the wine.—I am, &c.,

A FATHER.

FIGURE OF MERIT.

The annexed General Order has been promulgated, accompanied by a return, by Major-General Charles Hay, Inspector-General of Musketry, showing the comparative proficiency in shooting of the several corps and battalions stationed in the United Kingdom and North America, that have practised so as to establish a "figure of merit" in the yearly course of rifle instruction for 1859-60:—

"Horse Guards, S.W., May 7, 1860.

"The General Commanding-in-Chief has desired that the accompanying table, showing the "figure of merit," and the order of precedence, as regards proficiency in shooting of the corps which practised at home and in North America during the year 1859-60, shall be published in the general orders of the army, with a view to create emulation among the corps now going through the annual course for the current year.

"The General Commanding-in-Chief deems the present a fitting opportunity of calling attention to the concluding paragraph of the General Order of the 1st February, 1859, promulgating the new edition of the musketry regulations:—

"His Royal Highness regrets to observe that the extra position drill, thereby enjoined, is not practised, in the majority of regiments, as often as it might be. This neglect will tend to lower considerably the standard of shooting, and thereby materially affect the efficiency of the infantry.

"Position drill is indispensable to accustom the soldier to handle his rifle expertly, and to habituate him to those positions, standing and kneeling, on which good shooting mainly depends. The General Commanding-in-Chief expects that general officers on the staff will take measures for ascertaining that the provisions of the general order in question are strictly adhered to.

"By order of His Royal Highness the General Commanding-in-Chief,

"JAMES YORKE SCARLETT, Adjutant-General.

THE ELECTRIC TELEGRAPH FOR MILITARY PURPOSES.

The lecture at the United Service Institution yesterday was by Mr. Siemen, C.E., the subject being Electric Telegraphs. After a clear and interesting description, aided by experiments, of the various modes of producing electricity and applying it to useful purposes, the lecturer pointed out the application of the fluid to military uses. He explained the plan adopted in the Austrian army for firing mines: the cartridge was connected with the battery by means of copper wire, which is a good conductor of electricity; but in one portion, and in immediate contact with explosive fulminate, or with the powder required in the charge, is a small piece of platinum—this metal is a non-conductor—and the resistance which it offers to the passage of the electric fluid causes a retardation of the current, intense heat is created, and in an almost inappreciable space of time the platinum wire becomes red-hot, and fires the powder. The facility with which electricity may be employed for the purpose of conveying orders in the field was also explained, and some instruments specially adapted for working telegraphs of this description were exhibited to the meeting. No battery is required for working these lines, mechanical and not chemical action being required to obtain the magnetic current, by means of a coil on a bar of iron connected with a steel magnet. He stated that the cause of our land telegraph not working satisfactorily during the Crimean war, arose from the great injury which the wire sustained from carts and other traffic passing over the earth, in which it was laid too shallow. Major Patrick Stewart was so successful in establishing overland telegraphs during the mutiny in India, that he had been able to complete it almost as rapidly as the army could march. The system adopted in Austria is, according to the lecturer's description, very simple and efficient. The wire is wound upon a reel, which unwinds as it is conveyed over the ground, and at given distances the wire which is uncoiled is attached to light poles shod with an iron point, and which, where the ground is soft, can be easily set up. In places where the earth is hard a company of engineers make holes with an iron bar in which the poles are fixed. The top of each pole is fitted with "vulcanite," a mixture of indiarubber and sulphur, which is a perfect non-conductor, and the wire rests in a slot cut in this material. This form of telegraph can be completed easily at the rate of a mile an hour, and was extensively employed in the late Italian campaign. Captain Fishbourne presided, and the thanks of the meeting were unanimously given to Mr. Siemen for his able and interesting lecture.

THE CHINA EXPEDITION.

The following extract from a recent letter from Hong Kong contains some details of the military movements in those parts:—Canton is still occupied by our troops, and the Chinese people appear to have no objection to this arrangement. Some English soldiers and French sailors are quartered in a mandarin's palace in the heart of the city, and a European police patrol the streets day and night. There is an English commission which carries on the administration of the city in conjunction with the Chinese authorities, who are still kept in their places, though on sufferance. English offenders against Chinese are punished by the commission, and Chinese offenders against English or Chinese by the Chinese governor. It works very smoothly, and the people seem quite contented to be governed in this anomalous fashion. No doubt the number of dollars spent monthly by the troops in Canton has helped a great way to reconcile them to the presence of the "barbarians."

The organisation of the expedition is progressing here but slowly. The troops, however, are beginning to arrive. At Hong Kong there are now the 1st Royals, the 31st Foot, 44th, and 99th. At Canton are the 3rd Buffs and 67th Foot. When the force goes to the north one European and two native regiments will be left at Canton, and one European and one native regiment here, the former a provisional battalion made up from all the regiments forming part of the expedition. This is a good arrangement, as it obviates the necessity of an entire regiment being left behind, while it provides a permanent depôt for each corps at Hong Kong, to which sick, wounded, and invalids can be sent. The Commander-in Chief leaves this in a few days for Shanghai. A brigade, consisting, it is said, of the 44th and 67th Foot and 19th Punjabees (if they arrive in time) is to accompany him. Artillery and engineers, and a battalion of marines have already gone, and on the arrival of the brigade at Chusan that island is to be occupied, and depôts for stores and provisions formed there. It is not expected there will be any opposition; on the contrary, people who are competent to form an opinion, believe that the Chinese of Chusan will be glad to see us there again. The Commander-in-Chief will probably return to Hong Kong to complete the organisation of the force. With regard to subsequent operations, nothing definite is known of course, as it is always desirable to keep these as dark as possible. It seems certain, however, that when all is ready the force will proceed to the Gulf of Pe-chi-li, where it will land somewhere near the mouth of the Peiho river, and attack the Taku Forts by land. It is said the Chinese have made the approach by the river impossible by sinking junks and putting down stakes and booms and other impediments. When the forts are taken the navy will be able to clear the entrance, and then we shall probably proceed partly by land and partly by the river to Tien-tsin. This town is 80 miles from Pekin, and may be said to command the capital. The province of Pe-chi-li, being one of the poorest in the Chinese empire, a great portion of the vast supplies of grain and provisions of all sorts required for the population of Pekin, is drawn from the southern provinces of the empire. Large fleets of grain-junks ascend every year either by the Grand Canal or the Peiho river to Tien-tsin, from whence their cargoes are sent on to Pekin. Tien-tsin is also a great depôt for salt and timber. It follows that, having got possession of Tien-tsin, we can cut off the supplies from the imperial city, and starve the Brother of the Sun and Moon into compliance with our demands.

COOKING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your Correspondent "Aliquis" has addressed me on the subject of Army cooking; but as I am not in the habit of replying to anonymous communications I invite him to meet me, as I think I can furnish him with some useful information upon this subject; and, from the tone of his last letter, I shall be very happy to do so in a friendly spirit, if he will favour me with a call.—I am, &c.

7, Hyde Park Street, May 24, 1860.

JOHN GRANT, Captain, late R.A.

[ADVERTISEMENT.]—Our readers have only to send their address to A. N. PEARIER, 77, Regent Street, London, W., and they will receive free by post the 105th Edition of "THE INVALID'S OWN GUIDE," or natural restorer, without medicine or expense, of perfect digestion, strong nerves, sound lungs, and refreshing sleep, to the most enfeebled, effectually removing indigestion (dyspepsia), nausea and sickness, debility, nervousness, palpitation, cough, asthma, incipient consumption, dropsy, constipation, flatulency, diarrhœa, dysentery, biliousness, fevers, sore throats, catarrhs, colds, noises in the ears, rheumatism, gout, impurities, eruptions, hysteria, neuralgia, irritability, sleeplessness, acidity, palpitation, heartburn, headache, despondency, cramp, spasms, sinking fits, bronchitis; also children's complaints. Accompanied with numerous successful cures, which had resisted all medical treatment, and been abandoned as hopeless.

THE NAVY.

ADMIRALTY, MAY 19.

PROMOTIONS AND APPOINTMENTS. — Lieutenants P. J. Hankin to the Hecate, St. V. D. Lake to the Trafalgar, and F. G. Gambier to the Wasp.

Chief-Engineer J. London to the James Watt.

First-Class Assistant-Engineer J. Hughes to the Fisgard as supernumerary.

Second-Class Assistant-Engineer J. S. M'Farlane, to the Dee.

Acting Third-Class Assistant-Engineer J. R. Bird to the Asia, for service in the Cornet.

Acting Assistant-Surgeon Dr. D. Hilston to be additional to the Victory.

MAY 21.— Master G. Wright to be additional to the Castor.

Surgeons T. Nelson and C. M'Shane to be additional to the Castor.

Assistant-Surgeon J. Long, M.D., confirmed to the rank of surgeon.

Second-Class Assistant-Engineer E. Ingledew to the Wellington, for charge of the machinery of the Procris.

Acting Third-Class Assistant-Engineers J. Keay to the Himalaya; J. Hancock to the Asia, for service in the Sprightly; R. Anderson to the Himalaya, as supernumerary; and W. H. Phillpot, promoted to the rank of acting third-class assistant-engineer in the Racer.

MAY 22.—Second-Class Assistant-Engineer G. T. Gibbs to the Bacchante.

MAY 24.—Lieutenant J. V. D. Buller to the Royal Albert.

Paymasters Benjamin Luxmore (additional) to the Hogue, Albert Leur to the Hecate.

Assistant-Surgeon Thomas D. Alleson confirmed to the Scourge.

Mate C. H. Eden to the Clio.

Chief-Engineers Charles Wright to the Hecate; Thomas Davies to the Blenheim; Charles Cotten to the Asia, for charge of the machinery of the Colossus.

Acting Chief-Engineer James Roffey to the Fisgard, for charge of the Devastation.

Second-Class Assistant-Engineers John Roberts (promoted) to the Ajax, John H. Brettell to the Hecate.

Acting Third-Class Assistant-Engineer Henry W. Masterman to the Hecate.

Agamemnon returned to Malta on the 15th from a cruise.

Albion. The Lords of the Admiralty have decided on proceeding with the alterations of the Albion, 90, at Plymouth, but her defective planks and timbers will be made good prior to having any machinery put on board.

Assurance returned to Malta on the 14th, and left again for Sicily on the 16th.

Bacchante, 51, screw. When this vessel entered the basin at Portsmouth, on Monday last, she knocked away part of her fore-knee or stern, and it is expected grazed her side rather seriously below the water-line.

Barossa having been fitted at Woolwich with a pair of engines of 400 horse-power, by Messrs. Boulton and Watt, on Wednesday got up steam in basin for an engineer's first trial, when everything worked satisfactorily.

Bombay, 84, was taken into dock at Chatham on Wednesday afternoon to be converted into a screw steamer. In consequence of the extensive alterations required to be made in this ship she will be several months in hand.

Boxer left Malta on the 8th for Tripoli.

Caradoc left Malta for Naples on the 15th.

Chanticleer, 17, screw, now on the stocks at Portsmouth, is an instance of what can be done in the way of rapid construction in our chief naval arsenal. The whole of her frame has been put together in the course of a few weeks, and she is now being planked. Considering how short the national establishments are of timber, this may appear extraordinary. But there is some timber in the yard adapted for small ships, of a good and sound description. And the Chanticleer will turn out an exception to the line-of-battle ships and heavy frigates now building, and recently built, and converted at this establishment; all of which have been built and converted more or less with green timber; and, consequently, may be expected to require extensive repairs in a short time.

Cormorant, 4. The survey of this screw steam gunvessel having been completed, she was hauled out of dock at Chatham on Wednesday afternoon.

Cressy returned to Malta on the 15th, and was about to start on another cruise.

Dee has arrived at Portsmouth from Woolwich.

Dryad, 98. Workmen are now laying down the keel of this ship at Portsmouth, and are using very little sound and seasoned timber. Some of the wood is full of moisture (not sap), and bears evidence of having very recently left the forest. Some of the heaviest pieces have not been more than a week in store.

Duncan, 101, is receiving her machinery in the steam basin at Portsmouth, and fitting for the second-class steam reserve.

Forte, 51, screw, Captain Turnour, flag of Rear-Admiral Sir Henry Keppel, K.C.B., arrived at Madeira on the 8th instant, on her way to the Cape of Good Hope. All well. Governor Grey had landed, and the Forte was expected to sail on the following day.

Frederick William, 90. Workmen are preparing Dock, Portsmouth, for the reception of this ship, launched a few weeks since at this yard. She will, after being stripped of her launching gear, receive her copper, preparatory to going into the steam-basin to receive her machinery.

Hannibal returned to Malta on the 15th from a cruise.

Hecate, 6, in a forward state of fitment for the surveying service, being under orders for the Pacific, has been commissioned at Woolwich by Commander Hooker. Her officers, exclusive of the commander, will consist of one first and one second lieutenant, a master, surgeon and assistant-surgeon, paymaster, first, second, and third engineers, and 115 stokers and crew.

Hermes, 6, paddle, Commander W. E. A. London, arrived at Spithead on Thursday from the Cape, having left Simon's Bay, March 24; St. Helena, April 4; Ascension, April 12; Sierra Leone, April 25; Goree, April 29; and Madeira, May 15. Lieutenant T. B. Collinson died during the passage. The following have come home as supernumeraries and on passage:—Lieutenants H. D. King, M. B. Meddlycott, C. V. Vidal, and J. N. Croke; Surgeon W. T. Billing; Second Master R. Cooke; Midshipmen W. F. Boughey and H. V. Smith; and about 20 petty officers, seamen, and marines. Hermes is ordered to proceed to Sheerness, to pay off, having been in commission five years.

Himalaya, Captain Seccombe, in consequence of damage by grounding in Portsmouth harbour, was towed to Plymouth by the paddlewheel steam sloop Virago, 6, Commander Dunn, and arrived in the Sound on Sunday afternoon. On Monday she was towed by the steamers Zephyr, Confiance, Prospero, and Pike, two on each side, into Hamoaze. The topgallant yards and masts of the Himalaya were struck on Tuesday, and she was afterwards placed in the basin at Keyham steam-yard.

Intrepid left Malta for Sicily on the 16th.

Irresistible, 80 guns, was taken out for trial at Sheerness on the 22nd inst. by the same officers who conducted the trial of Waterloo, with the exception that the house of Messrs. John Penn and Son who constructed the engines was represented on the occasion. This ship is simply a conversion, having had nothing done to her but supplementary stern-post to carry the screw-propeller. Her horse-power is 400, and her draught of water on trial was—forward, 19 ft. 8 in.; aft, 22 ft. 6 in. The mean speed of six runs was 11·0 knots, at 20 lbs. steam, and mean revolutions 66 per minute. The ventilation in this ship was very satisfactory. She has been converted in the Medway, and is now ready to be brought forward for the first division of the steam reserve.

London was at Malta on the 16th, and would shortly put to sea.

Mersey, 40, screw, Captain Caldwell, C.B., left Spithead on Thursday at 4 p.m., under all plain sail, for Portland.

Nelson, 91, screw, is receiving her machinery in the steam basin, Portsmouth, and fitting for the second-class steam reserve.

Neptune left Malta for Naples on the 16th.

Orion. The artisans at Keyham steam-yard are strengthening with an iron band the after sternpost of the Orion, 91. They have stripped off the two upper streaks of her copper and are cleaning her below.

Orpheus, 21, screw corvette, building at Chatham dockyard, is nearly completed, and will be ready for launching during the ensuing month.

Perseverance, troop-ship, Commander Edward R. Power, has been undocked from No. 7 dock at Portsmouth.

Racehorse. This screw despatch-boat, built at Messrs. Wigram's, was on Wednesday towed down the river and despatched to Chatham.

Ranger, 5, Commander Wratislaw, has sailed from Spithead on a trial cruise.

Renown was at Malta on the 16th, about putting to sea.

Royal Alfred, 91. A great many shipwrights are employed upon this ship, working up a great deal of unsuitable as well as green timber. There is scarcely a "timber" in her at present (and she is well up in frame) that has not graving-pieces and chocks let in, and as far as can be discerned, all her deadwood is green timber. This cannot, perhaps, just now be avoided, as the demand for wood is so great that it is impossible to obtain seasoned timber. But it clearly demonstrates the necessity of having on hand a supply of timber much above the present stock. The conversion and cost of timber forms the principal item in all that appertains to ship-building, and the store of this article can in a country like England be scarcely too large, particularly as it now happens that, from the severe strain upon the Service, ships are in such constant demand that they cannot stand in frame "to season." The consequence is, if (as the case is just now) the store of timber is scanty, green timber must be used, and imprudent conversion of material follows, with great waste and extravagance.

Scylla left Malta for Messina on the 8th.

St. Jean d'Acre was at Malta on the 16th, and was about to go on a cruise.

Victoria, 121, screw. It was discovered when this ship ran her measured mile in Stokes Bay a few days since, that her thrust-chocks were not properly fixed, and that her true speed could not be ascertained in consequence thereof. As soon as they are strapped down firm she will try another run at the measured distance. It is expected she will be ready in a few days. The Victoria is fitting for the second-class steam reserve. There is also a rumour that she is to be commissioned.

Victoria and Albert, Captain Hon. J. Denman, has been placed in No. 7 dock at Portsmouth.

Vigilant, dispatch-vessel, now under repairs at Portsmouth, is very rotten in her after deadwoods. There must be a very great want for this boat, for her defects are being repaired in a manner not usual in this establishment. A few chocks of wood are being put in to cover up all; and, if in this state she goes to sea, it is pretty evident that she will soon require docking again.

Waterloo, 90, late flag-ship at Sheerness, has been razéd from a three to a two-decker most successfully, and was taken out on the 15th instant by Captain Schomberg, commanding the steam reserve, with the contractor and officers from the dockyard, &c., on board, to make trial of her new machinery at the Mile ground off Shoeburyness. The weather was very favourable, and nothing could be more satisfactory than the result of the trial, whether as regards the working of the machinery or performance of the ship. The draught of water was—forward, 19ft. 3in.; aft., 22ft. 4 in. The mean speed of six runs was 11·329 knots at 20lbs. steam, and the mean revolutions were 62 per minute; the ventilation of the engine-room and stoke-hole being highly satisfactory. She has been converted in the Medway, and is now ready to be brought forward for the first division of steam ordinary.

In honour of Her Majesty's birthday on Thursday week the Royal standard was hoisted at all the government works, and the ships of war in Portsmouth harbour and at Spithead dressed, and at noon a Royal salute was fired afloat and ashore. The Russian corvette at the Motherbank took up the firing in honour of the occasion.

Commander-in-Chief Vice-Admiral Henry William Bruce, the Lieutenant-Governor Lord William Paulet, &c. were conveyed from Portsmouth to Osborne in the Sprightly, tender, on Monday morning, to pay their official respects to the Queen.

Captain Stopford, of Her Majesty's ship Exmouth, at Corfu, having obtained his flag, is to be succeeded by Captain Paynter of the Racoon, to the command of which vessel Captain Chamberlaine, private secretary to the late Sir William Reid, has been appointed.

An Admiralty order has been issued announcing the intention of Government to supply the whole of the ships in Her Majesty's service with two spy-glasses each, free of cost (hitherto they were at the individual expense of the officers).

The Channel Fleet, consisting of the Conqueror, 101; the Donegal, 101; the Algiers, 91; the Aboukir, 91; the Trafalgar, 91; the Centurion, 80; the Mars, 80; and the Diadem, 32, left Portland harbour on Wednesday afternoon for a cruise in the Channel. The Blenheim, 60, is the only ship of war now at Portland.

In consequence of the dissatisfaction exhibited by the smiths and others employed in the gun factories at Woolwich on the stipulation of the authorities to equalise the pay of the night-work gangs with that of those employed by day, it has been decided to relinquish the night-work duty in future, and confine the operations of the department henceforth to day-work of 52 hours per week, without extra work or overtime.

The examination of candidates for inspectors in the shipwrights' department yesterday commenced in the dockyard schoolroom at Woolwich, in the presence of the Commodore-Superintendent, the Hon. J. R. Dummond, Mr. George Turner and Mr. Philip Thornton, Master and Assistant-Master Shipwright of the yard.

Captain Astley Cooper Key, who was invalided from China, while in the command of the Sanspareil, has been appointed to the Wellington, at Devonport, vice Captain Robinson, whose period of service has expired.

Commander J. De Courcy A. Agnew has been nominated Inspecting Commander of Coast Guard, vice Commander H. Baker, whose term of five years' service has expired.

THE WHITWORTH GUN.—The Lords of the Admiralty have consented to give Mr. Whitworth's gun a fair trial at the expense of the public, and this day several of their Lordships, accompanied by the Comptroller of the Navy (Sir Baldwin Walker), Mr. Lloyd of the Engineers' department, and other authorities, will proceed to Gravesend, and from thence will embark on board the Admiralty yacht Black Eagle, which has been ordered to be in attendance, and will proceed, weather permitting, to Shoeburyness. The experiments, which will be of a very interesting character, will commence about two o'clock in the afternoon.

THE WARRANT OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You have recently opened your valuable columns to the grievances of the warrant-officers, for which, as one of that neglected body, I thank you. Many letters have appeared in your journal, but they have related more particularly to the boatswains and gunners than to the carpenters, although the latter are warrant officers, and upon the executive list.

My object in appealing to you is to say, that if the gunners and boatswains have their grievances—and no one denies that they have—yet the carpenters in the Navy are even in a worse condition than they are. I regret, however, that in stating my case I must appear to bring the two other classes of warrant officers into the question, having no desire to under-rate their utility, or to over-state mine.

It is somewhat strange that the carpenter, although the most neglected warrant officer, should be the only officer in a ship of war whose duties cannot be performed by any other person. Even in the engineers' department, where it might be supposed that a break-down amongst the officers would be irremediable, the case is not so desperate as many imagine; for if by any unlikely event the chief engineer and his many assistants should be knocked over, every captain and commander and lieutenant in the Service, and most of the midshipmen, have passed elaborate examinations in steam; so that any difficulty in this scientific department, as it is called, is very manageable, particularly with the large quantity of spare gear carried in every ship of war.

Then, as to gunnery, which is, of course, one of the most important elements now needed in the Service, and because it is so, almost everybody on board knows something about it. Thus, the whole of our young gentlemen must have passed severe examinations in this branch of their naval education previous to their being made lieutenants, so that, should any difficulty arise in the gunners' department, there are plenty of able hands on board a ship-of-war to meet the emergency.

And, lastly, with respect to the boatswains. Are there not fifty men in every line-of-battle ship in commission capable of being made boatswains at a moment's notice? Independent of his mates, every one of whom is an aspirant for the "call," are not the whole of our captain commanders lieutenants, sailors, to use a nautical phrase? so that it is obvious there would be but little difficulty in filling up a boatswain's warrant, or supplying his place under almost any circumstances.

But should any disaster overtake a ship requiring the skill and resources of the carpenter, can we look round a ship and call any one to his aid? I think, sir, from what I know of the Service, that we should call in vain. No. The carpenter and his mates, notwithstanding the very scanty supply of tools and materials so niggardly supplied by the Admiralty, is expected to repair and keep the ship not only in good sound condition both for fighting and sailing, but he must do this without any assistance from any one. And yet the carpenters, as a class, have no position that carries with it the least authority, and are placed in a degrading condition, not only with respect to the engineers, who are not on the executive list, but even as compared with their brother officers, the gunners and boatswains.

This is, I believe, the first time that the carpenters of the Navy have ever attempted to lay their grievances before the public, and I shall be much indebted to you if you can spare a corner in your paper for these few remarks, hoping thereby to attract the attention of the Surveyor of the Navy.—I am, sir, yours, &c.,

CHIPS.

THE ADMIRALTY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—With your usual spirit and justice you comment on the distressing circumstances connected with the state of the gun-boats, as daily brought to light. This disaster must be "probed to the core," and it cannot be in better hands. At the same time a great want of proper supervision is visible, and some blame must attach to the system which governs the Admiralty, and such it is likely to remain until public opinion operates. As you are aware that, upon every change of administration, the several Naval Lords retire, to be replaced by "new hands,"—a slight exception in favour of one, now absent on foreign service, who retained his position in two administrations of different politics, an exception which worked well, with the most beneficial results. Now, I ask, why should this system be suspended? How does it act at present? Not beneficially, as is daily experienced. A naval officer appointed for political views is truly sensible that his occupation is transient, consequently he feels that, whatever he may originate or undertake, and bring nearly to a favourable issue with some labour, will be lost by a change of administration displacing him, with the prospect that his successors will possibly ignore all his efforts. Nor does he enter upon his duties with that *con amore* spirit that his position demands.

The only remedy for this anomaly is to appoint distinguished officers with an aptitude for such duties for a fixed period, as is at present conformable to dockyards and victualling establishments, viz., five years; keeping open, if necessary, one post of Naval Lord, an active partisan in Parliament, to meet the several questions on professional topics, and giving the other three for the fixed periods as above the power and control of departments, carrying with it a responsibility, which at present attaches to no individual but to the Board collectively, amounting to *nil*. Moreover, the certainty of an appointment for five years, irrespective of politics, would instil an *esprit* fruitful in its results.

It has been generally conceded in the Service that the late Board of Admiralty possessed officers of great merit, and one in particular, who for moral courage in resisting encroachment with which no doubt you are conversant deserved every praise, but who was lost to efficiency by a change of Government. He is now seeking distinction in another sphere, having been lately selected for an important foreign command; in which his abilities will shine forth with lustre.

The present Board is well constituted, but alas! who can predict how long they may benefit the Service by their individual capacity?

I feel assured that a five years' retention would incite a zeal worthy of their professional character, and supersede that pernicious system now existing. B.

THE MEDWAY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the *Times* of the 6th December, 1859, a letter appeared stating that "the channel of the Medway is slowly filling up by the wasting away of the banks, yet although this is steadily going on from year to year, and a period of eight years has elapsed since the probable result was first pointed out to the Admiralty, Government still lays out vast sums of money in new steam basins and docks, soon to become useless. Every year makes the undertaking more difficult, and the remedy of greater expense." If nothing have been done to counteract the evil, and the matter being of serious importance, may I ask a space for this letter in your GAZETTE?—I am, &c., ERNEST W. BARTLETT.

Brighton, May 21.

THE PAY OF MASTERS, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your influential journal of the 31st of March you did me the favour of inserting in your columns my views as to the injustice and neglect exhibited towards the masters of the Royal Navy.

I perceive in your journal of the 19th instant a letter, under the signature of "Complete View." Now, "Complete View" could have had but a very distant view of the masters' position when he states the following: "That, in allusion to the store-pay of the masters in addition to their regular pay, some of the masters receive 2*s.* 1*d.* per diem, others 2*s.* 8*d.*, and up to 4*s.* per diem, to those belonging to first, second, and third rates."

All masters have not the benefit of store-money. There are 230 "masters" employed in Her Majesty's ships of war. Of this number, there are only 34 who are recipients of store-pay; the said store-pay being awarded in consideration of the 34 masters taking charge of the stores belonging to their respective vessels, and keeping the books of the gunner, boatswain, and carpenter.

It is a matter of consideration with my Lords Commissioners of the Board of Admiralty whether this policy is adopted for the purpose of saving wages and provisions to the "warrant officers" in question; hence the allowance of store-money to 34 masters out of 230.

A very great extent of duty devolves upon the 34 masters, as well as a large amount of responsibility, in keeping a correct list of stores of every description as well as accounts.

I do not presume to question the prerogative of the Board of Admiralty, whether from motives of economy or as a matter of convenience to their lordships, that it has been their pleasure so to give store-money to these 34 deserving masters. My object in thus addressing you is to give "Complete View" the advantage of knowing now what he evidently has not known before—viz., that the personal pay of the masters has nothing whatever to do (upon a general principle) with the additional store-money allowance for extra duties performed.—I am yours, &c.,

J. M. K.

The last telegram received announces a victory by Garibaldi, who is said to have attacked the royal troops, who were strongly entrenched, and to have completely beaten them. According to the same despatch, this combat would lead to the immediate evacuation by the royal troops of Palermo, Messina, Trapani, Catania, and Syracuse.

THE MILITIA.

SOUTH CORK MILITIA.—Last week Colonel Hastings Doyle, Inspector-General of Militia in Ireland, held an inspection at Bandon of the South Cork Regiment of Militia, when 28 officers and 420 men mustered for drill, under command of Major Lucas. Colonel Doyle arrived on the review-ground at half-past ten and held a long and very severe inspection, which lasted until a quarter past three, and fully proved the discipline of officers and men and the careful training which both had undergone. He expressed himself greatly pleased with the result. The officers, he observed, were about the "tallest" he had ever seen, and the men were as fine-looking a set of young fellows as he had ever had the good fortune to place under drill.

ROYAL CORK CITY ARTILLERY.—Colonel Hastings Doyle, Inspector-General of Militia, reviewed this regiment at Elizabeth Fort on Thursday week. After a minute inspection of the men, arms, accoutrements, and clothing, the regiment marched past in slow and quick time in open column of companies. There were on parade 305 men, exclusive of officers, whose soldierly appearance was the theme of general conversation amongst those who witnessed the inspection. The height of the men attracted more than once the attention of the inspecting-general, which bears testimony to the care bestowed by Captain and Adjutant Stevenson in the recruiting department.

The King's Own Rifle Regiment of Staffordshire Militia, having completed 28 days' drill, was inspected at Newcastle-under-Lyme, on Friday week, by Lieut.-Colonel the Hon. A. M. Cathcart. The regiment mustered 500 strong. In his address to the officers and men Colonel Cathcart said he believed the country would soon require their services, and that he hoped the next time he met them would be in some hard-fought field, and in the front of the battle.

The Duke of Lancaster's Own Rifles, 560 strong, under the command of Lieut.-Colonel Sir Thomas G. Hesketh, were dismissed at Liverpool on Saturday last, having completed 27 days' training. During this period their conduct has been exemplary; and at the inspection both officers and men were highly complimented on the efficiency of the regiment.

The Worcestershire Regiment of Militia were inspected on Saturday (previous to their dismissal on Tuesday last) in a field near Worcester, by Major-General Douglas, Inspector of the Militia Forces. Having gone through some military manœuvres, the men were addressed in complimentary terms by the inspecting officer, who said he should report their efficiency to head-quarters in the highest terms of approval and admiration.

The Royal Ayrshire and Wigtonshire Rifles, under the command of Sir James Fergusson, M.P., have been ordered to assemble at Ayr on the 1st of June for 27 days' training and exercise.

The West Suffolk Regiment of Militia, which has been assembled at Bury St. Edmunds for the last three weeks for the usual periodical training and exercise, was disembodied on Saturday.

The Huntingdonshire Militia have just completed their periodical training and exercise, and having been inspected by Colonel Lewis, of the Grenadier Guards, have been disembodied.

The West Norfolk Militia will be disembodied to-day.

The 1st Stafford Militia, stationed at Portsmouth, were on Tuesday officially inspected by Major-General Lord W. Paulett, C.B., commanding the south-west district. The men's kits, barrack rooms, regimental accounts, &c., were inspected in the fore part of the day, and the men were ordered to parade in heavy marching order at 3 p.m. At 3·30 p.m. they drew up in line on Southsea-common, under the command of the Hon. Colonel Talbot, and shortly afterwards Lord W. Paulett, accompanied by his aide-de-camp, rode up to the front of the regiment, and was received with the usual honours. The regiment then formed in open columns of companies, and his lordship closely inspected the whole of the men. The regiment then marched past in slow and quick time, again formed in line, went through the manual exercise, and performed a variety of manœuvres. At the close of the proceedings Lord W. Paulett addressed the regiment, and expressed his gratification at the steadiness and soldierlike regularity of its movements, which reflected great credit on its colonel and officers. Having had the regiment under his own immediate command when at Aldershot, he knew the state of its discipline, and was therefore prepared to find them as he had found them that day; still, he also found they had greatly improved ever since he had seen them last, and it would give him great pleasure to be enabled to report the efficiency of the regiment to His Royal Highness the Commander-in-Chief.

On Monday the West Essex Militia were reviewed at Chelmsford by Mr. C. T. Tower, the senior Deputy-Lieutenant of the county, neither Viscount Maynard (Lord-Lieutenant) nor Lord Braybrooke (Vice-Lieutenant) being able to attend. Eight local Volunteer companies also took part in the review—viz., the Ilford, 75 strong, commanded by Captain Davis; the Brentwood, 60 strong, commanded by Captain Coope; the Chelmsford, 70 strong, commanded by Captain Tuffnell; the Colchester, 80 strong, commanded by Captain Sir Claude de Crespigny; the Witham, 33 strong, commanded by Lieutenant Luard (Captain R.N.); the Dunmow, 37 strong, commanded by Lieutenant Wilson; the Braintree and Bocking, 40 strong, commanded by Lieutenant Sparrow; and the Rochford, 30 strong, commanded by Lieutenant Tawke. The Volunteers were placed under the general direction of Major Whitehead, of the Essex Rifles; Major Joddrell took the command of the Militia; and Lieut.-Colonel Brise acted as Commander-in-Chief for the day. A variety of manœuvres were executed with much steadiness and precision.

The Leicestershire Militia, under the command of Lieut.-Colonel King, were reviewed on Monday by Colonel Preston of the 45th Regiment. The regiment is composed of upwards of 900 men, and, although only out for training for 27 days, presents a very soldierlike appearance. The inspecting officer, at the conclusion of the review, said,—"Colonel King, I feel great pleasure and satisfaction in witnessing the state of efficiency and progress which your regiment has exhibited this day, and considering the large number of men present, and the short time allowed for the purposes of drill and training, the performance of the various evolutions and movements proves that all ranks have exerted themselves to the utmost to do credit to their regiment. It will afford me much pleasure in making a most favourable report of its state and appearance to His Royal Highness the Commander-in-Chief."

4TH ROYAL SOUTH MIDDLESEX REGIMENT OF MILITIA.—This regiment was inspected on the 22nd instant at Hounslow, by Colonel Haygarth, of the Scots Fusilier Guards. The regiment was upwards of 400 strong, and after marching past in slow and quick time, Colonel Scriven put them through twelve or fourteen of the battalion movements, which were executed with great steadiness and precision; the inspecting officer expressed himself as highly pleased with the general appearance of the regiment and with their orderly conduct in billets. After the parade, about one hundred guests repaired to the Town Hall, Hounslow, and sat down to an elegant *déjeuner*; after which dancing was kept up to a late hour.

FATAL ACCIDENT TO THE COLONEL OF THE 1ST WARWICKSHIRE MILITIA.—This regiment, which assembled for 28 days' training on the 30th of April last, were reviewed on the Common at Warwick on Thursday morning by Colonel Preston, of the 45th Regiment. The gallant colonel was accompanied by Lord Leigh, the Lord-Lieutenant of the county, wearing his official dress. There was a considerable number of spectators, but the attendance was not so large as on former occasions, a circumstance which was no doubt owing to there having been an inspection of the same regiment, and a review of the Rifle Volunteers on Monday last. The regiment, having gone through their parade movements, were formed in square, and Colonel Preston congratulated Colonel Boultbee on the state of the regiment. The regiment were then marched into the town, and on their way there a very serious accident occurred to Colonel Boultbee. The colonel was riding a spirited mare of an Arabian breed, and was at the side of Colonel Preston and Lord Leigh, when the mare grew restive. The colonel turned her round, and forgetting it is presumed just at that moment that he had spurs on, clung to the horse by his heels. This infuriated the animal, and she dashed past the regiment, and about half a mile on the Stratford road the colonel was thrown from his horse. Lord Leigh, Colonel Preston, Adjutant Vaughton, son-in-law of Colonel Boultbee, and a number of the men were quickly on the spot, and Colonel Boultbee was carried to a private house immediately opposite. The surgeon and assistant-surgeon of the regiment immediately proceeded to ascertain the nature of the injuries, when it was found that the skull was not fractured, the shako fortunately having saved that disaster. The gallant colonel was, however, considerably hurt, and being an old man the surgeons feared serious consequences. Additional medical assistance was obtained, but Col. Boultbee remained for two hours quite unconscious, and from that state of stupor he never recovered. At a quarter to four, two hours after the accident occurred, the gallant colonel passed away; and his relatives and a large circle of military friends are left to lament his loss. Colonel Boultbee resided at Springfield, near Birmingham, and had attained a venerable age.

On Thusday afternoon last the Bedfordshire Light Infantry went out to Southsea Common, Portsmouth, in heavy marching order, and was inspected by General Lord Paulet, Commander of the south-western district. The men were put through a series of evolutions, usual on such occasions, and acquitted themselves to the satisfaction of the general, who expressed his approbation of their efficiency and soldierly appearance.

The 3rd, or Royal Westminster Light Infantry Regiment of Middlesex Militia, under the command of Colonel Viscount Chelsea, were inspected by Lieutenant-Colonel Haygarth, Scots Fusilier Guards, on Saturday, the 19th instant, when the regiment mustered 600 in all ranks; having marched past in quick time with the utmost precision and steadiness, after which they were put through the manual and platoon exercise by the major, and then performed several battalion movements in a most soldier-like manner. Upon the regiment arriving at the barracks, a square was formed, when the inspecting general highly complimented Viscount Chelsea, the officers, non-commissioned officers, and men, on their truly soldier-like appearance, cleanliness, steadiness under arms, and general good conduct during the period of the training; at the same time expressing his great pleasure in having the opportunity of presenting to Colour-Sergeant Nathaniel Haiter, late of the Grenadier Guards, a silver medal for "long service and good conduct," as he handed the medal, saying, "it was one of the most pleasing duties that he could possibly perform to a good and deserving non-commissioned officer." He then inspected the regimental and companies' books, hospital, and interior economy of the regiment, and was highly satisfied.

The East Essex Rifle Militia Regiment stationed at Colchester will complete its training and be disbanded this day (Saturday). The regiment, which is under the command of Lieut.-Colonel Kelly, comprises nearly 500 men, and although they have been under arms less than one month, they have made the most satisfactory progress, and are in a very efficient state. In consequence of the camp being pre-occupied by the regiments of the line, the men have been billeted at the various inns of the town, and during their training their conduct has been most exemplary. They were officially inspected yesterday (Friday).

THE NORTHUMBERLAND MILITIA. — North Shields has been the scene of two very disgraceful riots, initiated and promoted by a party of the Northumberland Militia regiment, stationed at Tynemouth Castle. The rioting commenced on Monday night, when certain policemen while in the discharge of their duties were maltreated by several militiamen, who had to appear on Tuesday at the police-court, and were suitably punished. The cowardly and brutal conduct of the militia has caused the greatest indignation and disgust in the town; and a common and almost unanimous opinion has prevailed that they should be removed from Tynemouth at once or disbanded.

The 3rd regiment of the Royal Surrey Militia were inspected on Tuesday by Lieut.-Colonel Carleton, Coldstream Guards, at its head-quarters, Kingston-on-Thames. The regiment formed under the command of Lieut.-Colonel Challoner at 9 a.m. in 10 companies of 21 files each. The battalion marched past in slow and quick time, and went through the ordinary evolutions of a field-day. Colonel Carleton expressed his complete satisfaction with the appearance of the regiment, its good conduct in billets, and the efficiency of its officers. The regiment's training expires on the 27th.

The Clare Militia having nearly completed its short period of training for the present year, was on Saturday last inspected by Colonel Hastings Doyle, C.B., Inspecting Field Officer of militia for Ireland. The regiment mustering 320. Colonel Doyle addressed them in a few words expressive of his satisfaction at their appearance. Ensign Lawler, having passed his examination, has been promoted by Lord Inchiquin, the Lord-Lieutenant of the county, to a Lieutenancy in the regiment, and Mr. George O'Brien, son of the late Cornelius O'Brien, Esq, M.P., has been appointed to an Ensigncy vice T. R. Gore, Esq., resigned.

City of Dublin.—Ensign Arthur Vowell, to be Lieutenant (Infantry), vice Smith, promoted; John Wall Radcliff, Gent., to be Ensign, vice Tully, to Marines; Ensign Francis Vowell, to be Lieutenant, vice Tottenham, resigned; Ensign Charles Howard, to be Lieutenant, vice O'Connor, to Marines; Henry Vowell, Gent., to be Ensign, vice A. Vowell, promoted; Henry John Ryde, late 1st Devon, to be Ensign, vice F. Vowell, promoted; Robert Mackintosh, Gent., to be Ensign, vice Howard, promoted; Ensign William Wallace, to be Lieutenant; Walter Murphy, to be Quartermaster in Artillery, vice M'Adam, resigned.

The King's County Royal Rifles were embodied on Monday, for twenty-seven days' drill. The muster was extremely creditable, and the appearance of the men most soldierlike. They are to remain under canvas, from the crowded state of the barracks, and upwards of sixty tents have been pitched in the drill-field. The officers present were Colonel the Earl of Rosse, Lieutenant-Colonel Bernard, Major Warburton, Captains Buchanan, Bernard, Drought, Blackett, L'Estrange, and Price; Lieutenants Palmer, Tarleton, Bayntun, Rolleston, and Ball; Ensigns Armstrong, Urquhart, Walsh, W. B. Armstrong, and Forde; Adjutant Major Bruce, Quartermaster Evans, Surgeon Baker, and Assistant-Surgeon Woods.

The Staff of the Royal South Down Regiment have taken possession of Newry Barracks, and a large number of men have arrived in town.

The town clerk of North Shields has received a telegram from the Horse Guards, stating that the Northumberland Artillery Militia will be removed from Tynemouth.

The Bedfordshire Militia Light Infantry were officially inspected on Thursday at Portsmouth by Major-General Lord W. Paulet, C.B., commanding the South-West District. The regiment, upwards of 400 strong, arrived on the ground shortly after 3 p.m., and took up position in line with the Sappers on the right, and the band in the rear. Lord W. Paulet, accompanied by Colonel Somerset, C.B., Assistant Quartermaster-General, Colonel Thackwell, Assistant Adjutant-General for the South-West District, and Captain Nidligan, Aide-de-Camp, soon afterwards arrived in front of the regiment, and was received with the customary honours. The regiment then formed in open columns of companies, right in front, and marched past in slow and quick time; re-formed in line on No. 6 company, and went through the manual exercise and a variety of other manœuvres incidental to a field-day in a highly creditable manner, at the close of which his lordship addressed them in eulogistic terms, and said it was the first time he had seen the regiment, but hoped it would not be the last. Their appearance under arms, and the general discipline of the regiment reflected the highest possible credit on their officers and non-commissioned officers, and he should feel great pleasure in reporting their efficiency to His Royal Highness the Commander-in-Chief. The troops then returned to their quarters.

The West Kent Light Infantry Militia, having completed its 27 days' training at Maidstone, was dismissed on Wednesday. Previous to its dismissal the regiment mustered at the militia barracks. On the return of the men to head-quarters they were addressed by Colonel Sir Thomas Wilson, who stated to them the gratification which Lord Sydney and Colonel Balders had expressed at their cleanly and soldierlike appearance, and also at the manner in which they had gone through their evolutions, as well as their orderly and creditable behaviour during their training.

East Kent Militia are under orders to leave Portsmouth for Canterbury on the 11th of June, preparatory to being disembodied.

On the 15th inst. Major-General Douglas made a minute inspection of the 4th Royal Lancashire Light Infantry Regiment, which occupied upwards of four hours in the field; and, having thoroughly sifted both officers and non-commissioned officers in their duties, at the termination congratulated Lieut.-Colonel J. Ireland Blackburne on the high efficiency of all ranks. The men, numbering about 940, left Warrington on Saturday morning last, their period of training having terminated on that day.

West Norfolk Militia were reviewed on Tuesday on Mousehold-heath, near Norwich, and was disembodied on Thursday.

The Militia Gazette.

WAR OFFICE, PALL MALL, May 22.

Durham Artillery Regiment of Militia—William Wilson, Gent., to be Quartermaster.

Haddington, Berwick, Linlithgow, and Peebles Regiment of Militia Artillery—Henry Robert Hardie, Esq., to be Second Lieutenant, vice Buckle, resigned.

Eastern Regiment of Militia—Alteration in date of commission—Arthur Henry Brittain to be First Lieutenant, dated January 6, 1860. By amendment of Lord-Lieutenant.

Memorandum—3d or Royal Westminster Light Infantry Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Captain Frederick Thomas Parsons.

2d or Eastern Regiment of Norfolk Militia—Quartermaster William Hardement to have the rank of Lieutenant.

Royal Berks Militia—Captain William Francis Wheble, commission resigned, accepted by Her Majesty.

Cornwall Rangers Militia—Resignation—Captain Francis John Hext has received permission to resign his commission.

VOLUNTEERS.

METROPOLITAN.

London Brigade.—A meeting of the council was held on Monday at head-quarters, when the secretary presented a report from the architect stating that the works at the Crystal Palace were nearly completed, and that the brigade would be enabled to commence firing in the course of a fortnight. The chairman announced a number of contributions to the band and general funds.

The City Rifles.—The City Rifles, about 600, left the Guildhall on Saturday afternoon, under the command of Alderman Captain W. A. Rose, and proceeded to their exercise ground at the Crystal Palace. Their butt for rifle practice, in course of erection in the lower portion of the park, is of considerable dimensions. The range, which has a width of upwards of 100 feet, extends the whole breadth of the park near the Anerley village, and at the western end, where the butt is formed, the ground has been excavated to the extent of 40 feet. The entire range is about 800 yards, and forms one of the most perfect practising grounds in the vicinity of the metropolis.

Queen's (Westminster) Rifle Volunteers.—On Saturday afternoon this corps assembled at Westminster Hall, and marched to Vincent-square for battalion drill. On Saturday (to-day) it is intended that the corps shall meet the South Middlesex and other corps for brigade drill in Hyde Park. A few days since the colonel commandant, Lord Grosvenor, presented the corps, in Westminster Hall, with a silver bugle, the gift of Lady Constance Grosvenor. A large number of other ladies besides the donor were present to witness the proceedings of the presentation.

St. Pancras and North Middlesex.—This corps has received a sanction to increase its numbers to six hundred men; and as there is a project for an amalgamation with another rifle corps in the locality, in a short period there is reason to believe that a "North Middlesex" brigade will be formed. The corps will have its first march out with its own band, which is under the direction of Mr. Field, the band-master of the Caledonian School, in full uniform, this evening. The order is, to leave head-quarters, St. Pancras Vestry Hall, at six o'clock precisely, for the Regent's Park Barracks, where it is expected they will be joined by the 20th Middlesex (Railway Rifles) and by the 14th Middlesex (the Highgate Rifles); and out of compliment to the latter and to Captain Wilkinson, its commandant, proceed down Albany Street to Camden Town, and up the Kentish Town road, through Kentish Town to Highgate, returning by way of Hampstead to head-quarters.

Highgate (14th Middlesex).—This corps continues its drill alternately at the Regent's Park barracks and at its head-quarters, and is progressing in a most satisfactory manner.

Paddington.—This corps still progresses steadily, and had one or two marches out during the past week. Its funds also augment in a most satisfactory manner.

An Artillery Volunteer Corps is being raised in London, under the title of "The Middlesex Volunteer Artillery." Major-General Griffin, an old and experienced officer of the Royal Artillery, has been elected the provisional Commandant; and Captain W. B. Stevens, provisional Adjutant. The latter officer served in the Artillery in India for upwards of twenty years, during which time he filled all the regimental staff appointments, and was adjutant for several years. He also served in the Artillery of the Turkish Contingent during the late war.

CAMBRIDGESHIRE.

A grand muster and parade of the whole body of the Cambridge University Rifle Corps took place on Wednesday on Parker's Piece, the object being the inspection of the corps by the Government inspector, Captain Egar, of the 40th Regiment. The inspection commenced shortly after two o'clock, in the presence of several thousands of persons. The corps numbered 500 strong, under Colonel-Commandant Baker; and the precision displayed in the various evolutions was the theme of universal praise. Captain Egar expressed himself in the strongest terms of admiration of the soldierly acquirements of the whole body, but selected the 6th company for especial commendation. The chief object of the inspection was to judge of the qualifications of the corps in firing, and the inspector pronounced a highly favourable judgment. The parade lasted nearly two hours; and, shortly before four, the corps left the Piece, headed by their band, and dispersed to their several colleges. On Thursday the town corps turned out for the presentation of colours, the latter the produce of a subscription amongst the ladies.

DERBYSHIRE.

Derby—On Saturday, the Derby Rifle Regiment marched from the County Hall to the Arboretum, preceded by their excellent band, and under the temporary command of Captain Dore, staff-officer of pensioners. This gallant officer has rendered the members of the Rifle Regiment invaluable service, and he is exceedingly popular among those whose training he has watched with great care and advanced with uncommon zeal. On their arrival at the Arboretum, the various companies were put through some very difficult exercises which were executed admirably. The skirmishing and the running fire were remarkably well done, and the movements were watched with much interest by a numerous company of ladies and gentlemen. The latest appointment in the corps has been the promotion of Mr. T. Coates to the rank of corporal, vice Mr. Spreckley, resigned.

DEVONSHIRE.

Major-General Hutchinson, Commander of Forces in the Western District, issued a district order on the Queen's birthday, in which it is stated that "He cannot refrain from naming in orders the 2nd (Plymouth), 3rd (Devonport), and 16th (Stonehouse) Companies of Devon Rifle Volunteers, who at their own request formed part of the parade in honour of Her Majesty." He is fully sensible of the laudable zeal shown by them, and is much gratified at their soldier-like appearance, and at the steady manner in which they marched past and took part in the proceedings.

ESSEX.

5th Essex Volunteers.—This corps (which numbers about 350 effectives) had their first field-day on Friday week, the commanding officer having selected that day, from its being appointed for the celebration of Her Majesty's birthday, as an auspicious one for their first public appearance. The members accordingly assembled at their head-quarters, and marched to Stratford, where they were joined by Major Capper, who formed them into line and inspected them. They were marched to Epping Forest, where, after a necessary refreshment, they were put through battalion and company drill. They then returned to their head-quarters; and, after depositing their arms, separated with three cheers for the Queen and for their officers. When it is considered that they had been under arms for nine hours, in almost incessant rain, had marched from point to point about 14 miles, and had been drilled four out of these nine hours, their appearance at separating spoke highly for their system of training and their prospects of being serviceable.

KENT.

An example (says the *South Eastern Gazette*) of liberality and patriotism has just been set by Mr. Whatman, of Vinters Park, which cannot fail to place his name high among those Englishmen who have demonstrated their love for their country by substantial tokens. It affords us much gratification to announce that within the last few days, he has undertaken, unsolicited, not only to make up the numbers of the present subdivision of the 1st Kent (Maidstone) Rifle Volunteer Corps, to a company, and thoroughly to equip the extra men (between 20 and 30 volunteers) at his own cost, but to bear the expense of maintaining their efficiency for service year by year.

MIDDLESEX.

West Middlesex.—On Friday week, notwithstanding the inclemency of the weather, about 200 members of this corps proceeded by special train on the Great Western Railway to the practice-ground at Wormwood Scrubs, accompanied by their band, for skirmishing practice. On reaching the Paddington station, "God save the Queen" was played and the men marched to their head-quarters at Lord's Cricket Ground. Lord Radstock complimented the corps on their effective skirmishing and general demeanour. The directors of the Great Western Railway have handsomely erected a special station at Wormwood Scrubs, where the butts are nearly completed for rifle practice, and special trains are to run at nominal fares of 2*d.* second class, and 4*d.* first class, or return tickets 3*d.* and 6*d.* for each volunteer.

STAFFORDSHIRE.

The 28th Staffordshire Rifle Volunteer Corps (Leek) has been united to the 1st battalion; the 31st (Smethwick) has been united to the 3rd battalion; and the 32nd (Wolverhampton) to the 4th battalion. There was a question whether majors would be allowed to these battalions, not being what are denominated "Consolidated Battalions;" but these appointments have been conceded, and majors will be appointed to all the battalions under lieutenant-colonels. But the 3rd battalion will not receive their major until the Kinver corps shall have been added to that battalion. All the four battalions for the county of Stafford are now considered as formed for drill and administrative purposes. The drill officers of the 2nd and 3rd battalions are not yet formed.

WARWICKSHIRE.

Warwickshire Rifle Corps.—The second battalion of the Warwickshire Rifle Volunteers were reviewed on "The Common" at Warwick on Monday afternoon last by the Hon. Colonel Scott, in the presence of Lord Leigh. The weather was remarkably auspicious, and everything passed off admirably, Colonel Scott highly complimenting the corps on its condition.

YORKSHIRE.

Bridlington.—The Artillery Volunteers.—Some nine or ten days ago, the first of the heavy guns—a 32-pounder—destined for the protection of the bay and coast, arrived, On Friday week, at noon, under the direction of Captain Haworth, in honour of Her Majesty's birthday, 21 discharges were given from the cannon. It is understood that arrangements for an effective brass band for this corps are nearly completed. It may be remarked that the Bridlington Artillery Corps is not only the first that was raised in Yorkshire, but the first also in the county that has had the honour of firing a Royal salute in the celebration of Her Majesty's birthday. The Rifle Volunteers.—Under the patronage of the officers, non-commissioned officers, and gentlemen of the Bridlington company of the East York Rifle Volunteers, a dress concert and ball was given, on Monday, the 21st instant, in the Temperance Hall. The orchestra and room were elaborately and tastefully decorated with evergreens, ingeniously interspersed with a variety and profusion of artificial flowers made for the occasion. Shortly after eight o'clock a gay and tolerably large number of ladies and the officers and gentlemen of the Artillery and Rifle Corps, in their uniforms, as well as several others, were assembled. The ball was well and highly respectably attended by many of the principal ladies and gentlemen of the town, among whom Captain Palmes, R.N., and lady; Captain Prickett, of the East York Militia; Captain Pitts (unattached); Captain Prickett, of the East York Rifle Volunteers, 5th company; Acting Adjutant Richardson, 5th Company Rifle Volunteers; Lieutenant Harland, of the Rifles; Lieutenant Holden, of the Artillery; the Artillery and Rifle Corps' surgeons Brett and Allison, as well as many of the sergeants, &c., of both corps. Dancing was well and spiritedly kept up till about three o'clock, and the whole passed off quite satisfactorily.

Driffield Volunteer Rifles.—On Tuesday evening the corps assembled in the Market Place, and, accompanied by the band, marched to the Corn Exchange, where the oath of allegiance was administered by E. H. Reynard, Esq., J. P., to 76 of them, including the band. A few were unavoidably absent. The rules were read over by Captain Conyers, and the corps was then put through drill exercise in the presence of Mr. Reynard, who addressed them in a very complimentary manner on their efficiency, and hoped that when they went to Beverley to the review they would take the first rank as Driffield generally did on such occasions. On taking his leave he received a warm round of applause.

Richmond.—The Enfield rifles, 64 in number, have been received from Government during the past week. The corps

Digitized by Google

drills five nights in the week, in the Castle Yard, under Sergeant-Major Green, of the North York Rifles.

11TH WEST RIDING.—The celebration of the forty-first anniversary of the birth of Her Most Gracious Majesty Queen Victoria took place on the 18th inst. The Leeds Volunteer Rifle Corps and 11th West Riding, who we are sure will never be found lacking in devotion to their Queen and country, fired a *feu de joie* in commemoration of the event in the spacious playground of the Leeds new Grammar School. The day unfortunately was very far from being characterised by "Queen's weather." Nevertheless the Volunteers, like true soldiers, were not dismayed by the inauspicious state of the elements, and they mustered at the appointed place—the yard of the Coloured Cloth Hall—in considerable force, shortly after three o'clock in the afternoon. Before leaving the Cloth-hall yard they were visited by General Douglas, the Inspector-General of militia, who happened to be passing through Leeds on official duties, and accidentally heard of the assembling of the riflemen. The gallant general, briefly addressed the men, expressing his satisfaction at their efficiency in military drill, and the completeness of the general organisation of the corps. We may remark, *en passant*, that the plan recommended by General Douglas has been acted upon in the Leeds Rifle Corps. The commissioned officers of the corps present were—Major Armitage; Captains Horsfall and Kinnear; Lieutenants Cousins, Kitson, Piper, and Atkinson, and Ensign Irwin. The recently appointed adjutant of the corps, Captain Hunt, was also present. This corps has, until lately, drilled morning and night on each day during the week, and now drills every morning and three evenings a week. On Saturdays, the corps, headed by their band (which is one of the best in the kingdom, composed of amateurs who are working men), march several miles. The corps are indebted in a great measure to their sergeant-major and the drill-sergeants for the progress they have made, but it is only right to add that the members have been most assiduous in attending drill and making good use of the valuable instruction they have received. On Whit Monday, being a holiday, the corps intend marching to Harewood Park, the seat of the Earl of Harewood, which is about eight miles from Leeds.

YORK.—This corps is making satisfactory progress in drill, already a large section were steadily engaged in target practice. The shooting is remarkably good, and several members bid fair to become first-rate shots. Lady Mary Thompson of Sheriff Hutton Park, near York, has signified her intention of presenting the York corps with a handsome silver cup to be shot for. We understand arrangements are in progress for the 1st Battalion of the West York Rifles having their first grand field day at York, early in August next, when in all probability numerous prizes will be shot for, at the excellent range which the York corps have been fortunate enough to secure.

CAPE OF GOOD HOPE.—The Volunteers were reviewed at the Camp Ground on the 30th March by the Lieutenant-Governor. The day was a very fine one, and the whole proceedings passed off with great *éclât*. There was an inspection, followed by a lunch, and a glorious action, in which a fort constructed and defended by the sappers and miners was taken, followed by a dinner at which the colonel-in-chief presided, and congratulated the Volunteers on the soldierly qualities they had displayed. He intimated that the Lieutenant-Governor was not only pleased, but actually surprised at the proficiency which had been attained.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, MAY 22.

Glamorganshire Rifle Volunteers—9th Company—Richard James, Gent., to be Ensign.

12th Staffordshire Rifle Volunteer Corps—The Rev. Horatio Samuel Fletcher, Clerk, to be Honorary Chaplain.

51st Lanarkshire Rifle Volunteers (Glasgow)—Lieut. John Crawford to be Captain, vice Robert Buchanan, resigned; Ensign Frederick John Christian Dietrichsen to be Lieut., vice Crawford, promoted; John Hamilton, Gent., to be Ensign, vice Dietrichsen, promoted.

88th Lanarkshire Rifle Volunteers (Glasgow)—William Robertson, Esq., to be Captain; William McWhinnie, Gent., to be Lieutenant; Alexander Sheridan Knowles, Gent., to be Ensign.

11th Cornwall Rifle Volunteer Corps—Ensign Edward Parkyn, to be Captain, vice Willyams, resigned; Hannibal Tyacke Ellis, to be Lieutenant, vice Cook, resigned; Richard Ferris Michell, to be Ensign, vice Parkyn, promoted.

Memorandum.—The 2nd (Oxford City), 3rd (Banbury), 4th (Henley), 5th (Woodstock and Witney), 6th (Doddington), and 7th (Bicester) Oxfordshire Rifle Volunteer Corps have been united into a Battalion for administrative purposes, with a staff consisting of a Lieut.-Colonel and an Adjutant. The Battalion will be numbered as the 2nd in the county, and the several corps composing it will retain their present numbers and designations in the county force.

THE OFFICIAL "NAVY LIST."—The "Navy List," published by authority, is a work that, from the great number of details which it embraces, requires much care in its compilation; but when we consider that the gentlemen at the Admiralty, to whom the task is delegated, have three clear months in which to do their duty, we think, in common with many officers of the Service, that it might be sent forth with more accuracy than it at present exhibits. We will content ourselves with pointing out a few of the errors which in a hurried glance over the list we discovered. We are told that "the effective ships" amount to 548 vessels of all classes, but we find that there are no less than 79 numbers missing: for instance, in the first page there is a jump from the Aboukir, No. 1, to the Achilles, No. 3, and so on through almost every page; but in order that John Bull, in taking stock of his wooden walls, should not run away with the idea that his property was diminished to the extent of one-seventh, we can comfort him by stating that there are at least from 45 to 50 ships—from the stalwart Repulse of 91 guns, to the puny Snipe, cutter, of 2 guns—without any numbers at all; but as most of these are building, and have yet to be launched, we cannot see how they can be called "effective." An attempt has also been made to classify those ships which, in case of need, might be depended upon for sea service, and those only fit for harbour duty; but in this there has also been a failure; with all our reverence for Nelson's flag-ship, we could not bring ourselves to believe that she would ever be fit for sea again. The Victory should therefore be deducted from the "effective list," so should the Nereus, Madagascar, Seringapatam, and Naiad, all old coal and store ships, fit for nothing but the services on which they are now employed. The "effective list" could bear weeding to a greater extent than this, and only requires the professional eye of the Comptroller to run over it to ensure the removal to another column, under a different heading, of all old, useless, and unseaworthy hulks. There are many other mistakes, such as conferring honours upon officers who have not, however entitled to them, yet been so distinguished; for instance, Captain John E. Commerell, of the Magicienne, is a C.B. by the compilers of the list, instead of being designated as the wearer of a Victoria Cross. Again, officers are posted to ships to which they have never been appointed. The means to be employed for correcting all blunders are at hand at the Admiralty, and all that is required is a little careful checking upon the part of those who receive a handsome allowance in addition to their ordinary salary for doing the work confided to them; and they would at the same time do well occasionally to turn to the United States' Navy List, to which reference is made in another part of our impression. They will there find simplicity of detail with a total absence of unnecessary repetitions. We shall be disappointed if the July list does not show a great improvement over that issued in April.

Sargon is described by a French officer as a place of exquisite beauty and fertility. The Donhai, where it passes the city at 84 leagues from the sea, is a mile broad and has from 10 to 15 metres of water, so that the Great Eastern could steam right up to Sargon. On 23rd February the port was declared free, and 200 ships arrived to take in rice. The drawbacks are heat, musquitoes, crocodiles, and serpents.

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12*s.* each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

MILITARY DISCUSSIONS IN PARLIAMENT.

The Army estimates are fixed for discussion for next Thursday in the House of Commons, and, judging from the notices which we subjoin, a copious and varied debate will take place.

Mr. M'Evoy,—On going into Committee of Supply on Army Estimates, to move that an humble address be presented to Her Majesty praying that she may be graciously pleased to order that those officers in the Army who have been promoted from the ranks may be allowed to reckon their previous services in the ranks, in the same manner as is now permitted to paymasters and quartermasters, so as to enable them to avail themselves of the 30th section of the Royal Warrant of the 14th day of October, 1858, which regulates the retirement of combatant officers in the Army and Ordnance corps.

Mr. Butt,—On going into committee of supply, to ask the Secretary of State for War if it be the case that the medical officers of the Army, during the service of their regiments in India, are deprived of the advantages both as to pay and rank granted to medical officers by Her Majesty's recent warrant; and, if so, whether it is intended to adopt any steps to remedy this.

Colonel Lindsay,—On going into Committee of Supply on Army Estimates, to call the attention of the House to the army promotion warrant of October, 1858, in respect to the position of certain general officers who accepted promotion on half pay in accordance with the terms of the general order of the 25th day of April, 1826, and are now receiving only the half pay of their former regimental commissions:

To the position of field-officers placed upon half-pay upon their removal from Staff appointments, on the expiration of five years' Staff service:

And also to the Medical Warrant of the 1st of October, 1858, in respect to its retrospective action upon certain efficient medical officers.

Mr. John Locke,—On going into Committee of Supply on Army Estimates, to call the attention of the House to the claims of the artificers of the Land Transport Corps, enlisted during the Crimean war.

Sir John Trelawny,—On going into Committee on Army Estimates, to call attention to the effect of selection of Lieutenant-Colonels of regiments upon the relative positions of the Guards and Line in cases of exchange; and to ask whether the grade of salaried full colonels might not be abolished (as regards the future) without disadvantage, and so as to effect a considerable saving; whether aide-de-camps are subjected to adequate examination, (as in a certain foreign service), and whether they have regimental pay when not on regimental duties; whether there is any ground for a difference between Guards and Line as to the necessity of certain officers going on half pay before they can go on the staff; and whether it is true that any Guards' officers have as much as eight months' leave for the year.

Mr. Conolly.—On going into Committee of Supply on Army Estimates, to move that an humble address be presented to Her Majesty, praying that Her Majesty would be graciously pleased to give the necessary orders to Her Majesty's Government (War Department), to enable them to restrain the officers of Engineers in Ireland from putting forward claims to rights of fishery on the coast and in the inland waters in Ireland, in respect of lands or positions held for purely military purposes.

Major Edwards,—On going into Committee of Supply on Army Estimates, to ask the Secretary of State for War whether any correspondence has passed between the War Office and the Treasury, or any other department of the Government, respecting the omission from the army estimates of the usual vote for the annual training of the Yeomanry Cavalry; and, if so, whether he has any objection to produce such correspondence.

Mr. Adderley,—On going into Committee of Supply on Army Estimates, to call the attention of the House to the Report of the Committee on the Military Defences of the Colonies.

Sir J. Fergusson,—On going into Committee of Supply on Army Estimates, to call attention to the deficiencies in the strength of the Militia force.

Sir J. Fergusson,—On going into Committee of Supply on Army Estimates, to ask the Secretary of State for War whether it is with his sanction that assistant-surgeons who had completed five years' service before 1859, and who by the regulations in force previous to that year were eligible for promotion after five years' service, are now only to receive their promotion on condition of their passing an examination.

Sir R. Peel,—In Committee of Supply on Army Estimates, Vote No. 5, for the Volunteer Corps, to move an amendment with the view of reducing the estimate of the charge for Volunteer Corps during the ensuing financial year.

Captain Jervis,—In Committee of Supply on Army Estimates, to call the attention of the House to the condition of the general and commanding officers of the Ordnance Corps.

Sir S. Northcote,—In Committee of Supply on Army Estimates, to move, that the vote for fortifications be deferred until the House is in possession of the views of the Government with regard to the military defences of the country.

Sir F. Smith.—In Committee of Supply on Army Estimates to move that the vote for Fortifications be postponed until the House has had before it, for the period of one week, a detailed statement such as was presented to it in the estimate of 1859-60, and in previous estimates, of the manner in which the amount asked to be voted is to be applied.

Mr. Griffith.—In Committee of Supply, Army Estimates, Vote 3, to ask the Secretary of State for War for some information on the subject of the recent regulation, enabling Cavalry officers to obtain chargers from the service horses of the regiment.

Mr. Griffith.—In Committee of Supply, Army Estimates, Vote 5, to ask the Secretary of State for War for information on the subject of the addition of 25 or 30 foot riflemen per troop to the ordinary strength of the Wilts Yeomanry Cavalry.

Digitized by Google

SHIPWRECKED MARINERS' SOCIETY.

The twenty-first annual meeting of this excellent and largely influential society, which it appears numbers in its ranks upwards of 62,000 supporters, 46,500 of whom are master mariners or mariners, was held at Willis's Rooms on the 25th inst. His Grace the Duke of Marlborough, President of the Society, was in the chair.

A letter was read from Sir Richard Glyn, Vice-President, sending 10*l.* Letters were read from Vice-Admiral Earl Hardwicke, M. Gore, Esq., and Lord Henry Cholmondely, regretting their inability to attend. The secretary, Mr. Lean, read the report, by which it appeared there were 3329 wrecks reported at Lloyd's in 1858, that the fearful storms of last year had greatly increased that number.

The committee report that during the last year by means of 500 agents spread over the coasts of the United Kingdom, in conjunction with the central office in London 6792 shipwrecked persons had been clothed (if necessary), and sent to their homes; or if foreigners to the nearest consul of their nation, and 3562 widows, orphans, and aged parents of mariners had been relieved, making a total of 10,354 persons. The income of the society appeared to have been 13,503*l.*, and that the great distress amongst the shipping had caused an excess of expenditure over income of 2510*l.* 10*s.* 6*d.* during the last three years. Five gold and 19 silver medals have been awarded during the past year for gallant exertions in saving the lives of 604 persons. It was stated that it was the purpose of the committee to go on with their scheme for establishing a pension fund and an hospital for worn-out merchant seamen, supported by their own payments and any aid that the public might be pleased to give. Admiral Sir George F. Seymour and Admiral the Earl of Shrewsbury and Talbot moved and seconded the adoption of the report. The other resolutions were moved and seconded by Revs. H. B. Owen, R. H. Baynes-Wallis, Captain Henry F. Maude, R.M., Colonel Nolloth, R.M., G. A. Brograve, Esq., and Arthur Ellis, Esq. All the resolutions were carried unanimously, and the meeting terminated by a vote of thanks to His Grace the chairman.

The General Commanding the Forces in Ireland having occasion to believe that in some of the regiments and corps in this command officers have fallen into the habit of sitting as members of regimental and other courts-martial in blue undress coats, begs to remind commanding officers that such a practice is contrary to the regulations of the Army, and desires that henceforth they may be careful that all officers when engaged on this important and solemn duty be dressed in full regimental uniform.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

"EASTWARD HO!" and "HOME AGAIN!"—These two interesting Pictures, painted by HENRY O'NEIL, Esq., A.R.A. (representing the Departure of Troops for War and their subsequent Return), are now being EXHIBITED TOGETHER, for the first time in London, at 191, Piccadilly, from Ten till Six daily, admission Sixpence.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

EXHIBITION OF HOLMAN HUNT'S PICTURE OF "THE FINDING OF THE SAVIOUR IN THE TEMPLE," commenced in July, 1854, is now ON VIEW at the GERMAN GALLERY, 168, New Bond Street, W., from Nine till Five. Admission, One Shilling.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.

The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

No. 2, Light Infantry Model	1	8	0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s.*, or strongly electro-plated, 63*s.*; green cord and tassels, 3*s.* 6*d.*; silk ditto, 8*s.*; enamelled leather case, with strap and buckle, 12*s.* Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with Instruments and music of every description.

NOTICES TO CORRESPONDENTS.

The sooner such gentlemen as "A PRIVATE," if there be any more of them, retire from the Volunteer Service, the better for the country. He writes about saluting, and sword wearing, and side arms, as if such questions were vital to the movement. If they be so the movement is not worth a rush. "A PRIVATE" is one of those silly people, as far as can be judged from his letter, whose object in joining the Volunteer Service was to wear a uniform, to hang himself round with sashes and side arms, to carry a sword in the street, and to be saluted by the Guards.

We have not received the account of the Yeomanry and Volunteer inspections referred to by a Nottingham correspondent.

In the letter from a "Mournful Peak" in last week's paper, by a mistake "Sabretache" was printed instead of "Shabracque."

ORIENT. It would be irregular and inconvenient to publish a letter referring to an article which did not appear in our columns.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 26, 1860.

When, in the autumn of 186—, our "faithful ally," who, whatever may be his private feelings, can never forget that the interests of his country are still more sacred, shall have made a magnanimous peace as suddenly as he made an unprovoked war; Waterloo being avenged by the seizure of Malta, and the annihilation of our Mediterranean squadron by superior organisation and numbers—the chairman of quarter sessions, or other "politico" who may happen to be the temporary wielder of our military maritime power, will probably stoop to inform the nation, through the medium of a Mansion House dinner, "that the period has arrived for the organisation and re-construction of the Navy of this great country." The right honourable gentleman will resume his seat amid loud cheers, and Shadrack and his co-Mosaics of the choir will sing "Rule Britannia" according to precedent. Now, wishing to preserve those "cursed streets of stairs," and likewise not being desirous of seeing the squadron which makes it its rendezvous overweighted, though it is rather mutinous at present, we wish to anticipate the right hon. gentleman, whoever he may be, and therefore submit the necessity of seriously considering the disorganisation and want of re-construction unhappily too apparent in our right arm of defence. The cardinal points of which may be thus briefly classed:—

1. Administrative Re-construction.
2. A Standing Navy.
3. An Available Reserve.
4. Working Officers.

The first is required, because the Board is irresponsible, and does not keep accounts; as exemplified by the present Secretary of the Admiralty, in Opposition, when all the public could ascertain of a missing item of 5,000,000*l.* was, that it went—midshipmen generally account for a deficit in their quarterly allowance in a similar manner—and also that my Lords pay more than double the market price for what they go to the expense of demonstrating to be an inferior article; as in the case of anchors, when, having proved by repeated trials the inferiority of their own to all others, they not only persist in contracting for more, but in paying the fortunate contractor more than twice its market value,—only paralleled by those old salts who used to light their pipes with banknotes, but with this wholesome difference, that they were squandering their own instead of the public money; for, if this may be taken as a criterion of Admiralty contracts,—and why not?—a saving of 1,500,000*l.* may be effected in the item of naval stores alone, to say nothing of the victualling and transport contracts. In short, we find profligate and unaccountable expenditure everywhere save under the head of wages; there it is niggardly indeed. And finally, that past and present Boards have only accomplished one object, namely, the getting rid of any amount of money that the House in blind confidence is ready to vote them, the result being invariably unsatisfactory, and, at the present moment especially, alike dangerous and humiliating.

The second is required, because a standing Navy is the only firm basis on which to build our maritime supremacy, and the only form which possesses that elasticity requisite to cope on sudden emergency with the rapidly-developing navies of the world, and particularly the vast amount of latent strength acquired by our neighbours through their system of marine conscription.

It is demanded, also, because irregular bodies will no longer be able to triumph by sea or by land against disciplined and highly-trained adversaries, even of inferior physique.

It commends itself on economical grounds; and last and not least, it is the only comprehensive nucleus round which to form and rally Reserves.

The third is required, because the Admiralty schemes for a Reserve are abortive, and only exist on paper, and will be best attained by a steady increase of the Coast Guard, and the creation of a transport service. In future, all troops, stores, &c., should be carried, if not absolutely in Government bottoms, in vessels partially manned by the standing Navy, and men borne as irregulars for comparatively short periods of service, but liable to serve in case of war. By this means a healthy connection would still be maintained with the mercantile marine—which is more desirable—and a useful body of seamen held in hand for emergency.

The fourth is required, because working officers, always on full pay and actively employed with the standing Navy, will—patronage being abolished—find greater rewards for their zeal and service than under the present system, which is admirably adapted for those of high social position, or moneyed or amphibious interest, who are thereby enabled to make a lounge of the Service, either remaining to clog and cumber the lists, or when it suits their convenience, returning to high commands, when they are not even fit to be commanded—to the exclusion of those who have borne the heat and toil of arduous service and unhealthy climates, but who are not posted in that underground passage which leads from the Senior United Service Club to the Man in the Moon at Whitehall.

Whatever might have been the other merits of Sir John Pakington's scheme for the Retirement of Naval Officers, and the consequent opportunity which would have been afforded by that means for the promotion of younger and more active officers, it certainly presented advantages in the mode of treating the junior ranks of the Navy. After fifty-five or sixty years of age—with rare exceptions—men are not able to perform with efficiency the duties of either admirals or captains, and still less are officers then fit to be retained in the subordinate ranks of commanders or *lieutenants*. It is said that the Duke of Somerset has also a scheme for a Naval Retirement in a forward state. We trust his Grace will not be deterred by considerations which, we fear, had too much influence upon his predecessor, from including admirals as well as captains and lower ranks, in his regulations for a Naval Superannuation, in the proper sense of that word. We are proud of our old admirals who, like Howe, are ready to fight in their old age, and as far as pluck and daring are concerned, might be matched with the youngest officers in the Service; but we are not unmindful of what the character of our next naval war must be, and we warn the admirals themselves, as well as the Admiralty, that we cannot afford to run any risks. Great scientific attainments, as well as the utmost energy, will be required whenever hostilities are commenced. Officers who have been long unemployed afloat, and all who are not fully acquainted with the whole subject of steam propulsion and of modern theoretical tactics, as affected by steam, modern rifled ordnance, and hollow shot filled with molten iron, had better not risk their reputation and the salvation of the country by accepting a command, even if it were offered them. But we trust the gunboat frauds and other mischances at the Admiralty will be compensated, in some degree, at least by common-sense measures, as regards the retirement of old officers and the future state of the active list. Hitherto, the Duke of Somerset has not been able to do much to "win his spurs." Will he throw away this opportunity?

We are perfectly aware of the great difficulties of the subject, and that it will be simply impossible to please all parties. Probably the First Lord of the Admiralty has not better opportunities of knowing the feelings of naval officers as to their grievances than we have. Our table is covered weekly with communications from admirals and captains and other officers, as to their respective hardships. Some of these, we are bound to say, are real, but some are only fancied; and many of the propositions urged by officers in some positions are antagonistic to the pleas of others in a different class. This alone shows the necessity for a firm yet delicate handling; and, as this is a subject for the satisfactory settlement of which titled and civilian First Lords have been said to have very special qualifications, we think the public are entitled to

Digitized by Google

expect much from the Duke of Somerset. We have frankly criticised the doings of the Board of Admiralty. We think there can be no question, that they are not the best qualified to decide upon questions of shipbuilding and others, which, "in the intervals of their other duties," they have sometimes attempted. The present question, however, pertains entirely to their proper business, and in it there is no Storekeeper-General or Surveyor of the Navy—not even a Contractor—for a scapegoat. A blunder in this will, in all respects, belong to the Board itself.

But having said thus much as a hint to their Lordships, we must now—charged as we confessedly are with considerable knowledge as to the various expectations of the naval officers—give a little bit of advice to the expectants themselves, which we judge is especially wanted, from the perusal of a privately-circulated pamphlet on the "Present Condition and Prospects of the Captains of the Navy." The writer of this pamphlet is zealous for his own class, and goes upon every tack—a very proper nautical course, when dealing with unstable winds and water, but fatal upon paper and in logic,—fatal, also, even as a popular mode of pleading a cause. For what would the public say, if they heard that the foremost grievance of the captains of Her Majesty's Navy is, that they *are captains!* "On attaining this rank the officer, without interest, finds his occupation gone; he has scarcely a chance of employment."—And that the second grievance is, that they often decline employment when they get this rare chance. "If he should unexpectedly receive an appointment, ... prudence must often dictate non-acceptance of the proffered favour." Then we think it is *mal-à-propos* and somewhat "*infra dig.*" to compare the pay of captains with clerks, paymasters, surgeons, and other civilians in the Service. Many of these arguments, if they can so be called, only amount to this, that some captains of the Navy have mistaken their profession, and cannot very well afford to hold the position they have chosen in life. The mere money estimate of the "British Captains'" pay, compared with the pay in the American and French Navies, is putting the matter on very low grounds. Half-pay may be very small for gentlemen who have hoped to live upon it; but is it not better than none? And how is it possible to avoid the necessity of having a surplusage of officers in times of peace? That the Active List is now redundant is simply notorious; and that the Duke of Somerset will deserve the gratitude of the general public, as well as the officers of the Navy, if he can greatly lessen the evils of such a necessity, is most freely acknowledged. But the Duke cannot do impossibilities. He cannot rapidly promote to the rank of captain, and easily keep down the numbers on that list who are unemployed. He cannot weed the list, and yet retain upon it all the old officers. He cannot give the unemployed and the employed an equal amount of pay. And he cannot very well increase the ships in commission, to any great extent, till a naval war really becomes imminent.

What his Grace can do, we hope he will endeavour to accomplish; and we trust we shall not have long to wait before his scheme of Retirement is announced. The principles he enunciated some weeks ago in the House of Lords on the subject of promotions by merit instead of by seniority and purchase, certainly showed a right feeling; and we therefore think it only fair to wait patiently for his plan of Retirement.

A common subject of complaint, also, among naval officers of the highest rank, is the frequent employment of the same admirals again and again, to the exclusion of others. We must confess that to us it appears strange that this should be so. Surely, on the large list of admirals we have a goodly few both willing and well-qualified to serve. Of these, none should be left unemployed when their proper turn comes; but, at the same time, we must observe that we cannot defend a mere seniority system; and we believe that the seniority argument and the unwillingness of the majority of old officers to retire, have been the real causes why so few on the list are employed. It is so much easier to continue the same Flag flying than to attempt a change, and thus raise a hornets' nest of seniors, all claiming the command, when "my Lords" know that it might become a Cabinet question if they even dared to listen to any one of the first ten, twenty, or thirty on the list who might have asked for the appointment.

It appears to be of little consequence (though made much of in the pamphlet before alluded to) whether midshipmen's or mates' time is allowed to count for half-pay and retirement or not. If so, we presume less pay would be allowed for each year than if only time after promotion is counted; and the difference might thus be as "six and half-a-dozen." But the grand remedy for the recurring evils affecting the active list is an age for retirement—the only plea of *seniority* which, in our estimation, ought invariably to be observed as a rule in the Service.

The gun-boat controversy has reached its crisis, and we may therefore naturally expect that the excitement will subside. Messrs. Green, of Blackwall, have admitted that unseasoned wood was used by them in the construction of the vessels for which they contracted; but they shield themselves from all blame by stating that the Lords of the Admiralty were made acquainted by them with the fact. They also do not deny that short bolts were in several instances driven, but they attribute this most serious circumstance to a number of unprincipled workmen, whom by the urgency of the case they were compelled to employ.

We believe that there has been a little unnecessary clamour raised on this subject, but the agitation has been attended with results which will prove satisfactory; for we have good reason to know that up to this time, fault has only been found with the work of one contractor, while the craft turned out of the yards of several other builders have been pronounced to be in excellent condition.

We think that, before uttering a sentence of utter condemnation against the contractors who in so short a space of time launched the "Mosquito Fleet," which did service in the Baltic and Black Seas, and since then on the distant coasts of China, we should institute some inquiry into the state of the gun and mortar boats constructed by the French and Russian Governments during the war. Sir Maurice Berkeley is a little angry with Messrs. Green; but allowance must be made for the gallant officer, for never did a man work harder than he did from the commencement to the termination of the Russian war. His whole soul was given to the discharge of his duty; and, when we recall to our memory the speed with which he dispatched ship after ship to reinforce Sir Charles Napier, we can forgive any ebullition of temper on his part.

Some years ago, when advancement in the Naval Service was more difficult than it is at present, there was a saying that "a Dundas was sure to be promoted while there was a Hope left." Times have changed, and interest seems to have migrated from the north to the west country, for we find that the good things of the Service are heaped with a lavish hand upon the Fanshawes, the Stopfords, and the Martins. If there is an important command vacant, a Martin or a Fanshawe steps in almost as a matter of course. If there is a good service pension at the First Lord's disposal, a Stopford, if there is one eligible, gets the preference over all competitors. If a fine line-of-battle ship is without a captain, one of the "family," although he may have flogged two out of every three of his crew in his last commission, hoists his pennant.

The Devonport command is now vacant, owing to Vice-Admiral Sir Barrington Reynolds having served his allotted period of three years; and it has been currently reported that the new K.C.B., Sir Arthur Fanshawe, red-hot from the Mediterranean, is to be his relief. What a reflection upon the poor Vice-Admirals who have not been so fortunate as their brother officer! Surely there can be found one hale enough and capable enough to take upon himself the responsibility of the duties of an Admiral of a Port, without taxing Sir Arthur Fanshawe with the task of assuming one command after another. If not, the sooner the Duke of Somerset can bring forward a sound scheme of retirement, the better will it be for the country, and for the Service.

The details of the reorganisation of the Indian Army are being arranged, and we believe that, as regards an equitable settlement of the vested interest in the different funds, no difficulty is likely to arise. The European Cavalry and Infantry regiments, which have been hitherto local, will become part of the Queen's regular imperial service; the Cavalry being numbered the 19th Light Dragoons, &c., and the Infantry the 101st Foot, &c. But we understand the purchase system of the present imperial army will not be extended to these corps, in which a system of promotion by seniority, tempered by selection, will be adopted, the first appointments in these regiments being made by open competition. The officers of the native regiments that mutinied, most of whom are now on the Staff, will be allowed to continue in their appointments without any restriction as to time; but all the new Staff appointments will be made from a Staff corps, for which any officer belonging to a corps serving in India, who has himself been one year with his corps in that country, will be eligible. A certain period (five years) of actual Staff service, exclusive of leave of absence, will entitle the officer to a step of military rank. Where so many of the details of the new scheme are still under consideration, we do not feel warranted in anticipating the changes more minutely; but we believe the above are likely to be the leading points of the amalgamation scheme.

Among a whole crop of notices, which will be found in another column, of questions to be brought forward in the House of Commons on Thursday evening, on going into Committee on the Army Estimates, we find one from Sir John Trelawney directed against the retention of the office of Colonel of a regiment. In speaking of that most unfortunate appointment of General Grey last week, we alluded to a previous attempt like Sir John Trelawney's; but we earnestly hope that an exceptional case or two will not induce the House to listen to a proposal, the effect of which would be practically to diminish the already inadequate rewards for good service bestowed upon old and gallant officers. It would be a very unsatisfactory thing for the Service, if a bad appointment or two—if the misapplication of the money granted by Parliament as rewards for distinguished service—were to be made an argument for the total abolition of these rewards. Rather let Sir John Trelawney endeavour to extract from the responsible Minister a pledge that no such appointment as that of General Grey will again be made. If so, he will have done good service to the Army and the public interests.

It has been announced, that shortly after Whitsuntide the Government will bring forward a Bill for the amendment of the present Militia. We warn those who look forward to a general modification of our Militia system, not to expect too much from this announcement. We fear that the Bill of the Government, though to a certain extent useful, and proceeding in the right direction, will almost exclusively deal with details, and avoid the larger questions which have from time to time been raised with the object of making the Militia—what it ought to be—a powerful local force, organised only for purposes of national defence. The new Bill will substantially embody the recommendations of the Royal Commission on Militia Organisation, which are sensible though very much restricted in their scope.

It is highly probable that Colonel Studholme Brownrigg, C.B., now Deputy Adjutant-General in Ireland, will succeed Major-General Forster as Deputy Adjutant-General at the Horse Guards, on the latter succeeding Sir Charles Yorke as Military Secretary. Sir Charles resigns his office on the 1st of July.

Colonel Daubeney, Inspector-General of Army Clothing, is at present in Paris on an official visit, in order to investigate the system and economy of the clothing departments of the French army. We believe that up to the present there is no foundation for some of the statements that have been made as to the contemplated change of uniform. Nor is it probable that any alterations, save some of an unimportant character, will be made for some time.

With reference to an article in last week's GAZETTE, our attention has been called to a Parliamentary Paper, No. 33 of the present session, being an account of naval prize-money, &c., from which it appears, that far from there having been any delay in distributing the prize-money of the Russian war, it actually commenced as early as May, 1855; and that almost all the certificates of distribution are dated in 1855 and 1856. As regards the later distributions of 1857 and 1858, they simply arose from "the law's delay" in adjudicating in certain exceptional cases. Some of the condemnations have also since been reversed on appeal; and only a few such cases remain undistributed. We have much pleasure in thus noticing the promptness with which the prize-money is now distributed through the department of the Accountant-General of the Navy, free from all abatements for agents' commission; and therefore presume that there is some satisfactory reason if the Canton booty is not yet payable. As to the Peiho affair, it is still very recent; and we only hope the gallant mariners have something ultimately to come to them.

When the contracts for the steam rams were taken last year, it was specified that they were to be ready for service within twelve months. This period has now or is on the point of expiring in the case of more than one contractor; but we hear nothing of the launch of any of these vessels. Our neighbours on the opposite side of the Channel have displayed greater smartness; for already some of their steel-plated ships are ready for work. It is strange that in this mechanical, iron-producing, coal-giving country, we should allow ourseleves to be outstripped; but so it is. The contractors entered into the agreement with their eyes open. They signed and sealed under no compulsion; they got their own prices, and should be compelled to keep faith.

M. Xavier Eyma, one of the leading writers of our contemporary, the *Moniteur de la Flotte*, is in raptures with M. Lesseps and his scheme; and, after a few words on the alleged intrigues of England to thwart both, glorifies Port Said, "our establishment in the middle of the Desert," and the development about to be given to operations which, as he significantly intimates to winds and sands and England, "*rien désormais n'arrêtera plus.*"

The members of the commission sent by France to Abyssinia, under Captain Roussel, have returned much satisfied by the reception of the viceroy, who has promised his visitors that he will light up his sea coast with "pharos" on the French principle.

OUR GREENWICH PENSIONERS.

One of the baits held out to lure seamen into the Navy, is the right which the Service confers of admission into the haven of Greenwich Hospital. This is made the chief attraction in the staring posters which, on occasions when hands are required, everywhere meet the eye, parading the advantages of the Service, and calling on the maritime portion of the population to come forward and make them their own. No one in authority seems to have an idea that the large type composing this prominent announcement could possibly operate in the other way; and, in fact, serve rather as a warning to stand off, than a signal to heave to. It might be thought that a sailor, amidst the hardships and dangers of his career, would bear vividly in mind the stately front of the Hospital, and recalling its sunny park and noble glades, say, like the Great Mogul at Delhi, "If there be a Paradise on earth, it is here." But unfortunately Jack has no taste for the picturesque; and it appears he would be content with less splendour, if he could take it out in comfort. Different people have different standards of happiness; but we rate the sailors' very low when we offer him bed and board at Greenwich and a shilling a week for tobacco as the height of felicity. Liberal as such a provision may seem in the eyes of authority, an old tar thinks it too dearly purchased by the surrender of his pension, separation from his wife and family, and, what he feels so acutely, the loss of his liberty. That Greenwich Hospital is not looked upon by the sailor as an eligible retreat has long been known; and, at last, its languishing condition became so apparent, that, as our readers are aware, a Commission was appointed to inquire into the cause. The investigation has just closed, and we are presented with a valuable report, which treats fully of the circumstances that have tended to bring the institution into disrepute among seamen, and shows that, though proverbially grumblers, they can adduce in this case real grievances.

Compared with the strength of our Navy in time of war, or even at the present moment, the establishment of Greenwich Hospital is disproportionately small, the number of berths being only 2352; but, inadequate as this may seem, there are upwards of 700 vacancies. No doubt many of the old constituency have died off, and we rarely meet now the weather-beaten veterans whom Marriott and Chamier rendered such favourites, and whose yarns, recounted to young ears on the turf of the park, have made many a sailor. A margin must also be taken for the long reign of the economists, when the Navy almost expired, and, consequently, supplied few successors to the previous generation. But the report attaches more weight to these considerations than they seem to claim; for it is within the last four years, after we have been engaged in a European war, that the greatest diminution has taken place in the number of the residents. Hence we must attribute it to the lack of attraction in the institution itself, and the testimony of the report fully confirms this opinion.

One of the foremost grounds of complaint is the smallness of the daily dole, which, according to the Committee, exercises a demoralising effect, by compelling its recipients to resort to any possible employment that will bring an additional penny. The uniform being thus degraded, only men of bad character, or who are goaded by the last necessity, will enter the hospital. Complaints are made of the uniform itself, which has grown so antiquated that, like the costume of the Blue-coat boys, it exposes its wearers to derision; and not every old tar has philosophy enough in his composition to bear with indifference the gibes of Young England. Besides, there is no reason why his dress should not be suitable and becoming. On this point, as with the daily pittance, the regulations of the Hospital should keep pace with the age, and not take the standard fixed at its foundation, a century and a-half ago. But, instead of being adapted to the altered condition of the seaman, they have been converted into a dead-lock, so that there is no recognition of any change whatever; and the sailor forfeits the good-conduct pay he obtained from William IV., because none was allowed in the reign of William III. He discovers, too, that whatever his rating in the Navy, whether ordinary seaman, A.B, or petty officer, in the Hospital all are the same; or, what is worse, he may have been a petty officer on board a man-of-war, and find himself subordinate to an ordinary seaman in the Hospital. Such are some of the reasons for the ill-repute which has undeniably fallen on this great national establishment among the classes it was intended to benefit; and they offer, we must own, a full explanation of the blank in its numbers. The imperfections they indicate are so easy of correction, and the remedies so obvious, that we can only wonder they can have existed so long, rendering an institution the country was accustomed to regard with pride, little less, in reality, than a reproach. The patriotic report of the Commission recalls the object for which the Hospital was founded, and it is one involving the mightiest consequences—even our very existence as a nation. The provision secured at Greenwich was designed to operate as a premium for the encouragement of seamen, and to render the Navy attractive to youth by the guarantee of a comfortable retirement in age. We have but to fulfil the conditions of the bond to restore the Hospital to its old popularity; while we shall at the same time hold out to the sailor a recompense proportioned to his services, and not unworthy of the name of England.

THE COURT MARTIAL AT THE CAPE.

A father may claim to be heard on behalf of his son, even in a bad cause; and we can respect the partiality that perverts his judgment, and the affection that gives edge to his words. But, when appealing to public opinion on a question of facts, such advocacy is not always calculated to benefit a delinquent. The letter of Mr. F. Henry F. Berkeley, published in our impression of to-day, in nothing refutes the strictures we made last week on the court-martial held at the Cape on Lieutenant Henry Berkeley, of Her Majesty's sloop, Lynx. It is well for all to remember that we live in an age when every excess is sure to be brought to light, whether committed in the dungeons of Naples or on board a British ship-of-war in the midst of the ocean. The letter of Mr. Berkeley charges us with painting the facts against his son in the blackest colours, and he intimates that we have even carried our animosity so far as to deviate from the truth. To arrive at this conclusion, he appears to have read our observations upside down; and now his letter, like a camera obscura, presents them in this inverted aspect to ourselves. But a glance at the article itself dispels all mystification. In the first place, it is at once seen that we have used very different language from that imputed to us, and, secondly, that our strictures applied solely to the admitted facts. It was not, as Mr. Berkeley asserts, the verdict of the court-martial, but its sentence, that we complained of. Mr. Berkeley accuses us of telling "the public that according to the evidence Lieutenant Berkeley was his own lictor;" but if he refers to the article, he will discover our words are "according to the charges brought against him." That we have not placed these charges in the worst light—that we even left the most serious unnoticed—is fully proved by the report of the proceedings. For instance, no mention is made of charge 2, which accuses Lieutenant Berkeley of using profane oaths, cursings, and execrations—of charge 3, which declares that he caused Francis Williams, ship's steward's boy, to be flogged on the breech with a riding whip, without any warrant being made out or read before the infliction of the punishment—or of charge 5, which, among other counts, arraigns him of kicking Edward Davis, Krooman, "using bad language towards him, causing a rope to be put in his mouth, and causing him to be lashed to the mainmast and kept there all night." We could not, of course, believe that any English officer, would be guilty of such barbarities; and we wondered that the court, after an investigation extending over eight days, could require five hours and a-half to come to the conclusion that they were "not proven." For the same reason, we made not the most distant allusion to charge 4, though it imputed to Lieutenant Berkeley the heinous offence of causing James Holt, able seaman, to be "kept in irons, on the boiler, for fourteen days and eight nights," and this in a tropical climate Mr. Berkeley, therefore, must acknowledge that, in affirming we had stated all that could operate to the prejudice of his son, and ignored all that could be said in his favour, he is unjust. Lieutenant Berkeley was acquitted of these charges, and far from regretting, we rejoice at his acquittal; but was it exaggeration to say that such an indictment reads like a chapter in "Two Years before the Mast"? Mr. Berkeley replies that the evidence in support of the charges was indeed a "work of fiction;" but we may remind him that the famous American novel is a fiction founded on fact. Nor was it the testimony of the man who, as Mr. Berkeley tells us, "was flogged out of the Boscawen into the Lynx," that gave rise to the 6th charge, but the suggestion, the positive order, of a man as high-born as any one bearing the name of Berkeley, an officer of unblemished reputation—Admiral Grey, the Commander-in-Chief. The quarterly returns of punishments on board the Lynx may be as "extremely light" as Mr. Berkeley reports, but Admiral Grey saw reason to order that they should be examined, as, in the words of the report, the punishments "appeared in some cases excessive, and in others irregularly inflicted, and not in accordance with Admiralty Circular No. 131, which requires that warrants should be made out and read." The court decided that the punishments in question were not excessive, but were irregular, and in two instances without warrant. The strictures that have brought down upon us the reproaches of Mr. Berkeley were confined to this point, avoiding all consideration of the evidence and its details, as well as the inferences they might prompt; and, in thus accepting the verdict, we complained that Lieutenant Berkeley, convicted of a serious breach of discipline, was awarded only a nominal punishment. We did not go the length of saying, as Mr. Berkeley insinuates, that he should be deprived of his commission; but simply stated the fact, that he is left in command of a ship in which he has set an example of disobedience to orders. We trust his late entanglement will operate as a warning, so that he may come to be regarded not only as "an officer of excellent promise," but one every way worthy of the name he bears.

THE NEAPOLITAN NAVY.

The naval station is at Castellamare, where the Government have established very fine docks and building slips. No less than 30 ships have been added to the Neapolitan Navy since 1856. At present it consists of

The anniversary of the Queen's birthday was signalised at Queenstown by a series of novel naval displays, including the storming and capture of a miniature battery. The entire display went off with admirable precision, and furnished a most agreeable and novel spectacle.

Lord John Russell laid before Parliament, on Thursday evening, further correspondence relating to the landing of General Garibaldi in Sicily. The only important document is one from Commander Marryat, detailing the particulars of the landing of the expedition at Marsala, and refuting the report that a British ship of war hindered the Neapolitan frigate from firing upon the invaders.

In the House of Commons, some evenings since, in reply to Mr. Alderman Copeland, Sir C. Wood stated that the pension to military Indian officers on furlough was not extended to civil officers, but all the officers, whether civil or military, invalided at Lucknow, had a year's time allowed them towards their retiring pension.

India.—We have two official telegrams from India this week. One states that on the morning of the 20th of April the Wuzerees attacked Colonel Larkins' (?) column, with some damage to the cattle and camp followers, but they were driven out with heavy loss, and pursued for three miles over the hills, and to all appearances have been broken up. A subsequent one announces that the force under General Chamberlain joined that under Colonel Lumsden on the 26th. The Wuzerees gave up their intention of holding Shapoor and Petray, and retreated.

Canterbury.—On Friday evening last the non-commissioned officers of the cavalry depôt assembled in their mess-room for the purpose of presenting Robert Parsons Davies, late Sergeant-Major of the 3rd Dragoon Guards (now superintendent of Police for the city of Canterbury), with a testimonial of their esteem and respect on his leaving the regiment. Garrison Sergeant-Major Sutherland presented the testimonial (a handsome silver teapot) in the name of the non-commissioned officers. On the side of the teapot was engraved a suitable inscription. Mr. Davies has served in the Army twenty-four years, and he retires with the good wishes of his officers, and the respect of his men.—The garrison of Canterbury has been warned to have in readiness some 800 men to go out at once to India. The first draft will leave about the first week in June.

Chaplains to the Forces.—The following general order has just been issued from the Horse Guards:—

"Her Majesty having been pleased to approve of a uniform to be worn by chaplains to the forces, patterns have been duly prepared and sealed, and are now in the pattern-room, at the Horse Guards, for general reference and guidance. In promulgating this, his Royal Highness the General Commanding-in-Chief wishes it to be understood that chaplains are required to wear uniform only in the field, in home camps, and in garrison towns when visiting the hospitals, or otherwise engaged in military duty.—By order of his Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General."

The uniform consists of a black frock coat, with a crown and stars embroidered in black silk on the collar (the number of stars indicating the rank of the chaplain), trousers, and an ordinary hat for full dress; a forage cap for undress.

Royal South Gloucester Regiment of Militia was inspected and reviewed by Colonel W. Sullivan, C.B., Inspecting Field Officer of the Bristol District, on Tuesday, at Gloucester. At the conclusion Colonel Sullivan addressed the regiment, stating he was much pleased with the admirable manner in which they went through their evolutions, and with their clean and soldierlike appearance. The training will cease to-day.

LIEUTENANT BERKELEY, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is with surprise that I have read in your paper a leading article containing remarks on the conduct of a young officer of the Navy, which seem to me equally severe and unjust, and I cannot but be grieved that a paper, now under the conduct of a gentleman who, as Correspondent to the *Times*, has rendered such distinguished service to the Army—indeed, I may say to the country—should have lent the *prestige* of his name to an injurious assault upon the character of an officer of the sister Service.

I think you will admit that, as the father of Lieutenant Henry Berkeley, Commandant of Her Majesty's sloop Lynx, I may be expected in his absence to defend his character from misrepresentation; and although the advocacy of a father may be viewed properly with caution, parental eyes having naturally a one-sided vision, yet affection cannot be mistaken in matters of fact, although its deductions may be erroneous in matters of feeling. The press is a frightful engine of mischief, when not used with caution and discretion equal to its power; and when a writer of your authority expresses an opinion that an officer has been guilty of charges which a court-martial has acquitted him of, nine hundred and ninety-nine men out of a thousand will have read your opinion, and be guided by it; while the man who remains, may alone have read the minutes of the court-martial, and will think for himself. The court consisted of Captain Powell of the Boscawen, Captain Veitch of the same, Captain Craufurd of the Sidon, Captain De Horsey of the Brisk, and Captain Gordon of the Hermes. If Lieutenant Berkeley be guilty of the charges brought against him, having been acquitted of every charge which affected his character as an officer or a gentleman, and merely reprimanded and admonished for not observing certain forms in making returns, why it follows that the experienced and distinguished officers I have named, committed perjury.

Lieutenant Berkeley has gone through the solemn ordeal of a court-martial, and been acquitted; but the editor of the paper calls in question the verdict, puts him to trial again in its columns, assumes at once the attributes of both the court and the accuser, and condemns him without assigning any cause whatever. You tell your readers that the evidence reads like the novel, "Two Years before the Mast." The distinguished officers who formed the court agreed with you, so far as to consider the evidence a work of fiction. You tell the public that, according to the evidence, "Lieutenant Berkeley was his own lictor, seizing one man by the throat, giving another a kick, a word and a blow," &c. You do not however tell your readers that this evidence, on which you are pleased to rely, but which the court scouted, was self-contradictory and contradicted by witnesses, and was sworn to by men of the worst character, a convicted thief, and a man who had been flogged out of the Boscawen into the Lynx. On the other hand, you ignore the fact that the best men in the ship gave the lieutenant an excellent character. You made the bold and broad accusation that Lieutenant Berkeley "had been found guilty of ill-using his crew." I cannot believe that this is a wilful and malicious falsehood, and hope most sincerely that the editor will confess his error, as arising from some mistake, but the assertion is most unequivocally untrue. So far from the court finding "that Lieutenant Berkeley ill-used his crew," they distinctly put upon record that although the punishments were irregularly reported in point of form, yet that they were *not excessive*. Let me ask you why are all points favourable to the young man sedulously kept in the back-ground? If you have read the trial fairly, you must have read the defence as well as the accusation; but it would appear that you greedily seize upon the accusation, and steadily turn your back upon its refutation. Why have you concealed from your readers the fact that the report of punishments was extremely light in the Lynx? Why not give the lieutenant that credit accorded to him by everyone who has read his defence—that it is manly and straightforward, and that he admits the fact of being irregular in not carrying out the formula prescribed for reporting punishment, but points to the fact that in so doing he had avoided having men up to the gangway and leaving them "scarred for life." This he might have done, and escaped censure for irregularity, which was the only censure he incurred. Surely, sir, it is hard that you should publish to the world, as if plain matter-of-fact, that this young officer had been "found guilty of ill-using his crew, and yet retained his commission," and of course "would laugh at the reprimand, relying on the Berkeley interest!" Sir, Lieutenant Henry Berkeley knows perfectly well that the countenance of the head of the Berkeley family depends upon his own deserts, and that out of his family he could not find a sterner judge; but he has a stronger reliance than the mere supposition of favour shown to a name—he relies on the honourable acquittal of the court-martial, on the high testimonial he bears from every officer under whom he has ever served. The charges against Lieutenant Berkeley extended over thirteen months, during which time every minute circumstance was carefully and secretly noted against him. During those thirteen months few officers have been more actively and usefully employed. The Lynx relieved Dr. Livingstone in the Zambesi, who spoke highly of the service rendered to him by Lieutenant Berkeley. The Lynx conveyed the Bishop of Mauritius to the Seychelles Islands on visitation, who praised the order of the ship. Lieutenant Berkeley acted as joint commissioner with another gentleman, appointed by the Governor of Mauritius, and made a report of the state of those islands as regarded the relations of master and servant, and the supposed encroachment of a slavery system. For this report, in collecting evidence for which he contracted fever, the lieutenant received one hundred pounds gratuity. From thence the Lynx sailed to Zanzibar; and Lieutenant Berkeley, with the officers of the Lynx and Assaye, led the Sultan's forces in an engagement with a rebel chief, the Sultan's brother. Subsequently, Lieutenant Berkeley commanded a detachment of 150 men from the Lynx and Assaye, quelled the rebellion and made prisoner the rebel chief. For these services, Lieutenant Berkeley received a letter of thanks from the British consul, for "the distinguished bravery he had evinced with the officers who accompanied him under a very heavy fire for a lengthened period, and for the excellent discipline and good conduct of the men under his command in a long march into the interior." The Sultan likewise presented Lieutenant Berkeley with a scimitar. The Admiralty acknowledged the lieutenant's excellent conduct in a special letter, and gave him permission to wear the sword. I have thought it my duty respectfully but firmly to remonstrate with you for unfairly using that influence which your well-earned position of necessity must give you, to the disadvantage of a young officer (I hope I may say) of excellent promise, at a time, too, when I fear that discipline will not be improved by fostering a spirit of discontent, which the designing will not fail to turn to bad purposes.—I am, sir, yours &c.,

F. HENRY F. BERKELEY.

ROYAL NAVAL SCHOOL, NEW CROSS.

A meeting of the members of this corporation took place on Tuesday, at the Royal United Service Institution, Whitehall; Admiral Bowles, C.B., President, in the chair. Amongst those present were Admirals Sir George Back, Sir Thomas Hastings, Meynell, M'Hardy, and J. G. R. Gawen; Sir John Liddell, M.D., C.B.; Captains the Hon. F. Maude, R. H. Stopford, Barnett, Davies, M. J. Currie, W. Greet, G. F. Morice, John Sanders, G. G. Burton, and T. D. Stewart; Lieutenants W. B. Crooke and W. Gardiner, Dr. Gamble, the Rev. J. C. Connolly, John Breaks, Esq., R.N., Rev. E. Kitson, J. Pew, Esq., and the Rev. Dr. Chambers (Head Master).

The President, having opened the proceedings, called on the secretary, Mr. Eames, to read the annual report. It stated that since the last meeting Her Majesty and the Prince Consort had contributed handsomely towards completing the swimming bath, at the same time expressing their opinion that this object is most desirable; and that the committee of Lloyd's Patriotic Fund, Earl Manvers, Admiral Meynell, Admiral Sir Thomas Herbert, and other kind supporters, had liberally subscribed to the fund, which now amounts to 150*l.*, but about 400*l.* will be required. After erecting by subscription a monument to the late matron, the parents' committee had handed over a balance of 4*l.* 4*s.* 7*d.* to the "Gratuitous and Reduced Fund." Many officers had, during the past year become subscribers, amongst others Lieutenant O. Menzies, 9th Punjab Infantry (a former meritorious pupil), contributes 5*l.* per annum; Captain P. F. Shortland had given a donation of 21*l.* to the general funds: and Captain C. R. Egerton, R.N., and Captain C. L. Waddilove have each become nomination debenture holders. Of the pupils who had distinguished themselves during the past year, Mr. J. G. Gamble (who received the gold medal at Midsummer last) gained by open competition a mathematical demyship of 75*l.* per annum for five years at Magdalen College, Oxford; Mr. Hardy M'Hardy (to whom was awarded the first naval cadetship and Yarborough scholarship in 1854) passed for a lieutenant at the Naval College in March last, under the Admiralty circular of 1857, and obtained a first-class certificate, which from being at that time an honour unprecedented since the adoption of the regulations in the before-named circular, he was immediately promoted to the rank of lieutenant; Mr. Philip Hast, who went up for his examination as naval cadet in June last, passed first out of 93 candidates; Mr. E. P. T. Goldsmith passed as Queen's cadet at Sandhurst; and Mr. J. H. B. Northcote gained one of ten marine cadetships, which were open to competition. Major-General Sir Henry Floyd, Bart., whose son was at one time a pupil, and who died at Gibraltar, whilst serving on board Her Majesty's ship Marlborough, had obtained the council's permission to erect in the chapel a tablet to his memory, in testimony of the advantages he received from the Royal Naval School, and as a memorial of the high character he had obtained in the Service.

The report having been received and adopted, the re-election of vice-presidents, directors, and auditors took place, and the meeting separated after a unanimous vote of thanks to the chairman.

FRENCH NAVY.

The Beaumanoir has left Cherbourg for Brazil.

The Prony has steamed from Toulon with dispatches to Admiral Jehenne.

The Latouche-Treville, Archer, and Pionnier, are being fitted at Toulon for Senegal.

The Loiret has arrived at Cherbourg from Senegal with sick and soldiers wounded in recent disturbances.

The Duquesclin has not yet been floated off the rocks near Brest.

THE FIRST LORD OF THE ADMIRALTY AND HIS MINUTES.—Some one said lately, and the statement has not been contradicted, that the gun-boat slip on Haslar beach originated in a "Minute" given by a First Lord of the Admiralty on his own responsibility. This is quite possible, and calls to our recollection the incidents of another "Minute" issued by an ex-First Lord of the Admiralty in the course of a summer cruise in the Admiralty yacht. At that particular period some very heavy contract works were in the course of progress, and the contractor, being very much pushed for timber fit for piles, took advantage of the opportunity to represent that beech wood was preferable to fir for piles, inasmuch as it was a harder wood and would resist the action of water for a longer period; and to illustrate his assertions by a practical demonstration, he called to his foreman to rig the monkey (the pile-driving machine) and to drive in a beech pile. The foreman, who had previously received his cue, complied with the order, and the monkey was dropped with a steady "thud" on the spar, which quietly entered the yielding ground without a chip being knocked off. Now came the trial on the other wood. The "monkey" was run up with all the force that the sturdy navvies at the winch could bring to bear, and its descent was of course proportionately rapid; the result was the head of the pile was smashed, and a shower of splinters scattered to the very feet of the great man. This was quite sufficient—a minute was signed on the spot that beech should be employed instead of fir. The clever contractor secured the same day an ample supply of the former wood from the plantations of a neighbouring landowner for which he had previously bargained, and the Navy Estimates were swelled with the difference of the cost.

THE MEDITERRANEAN.

MALTA, May 18.—The news from this quarter is both varied and important; and consists of courts-martial, arrivals and departures of men-of-war, Sicilian intelligence, and local news of an exciting nature. Pursuing an inverse order, we have first the murder of another Maltese policeman, named Serafino Zammit, by a miscreant named Angelo Farrugia, and the details are briefly as follows:—Farrugia, a man formerly in prison, and undergoing sentence of confinement for life for murder, was liberated on the occasion of Prince Alfred's visit to Malta. So far from profiting by this act of clemency, he in all probability returned to his former evil ways, and was on the morning of the recent murder observed by the deceased carrying a sack which was deemed to contain stolen property. The policeman having encountered him thus, under what he regarded as suspicious circumstances, challenged him, desiring him to set down the sack in question. Farrugia refused, and took refuge in his house. The constable followed him, and there met his death by blows from a wooden bar, which fractured his skull. The unfortunate man was heard to cry for help, but too late did any assistance arrive, as life was then extinct. The perpetrator of this barbarous murder has been arrested, and considerable difficulty was experienced in preventing the populace from inflicting summary punishment on him, so exasperated were they by this dastardly outrage, and the more so as the death of Zammit forms the second murder of a police constable within the space of ten days. Another melancholy occurrence happened last Monday in the Corradino prison, a soldier of the 3rd Buffs, named Thomas Abern, having hanged himself in his cell with the lashings of his hammock: he was at the time of his suicide undergoing imprisonment for stabbing a comrade. The news of Garibaldi's successful landing at Marsala has caused great commotion here among the Sicilian refugees; and one, more zealous than wise, a carpenter, learning what had taken place, hoisted a tricolor flag, around which several of his compatriots assembled, and proceeded to exhibit their joy and enthusiasm by saluting the flags, &c. This having occurred in the public streets of a neutral place, and nearly opposite to the residence of the Neapolitan consul, the police very rightly endeavoured to put a stop to it, and insisted upon the flag being taken down. This the enthusiastic carpenter refused to comply with, and he has been in consequence fined by the magistrates in the sum of twenty-five shillings, which his sympathising countrymen of course immediately paid for him. A ball at the palace, in honour of the Queen's birthday, and given on the 16th instant for the 24th, came off on the evening of the former, and was attended by the Maltese nobility and gentry, as well as the *élite* of the English residents, Army, Navy, &c. Cards have been issued for a ball at the house of the chief secretary on the 21st, which is expected to be a very brilliant affair. The Sicilian intelligence will no doubt have reached you before this. However, as the gun-boats Intrepid and Assurance have both arrived here since the landing of Garibaldi, it may not be uninteresting to give a short digest of the news they bring. The landing which took place at Marsala on the western coast of Sicily, on the 11th, was accomplished without loss of life; and a force variously estimated at from 1500 to 1800 men were safely disembarked, as were also the guns, baggage, &c. 800 insurgents joined Garibaldi's standard, and in all probability as they proceeded inland, after destroying the telegraph wires, they have ere now come into hostile contact with the Neapolitan forces. It is almost unaccountable that Garibaldi and his adherents—principally young men, many of whom wear the Crimean medal—should have eluded the vigilance of the authorities, which has been of late most active. The steamers which conveyed the friendly invaders came from Genoa, from which port they cleared for Malta, and afterwards changed destination for Sicily. The Neapolitan steamers were late in arriving at the scene of these stirring events, and their bombardment did not in any way impede the progress of the debarkation. One of the Sardinian steamers grounded on her way in, and has since been plundered by the Marsalese mob, no very friendly act towards their liberators. H.M.S. Hannibal (flag), Agamemnon, Cressy, and Neptune arrived here from a cruise on Tuesday, and the Neptune left the following day for Naples. The Hannibal leaves this evening for Palermo, and will probably arrive there on Sunday morning. The arrival of the gun-boat Boxer and the departure of the Caradoc were the only ship movements to be noted until yesterday, when the Terrible arrived from England. The arrival of Admiral Martin will place him in an important position, as the Mediterranean, always a prominent command, is now more than ever invested with responsibility, and will require all his wisdom and decision of character. He will have a noble fleet under his command, and there is every probability of there being something to be done by naval men before long. On the departure of the Hannibal to-night for Palermo, there will be remaining at Malta the Hibernia, Marlborough, and Agamemnon, and some smaller vessels. The Terrible is under orders to leave this evening or to-morrow morning. The Cressy, St. Jean d'Acre, London, and Renown are cruising outside of Malta; whether they will return into harbour or proceed to the scene of hostilities, remains yet to be decided. The courts-martial, to which allusion has been made, were one on a marine, and the others on seamen—in all, three cases. The president was Admiral Codrington, than whom no officer in the Service is more upright, nor possesses a higher sense of justice.

MALTA, May 19th.—H.M.'s screw gun-boat Intrepid, Commander Marryat, arrived on the 12th inst. from Marsala, and left on the 16th for the same port. H.M.'s screw gun-boat Assurance, Commander C. M. Aynsley, proceeded to Messina on the 16th inst. H.M.'s line-of-battle ships Hannibal, flag-ship of Rear-Admiral G. R. Mundy, C.B., Neptune, Cressy, and Agamemnon, came into our port on the 15th from a cruise. The Neptune left on the following day for Naples, and was followed by the flag-ship Hannibal, which left this morning for the same place. The Cressy, St. Jean D'Acre, London, and Renown, sailed on the 17th inst. for a cruise. H.M.S. Caradoc, Lieut.-Commander Buckle, left on the 15th inst. for Naples with despatches from the Admiral. H.M.'s screw gun-boat Boxer, Lieutenant T. S. Grahame, arrived on the 16th from Tripoli, and will leave to-morrow for Corfu. H.M.'s steam frigate

Digitized by Google

Terrible, Captain H. Glasse, C.B., arrived on the 17th from Gibraltar and England. H.M.'s ships of war in our port:—Marlborough, flag-ship of Vice-Admiral Fanshawe, C.B.; Agamemnon, Captain T. Hope; Hibernia, flag-ship of Rear-Admiral Codrington, C.B.; Medina, Captain T. A. B. Spratt, C.B.; Terrible, Captain H. H. Glasse, C.B.; Boxer, Lieut.-Commander T. S. Grahame.

FORTIFICATION.

On Monday evening, the 21st inst., Captain Tyler, R.E. read a paper in the theatre of the Royal United Service Institution, on Mr. Fergusson's System of Fortification. Colonel Yorke, late of the Scots Fusilier Guards, vice-president of the institution, occupied the chair, and there were present Lieutenant-General Sir Charles Pasley, K.C.B., R.E.; General Oldfield, C.B., R.E.; Colonel Lindsay, M.P.; Colonel the Hon. Alexander Gordon, C.B.; Captain Fishbourne, R.N., and a number of other distinguished officers. Considerable interest attached to the subject, partly in consequence of the former discussions that had taken place upon it, and partly because the report of the Commission on National Defence, of which Mr. Fergusson is a member, is expected shortly to be laid before Parliament, together with the scheme of the Government for fortifying the country. The paper was in reply to one which had been submitted by Mr. Fergusson to the same institution in the course of last year; and it embraced a general review of the principles advocated by him in his various publications.

The following were the most prominent of the principles put forward by Mr. Fergusson: 1. The garrison of a fortified place should always possess the means of overwhelming its besiegers, and of arresting their progress, by the employment of a vastly superior force of artillery; 2. The guns of the garrison should be mounted upon three, four, or five tiers of earthen ramparts; 3. Circular instead of rectangular forms should be adopted; 4. The whole should form a cheap means of obtaining an impregnable fortress, and of making the defence in all cases superior to the attack.

The first of these principles had formerly been advocated by Montalembert; but there was a difference between that author and Mr. Fergusson as to the way in which it should be carried out; and the reasons for this difference were singular. M. Montalembert in his circular system abandoned the use of earthwork for ramparts and parapets, on account of its expense, and substituted tiers of masonry casemates for them. Mr. Fergusson, on the other hand, objected to the cost of masonry, and proposed, as a cheap arrangement, to mount his guns upon earthen ramparts, rising up to a height of 48 when three, or 64 feet when four tiers were employed above the level of the ground.

The masonry constructions of M. Montalembert were inadmissible in practice because they were liable to be destroyed by the enemy's guns; but looking to the relative proportions of masonry and earthwork employed, and their respective cost, M. Montalembert was correct on the question of expense rather than Mr. Fergusson.

Mr. Fergusson had over-estimated the cost of masonry, and under-estimated that of earthwork very considerably. He had put down for ordinary systems 1-10th, and for his own system 1-5th of the contract price per cubic yard that was now being paid in this country for the earthwork of ramparts and parapets. The calculations which he had made to prove the cheapness of his system, when thus corrected as to prices, led to a contrary result. His estimate for the line, three miles long, by which he had proposed to defend Portsmouth on the Gosport side, was 100,000*l.* for earthwork alone. That would be increased to 500,000*l.*, even at the price of ordinary ramparts; and this sum was sufficient to purchase the land, to construct fortifications, to build bomb-proof barracks, to provide a proportion of gun-casemates, and to complete the defences of the whole line, if other methods were employed.

The practicability of providing the garrison of a fortified place with a superiority of artillery fire over that of their assailants on every point on which they could be attacked, was discussed at considerable length.

Various duties—which were enumerated—required to be performed during a prolonged contest by those who composed the garrison of a fortress; and only a limited proportion of them could be spared for the service of the guns. The experience of past sieges had shown that about 45 men were required to every gun that was provided for an octagon of the French system, when proper means were adopted for opposing the besieger at each stage of his operations. Even if half that proportion were allowed in one of Mr. Fergusson's 1,000-gun forts—corresponding to an octagon of the French system in which two, three, or more guns were to be opposed to every one of the besieger's, the strength of the garrison of such a fort would then approach more nearly to that which had been usually assigned for the besieging army than to what would be considered requisite for its defence. So great a number of men would not, however, in practice be allotted as a garrison for a fort of that description, because they could not be accommodated in it; because they would be able, if they were available, to occupy with advantage a greater extent of ground; and because they would not require works of so expensive a character or resources of so costly a description to enable them successfully to oppose their assailants.

Mr. Fergusson had also underrated the expense of his system of defence in estimating the cost of the extra guns which he proposed to employ. He had omitted to add the price of the ammunition, without which the guns could not be rendered serviceable. Taking this, according to what had been stated, at 1000*l.* per gun and thousand rounds, his estimate would be increased from 48,000*l.* to 1,000,000*l.* sterling, for the maximum offensive armament of a fortress constructed on a radius of only three-quarters of a mile.

In Mr. Fergusson's system, if it were defended as proposed, the labours required from the garrison would probably be greater than in ordinary systems. The tiers of ramparts, more extensive and more exposed, would require more maintenance and repair, at the same time that they would be more easily injured. There would be more guns to move about to meet any real or threatened attacks of the assailants, more embrasures and traversers to construct and maintain, more platforms to lay down and keep in repair, more communications to keep up, &c. These numerous tiers of ramparts could not be required for use, any more than the heavy armaments proposed, without a very greatly increased garrison, because the garrisons by which fortresses had hitherto been manned had not been able fully to employ even one line of ramparts.

The object of fortification was to enable an inferior force to resist one considerably superior to it. If a garrison were furnished with much greater works than they could man, or with much greater means in guns and ammunition than they could employ, the extra expense incurred in the supply of those works and means was then thrown away, and the surplus of military stores was in danger of falling into the hands of the enemy at the fall of the fort. If increased works and means of this description, to anything like the extent proposed, could be provided, and if the garrison could be increased in proportion, so as to take advantage of them, then the object of fortification was done away with, and the necessity for its construction ceased to exist, because such garrisons would not require expensive works for their defence against an equal or not greatly superior number of their enemies.

It would give a practical idea both of the labour and resources involved in the defence of a thousand gun fort, and of the difficulty of completely stopping the progress of an attacking party, even with a superior number of guns on the side of a garrison, when it was remembered that the Russians in the Crimea were only able to muster after all 1254 guns on their ramparts at Sebastopol, against 814, which the allies had in position previous to the last assault of the place.

In future it would require fewer men to serve each gun, on account of the facility in working which was afforded by the modern application of loading at the breech. That would allow of more guns being employed efficiently, in proportion to those of the besiegers, if it were not for other circumstances: 1. Increased areas would have to be occupied, and the garrisons would have more extensive works to defend. 2. The light guns of the besiegers would be better able to cope with the heavy guns of the garrison. 3. The besiegers would be able to bring a greater force of artillery to bear, and would be less easily overwhelmed. It was not, therefore, likely upon the whole that a garrison would have greater opportunities of overwhelming the besieger in future than heretofore.

In future, also, one line of gun casemates would be found superior to several tiers of open ramparts, because by the accurate fire of modern weapons, the projectiles of rifled guns and muskets might be dropped over the edges of the parapets with great accuracy, so as to render the terrepleins untenable, and prevent the guns from being served. The works that would be necessary would be so expensive that one line of ramparts would be far more than could be fully employed, and so far from tiers of continuous ramparts being required, the question was rather whether detached forts properly connected would not take the place of long lines.

Circular systems had often been proposed but could not be reduced to practice with advantage. It was true that a circle enclosed the largest space in the smallest outline, and that this might be expected at first sight to lead to cheap construction; but in the present instance a bastionary or polygonal trace was partly filled up by several tiers of circular ramparts, and very little interior space remained. Though simple in theory, this system became complicated and very expensive in construction.

It appeared on the whole that Mr. Fergusson's system could not be carried out in practice, and that the changes which he proposed were in a direction opposite to those which must be made in order to meet the improvements that had been effected in rifled guns and muskets.

Captain Tyler indicated towards the close of his paper the alterations which he considered now to be required in fortifications, and illustrated them by diagrams on the walls of the theatre. And he demonstrated the methods by which the large dry or wet ditches of Mr. Fergusson might be passed, by way of showing that if they could be carried out in practice they would not be so formidable as had been imagined. In the case of the wet ditch, 200 feet wide, and containing 12 or 15 feet of water, which Mr. Fergusson had designed for the Gosport lines, the principal operation required was that of draining it, as the bottom of it was shown to be 10 feet above low water. To destroy the escarp of the dry ditch it was only necessary, supposing the garrison to be able to prevent the besiegers from establishing batteries against it in the usual manner, to place guns in the galleries of descent, which are commonly made from the surface of the ground to the bottom of the ditch; and guns so placed could breach the escarp walls without being exposed to any fire from the ramparts of the fortress.

A vote of thanks having been passed to Captain Tyler, Major Jervois, R.E., Mr. Fergusson, and Sir Charles Pasley, addressed the meeting. The remarks of Mr. Fergusson were to the effect that he now abandoned the model before them, and retracted what he had published in his "Essay on a new System," and in his "Peril of Portsmouth." The employment of rifled guns, which had been introduced into the service since he published these works, rendered necessary a complete change in the science of fortification, and a new system would require now to be brought forward. He could not understand how so large a garrison could be required per gun, or how the price of earthwork could be so high for the works now being executed as Captain Tyler had stated. When he brought forward a new system adapted to the present circumstances, he should be happy to defend it. But the main principle that he now advocated was the separation, which had been made in the German systems, of the offensive from the defensive part of a fortification.

After a further reply from Captain Tyler, the meeting separated.

The foundation stone of the new fort at Popton Point, Milford Haven, was laid on the 23rd inst. Mrs. Ford, wife of Colonel Ford, Royal Engineer, performed the ceremony of placing it. In spite of the bad weather there was a large assemblage of spectators; Captain Ramsay, C.B., superintendent of Pembroke Dock, having kindly placed the Lightning steamer at the disposal of Mr. Tregenna, the contractor, for the use of his friends.

TRANSPORT OF TROOPS.

In connection with the changes in the Indian Army which will affect the relief of troops and the expense of transport, the following calculations were made by Mr. Alexander Wood in his recent lecture at the United Service Institution, and they may be read with advantage by those who take an interest in the question:—

The gross cost of transport for all the Queen's troops, cavalry and infantry. Drafts and invalids for five years (from 1852-3, to 1856-7) was 615,032*l.*, or say in round numbers	£615,000
The average annual strength of the Queen's forces for the same period was 28,161, or say in round numbers	£28,000
Consequently, the average annual charges for "transport," including regiments, draft, and invalids, were	£132,000
The cost of relieving an army of the same numerical strength every five years, upon Mr. Wood's system, taking the cost of passage at 25*l.* for the double voyage, would be as follows:—	
5600 or one-fifth outwards, at 12*l.* 10*s.*	£70,000
3360 or three-fifths homewards, at 12*l.* 10*s.*	42,000
	£112,000

The number to be conveyed home is arrived at by assuming of the strength sent out two-fifths, or eight per cent., would disappear either by death, purchasing their discharges, or absorption in India. These casualties, it should be observed, are here taken at two per cent. less than the average shown by the return furnished to the commissioners by the Horse Guards. It is hoped that in shorter service the casualties will be less.

On a comparison of the two systems, Mr. Wood says his shows a saving of 11,000*l.* annually for transport. But its principal recommendation will be the economy of some men, who, when lost, are not to be replaced at any cost, while the immense cost of replacing others by fresh drafts must necessarily entail on Indian revenues, irrespective of the charge for transports, a heavy additional outlay for bounty, equipment, and training.

It should also be borne in mind that the above comparison was made before the mutiny. At the present strength the comparison would give the following results:—

If 28,000 men cost 123,000*l.*, 80,000 at the same rate would cost 351,428*l.* per annum. Now, transport for 16,000 or one-fifth of 80,000 men outwards, at 12*l.* 10*s.* per head.	£200,000
9600 men (or less two-fifths, or eight per cent. per annum of the number sent out) homewards at 12*l.* 10*s.*	120,000
	£320,000

Or an annual saving in round numbers of upwards of 30,000*l.* for transport alone.

FROM STAFF TO STAFF.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The following list of some of the Staff changes of 1860 may interest the readers of your excellent journal:—

Names.	From	To
Lieut.-Gen. Sir G. Wetherall	Horse Guards	Manchester.
Lieut.-Gen. Sir J. Pennefather	Manchester	Aldershot.
Major-Gen. Sir J. Scarlett	Portsmouth	Horse Grds.
Major-Gen. Forster	Horse Guards, day	Horse Grds. Mil. Sec.
Major-Gen. Cunynghame	Dublin	India.
Major-Gen. Bloomfield	Colchester	Dublin.
Major-Gen. M'Cleverty	Scotland	India.
Major-Gen. Sir R. Airey	Horse Guards	Dublin.
Major-Gen. Cameron	Education Board.	Scotland.
Major-Gen. Rumley	Gibraltar	Education Board.
Major-Gen. Lawrenson	Aldershot.	Inspector of Cavalry.
Major-Gen. Lord W. Paulet	Aldershot.	Portsmouth.
Major-Gen. Hon. Spencer	Aldershot.	India.
Colonel Brook Taylor	Horse Guards	Aldershot.
Colonel B. Wood	Ireland	Colchester.
Colonel Hon. R. Rollo	Canada	Canada, Personal Staff
Colonel Blane	Shorncliffe	Dublin.
Lieut.-Col. Thackwell	Canada	Cape.
Lieut.-Col. Luard	Portsmouth	Volunteers.
Lieut.-Col. Mann	Curragh Camp	Plymouth.
Major Nelson	Mauritius	Volunteers.
Major Pearson	Plymouth	Horse Grds.
Major Ramsay	India	Horse Grds.

I have the honour to be, your obedient servant,
A FIELD OFFICER.

THE COMMISSIONAIRES IN SCOTLAND.

The following letter has been addressed to the *Times*:—

SIR,—Will you allow me to state, for the information of the people of Edinburgh, as well as those strangers who intend visiting Scotland during the approaching season, that a corporal of the commissionaires has been despatched from here with the intention of forming a division of the corps in that city?

The Lord Provost and magistrates having signified their approval, I hope that the public will give the commissionaires the same support they have received in London, Dublin, Manchester, and Liverpool, in which cities 150 men who have been severely wounded in the service of their country are now, without any charitable aid, gaining an honest and useful livelihood.

There are several one-armed men in Scotland who have been discharged since the late campaigns in India, and, being unable to obtain any ordinary occupation, are now waiting the present opportunity of earning their living.

I hope that this circumstance, combined with the good character of the men and their very moderate tariff—viz., 3*d.* per mile or 6*d.* per hour,—will insure them a liberal support.—I am, &c.,

E. W.

Barracks of the Corps of Commissionaires,
Exchange-court, 419A, Strand, W.C.

GREENWICH HOSPITAL.

(From the Times.)

Greenwich Hospital is among the few picturesque institutions which remain to England. A foreign traveller, after giving an account of the spectacle presented by the House of Lords on the opening or proroguing of Parliament by Her Majesty, after dilating on the gilded hall, the throngs of ladies, the gorgeous costumes of Embassies, the quaint but impressive robes of Peers and Judges, and the lawn sleeves of Bishops, generally devotes a chapter to the beautiful work of Wren, placed so strikingly on the bank of a tidal river, with its aged inmates, dressed in the traditional costume of the Navy, tottering about with their wooden legs, or sunning themselves under the gray columns of their Hospital. The institution is certainly a noble one, and Lord Macaulay does not carry his partiality too far when he says that the affection of King William III. for his Queen has been "attested by a monument the most superb that was ever erected to any Sovereign." For 150 years Greenwich has been the refuge of a body of men without an equal on earth for courage, and devotion, and long service, rendered in all simpleness of heart to their country. The long and almost unbroken period of naval war which extended from the breaking out of the American Revolution to the Battle of Waterloo filled the hospital with veterans whose lives were almost an index to the history of the British empire. Nothing more romantic or adventurous could be imagined than the narratives which even a few years back some of the oldest men were able to give of fights under Jervis or Nelson—of cruises to intercept Mexican silver, or rich cargoes from the Spice Islands—of cutting-out expeditions —of the capture of Sugar Islands—of the landing in Egypt, in Flanders, or in Portugal. But time and altered circumstances have, it is said, wrought a change for the worse even in this time-honoured asylum. If man does not innovate for the better, says the philosopher, time will innovate for the worse; and so it has been with Greenwich Hospital. For fifty years there has been no naval war to speak of. In that time the wealth of the country has increased enormously, the means of livelihood possessed by our seamen have become larger and more various, the education and the desires even of this uninstructed class have been developed, and a berth in Greenwich Hospital is, unfortunately, not now that object of ambition to a worn-out seaman that it was during the first thirty years of this century. Increasing complaints and the falling off in the number of the pensioners induced Her Majesty to issue a commission of inquiry, and in November last the Commissioners began their labours. Their Report has now been made, and has just been presented to Parliament.

Greenwich Hospital was founded in the year 1694, in memory of Queen Mary, who had long had at heart the foundation of such an institution. It was also designed to be a monument of the great victory of La Hogue. Wren furnished gratuitously the plans for the edifice. The objects of the foundation were "to encourage the seamen of this kingdom to continue the industry and skilfulness in their employments by which they had for a long time distinguished themselves throughout the world;" "to encourage them to continue also their ancient reputation for the courage and constancy manifested in engagements for the defence and honour of their native country;" "to invite greater numbers of His Majesty's subjects to betake themselves to the sea;" "to promote the furnishing and supplying of His Majesty's Royal Navy with a competent number of able mariners and seamen, who might be in readiness at all times for that service." These objects Greenwich has, on the whole, nobly attained; to continue the usefulness of the institution has been the object of the Commission, and it lies with Her Majesty's Government and with Parliament to take such steps as shall be necessary for carrying into effect its recommendations. The rise and comparatively recent decline of the Hospital are very interesting. The complement of pensioners, which in 1705 was 100 only, has been increased, from time to time, as the requisite building and funds permitted, until it reached in 1814 its *maximum* of 2710 men. From its foundation the number of pensioners had gradually increased, but the greatest influx was, of course, after the naval battles which distinguished the struggle against the French Republic and the earlier Empire. The nominal complement for which accommodation is said to be provided is now 2642 men, but there are berths for 2352 only. The Hospital is, however, so little an object of desire to sailors that almost half of these are unoccupied. Out of 61 wards which the buildings contain, 7 are at present closed. The falling off of pensioners has taken place almost entirely within the last 12 years, but during that time it has advanced with great rapidity. In 1848 there were only 11 vacancies in the complement of 2642 admitted by the Hospital. In 1852, however, the vacancies were 180; in 1856, 720; and in 1860 no less than 1124. The actual residents now are fewer than 1600.

For this progressive decrease there are, of course, several causes, the principal of which are the gradual removal of the survivors of the Great War, the facility with which out-pensions may be obtained, and the opportunities of obtaining employment in the merchant service. But among the causes is, "we regret to add," say the Commissioners, "an unwillingness on the part of many seamen of the most valuable class to enter Greenwich Hospital under the existing arrangements." The feature of the institution which chiefly deters applicants seems to be the absence of "the comforts peculiarly suited to old age and infirmity, and the prospect of a provision for their wives, widows, and children." To insure these to the men will be to carry out most fitly the wishes of Queen Mary. How not only the self-esteem of the men but their domestic attachments are disregarded in the Hospital system is fully shown in the Report. The badges of good conduct earned by seamen in the Royal Navy are allowed to be worn, but, in contradistinction to the Army, they carry with them neither emolument nor practical distinction. Men who have attained the rank of petty and even of warrant officers are practically disrated, and mingled indiscriminately with ordinary seamen and the refuse of the naval service. "Distinguished seamen of many years' standing, who have been wounded and maimed in action, or otherwise disabled on duty, are confounded with others who have never known active service at all, and who are rather to be regarded as labourers or as domestic servants than as seamen." The food of the pensioners seems to be good and abundant, and the system of messes not objectionable; but the dress appears to be unsatisfactory to the men. "At the time of the foundation," say the Commissioners, "the dress now in use there was the mark of a superior condition in life, and was doubtless adopted on that account." Now it is antiquated; it has no resemblance to the uniform of the Navy, and "its grotesque appearance not unfrequently attracts a notice little complimentary to the wearer." But the most practical grievance is the small allowance made to the inmate beyond his board and lodging. On entering the Hospital he is made to relinquish any pension he may have gained in the service. He thenceforward receives, under the name of "tobacco-money," the sum of one shilling a-week. This sum was fixed in the early days of the Hospital, when a shilling represented a larger exchangeable value than now. It is at present very inadequate to supply the men with the humblest comforts; and, indeed, we can see but little difference between a fraction under twopence a-day and nothing at all, so far as the gratification of the poor old men is concerned. "The practical effect," says the Report, "of these parsimonious restrictions is at once offensive and demoralising; they induce many pensioners to present themselves before visitors of this great national asylum in the character of ordinary beggars; they force others to seek in places of the lowest description about Greenwich menial and degrading employments, and they tend to exclude the pensioners from social intercourse with all but those of their own monotonous fraternity." The remedies for these and other evils are pointed out by the Commissioners in a long Report, which we recommend heartily to the consideration of the Admiralty. A better classification of the men, an extended system of out-pensions, more attention to the wives and families of those residing in the Hospital, and a small increase in the sum allowed them for humble comforts, will probably give Greenwich all its former popularity, and encourage the seamen of England to uphold their "ancient reputation for the courage and constancy manifested in engagements for the defence and honour of their native country."

HOUSE OF COMMONS.—FRIDAY.

DEFENCES OF PORTSMOUTH.

In answer to the following questions put to the Secretary of State for War—whether the land, or a portion of it, which had recently been bought at a high price by Government for the defences of Portsmouth was not formerly in the possession of Government, and sold by them a few years back at a comparatively cheap rate? Whether there was not, at the time of selling such land, an official plan for the defence of Portsmouth, embracing such land, in the hands of Government, or of the military authorities? and whether he would lay upon the table of the House a return of the price at which the land was sold, the price at which the land has been re-bought, and the name of the official who sanctioned the sale? Mr. Sidney Herbert stated that the land referred to was sold in 1827 for 8000*l.* and had been bought back again by the Government in small portions for the sum of 28,000*l.* The land was not included in any plan except the old plan of the Duke of Richmond, which was discussed in Parliament in the time of Mr. Pitt. The land was sold by the Master-General of the Ordnance of the time.

GUN-BOATS.

On the motion of Mr. Berkeley, a return was ordered of copies of the report of the Surveyor of the Navy to the Board of Admiralty, relative to the gun-boats building by Messrs. Green, dated the 12th day of January, 1856; of Admiralty letter to Messrs. Green, of same date, in consequence of that report; and, of reply of Messrs. Green, dated the 14th day of January, 1856.

INDIAN ARMY.

On the motion of Colonel Sykes, a return was ordered of the number of troops, regular and irregular, European and native, line and local, of the several arms on the establishment of each presidency in India in the month of April, 1857, and summary of the whole.

FORTIFICATIONS.

Colonel Dunne expressed a hope that before the House should be called upon to vote any sum for fortifications, the Secretary at War would make a full statement of the intentions of the Government on the subject.

Lord Palmerston intimated assent.

GUN AND MORTAR BOATS.

On the motion of Sir Frederick Smith a select committee was appointed to inquire into the circumstances which have caused the (alleged) defective state of a considerable number of the gun and mortar boats and vessels of the Royal Navy.

The Minister of Marine, Brigadier and Intendant General, Marquis Jerome de Gregorio, is under a Council of Admiralty, which is presided over by the Prince Count D'Aguila, Commander-in-Chief of the Fleet, the Vice-President is Marquis della Spina. The personnel consists of five Rear Amirals, Garofalo, Palma Calvacanti, Lettiere, and Roberti—1 Major-General, 1 Director of Marine Artillery, 9 Brigadiers, 10 Captains, 20 Commanders, 15 Lieutenants, and 30 Ensigns. There are 125 officers of "Corps des Equipages," and of Marine Artillery, 20 Engineers, and 1500 men. The Marines consist of 1 regiment of 2 battalions of 6 companies each; 2 regiments of artillery of 6 companies each, 225 strong; 2 reserve companies of 131 each, presenting altogether an effective for the Fleet of nearly 10,000 men.

As a proof of the speed of Arabian horses, it is mentioned in an Algerian paper that a French officer has lately driven, in a common carriage drawn by four horses, a distance of thirty-seven kilometres, or nearly twenty-five miles in two hours and ten minutes.

The 4th Royal South Middlesex Regiment of Militia was inspected on Tuesday at Hounslow by Colonel Haygarth, of the Scots Fusilier Guards. The regiment was upwards of 400 strong, and, after marching past in slow and quick time, Colonel Scriven put them through 12 or 14 of the battalion movements, which were executed with great steadiness and precision. The inspecting-officer expressed himself highly pleased with the general appearance of the regiment, and with their orderly conduct at billets.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOILEAU—May 19, at Heath Cottage, Inverness, the wife of Major T. T. Boileau, H.M.'s 2nd Regiment of Bengal European Cavalry, of a daughter.

CRUTCHLEY—May 19, at the Royal Military Asylum, Chelsea, the wife of Colonel Charles Crutchley, of a daughter.

EDWARDS—May 18, at Cheltenham, the wife of Major Cadwallader Edwards, of a daughter.

FITZGERALD—May 21, at 2, Harriet Street, Lowndes Square, the wife of Major William Fitzgerald, of a son.

GREENWOOD—May 19, at Crayke Hall, Yorkshire, the wife of Thomas Greenwood, Esq., Captain in the 7th Lancashire Militia Rifles, of a son and heir.

HAYES—May 21, at Portland Terrace, Southsea, the wife of Captain Montagu Hayes, R.N., of a daughter.

MADDOCK—May 20, at Leamington, the wife of T. Herbert Maddock, Esq., H.M.'s Indian Army, of a daughter.

MALCOLM—April 12, at Belgaum, in the Bombay Presidency, the wife of Lieut.-Colonel Malcolm, C.B., Southern Mahratta Horse, of a son.

PALMER—May 19, at Old Charlton, Kent, the wife of Major Edmund Palmer, Royal Artillery, of a son.

RAPER—April 12, at St. George's, Bermuda, the wife of A. H. Raper, Esq., 39th Regiment, of a daughter.

TONGE—May 18, at Fair Lea, Great Malvern, the wife of Commander L. C. Tonge, R.N., of a son.

WALKER—May 22, at 13, East Cliff, Dover, the wife of Captain Edmond Walker, Royal Engineers, of a son.

MARRIAGES.

FYLER—STEVENSON—May 22, at the Old Church, Clifton, by the Rev. James Fyler, rector of Siddington, Glocestershire, John William Townsend Fyler, Captain H.M.'s 31st Regiment, of Heffleton, Dorset, to Jane Louisa, youngest daughter of George Stevenson, Esq., late of the Grenadier Guards.

HAMILTON—GETHIN—May 22, at St. George's Church, Dublin, by the Rev. John Finlay, Frederick Fownes Hamilton, Esq., of Windmill, county Kildare, youngest son of the late Charles Hamilton, Esq., of Hamwood, county Meath, to Frances Catharine, only daughter of Richard Gethin, Esq., of Earlsfield, county Sligo, late 13th Light Dragoons.

HILL—CLARKE—May 17, at Llanwenarth, Monmouthshire, by the Rev. T. A. Wood, M.A., of Pentre Court, in the same county, C. Willoughby Hill, Esq., Lieutenant 1st Bombay Lancers, eldest son of the late Rev. Charles Vienott Hill, M.A., of Yalding, Kent, to Annette, youngest daughter of the late Frederick Arnaud Clarke, Esq., of Tatsfield, Kent.

HORNER—DAVIS—May 17, at Sevenhampton, near Cheltenham, by the Rev. W. S. Davis, John Horner, Esq., Captain 58th Regiment, to Louisa, youngest daughter of John Davis, Esq., Captain Dorset Regiment Militia.

WILLIAMS—JONES—May 19, at All Souls', Langham Place, the Rev. J. Williams, vicar of Gringley, Notts, to Mary, daughter of Vice-Admiral the Hon. Alexander Jones.

DEATHS.

BRISCO—May 24, at his residence in the Albany, Arthur Brisco, Esq., of Newtown Hall, Montgomeryshire, late of the 11th Hussars, and second son of Wastel Brisco, Esq., of Bohemia, near Hastings.

CRAWFORD—April 22, suddenly, at Bombay, Lieut.-Colonel James H. G. Crawford, Bombay Engineers.

FITZGERALD—May 22, at No. 2, Harriet Street, Lowndes Square, James William, infant son of Major William Fitzgerald.

FOREMAN—May 12, at Ryde, Captain Thomas Manning Foreman, late 56th Regiment, aged 77.

FOREMAN—At No. 7, Manor Street, Clapham, S., suddenly, Louise Henriette Foreman (née Gouthier), of Morges, Switzerland, widow of the late Captain Henry Foreman, aged 61.

JONES—May 12, at Harwich, very suddenly, Ann Sarah, the beloved wife of R. W. M. Jones, Esq., Additional Paymaster of H.M.S. Pembroke, aged 28.

MACPHERSON—April 15, at Calcutta, aged 54, Major Samuel Charters Macpherson, 8th Regiment H.M.'s Madras Infantry, Political Agent at Gwalior, eldest surviving son of the late Dr. Macpherson, of King's College, Aberdeen,

MURRAY—May 22, Lieut.-Colonel Sir Archibald Murray, Bart., late of the 3rd Fusilier Guards, aged 67.

PHILLIPS—April 6, at Dehree Ghaut, East Indies, of cholera, Captain J. G. Phillips, 63rd Bengal N.I.

PRICE—May 17, at Bath, Lieut.-Colonel Augustus Price, late of the Bombay Army, aged 46.

PUCKLE—April 16, of cholera, at Kamptee, Louisa Hale, wife of Henry Glover Puckle, Lieutenant 28th Madras Native Infantry, and Assistant D.E. of Kamptee.

PULLEY—April 7, at Jaulnah, Captain L. H. Pulley, 9th Regiment Madras N.I., third son of Joseph Pulley, Esq., of Bayswater, aged 32

We regret to state that Colonel Lake, who was attacked by severe indisposition during the recent inspection of troops by H.R.H. the Duke of Cambridge, at Woolwich, and who fell from his horse during the review, is still far from being well.

In the Upper House on Monday evening Earl Grey asked whether or not the regiments sent from India to China would be charged upon the British revenue from the time of their embarkation; whether English regiments would or would not be entitled to Indian pay and allowances whilst serving with the Indian troops in China; and whether provision had been made in the estimates for the pay of the Indian regiments, and for the Indian pay and allowances of British regiments, serving in China?—Earl Granville replied to the former question by reading from a written paper; but owing to the confusion prevailing in the House, the answer of the noble earl to the first question was inaudible in the gallery. In reply to the second, the noble earl was understood to say that British troops whilst serving in China would be entitled to Indian pay and allowances; and in answer to the third, that no provision had been made in the estimates for the sums referred to.

In the House of Commons on Monday, Sir G. Pechell asked the Secretary to the Admiralty if any steps had been taken (on the recommendation of the late Naval Commission) to abolish the present system of sharing freight money for the conveyance of specie, jewels, or treasure, on board Her Majesty's ships; one-fourth share being paid to the admiral on the station, two-fourths to the captain of the ship who signed the bill of lading or receipt for the same, and the remaining one-fourth share only being paid to Greenwich Hospital for the use of the institution.—Lord C. Paget replied that there was a commission to inquire into the management of Greenwich Hospital, which had taken this subject into consideration amongst others. That commission had not yet reported; until they had the Government could take no action upon it.

For several months past differences have been pending between the parish authorities of Woolwich and the War Department as to the payment of parochial rates for houses in the Royal Arsenal and at the garrison, occupied by Government officers. During the term of the late Conservative administration the vexed question was in a fair way of settlement; but subsequently payment of the rates was again refused. After receiving deputations on the subject, and conferring with the members for Greenwich (Alderman Salomans and Mr. Angerstein), the Home Secretary, Sir G. C. Lewis, has informed the parochial authorities that the War Department has received instructions to pay the rates due.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund	£1,684,598 2 10
Annual revenue	289,231 13 5

Annual average of new assurances effected during the last ten years, upwards of half a million sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the office daily, at half-past one.

LONDON, 82, King William Street, E.C.
EDINBURGH, 3, George Street (Head Office).
DUBLIN, 66, Upper Sackville Street.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,
K.G., K.T., K.P., G.C.B., & G.C.M.G.

Subscribers' Names at CHAPPELL'S, 50, New Bond Street, London, W.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

MILITARY BAND INSTRUMENTS.

J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.

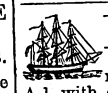
J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.

Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35, Henrietta Street, Covent Garden, London, W.C.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. Lock's City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O.M. 236 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9½ knots on a remarkably light consumption of fuel, being 2½ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to

CURRY, KELLOCK, & Co., Brokers, Liverpool.



FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—700 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to

CURRY, KELLOCK, & Co., Brokers, Liverpool.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, and Melbourne, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

W. R. LOOKER & Co., 12, Pall Mall East, London, S.W.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W.

Officers' bills discounted. Reversions purchased.
Life insurances effected free of charge.
Wines and all mess supplies furnished.
Every description of army business transacted.

CUNNINGHAM'S PATENT SELF-REEFING TOPSAILS, &c.

Copy of a letter from Captain J. M. OUTRIDGE, of the Champion of the Seas, 1946 tons register, belonging to Messrs. J. BAINES & Co., dated Liverpool, April 14, 1860.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.

GALLERY, 179, REGENT STREET, W.

THE VOLUNTEERS' PICTURE FRAMES.—The Cheapest House for every description of Picture Frames. Country dealers supplied with every description of Gold and Fancy Wood Moulding. Three-quarter Gilt Beads at 7*s.* per doz. 6 feet, at

GEORGE REES, 129, Drury Lane, W.C.

SCHOOL OF MUSKETRY, HYTHE.—Noblemen and Gentlemen proceeding to the School of Musketry, will find every description of MILITARY BOOKS at BOURNE'S, Bookseller, Stationer, and Circulating Library, High Street, Hythe.

WESTERTON'S LIBRARY, Hyde Park Corner, W., unsurpassed for liberal supplies of new books, and for its liberal scale of subscriptions.

Books may be exchanged daily.

VOLUNTEER-SERVICE CLUB.—Members are informed that the CLUB was OPENED on the 15th inst., at 53, St. James's Street, S.W.

Officers holding commissions in Volunteer corps, and Gentlemen, being effective or non-effective members of such, are eligible for admission.

The Lieutenancy of Counties, and Officers belonging to the Yeomanry and Militia, are likewise eligible.

Admission by ballot.

The Annual Subscription is six guineas.

The annual subscription of members having no residence in London, and living beyond a radius of sixty miles therefrom, is three guineas.

There is no entrance fee, and no liability beyond the annual subscription.

The Club-House is now open for the accommodation of members.

Lists of rules and regulations, and every information, may be obtained at the Club-House, on application to the Secretary.

At a special meeting of the committee held on the 7th inst.—Lord ELCHO, M.P., in the Chair—the following noblemen and gentlemen were nominated a sub-committee to carry out the new arrangements:—

Sir Ralph Anstruther, Bart.
Captain the Hon. T. C. Bruce.
Major Brewster.
Dr. John Rose Cormack.
Lieutenant-Colonel Lord Elcho, M.P.
Thomas S. Egan, Esq.
Lieutenant-Colonel the Earl Grosvenor, M.P.
Lieutenant-Colonel G. M. Hicks.
Alexander Stavely Hill, Esq., D.C.L.
Lieutenant-Colonel the Hon. C. H. Lindsay.
Lieutenant-Colonel Viscount Ranelagh.
Captain Josiah Wilkinson.

By Order, WILLIAM DE CARTERET, Secretary.
Club House, 53, St. James's Street, S.W.,
May 16, 1860.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

St. Estephe, superior, 32*s.*; excellent Pale and Golden Sherry, 26*s.*; superior do., 30*s.* and 32*s.*; very superior Pale, Dry, or Golden Sherry, 36*s.*; Vino de Pasto, pure Ammontillado Sherry, 42*s.*; Old Port, fresh bottled, 30*s.*; superior old tawny Port, 36*s.*; pure pale Cognac Brandy, 24*s.* per gallon; superior old Cognac, 30*s.* per gallon; choice old Liqueur Brandy, 72*s.* per dozen.

Priced Lists of all Wines forwarded on application.

ANDREWS & Co., 19, 20, 21, & 22, Dame Street, Dublin.

KINAHAN'S L. L. WHISKEY *v.* COGNAC BRANDY.—This celebrated OLD IRISH WHISKEY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3*s.* 6*d.* each, at most of the respectable retail houses in London, by the appointed agents in the principal towns in England; or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET.—Observe the red seal, pink label, and cork branded "Kinahan's L. L. Whiskey."

CYDER AND PERRY IN THE GREATEST PERFECTION.—Devonshire Cyder, 8*s.* qrts., 4*s.* 6*d.* pts.; Cockagee Somerset Cyder, 14*s.* qrts.; Old Field Perry, 18*s.* qrts., 10*s.* pts.; the real Taynton Squash Perry, 25*s.* qrts., 15*s.* pts. Hampers and bottles, 3*s.* per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

IMPORTANT TO OFFICERS.—Have all your BOTTLED ALES, WINES, &c., PACKED IN SEYMER'S REFRIGERANT STRAW ENVELOPES, which entirely prevent Heating, Fermentation, and Breakage, will use repeatedly as Wine Coolers, prevent all litter on board ship or in quarters, and save 30 per cent. in space and freight. Supplied by all Wine Merchants at 9*d.* per dozen, and wholesale by THOMAS WHITEHEAD, 37, Eastcheap, London, E.C.

MESS PRESIDENTS, PURSERS, AND OFFICERS OF BOTH SERVICES, Supplied with every description of GENUINE STORES for the use of the Mess, on the most moderate terms. WAX and all other CANDLES; SCRUBBING and the best TOILETTE SOAPS in use; PURE LILLE COLZA OIL; PICKLES and ITALIAN GOODS of approved makes only. W. & Co.'s PLATE POWDER, Brushes and every Article for the Table as supplied in India and elsewhere.

WHITMORE & CRADDOCK, General Exporters and Purveyors, by Appointment to H. M. Government. Offices, 16, Bishopsgate Street Within, London, E.C. Printed Lists on application.

SOUTHSEA STEAM MARBLE WORKS, COTTAGE GROVE, SOUTHSEA, PORTSMOUTH.
ESTABLISHED 1849.

A. W. BAKER respectfully informs his Friends, Patrons, and the Public in general that he has erected improved Steam Machinery, and will now be enabled to execute all orders without delay at London prices.

A large stock of marble and enamelled slate chimney pieces in show-rooms, monuments, tombs, tablets, headstones, &c.

Digitized by Google

MONEY TO LEND AT 5 PER CENT.—TO OFFICERS, NOBLEMEN, AND GENTLEMEN.—If you require money upon real estate for any term of years, or upon reversionary interests—life estates or marriage settlements; or if you want ADVANCES, LOANS, or DISCOUNTS for short periods on Bonds, joint notes, or bills of exchange, you can apply personally between 1 and 5 o'clock daily, or by letter addressed, MR. COLLINS, 13, Duke Street, St. James's Square, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to MR. DICKER, 10, Craig's Court, Charing Cross, S.W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

YOUTH, BEAUTY, AND ARTICULATION.—MR. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10*s.* per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10*s.* 6*d.* per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11*s.*, 22*s.*, and four quantities in one for 33*s.* Attendance daily, from 10 till 6.

TEETH.—MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.

Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.

Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post freee for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 2, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

Certificate No. 36,418. In chronic dyspepsia (indigestion), nervousness, palpitation, constipation, diarrhœa, bilious and liver complaints, cough, debility, asthma, and incipient consumption, we find it the safest remedy. Andrew Ure, M.D., F.R.S.; Dr. Harvey; Dr. Bright; Dr. Shorland; Dr. Campbell; Mr. S. E. Smith, M.R.C.S.L.

We extract a few out of many thousand cures:

Cure No. 1771. Lord Stuart de Decies of many years' dyspepsia. Cure No. 49,832. "Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting, have been removed by Du Barry's excellent Food." Maria Joly, of Lynn, Norfolk. Cure No. 53,816. Field Marshall the Duke of Pluskow, of dyspepsia, constipation, nervousness, and liver complaints. Cure No. 47,121, Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. Cure No. 54,816. From the Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk: In all cases of indigestion, and particularly when the liver is affected, I consider it the best of all remedies.—JAMES T. CAMPBELL.

THE FRENCH INVASION OF RUSSIA.

Now ready, with Plans, 8vo. 15*s.*

THE SECRET HISTORY OF EVENTS DURING THE FRENCH INVASION OF RUSSIA, AND RETREAT OF THE FRENCH ARMY IN 1812. By GENERAL SIR ROBERT WILSON, K.M.T., British Commissioner at Head Quarters of the Russian Army.

"Sir Robert Wilson was with the Russian army in 1812, and was treated confidentially by the Emperor Alexander; hence he was able to give a history of the *French Invasion of Russia*, which may be advantageously read after the narratives of Labaume, Segur, and others. It is the work of a soldier and a gentleman, who felt bound to record many things that reflect deep disgrace on many of the actors in that memorable campaign, and that is the reason of its publication having been so long delayed."—*Literary Churchman.*

"Sir Robert Wilson's book abounds in new and striking illustrations of events and incidents. He does justice to both parties in this war of giants. The world had never seen such a campaign of six months as this, honestly and fearlessly described by an impartial and perfectly competent witness. It is not to be read without many conflicting emotions of admiration, horror and disgust. There is abundance, too, of excellent instruction in the book."—*Athenæum.*

FOX HUNTING.

Now ready, Second Edition, with Portrait and Illustrations, 8vo. 15*s.*

REMINISCENCES OF THE LIFE OF THE LATE THOMAS ASSHETON SMITH, Esq.; OR, THE PURSUITS OF AN ENGLISH COUNTRY GENTLEMAN. By SIR JOHN E. EARDLEY WILMOT, Bart.

"Sir Eardley Wilmot has compiled a series of graphic incidents and sketches of the life of Thomas Assheton Smith—a name that will long be remembered, not only by the farmers and riding men of the counties he hunted, but by all who are disposed fairly and justly to appreciate the lights and shadows which constitute the character of 'The English Country Gentleman.'"—*Quarterly Review.*

Dick Christian.—"No man that ever came into Leicestershire could beat Mr. Smith."

Nimrod.—"That most conspicuous sportsman of modern times, Thomas Assheton Smith; combining the character of a skilful sportsman with that of a desperate horseman, perhaps his parallel is not to be found; and his name will be handed down to posterity as a specimen of enthusiastic zeal in one individual pursuit, very rarely equalled."

The Druid.—"He was the mightiest hunter that ever 'rode across Belvoir's sweet vale' or wore a horn at his saddle bow."

Delme Radcliffe.—"I could nowhere find a more fitting model for the rising generation of sportsmen. He was an instance of the very rare union of coolness and consummate skill as a huntsman, combined with the impetuosity of a most desperate rider; and not only was he the most determined of all riders, but equally remarkable as a horseman."

JOHN MURRAY, Albemarle Street.

GROSVENOR, Lieut.-Colonel.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, 12th March, 1860, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Warren, Trollope, Payne, Loveridge, Passy, Haggarth, Horne, Orton, Harrison, Higgins. 41 Naval Cadets passed from North Grove House in 1859.

W. BELL, Chaplain;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives 25 PUPILS to educate for the Royal and Indian Navies, the Army, Woolwich, and Addiscombe. Terms, 70, 80, and 100 guineas, according to age. Upwards of 70 pupils have passed since 1854.—St. Mary's Hall, Southsea, Hants.

NAVAL, MILITARY, AND CIVIL SERVICE EXAMINATIONS.

MR. CHARLES F. COOPER, R.N., assisted by talented Masters, receives and quickly prepares a limited number of young gentlemen. Terms, 50 guineas per year, or 7 guineas per month. March 12th, 1860, Mr. Leacock passed second of the 43 successful candidates for Naval Cadets, and last year six of the pupils obtained First, Second, and Third Places. All the pupils prepared have passed.

Abbeville Villa, Ryde, Isle of Wight.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

17TH LANCERS.—The ANNUAL DINNER of the OFFICERS who have served, and who are now serving in this Regiment, will take place at THE CLARENDON HOTEL, BOND STREET, on WEDNESDAY, MAY 30TH.

His Royal Highness the Duke of Cambridge will be present. Dinner on table at Eight o'clock.

Gentlemen intending to dine are requested to send their names to the Hotel on or before Monday, May 28th.

THE ST. JAMES'S RESTAURANT, 69, REGENT QUADRANT, and 25, Piccadilly.—The most brilliant suite of Dining Saloons in London. Fashionably and centrally located for Families and Gentlemen.

Ladies' and Private Rooms overlooking the Quadrant for large or small parties.

A lofty and splendidly-appointed Smoking-room.

Dinner as per Carte 2*s* and upwards.

The St. James's Dinner, consisting of Soups, Fish, Entrées, Joints, Sweets, &c., 3*s*. 6*d*. each person.

The Stock of Wines, selected with the utmost care, are of the most recherché quality.

WILLIAM DONALD, Proprietor.

CRYSTAL PALACE.—PRIVATE DINING ROOMS.—This magnificent suite of Rooms for Private Parties of from Four to Four Hundred persons, are now Open for the Season. Early application for accommodation is requested.—F. STRANGE, Purveyor.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s*. per 1000; blank, 33*s*. per 1000.

Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

RIFLE AMMUNITION.—DR. SCOFFERN'S BALL CARTRIDGE for the Enfield Rifle is waterproof, and free from tallow or grease. A sample (quarter of a hundred) may be had for 2*s*. 6*d*. of HENRY GRAFTON, 89, Chancery Lane, W.C.

SPURIOUS RIFLE AMMUNITION.—WHEREAS certain RIFLE CARTRIDGES are now being advertised as "DR. SCOFFERN'S," the same not being authorised or approved by me, I therefore GIVE NOTICE that no Cartridges of mine are vended in commerce at present; and that, when vended, none will be genuine that do not contain a bullet of full regulation gauge; that do not withstand boiling without wetting the charge; that are not already filled with powder; and that are not sent out in packets of ten, the envelope of each packet bearing my autograph signature.—JNO. SCOFFERN.

TO VOLUNTEER CORPS.

WOOD'S GOVERNMENT PATTERN TARGETS, price 63*s*. complete, with wrought-iron staves, fastenings, &c. Delivered free at any Station in England. Weight about 5 cwt. each.

To be had only of the appointed Agents, RICHARDS & Co., Nos. 117 & 118, Bishopsgate Street Within, E.C. Drawings, &c., per post.

THE appointment of Major-General the Hon. Charles Grey to the colonelcy of the 3rd Buffs was brought before the House of Commons on Thursday evening by Sir De Lacy Evans in a very fair and temperate manner. The Secretary for War defended the appointment with no want of boldness, and with not a little jesuitry. He chose especially to dwell upon the fact of General Grey having a place at court, and asked was that a disqualification for military reward. "Because," said he, "a man happens to possess a place at Court, and there may be an outcry in the public prints about his getting any other place, it would be a shabby, cowardly thing not to give him a post of this sort when it falls vacant, and he has otherwise a fair claim to it." We cordially endorse the observation; and when a gallant and highly distinguished officer who holds a place at court—Sir Edward Cust—obtained the colonelcy of the 16th Lancers about a year ago, our only regret was that the honour had not been bestowed sooner on one who had shown his gallantry on the fields of the Peninsula, and whose writings proved that he was in heart a soldier. We are far from thinking that the possession of a non-military office should be held as a disqualification for reward for military services rendered, and we should be happy if the Army authorities practically showed their sincerity in enunciating the opinion by giving a regiment to Sir Duncan McGregor, who has been 60 years in the Army, is high up on the Lieut.-Generals' list, and served actively in Egypt, Sicily, Holland, and the Peninsula. Nevertheless he has been passed over for a regiment about fifty times on the presumed, and as we are inclined to think, insufficient ground that he held a civil appointment as Inspector of the Irish Constabulary. As we think Sir Duncan McGregor should not have been passed over because he had a civil office, so we think General Grey should not have been passed over for any military appointment to which he was fairly entitled, because he had a civil office in the shape of a place at Court. The truth is, this place at Court is an incident in the affair, not an essential part of the argument against General Grey's appointment. It was certainly thought, and we rather shared in the opinion, that it was General Grey's position at the Palace that brought about an appointment to a colonelcy, for which there was no fair justification on the ground of military service in the field. This, however, was merely conjecture, and we have the word of a Royal duke that if General Grey were General Smith or anybody else but Grey, he would have had his regiment before this. No more about the Court, therefore. Let us not even put the converse of Mr. Sidney Herbert's proposition, and say, "Because a man happens to possess a place at Court, it would be a shabby, cowardly thing to give him a place of this sort, to which otherwise he has not a fair claim."

We abstain, therefore, from inquiring what may have been the precise grounds upon which General Grey was selected, and prefer recapitulating the reasons why he ought not to have been selected before many other officers on the list. When Mr. Sidney Herbert met the Duke of Cambridge he questioned General Grey's military claims, apart from his position and connections, to which his Royal Highness replied satisfactorily. It does not appear, however, that the responsible minister thought of asking the duke whether he was the fittest man for the place, and whether there were not other generals on the list of longer and more distinguished service giving them superior claims to a purely military reward. If he had done so, according to his own argument, he must have come to a different conclusion as to the fitness of the appointment. Lord Raglan, when Lord Fitzroy Somerset, gave evidence that regiments were given according to this classification—1st, to those who had distinguished themselves in war; 2nd, to those who had performed colonial service; and 3rd, to those who had commanded efficiently and respectably at home. This evidence was quoted on Thursday night by Sir De Lacy Evans, and the theory was accepted by Mr. Sidney Herbert, who said that General Grey fell into the second class, viz., those who had seen colonial service. He thus admitted that an officer of minor qualification was preferred to one of greater. We do not mean to contend that every officer who has won distinction in the field should be taken before all those who are not so fortunate. There may be cases in which, from great seniority of service, from long and meritorious conduct, an old officer who had not been opposed to an enemy might be selected before one a great deal younger, though more brilliantly distinguished than himself. But these cases should be exceptional, and only when those who had seen service in the field were very junior, and in a position where they might well afford to wait for the first-class military reward. We speak of real and not fictitious seniority,—of seniority dating from the period of first entry into the Service, and not from a list based upon the luck and accidents by which individuals find themselves at a particular day at a particular rank. The purchase system and the varying luck of different regiments tend to make promotion in the lower grades very unequal; but when an officer reaches the rank of major-general, he should cease to feel any disadvantages he might have previously incurred in this respect. The authorities should, at the proper opportunity, remedy the grievances inflicted by an imperfect system, and it was little less than mockery to hear Mr. Sidney Herbert say on Thursday night, "General Bell is considerably the junior of General Grey," when General Grey entered the Service in 1820, and General Bell in 1811. Of the half-dozen Infantry Generals whom we have named as having conspicuous military service to show, Generals Orlando Jones and Jackson have each 55 years' service; Generals Cox and Macarthur, 52 years'; General M'Pherson, 51 years; and Generals Bell and Garrett, 49 years' each. General Grey is, therefore, in fact and in truth, junior to every one of them; and, although he has no war service, and is therefore in the second class, he is selected over their heads who occupy a conspicuous position in the first class. This is taking Lord F. Somerset's theory as accepted by Mr. Sidney Herbert. It was said in the course of the debate that the officers who were serving between 1816 and 1853 could show no war service; and that, if that were made a qualification, there would soon be none qualified. We deny the fact, for there were services rendered between 1816 and 1853 of very great brilliancy and reflecting the highest honour on those concerned. There were wars at the Cape and in China in that interval which tried the endurance of British troops, and in India we have had wars of no small dimensions for which peerages, regiments, and medals were very properly conferred. But we maintain that while the old officers who fought and bled in their youth are unrewarded, it is a misapplication of the funds voted by Parliament to give a colonelcy to General Grey, who has never seen War Service. Mr. Sidney Herbert complains of an undue depreciation of General Grey's services by the Press—of statements that he was never beyond Windsor or Hyde Park. We have not seen any such assertions; but whoever has made them is in error. Before speaking upon this matter, we were well acquainted with General Grey's military career. We knew it then as we know it now, and we have no hesitation in pronouncing it to be of the most ordinary character, not deserving a reward designed by the country for distinguished old soldiers, and in the present and some three or four previous instances unjustifiably withheld from them. We can afford to divert these prizes from their legitimate purpose in the case of Princes of the Blood, but not of their retainers.

At the present moment, when the power of resistance of iron plates to shot is a subject of so much interest, we cannot do better than briefly sketch the general results of the experiments which have from time to time been made with a view to test the efficiency of this defence against ordnance.

The first experiments upon the resistance afforded by wrought-iron plates to heavy artillery were made in 1854 at Woolwich and at Vincennes. From these it appeared that wrought-iron plates of 4½ inches thick afforded complete protection to a ship's side against the heaviest artillery of that date, viz., 68 lbs. shot, 16 lbs. charge, at distances of 1200 yards and upwards; that the same iplates afforded considerable protection at 600 yards' dtstance, but that at 400 yards they afforded little proection against 68 lbs. shot, as the plates are quiekly broken up by three or more shot striking within a short distance of one another; and the broken pieces of iron were then driven through the ship's side, and caused more injury than if there had been no iron casing at all. At the same time single shot were successfully resisted at 200 yards' range. It was also made evident that these plates afforded considerable protection at short ranges from 32 lbs. shot and 8-inch hollow shot, but that three or four shot of these kind striking near together broke away portions of the plate, and a breach was gradually formed in the ship's side.

At Vincennes the general result was as follows:

That iron plates 3·94 English inches would resist 14 shot from French 30-pounders per square metre (10¾ square feet). That plates 5½ inches thick gave a resistance of 18 shots per square metre. The French 30-pounder throws a 32 lbs. shot English.

Upon the above data the floating batteries were constructed, experiment having shown that it required a sustained and deliberate fire from guns in use at that date, in order to effect a breach in their sides.

The case of artillery *versus* floating batteries remained in abeyance until 1857, when Mr. Whitworth having rifled a Service 68-lbs. cast-iron block, proposed to try it against the floating batteries. This experiment took place at Portsmouth, and was the first instance of a flat-headed shot of wrought-iron having been used against the plates.

This form of shot which weighed from 68 to 70 lbs. penetrated clean through the 4½ in. plates, but unfortunately the gun burst after a few rounds had been fired, and it was subsequently discovered that ordinary cast-iron had not sufficient strength to bear the strain put upon it by any efficient system of rifling. Notwithstanding the above experiment the Admiralty, alarmed by the progress made in France in the construction of iron-plated ships, decided to build similar men-of-war in this country; and an enormous expenditure has been incurred upon this account.

In 1859, the Armstrong gun having been introduced into the Service, experiments were made with it against an iron-plated ship. The Armstrong 32-pounder failed to pierce the plates; in fact, at a short range, it had no more effect than the old service 32-pounder, in consequence of its want of velocity.* In the early part of this year the Armstrong 100-pounder gun was tried against the iron plates, but failed to pierce them until a flat-headed shot of steel or wrought iron was employed, similar to the one used by Mr. Whitworth in 1857. With this species of projectile, the Armstrong 100-pounder pierced the plates, but did not penetrate clear through the side of the ship, except where it had been previously weakened by former shot.

In fact, it has been shown by these experiments that the Armstrong 100-pounder is only one-fourth better than the old Service 68-pounder at short ranges. This arises from the low initial velocity of the former shot. At the experiments at Shoeburyness, on Saturday last, with the Whitworth 80-pounder, every shot which struck fair passed clean through the side of the floating battery, and was picked up within a few feet of the opposite side of the vessel.

---

* The Admiralty upon this ordered additional iron-plated ships to be commenced.

THE ARMY.

1st Life Guards. The annual banquet of the 1st Life Guards took place at the London Tavern, on Saturday evening, Sir W. Wynn, Bart., M.P., in the chair, supported by the Duke of Beaufort, Marquis of Conyngham, Earl Beauchamp, Earl of Mount Charles, Viscount Templemore, Viscount Grey de Wilton, Viscount Elmley, Viscount Ingestre, Earl Vane, Sir Hervey Bruce, Captain Caulfield, Captain Lowther, Colonel Parker, Colonel Hogg, Lieut.-Colonel Hon. D. C. F. de Ros, Colonel Oakes, Colonel Greville, Lord Eliot, Captain Bateson, Captain Streatfeild, Captain Hon. Henry Wyndham, Captain Magens, Hon. C. Duncombe, Captain Levett, Sir W. A. Fraser, Bart., Captain Peyton, Captain Fraser, Captain de Winton, General MacNeil, Captain Farrer, Colonel Biddulph, Captain Walsh, Captain Bulkeley, Hon. W. North, Lord Earlsfort, Hon. R. Talbot, Mr. G. W. Harvey, Mr. H. Langham, Mr. F. Graham, Mr. J. Leslie, Mr. C. Alexander, Mr. W. G. Craven, Mr. E. Heneage, Mr. Richardson, Mr. Greville, Mr. George, Mr. Osborn, Mr. Hanly, Mr. Limbert. The dinner and wines were of the most recherché description.

1st (King's) Dragoon Guards. Cornet Stephenson has joined the depôt at Canterbury.

2nd Dragoon Guards. Lieutenant O'Beirne is attached to the Nynee Tal depôt during the hot season.

3rd Dragoon Guards. Surgeon Allen has leave to England.

4th Dragoon Guards. Lieutenant Ponsford has left Shorncliffe for Brighton, to join the head-quarters of his regiment.

6th Dragoon Guards. Lieutenant Doering is attached to the Landour convalescent depôt during the hot season. Cornets Fryer, Dakin, and Jones, have joined the depôt at Maidstone, on appointment.

7th Dragoon Guards. Cornet Cammilleri has joined the depôt at Canterbury, on appointment.

3rd Light Dragoons will shortly move from Dublin to the Curragh for the summer.

6th Inniskilling Dragoons. Assistant-Surgeon R. G. Burton has obtained leave to England on medical certificate.

7th Hussars. Captain Brown and Lieutenant Topham are on leave to Simla to October 15.

8th Hussars. Major Phillips is on leave home. Lieutenant de Winton has arrived in India. Cornet Coates has joined the depôt at Canterbury, on appointment.

12th Lancers may be expected to arrive in England in July, and will be quartered at Leeds. Colonel Pole, Brevet-Lieut.-Col. Prior, Lieutenant F. Jones, and Riding-Master Stephens have preceded the regiment by the overland route. Captain Harford, acting paymaster, has gone to Calcutta on duty.

14th Light Dragoons. The head-quarters have arrived at Plymouth in the Sydenham, and proceed to Dublin for disembarkation. Several of the officers have preceded the corps by the overland route and the depôt at Newbridge are collecting horses.

15th Hussars will move from Dublin to the Curragh for the summer.

16th Lancers. The greater part of the regiment has arrived at Aldershot.

17th Lancers. The coming of age of Cornet Bruce of this regiment, eldest son of Lord Ernest Bruce, has been celebrated with great rejoicings at Marlborough, which borough Lord Ernest represents in Parliament. Lieut. H. E. Wood is appointed second in command of the second corps of Mayne's Horse. The officers now serving in, and those who have served in, the above distinguished regiment, dined together on Wednesday evening at the Clarendon Hotel, Bond Street. His Royal Highness the Duke of Cambridge presided on the occasion. The banquet was served up in splendid style, covers being laid for thirty. The Duke of Cambridge, attended by Colonel the Hon. James Macdonald, arrived shortly before eight o'clock, at which hour dinner was announced. There were present Major-General F. Johnson, Major-General Scott, Major-General Lawrenson, Colonel Sir J. M. Wallace, K.H., Colonel Benson, Sir G. Leith, Lieut.-Colonel Learmouth, Lieut.-Colonel Holden, Colonel St. Quintin, Hon. Colonel Massey, Major Pole, Major Parry, Captain K. Erskine, Captain A. Burnand, Captain Macartney, Captain H. Baring, Captain Marshall, Captain Lowe, Hon. G. Morgan, Lieutenant Bainbridge, Lieutenant Gooch, Cornet Blumberg, Cornet H. A. Robinson, Mr. J. Wilkinson, Sir G. Wombwell, Dr. Gibson, Mr. D. Lane, Mr. A. Crawshay, Mr. Gonne, &c.

Royal Artillery.—G Field Battery of the 9th Brigade of the Royal Artillery marched from Athlone, in three divisions, on the 28th, 29th, and 30th ult., arriving at the Portobello Barracks, Dublin, on the 31st of May and the 1st and 2nd of June, there to be stationed.

Captain M'Dougall's battery of artillery marched from Limerick for the Curragh on the 24th ult. The officers accompanying it were Captains M'Dougall and Thornton, and Lieutenant O'Connor. Lieutenant Kyle of the same battery left on the 27th, with the dismounted men. This battery was succeeded at Limerick by Captain Colclough's from Newbridge on the 27th, Lieutenant Barrington with the dismounted men having arrived on the 24th. Colonel Frome, Royal Engineers, accompanied by Lieut.-Colonel Robertson, R.E., Captain Brine, R.E., and Major Mackintosh, barrack-master, inspected the Limerick barracks on the 24th. They proceeded down the river Shannon to inspect the various forts, &c., on the 25th.

Captain H. Renny is attached to the Murree convalescent depôt for the hot season.

Second Captain Le Mesurier is on leave to Nynee Tal, from 15th March to 15th July.

Veterinary Surgeon Callow, of the Royal Artillery, has received orders to proceed to China at once. He leaves Shorncliffe this week.

No. 7 Battery of the Royal Artillery at Shorncliffe, has taken over the battery of Armstrong guns brought last week from Woolwich by No. 9 Battery; this is the first Armstrong battery which has been sent from Woolwich to join any battery of the Artillery. During the week the men have been actively drilled in the new exercise required for these guns; they consist of 12-pounder guns, and weigh about 8¼ cwt. each, the weight of the 9-pounder field batteries being about 13 cwt. per gun. The strength of the 9th Battery is the following: 1 captain, 3 subalterns, 1 surgeon, 239 non-commissioned officers, gunners, and drivers, 103 horses, 6 guns, 6 waggons, and 5 ambulances and store-carts.

Royal Engineers.—Captain E. O. Hewett, R.E., has been ordered to proceed to Portsmouth, to take command of the 36th Company of Royal Engineers.

1st Royals. 1st battalion.—Ensign Atkinson and 80 rank and file are under orders for Madras.

4th Regiment, 1st battalion. Captain J. Paton has leave to England for 18 months, from date of leaving the regiment. Ensign F. R. Sandys will succeed to the Adjutancy of the 1st battalion, vice Law, resigned.

5th Fusiliers. Brevet-Major A. Scott, Captain R. Moore, Lieutenant Shegog, and Ensign Ormond, with 210 rank and file, are ordered from the depôt to Calcutta to join the regiment.

6th Regiment. Ensign Collis and 46 men are under orders for India.

7th Fusiliers. Lieutenant Sparks is attached to the Murree depôt for the hot season. Lieutenant Little is about to be gazetted as Adjutant of the 1st battalion.

8th Regiment. On the departure of the 1st battalion for England the Governor-General of India issued the following complimentary Order:—"His Excellency the Governor-General considers it due to Her Majesty's 8th (the King's) regiment of foot to take leave publicly of the regiment on its departure to England, and to offer to its officers and men the acknowledgments of the Government of India for their services in this country. The 8th Regiment embarked for India in April, 1846, and, after serving for some years in the presidency of Bombay, was transferred to the Bengal presidency in December, 1853. The regiment was at Jullundur in 1857, when the mutiny of the Bengal army broke out, and did essential service at that station in resisting and punishing the mutineers. It joined the army before Delhi soon afterwards, and served with much distinction in the siege and capture of that fortress. It bore a conspicuous part in the complete repulse given to the forces of the mutineers in their persevering sorties on the 14th, 18th, and 23rd July, 1857; and in the glorious struggle within the city, which lasted for six days. After it was stormed in September, the 8th Regiment was among the foremost in exhibiting the irresistible effect of the valour and endurance of British soldiers. The regiment formed part of the pursuing column under Brigadier Greathed, C.B., and was present in the actions at Boolundshur, Allyghur, and Agra. It subsequently served with the force under His Excellency the Commander-in-Chief in the relief of the garrison of Lucknow and at Cawnpore, and was subsequently employed in the final conquest of the province of Oude, and exhibited its characteristic bravery in the capture of the town and fort of Sandee. The Governor-General begs to assure the 8th Regiment of the very high sense entertained by him of its services and soldierly conduct, whether in quarters or in the field, and of the interest which he will always feel in its future welfare." Captain Meade and Lieutenant Moynihan of the 1st battalion, are on their way home from India in the Monica in charge of detachments. Captain T. G. Souter has leave for 6 months, from date of embarkation of the regiment.

11th Regiment. The 1st battalion of the 11th Regiment of Foot (North Devon), stationed at Portsmouth, received new colours yesterday, on Southsea Common, at the hands of Lord William Paulet, C.B., commanding the south-west district. This fine regiment is under the command of Colonel Moore, and has recently returned from Australia, where it had been stationed for thirteen years. The regiment is rather strong, and is in a very high state of discipline. One of the remarkable historical reminiscences connected with the fame of this gallant corps is, that it was one of the first regiments that declared for the Prince of Orange. Its first colonel was a Duke of Beaufort.

15th Regiment. The 1st battalion will move from the Channel Islands to the Curragh, relieving the 30th Regiment.

20th Regiment. Captain H. E. Quin of the 1st battalion is employed in the Public Works Depôt in India. Lieutenant Fahie is attached to the Nynee Tal convalescent depôt.

23rd Fusiliers. Captain the Honourable Savage Mostyn is attached to the Nynee Tal depôt.

24th Regiment. Captain H. M. Burns is doing duty with the Kussowlie convalescent depôt. Lieutenant Tongue is to be appointed Adjutant to the 1st battalion, vice Lieutenant Fox, who has leave to England.

26th Regiment. Sir George Brown, the Commander of the Forces in Ireland, in officially communicating the melancholy death of Captain Collins, of this regiment, to the Commander-in-Chief, says, "It appears that Captain Collins and Lieutenant Armstrong (also of the 26th Regiment) were returning from musquetry practice directly across the line of fire of a party at No. 2 range, in direct contradiction to all orders on the subject, when a shot struck the former officer, and he died almost immediately. A court of inquiry has been ordered to assemble to investigate into all the circumstances of the case, the proceedings of which, as well as the finding of the coroner's jury, will be forwarded to you when they are received by me."

27th Regiment. Lieutenant Surman is attached during the hot season to the Kussowlie depôt.

30th Regiment, under the command of Colonel Mauleverer, C.B., is under orders to be moved from the Curragh camp to Jersey and Alderney, in exchange for the 1st battalion, 15th Foot, which battalion will be sent from those two islands to the Curragh on arrival.

34th Regiment. Captain A. G. Shawe, Lieutenant Wyse, Ensigns Sharpe and Webb, and 75 rank and file are under orders for India.

35th Regiment. Lieut.-Colonel Beamish, Captains Tisdall, Morton, and Davis, and Lieutenant Lloyd, are on leave from 15th April to 14th October, to Nynee Tal and the hills north of Deyrah. Lieutenant Trimen is doing duty with the Landour depôt.

37th Regiment. Brevet-Lieut.-Colonel Heaton, Lieutenant Mason, Ensigns Ennis, King, and Holton, with 132 men, are under orders to join head-quarters in India.

38th Regiment. Brevet-Major Walton, Ensign Bromhead, and 93 men, are under orders for India.

42nd Highlanders. Captain J. Wilson is temporarily acting as Instructor of Musketry. Captain R. H. Gordon is on leave from 15th April to 15th October, 1860, to Kumaon Hills.

46th Regiment. Lieutenant Radcliffe is doing duty with the Kussowlie depôt.

48th Regiment. Ensign Brown is doing duty with the Nynee Tal depôt. Ensign Bowlby is acting as Adjutant and Quartermaster to the wing of the corps quartered at Oorae, under Major Aplin.

51st Regiment. Captain R. G. S. Mason and Lieutenant C. L. B. Hamilton are on leave to Bombay for 2 months, from date of departure from the regiment, m.c.

52nd Light Infantry. Major A. L. Peel has arrived in England on 18 months' leave. The anniversary dinner of the 52nd Light Infantry was held at the London Tavern on Monday evening. Generals Sir F. Love, K.C.B., Sir C. Yorke, K.C.B., Sir John Bell, K.C.B., M'Neil, Colonel Blois Colonel French, Colonel Campbell, C.B., Colonel Pocklington, Captain the Hon. E. Curzon, Major Vigors, Major Bailey, Lieut.-Colonel F. Cavendish, Major A. Peel, Captain the Hon. J. Monson, Captain Hughes, Captain Moorsom, Lord Walter Scott, Major J. Peel, Captain the Hon. W. Clive, Captain Jones, Captain Stopford, Captain Henley, and Mr. Beattie were present. The Duke of Richmond was prevented from taking the chair by indisposition.

53rd Regiment. On the eve of the departure of this gallant regiment the following well-deserved General Order was issued:—"His Excellency the Governor-General of India gladly embraces the opportunity afforded by the return of Her Majesty's 53rd Regiment to England to place on record the sense entertained by the Government of the services rendered in this Presidency by this excellent regiment. The 53rd Regiment arrived in India in December, 1844, and proceeded to the North-Western Provinces. It was present in the campaign of the Sutlej, and engaged in the battle of Aliwal in January, 1846, and at the battle of Sobraon on the 10th of February, 1846, which closed that campaign. It took part also in the campaign of the Punjab, and was present in the battle of Goojerat. After several years of service in the Upper Provinces and in the Punjab, in the course of which, while at Peshawur in 1851 and 1852, the regiment was frequently engaged in successful expeditions against the border tribes, the 53rd foot proceeded to the presidency, and it was in garrison in Fort William in the early part of the memorable year 1857, when the late mutinies broke out in the native army of Bengal. The Governor-General willingly bears testimony to the importance of the service rendered at that time by the regiment at the presidency. The 53rd foot proceeded to the North-Western Provinces while the general disturbances were at their height; and at the brilliant affair at Khujiva, on the 1st of November, 1857, where about two companies were engaged successfully, in concert with the Shannon's naval brigade, against a very superior body of rebels and mutineers, the regiment lost its gallant and lamented commander, Lieut.-Colonel Powell, C.B. Of this action it was appropriately remarked in the despatch of His Excellency the Commander-in-Chief, 'This fight affords one more instance of what the British soldier will perform in spite of every disadvantage and extraordinary fatigue. This was a soldiers' fight, if ever there was one.' With the detachment of the 53rd, on this occasion, it will be remembered that a company of the 93rd Highlanders, a small party of the Royal Engineers, and a depôt detachment likewise fought, the whole winning for themselves the admiration and gratitude of their fellow-countrymen. The 53rd Regiment served at the memorable relief of the garrison of Lucknow, achieved by His Excellency the Commander-in-Chief in November, 1857; and, after having been present at the relief of Cawnpore, and at the action on the Kalanuddee, both directed by His Excellency in person; at the actions at Futtehghur and at Shumshabad, and the storming of Meangunge; the regiment was engaged in the capture of Lucknow, by the Commander-in-Chief in April, 1858. Lastly, the regiment was employed in the taking of Sultanpore, and the passage of the Goomtee, under Major-General Sir Hope Grant, K.C.B., and in the final subjugation of Oude. The field services of the 53rd foot, however, have not been more conspicuous than its discipline and good conduct throughout the period of its employment in India. The Governor-General takes his leave of this fine regiment with a very hearty farewell."

54th Regiment. Brevet-Lieut.-Colonel W. F. Brett is on leave from 15th April to 15th October, 1860, to hills north of Deyrah. Lieutenant Cliffe is doing duty with the Nynee Tal depôt. Captain Robinson and 93 rank and file are under orders for India.

55th Regiment will shortly move from the Curragh to Aldershot. Some months ago we mentioned the fact that Mr. Bell, formerly a lieutenant in the regiment, recovered 450*l.* damages in Dublin against Captain Parke for slander. On that occasion evidence of a previous charge against the plaintiff was tendered, with a view to depreciate his general character, and therefore to mitigate the damages. On this ground, and also on that of the excessive amount of the damages, an application was this week made to the Irish Court of Exchequer for a new trial on behalf of Captain Parke. The Chief Baron thought Captain Parke entitled to a new trial, but the two other Barons differed from him, and the application was refused.

56th Regiment. Private Burns, of the 56th Regiment, stationed in Colchester Camp, on Wednesday, received 50 lashes, in accordance with the sentence of a garrison court-martial, for having for the third time deserted from his regiment.

60th Rifles. Four officers and 192 men of the 2nd battalion, 60th Rifles, are under orders to proceed to join the service companies in China as soon as tonnage can be provided for them. No women or children will accompany this detachment, as it proceeds to the seat of war; but they will receive the usual allowance until sent out, consisting of 6*d.* per day for each woman and 2*d.* per day for each child.

66th Regiment. Captain and Brevet-Major Sir C. F. W. Cuffe, Bart., has leave to England for 18 months.

68th Light Infantry. A letter from Rangoon of the 31st of March, says, "Major-General Bell is now holding his annual inspection of Her Majesty's 68th Regiment. The amateurs of this corps are to have their first theatrical performance this evening in the Assembly Rooms, which they have brushed up at considerable expense with new scenery, &c. The drop scene, painted by Lieutenant Blair, of the

Digitized by Google

Artillery, is intended to represent the public gardens. The regatta came off on the 29th and 30th."

71st Light Infantry. Brevet-Major A. C. Parker is on leave to Matheran and Bombay, from 1st April to 1st October, and Lieutenant H. B. Aldridge to England for 18 months. Lieutenant Kane is doing duty with the Landour depôt.

75th Regiment. Ensign T. B. Morris is doing duty with the Nynee Tal depôt.

78th Highlanders. Three companies of this regiment have moved from Edinburgh, replacing the same proportion of the West York Rifles, whose rioting has been the subject of notice elsewhere.

79th Highlanders. Lieutenant Cleather is doing duty with the Kussowlie depôt.

81st Regiment. Major J. B. Flanagan is on leave to England for 18 months, from date of leaving the regiment. Captain Bourchier is attached to the Murree depôt during the hot season.

82nd Regiment. Lieutenant F. Mylne is on leave (in ext.) from 1st November to 1st May, 1861.

87th Fusiliers. This fine corps, the last on its way to China, left Singapore on the 19th of April *en route* for Hong Kong.

88th Regiment. Colonel G. V. Maxwell is on leave from 15th April to 15th October to proceed to the Hills. Ensign Buchanan is doing duty with the Landour depôt during the hot season. Ensign Cuthbertson and 167 men are under orders to embark for India.

90th Regiment. Lieut.-Colonel J. C. Guise has leave to England from 1st May, 1860, to 1st November, 1861.

91st Regiment. Lieutenant E. K. Obbard is on leave to England for 18 months.

93rd Highlanders. Lieutenant Burgoyne is attached to the Murree depôt.

94th Regiment. Captain St. John is attached to the Murree depôt for the hot season. Lieutenant Richards has passed his examination in the vernacular. Lieutenant Malthus is acting as Instructor of Musketry until the arrival of Lieutenant Teevan from England.

97th Regiment. Lieutenant Shawe is ordered to Calcutta to appear before a Medical Board. Lieutenant Thompson and 80 men are under orders for India.

98th Regiment. Lieutenant Simpson is attached to the Murree depôt for the hot season.

Rifle Brigade. Lieutenant A. R. Keene is attached to the Landour depôt for the hot season.

3rd Depôt Battalion, Chatham. Captain and Adjutant Roney, who, in last week's *Gazette*, succeeded to a majority by purchase, in this Depôt Battalion, is an officer of 21 years' standing. We understand he commenced his career in the Austrian service as a cadet. Major Roney has seen much foreign service, and during the Crimean war was appointed major of the 1st Jäger Corps, which he eventually succeeded to the command of. Major Roney is youngest brother of Sir Cusack P. Roney.

Royal Malta Fencibles.—Surgeon Bernard has been gazetted surgeon-major, with the rank of major, and Assistant-Surgeon Ellul of the same regiment to the rank of captain. Immediately after the publication of the Warrant increasing the rank and allowances of the medical officers of the Army, Surgeons Bernard and Ellul applied to the Secretary of State for War (then General Peel) for the rank, if not the pay, of their brother officers in the Army. And, although General Peel then stated that the provisions of the Warrant are not applicable to the Royal Malta Fencibles Regiment, Mr. Sidney Herbert, at the recommendation of His Excellency the Lieut.-General Commanding, has been pleased to grant their just demand.

Sir B. Hawes has just issued a circular, in which he says that Mr. Sidney Herbert, having been in communication with the Duke of Newcastle, desires that the appointment of a separate legal adviser should be limited to colonies having a responsible government, and in which the law officers of the Crown are subject to frequent changes, and to other cases in which, from some local circumstance, the general officer commanding, with the assent of the governor, may consider that the law officers of the Crown are unable to attend conveniently to the business of the War Department. Hitherto, where a law officer of the Crown was paid by a salary, his remuneration bore annually to his annual salary, as nearly as possible, the same proportion which the demands of the Board of Ordnance on his time and attention during the year have borne on the demand made during the same period on his time and attention by the colonial government. And where he was remunerated by fees the fees were paid by the Board of Ordnance, the fees in no case to be greater or less than those which such officer received in respect of duties of equal importance and difficulty from the local government. Mr. Herbert now desires that when the income of the person concerned is derived partly from his official salary, and partly from private practice, he should receive the fair remuneration which he would obtain from private individuals for any business which may be thrown upon him by the War Department.

The following Circular has been forwarded to the military storekeepers at Chatham garrison by order of the Secretary of State for War:—"The Secretary of State for War, with the concurrence of His Royal Highness the General Commanding-in-Chief, and in consequence of the favourable results of experiments by the departmental chemist and trial by the superintendent of small arm factories, has approved of the introduction of Price's Rangoon oil into the Service, for the preservation of small arms and articles made of metal from oxidation. This material, which is manufactured by Price's Candle Company, is found to be unalterable, always procurable, of a uniform quality, and equal in every respect to the best sperm oil, and at the same time more economical. Price's Rangoon oil for preserving metal work is therefore to be demanded whenever oil is in future required by the departments for the use of the Army, and for the preservation of small arms, or for metal work of any description, in lieu of oils of other description hitherto supplied.—J. Crawford Caffin."

The annexed Circular Memorandum, addressed to the regiments and battalions of infantry at home and abroad, except those in India and China, and the 65th Regiment, has been promulgated:—"Horse Guards, S. W., May 22nd.—The distribution of regiments and battalions of infantry of the Line at home and abroad, except of those in India and China and the 65th Regiment, which remains as at present, is to be follows:—

	Field-Officers.	Captains.	Lieutenants.	Ensigns.	Staff.	Sergeants, exclusive of Schoolmaster.	Drummers.	Corporals.	Privates.
10 Service Companies	3	10	11	9	6	46	21	40	760
2 Depôt Companies ...	...	2	3	1	...	10	4	10	140
	3	12	14	10	6	56	25	50	900

The second battalions which are now serving at home are not to be divided as above without special orders, though they should, of course, be formed into 12 companies. The pipe-major and the five pipers of the Highland regiments, which are in addition to their establishments, belong to the service companies.—By command, James Yorke Scarlett, Adjutant-General."

The following General Order, respecting the marching of recruits in India, has been issued by Lord Clyde:—"With a view to ensuring a more efficient control over parties of European recruits proceeding up country, whether marching or by bullock-train, and to prevent the recurrence of those acts of misconduct which have, the Commander-in-Chief is pained to observe, been of late so frequently brought to notice, His Excellency, with the concurrence of Government, is pleased to direct that the maximum number of recruits for British regiments to be henceforward placed under the charge of one officer shall be 50; and that, whenever practicable, 3 officers, with some non-commissioned officers, shall be attached to every 100 men. Lord Clyde further directs that the officer in charge of every detachment shall be required to keep a diary of the marches made, and of the conduct of the soldiers, which he will submit to the officers commanding the stations through which he may pass, and finally deposit in the staff office of the station where the last draft is left. It will be the duty of officers commanding stations to inspect carefully this report; bringing, if necessary, to the notice of superior authority any entries which may appear to require observation or inquiry."

Colonel C. A. Browne, so long the Military Secretary in Madras, has been appointed to the command of the Nagpore Force on his return to India. "The Governor in Council cannot allow the long, honourable, and highly valuable service of Colonel Browne, as Military Secretary to the Government, to terminate without recording their sense of his eminent public merits, and acknowledging the important assistance they have always received from him."

The whole of the troops of the line at Chatham who are about to proceed to India to augment the service companies of their regiments in the three presidencies have been instructed in the great gun drill, pitching and striking tents, field works, and making gabions and fascines, escalading, embarking and disembarking, and in cooking when in the field. They have also gone through a course of rifle instruction, and are in every respect ready to take the field immediately on arriving in India.

A numerous detachment of non-commissioned officers and men of the 20th, 23rd (Fusiliers), 31st, and 73rd Regiments, left Chatham Barracks on Tuesday morning, and proceeded to the Ordnance wharf, where they were exercised in embarking and disembarking from Her Majesty's ship Tyne, the troops being conveyed to and from the ship in the men-of-war launches.

An amateur theatrical performance by the non-commissioned officers and men of the Royal Engineers took place at the Royal Marine Theatre, Chatham, on Tuesday evening, in the presence of Col. H. Sandham, Director of the Royal Engineer Establishment, Col. A. P. Ross, R.E., Col. E. Rea, Commandant of the Royal Marines, and a large number of the officers of the garrison and the men of the Royal Engineers. The pieces performed were *Rob Roy* and *Deaf as a Post*, the various characters being sustained in a very effective manner. The band of the Royal Marine Light Infantry, under the direction of Herr Kappey, occupied the orchestra.

On Wednesday the 3rd battery 1st brigade Garrison Artillery, in command of Lieut.-Colonel and Brevet-Colonel De Rinzy, assembled in the mortar battery park, adjoining the Royal Artillery barracks, Woolwich, and fired four rounds of mortar practice, the target being, as usual, a flagstaff about 30 feet high, bearing a union-jack, erected on Woolwich Common, over a range of 100 yards. The barrack field, forming a portion of the intervening space between the battery and the flagstaff, was occupied by squads of recruits belonging to the depôt and men of the 4th brigade under drill, and other portions of the field were taken up with various parties of officers and soldiers engaged in the game of cricket. The review-ground near the flagstaff was converted into a drill-ground for pitching and striking tents, under rehearsal of that part of the proceedings intended to be carried out on Dartford Heath on Friday, and had the appearance of a bivouac of troops on the march. The whole available battalion of Royal Marines, in command of Colonel Stransham, were also on the ground, under a course of summer drill and rifle practice. Woolwich was unusually crowded with holiday folks, and great numbers were attracted to the locality by the firing and other circumstances, necessitating redoubled caution on the part of the provosts and sentries to keep the ground free within a certain distance of the flagstaff, marked out as dangerous to the approach of visitors, the mortar-shells whizzing through the air with great velocity, and falling from 10 to 40 and 50 yards in every direction from and about the target. In the third round the firing was exceedingly precise, the fifth shell from the mortar glancing along apparently within a hair's-breadth of the mark. The next shot, fired with a ten-inch shell, struck the flagstaff about a foot below the flag, shivering it in splinters, and bringing the flag to the ground, the shell being found buried three feet beneath the shingle twelve feet beyond. A loud shout of applause and clapping of hands thereupon ensued, and, the flagstaff having been lashed up and replaced, the firing continued with fair results.

A farewell dinner was given on Tuesday by the gentry and tradesmen resident in the neighbourhood of Aldershot, to Lieut.-General Knollys, lately commanding the camp, in recognition of his uniform urbanity and his continuous efforts to promote the welfare of Aldershot and its vicinity. The dinner was held at the Club-house, Aldershot, and about 130 persons were present, among whom were Captain Mangles (chairman), Sir C. Phipps, Mr. Roupell, M.P., &c. The Chairman, in proposing "The health of General Knollys," dwelt upon the excellent order that had prevailed in the camp during the gallant officer's command, and upon his unceasing efforts to promote the comfort, not only of the soldiers under his control, but of all who dwelt in the vicinity of the camp. The compliment was duly acknowledged by the gallant general, who expressed the great pleasure he felt at finding that his good wishes and best efforts were so well appreciated. After some other toasts had been disposed of the company separated.

Chatham Garrison Amateur Theatricals. On Wednesday evening the sergeants of the 1st, 2nd, and 3rd Depôt Battalions and Royal Engineers gave their last performance at the Theatre Royal, Marine Barracks. The plays selected were, "Still Waters Run Deep," and "The Unfinished Gentleman." The theatre was crowded with the *élite* of the garrison and town, and at the finish of each piece the performers were loudly called for. In the first piece, Staff-Sergeant Flowers, W. Norfolk Militia, as "John Mildmay," was excellent, as was also Colour-Sergeant Rowe, 7th Regiment, as "Captain Hawksley." Mr. Bristowe, Librarian, St. Mary's Barracks, was a capital "Unfinished Gentleman," his acting eliciting roars of laughter throughout. It is generally admitted, that the above performances were the best of the season, and there is no doubt, that whenever the Sergeants play, they will obtain the patronage of the officers of the garrison and the respectable inhabitants of the town.

H. W. Eve, Esq., B.A., scholar of Trinity College, Cambridge, has been appointed one of the assistant-masters of Wellington College. An annual nomination to Addiscombe has been given to the college by Sir James Weir Hogg, and two additional nominations for next year.

SHORNCLIFFE CAMP.

On Monday morning last, an experiment was tried to test the value of draught oxen for the purpose of moving heavy guns. Mr. Robert Bourne, of Summerfield Court farm, near Sellinge, supplied three yolk of oxen, which were attached to one of the 18-pounder siege guns, from the new shed at the north-west part of the camp; the number of horses usually required being twelve, and six drivers, the horses being harnessed four abreast, the drivers mounted on the off and near horse of each section of four. The ease with which the oxen started the ponderous mass, weighing over four tons, excited the admiration of all the bystanders. The course taken was along the D and E ranges, down the military road into Sandgate, from thence through Sandgate to Seabrook, then up the hill, past the new church, along the front of the C range, completing the circuit. The distance was over 3½ miles; the time consumed, including stoppages, was about one hour and a quarter. Lieut.-Colonel the Hon. H. Devereux, conducted the experiment, which appeared to be quite successful; proving that for moving heavy guns with a steady, continuous movement the ox far exceeds his compeer the horse.

VETERINARY SURGEONS IN INDIA.

The following scale of pay and allowances of Veterinary Surgeons in the British and India Forces of Her Majesty are officially published:—

	For any month. Rs.	As.	P.
Staff veterinary surgeons, after 15 years' service on full pay	313	1	2
Staff veterinary surgeons, after 20 years' service on full pay	327	15	8
Staff veterinary surgeons, after 25 years' service on full pay	342	14	2
Veterinary surgeons, 1st class, after 5 years' service on full pay	186	5	8
Veterinary surgeons, 1st class, after 10 years' service on full pay	216	2	8
Veterinary surgeons, 1st class, after 15 years' service on full pay	231	1	3
Veterinary surgeons, 1st class, after 20 years' service on full pay	253	7	0
Veterinary surgeons, 1st class, after 25 years' service on full pay	298	2	7
Veterinary surgeons on appointment	149	1	4
After 5 years' service on full pay	171	7	1
After 10 years' service on full pay	193	12	11
After 15 years' service on full pay	208	11	5
After 20 years' service on full pay	208	11	5
After 25 years' service on full pay	208	11	5
Veterinary surgeons appointed before 1st July, 1859, on appointment	149	1	4
After 5 years' service on full pay	171	7	1
After 10 years' service on full pay	193	12	11
After 15 years' service on full pay	208	11	5
After 20 years' service on full pay	223	10	0
After 25 years' service on full pay	260	14	8

The Army Gazette.

THE NAVY.

ADMIRALTY, MAY 26.

PROMOTIONS AND APPOINTMENTS.—The following Engineers have been promoted to the rank of Second-Class Assistant-Engineers and appointed to the under-mentioned ships:—D. Millar to the Highflyer, W. Roberts to the Blenheim, M. B. Kelly to the Wasp, J. Hird to the Flying Fish, T. Edgar to the Wellington as supernumerary, E. Hawkes to the Eagle for service in the Violet, and R. H. Dobney promoted to the rank of Acting Second-Class Assistant-Engineer in the Tribune.

MAY 28.—Surgeon J. T. Gabriel, to the Hecate.

Acting Assistant-Surgeons S. Bamfield, to the Victory, for service at Haslar Hospital; W. H. Bell, to the Hecate; and D. Hilston, to the Edgar.

Master's Assistant R. J. Ellis, to the Wasp.

MAY 29.—Commanders W. Wood, to the Barracouta; and E. H. Howard, to the Mohawk, vice M'Dougall, invalided.

Lieutenants J. W. Pike and F. W. Lewis (additional), to the Imaum.

Masters C. C. Scott, to the Barracouta; and W. J. Olive, to the Imaum.

Mate H. Austin, to the Aboukir.

Assistant-Paymasters W. K. Harriott, to the Impregnable; and H. P. Brenan, to the Excellent.

Acting Assistant-Surgeons T. Milne, to the Renown; and F. F. Flynn, to be additional to the Marlborough.

Chief-Engineers A. M'Innes, to the Cumberland, for charge of the machinery of the Virago; and J. W. German, confirmed as Chief-Engineer in the Barracouta.

Acting Third-Class Assistant-Engineer J. Clinkskill, to the Wellington, for service in the Thais.

MAY 30.—Lieutenant J. E. N. Graham, to the Barracouta.

Paymasters J. B. Swann, to the Scourge; and W. E. Kelly, to the Barracouta.

Assistant Paymasters J. N. Robinson, to the Dauntless; M. B. Granby, to the Pembroke; E. W. Golden, to the Imaum; and F. A. Keogh, to the Blenheim.

Midshipmen A. E. Hutchinson, to the Aboukir; and P. C. Johnstone, to the Agamemnon.

Clerk J. C. Franklyn, to the Barracouta.

Second-class Assistant-Engineer T. Brown, to the Asia, for charge of the machinery of the Blazer.

MAY 31.—Captain Sir F. L. M'Clintock to the Bulldog commissioned.

Midshipmen G. H. J. Elliot to the Cressy, W. H. C. St. Clair to the Aboukir, C. F. M. Gordon to the Hannibal, R. D. Campbell to the Marlborough, H. S. Sandys and F. A. Wetherall to the Donegal.

First-Class Assistant-Engineer G. H. Beaton to the Cumberland, for charge of the machinery of the Racehorse.

COAST GUARD OFFICE—MAY 31.

APPOINTMENT.—Commander John De C. A. Agnew to be Inspecting Commander of the Coast Guard, Aberdeen Division, vice Warren, removed.

REMOVAL.—Commander Frederick P. Warren, from Aberdeen, to be Inspecting Commander at Gravesend, vice Baker, period of service expired.

Acorn was at Amoy when the last mail left.

Actæon was at Shanghaie when the last China mail left.

Adventure was at Chusan at the departure of the last China mail.

Agamemnon was at Malta on the 17th ult.

Algerine was at Ningpo when the last mail left.

Amethyst, 26, Captain S. Grenfell, will leave Valparaiso for Spithead, about the end of July next.

Arethusa, 50, screw steam-frigate, having been cut in half at Chatham, the operation of half-launching her will be performed during the next spring tides. She is to be lengthened by about 50 feet.

Assistance was at Chusan at the departure of the last China mail.

Banterer was at Hong Kong on the 14th of April.

Black Eagle, Admiralty steam-vessel, having undergone repairs to her machinery on Wednesday, proceeded down the river on a trial trip under the charge of an officer from the Woolwich factory department. The result was satisfactory.

Blenheim, 60, screw, Captain Francis Scott, C.B. This ship is to proceed to Milford, and her crew will be turned over to the Colossus, 80.

Boxer was at Malta on the 17th ult.

Britomart, a new gun-vessel, built at Newcastle-on-Tyne, was on Wednesday brought up to Woolwich Dockyard to be fitted for service.

Bulldog, 6, paddle, in the steam reserve at Portsmouth, steamed out of the harbour on Wednesday to test her machinery and speed, &c., after repairs. Everything worked satisfactorily, and she realised rather over 11 knots.

Bustard was at Ningpo when the last mail left.

Cadmus left Malta on the 1st ult. for the West Indies.

Cæsar, 90, screw, Captain Thomas Mason, will, it is said, on her arrival in England turn over her officers and crew to the Duncan, 101, screw, now completing her machinery, &c., at Portsmouth.

Cambrian was at Hong Kong on the 14th of April.

Camilla was at Japan by the latest accounts.

Caradoc, arrived at Malta on the 20th from Naples and Palermo; and proceeded on the 24th to Syracuse.

Carnatic (old 70-gun line-of-battle ship), recently converted at Messrs. White's yard, at Cowes, into a coal depôt, is receiving on board her steam crabs and gear alongside the shear jetty in Portsmouth harbour. She will be fitted in a similar manner to the Pitt, recently conveyed round to Portland, and is reported to be for service at Malta.

Centaur, 6, steam-vessel, Commander E. D'o D'a Alpin, left Singapore on the 30th of March, towing two transports full of troops for Hong Kong.

Chesapeake was at Hong Kong on the 14th of April.

Clio, 22, screw, Captain T. Millar, arrived at Valparaiso on the 11th of February last from Rio de Janeiro; she is to be stationed on the coast of Central America.

Clown was in Canton river on the 12th of April.

Collingwood, line-of-battle-ship, is being converted into a screw steam-ship at Sheerness.

Digitized by Google

Colossus, 80, screw, is ordered to be commissioned by Captain Francis Scott, C.B., for coast-guard service at Portland, in place of the Blenheim. 60, screw.

Cormorant, 4, had her steam up on Saturday, and proceeded down the river from Chatham to sea for the purpose of trying her engines.

Coromondel was at Hong Kong on the 14th of April.

Cressy has sailed from Malta for Naples.

Cruiser was at Chusan at the departure of the last China mail.

Cumberland, 70, Captain Schomberg, chief steam reserve ship in Sheerness harbour, was on Thursday paid wages, and the crew granted seven days' leave.

Doris was at Gibraltar on the 21st ult.

Dove was at Shanghaie when the last China mail left.

Drake was at Hong Kong on the 14th of April.

Eagle, 50, Captain E. Tatham, Coast Guard. It is reported in naval circles that this ship will leave her present station and go to Southampton, and be employed as a training-ship.

Edgar, 91, screw, Captain James E. Katon, bearing the flag of Rear-Admiral Erskine, is ready for sea, and is expected to sail in a few days.

Esk, 20, screw, Sir R. I. Le M. M'Clure, C.B., left Singapore on the 4th of April, for Hong Kong. Sir R. M'Clure remains at Singapore to superintend certain official business that required his attention.

Espoir, 5, screw, preparing at Devonport for the first division of the steam ordinary, is receiving her stores in the basin at Keyham.

Firm was at Shanghaie when the last China mail left.

Flying Fish, 6, screw, sailed from Spithead on Tuesday for the eastward.

Forester was at Hong Kong on the 14th of April.

Frederick William, 86, screw, was docked on Saturday to be brought forward for sea service.

Furious was at Shanghaie when the last China mail left.

Fury was at Hong Kong on the 14th of April.

Ganges, 84, Rear-Admiral R. L. Baynes, C.B., Captain Fulford. By private letters from Vancouver's Island, we hear that the marines from this ship had been landed, and that the San Juan difficulty remained the same, but all quiet.

Hannibal was at Malta on the 17th ult.

Haughty was at Hong Kong on the 14th of April.

Hermes, 6, paddle-wheel steam-sloop, 200-horse power, Commander William A. Gordon, from the Cape of Good Hope station, has been inspected at Sheerness by the Commander-in-Chief, Vice-Admiral Edward Harvey and staff, preparatory to being taken into the basin to be dismantled and paid off. She has been in commission since the 16th of June, 1855, and has been reported a healthy and comfortable ship.

Hero, 91, screw, Captain G. H. Seymour, in Keyham Dock, having shipped her shaft, was taken out of dock on Tuesday.

Hesper was at Hong Kong on the 14th of April.

Highflyer was in Canton river on the 12th of April.

Himalaya, steam troop-ship, Captain Seccombe, at Devonport, is to have her defects made good with all possible dispatch.

Impérieuse was at Shanghaie when the last China mail left.

Inflexible was at Hong Kong on the 14th of April.

Insolent was at Hong Kong on the 14th of April.

James Watt, arrived at Malta on the 24th from Suda (Candia).

Janus was at Hong Kong on the 14th of April.

Kestrel was at Foochow when the last mail left.

Leven was at Hong Kong on the 14th of April.

London has sailed from Malta for Naples.

Marlborough, bearing the flag of Admiral Fanshawe, was expected to leave Malta about the 22nd ult.

Megæra, with 30 gunners of the Royal Artillery, arrived at Gibraltar on the night of the 18th ult., and proceeded to Malta, where she arrived on the 25th, with the 1st battalion of the 22nd Regiment, which she embarked at Queenstown, under the command of Major Sir George Robinson.

Mohawk was at Gibraltar on the 21st ult.

Nelson, 91, screw, got up steam and tested her boilers and machinery on Thursday in the steam-basin at Portsmouth. Everything worked in the most satisfactory manner.

Nimrod was at Shanghaie when the last China mail left.

Odin, 16, steam-vessel, Captain Lord John Hay, C.B., arrived at Singapore on the 9th of April last. On her passage from the Cape the weather was of a most extraordinary description: heavy gales, head winds, stark calms alternated. Between the Cape and Singapore she parted from her gun-boats, and no news of them had been heard previous to the departure of the last mail. She was to leave Singapore on the 10th with two transports of the 8th Punjabees on board.

Opossum was at Shanghaie when the last China mail left.

Orion, 91, Captain Frere, at Keyham, has been caulked to endeavour to stop a leak. Her shafting is to come out.

Orpheus, 21, 400 horse-power, having been completed, is ordered to be launched about the latter end of June.

Pearl was at Chusan at the departure of the last China mail.

Penguin, 4, having been coppered, was taken out of the North Dock in the Devonport Dockyard on Tuesday, and moored to the jetty.

Phœbe, 51, was hauled under the crane in the north basin at Keyham on Monday. She is taking on board her machinery.

Quail was at Gibraltar on the 21st ult.

Queen, 86, was spoken by the Peninsular and Oriental steamer Delta on the 23rd ult., steering southwards on her way to Gibraltar.

Racehorse, 4, 200 horse-power, arrived in harbour on Tuesday evening from Woolwich, to be docked and surveyed, after which she will be fitted out for the steam reserve.

Redwing, tender to the Cambridge, went out to the breakwater, Plymouth, on Wednesday, to enable the men to exercise firing shell from the Armstrong guns.

Renard, 4, screw, Commander J. G. Goodenough, was at Singapore on the 9th of April last, having arrived there with an Indian transport in tow, bound for Hong Kong.

Renown has sailed from Malta for Naples.

Ringdove, 4, screw, Commander R. G. Craigie, arrived at Singapore in April last, having been employed in towing Indian transports with troops on board for Hong Kong.

Roebuck was at Shanghaie when the last China mail left.

Royal Albert, 121, screw, Captain Lacon, flag of Rear-Admiral Sir Charles Fremantle, sailed from Plymouth on Tuesday to join the Channel fleet, leaving behind 60 or 70 of her crew, who have broken leave.

Scourge was at Gibraltar on the 21st ult.

Scout was at Chusan at the departure of the last China mail.

Simoom, 8, screw, Commander J. M. Cooke, arrived at Singapore from Hong Kong on the 9th of April last.

Slaney was in Canton river on the 12th of April.

Snake, 4, screw, Commander H. Harvey, arrived at Singapore in the beginning of April, having in tow an Indian transport with troops bound for Hong Kong.

Sphinx, 6, steam-vessel, Commander G. F. Day, V.C., arrived at Singapore on Saturday, April 7th, from the Cape, having experienced dreadful weather, during which she parted from her gun-boats, which she had conveyed from England at so much risk and trouble. It is fortunate that these last-named vessels were under the command of such an experienced officer as Commander Day, as they were in no condition to encounter the perils of an ordinary fair-weather voyage to the East. Captain Day was obliged to have them repaired on the voyage, and they were a source of constant solicitude to every soul on board the Sphinx. No doubt, however, is entertained about their turning up safe, but no intelligence of them was known on the departure of the last mail from Singapore. The Sphinx was to leave on the 10th with two transports of Sikh cavalry. A private letter received from Her Majesty's ship Sphinx, dated Singapore, April 15, says:—"We leave here to-morrow for the north, with a transport in tow. A large body of troops are said to be collected at Shanghaie, and were expected to start thence for the north about the 25th. A great number of Sikhs and a few native regiments have come up here; the remainder of the troops are English. A naval brigade of 2000 men will be landed, under the command of Captain M'Cleverty."

Starling was at Hong Kong on the 14th of April.

Staunch was in Canton river on the 12th of April.

St. Jean d'Acre has sailed from Malta for Naples.

Sutlej, 51, screw, fitting in the steam-basin at Portsmouth, will be ready for the trial of her machinery the latter end of this month.

Thunderbolt, 16, floating battery, 200 horse-power, has had her bottom covered with Peacock's composition, which has been introduced into the Royal Navy, in order to preserve the iron plates with which she is protected. She has also had her interior painted.

Topaze, 51, screw, Captain the Hon. J. W. S. Spencer. By advices from the Pacific station we hear that Mr. Ernest Rice is appointed lieutenant to this ship, vice Burgess, invalided.

Trusty, 14, floating-battery, was towed to Chatham on Wednesday, and placed at moorings off Upnor, for the purpose of the Lords of the Admiralty inspecting the effects of the experiment by Mr. Whitworth's 80-pounder gun.

Virago, 6, paddle-wheel steamer, Commander Dunn, anchored at the Little Nore on Thursday, and was inspected by Capt. H. Harvey, flag-captain, after which she proceeded into the harbour to be paid off.

Vivid, steam-vessel, Master-Commanding Allen, left Woolwich at six o'clock on Wednesday morning for Dover, where, in accordance with a telegraphic message, she was ordered to embark the Lords of the Admiralty for an inspection of the Channel Fleet now lying in the Downs, and subsequently to proceed with their lordships to Calais. On her return to Woolwich the crew of the Vivid will remain on board to be in readiness to convey their lordships to witness a repetition of experiments with the Whitworth gun.

Vixen, 6, steam vessel. Lieutenant Richards, flag to the Commander-in-Chief of the Pacific station, is promoted to be commander of this vessel, vice Captain Lambert deceased.

Wasp, 13, screw-corvette, Commander C. Stirling, arrived at Spithead on Thursday afternoon from Sheerness.

Watchful was in Canton river on the 12th of April.

Woodcock was at Shanghaie when the last China mail left.

Wrangler, 4, screw steam gun-vessel, 160-horse-power, Commander J. Beamish, was on Thursday inspected by Captain Rundle B. Watson, Captain-Superintendent of Sheerness Dockyard, and paid advance.

The Lords Commissioners of the Admiralty having awarded a silver medal to Serjeant-Major George William Lane, with an annuity of 10*l.*, Colonel George E. Hunt, of the Chatham division, presented the medal to him on Saturday, in presence of the officers and battalion on parade.

An Admiralty order has been issued promoting Mr. J. J. Fincham, first-assistant-master-shipwright at Chatham dockyard, to be master-shipwright at Deptford, vice Mr. Chatfield, superannuated. Their lordships have awarded the annual good conduct gratuity of 50*l.* to Mr. R. Driver, foreman of shipwrights at Chatham.

Vice-Admiral Sir Arthur Fanshawe, the newly-appointed commander-in-chief at Plymouth, comes to England in the Terrible, 21, paddle, Captain Glasse, which was to leave Malta on the 22nd inst. for Devonport.

The medical officers of the Navy have subscribed for the purpose of obtaining from the chisel of Baron Marochetti two marble busts of the late First Lord of the Admiralty, with a view to present one to Lady Pakington, and the other to Haslar Hospital. This step has been taken on the part of these gentlemen in order to testify to Sir John their gratification at his having successfully carried a measure by which their pay and their position have been materially benefited. The presentation will take place on Tuesday next, the 5th inst.

The following vessels have been chartered by the War Department for the conveyance of stores to various foreign stations:—Indemnity, Alphington, Trent, Hannibal, Celerity, Pride of the Sea, Reliance, Naomi, and Spartan.

Part of the Channel fleet is now lying in the Downs. There are seven line-of-battle ships and two frigates, viz.:—Aboukir, Centurion, Conqueror, Algiers, Trafalgar, Mars, Donegal, Diadem, and Mersey.

The whole of the officers at Chatham under orders to proceed to India have been granted one month's leave o absence prior to their embarkation.

The following ships have been taken up by the Hon. Council of India for the conveyance of troops to India, viz., the Vittoria, the Clarence, the Agincourt, and the Eveline.

NAVAL COURT-MARTIAL.—A naval court-martial was held on board the Impregnable, guard-ship, at Devonport, on Friday week, to inquire into the conduct of John Casey, stoker, employed on board the Partridge, steam-tender to the Royal Albert, "whereby damage was alleged to have been done to the midship boiler on the morning of the 17th of May, and to try him for the same." The court was composed of the following officers:—Rear-Admiral Sir Charles Fremantle (president), Rear-Admiral Sir Thomas S. Pasley, Captains W. J. Williams, Royal Adelaide; A. W. Jerningham, Cambridge; J. J. B. E. Frere, Orion; and J. Seccombe, Himalaya. Wm. Eastlake, Esq., officiated as Judge Advocate. Captain J. F. Lacon, Royal Albert, prosecuted. A letter was read from Mr. T. W. Sanders, the engineer in charge on board the Partridge, stating the orders given with respect to the management of the boilers; and a letter from Captain Lacon, who said he had examined the prisoner as to his motives in acting as he did, but could ascertain no reason. The prisoner appeared to be quite sober, and had acted in a most premeditated manner. The complete list having been produced by Assistant-Paymaster Valentine Rickord, the witnesses for the prosecution were called. From their evidence it appeared that the prisoner had been drafted on board the Partridge, screw gun-boat, tender to the Royal Albert, and on the morning of the above date, in defiance of standing orders, he proceeded to get up steam without calling the engineer on duty. The consequence was that, being insufficiently acquainted with the duties he undertook to perform, he heated two of the boilers without filling them with the requisite quantity of water, and thereby caused the crown of one of the furnaces to become red hot and bulge in. Mr. Ware, one of the engineers on board, fortunately hearing the noise, proceeded to the engine-room, and there found the prisoner about to turn on the cold water, he having just started the donkey-engines, there being already about 50 lbs. pressure on the boilers. Mr. Ware immediately took the necessary steps to remedy the prisoner's indiscretion. From the evidence of the other witnesses it was shown that had not Mr. Ware arrived in the engine-room at the fortunate time he did, the accident might have extended to most serious consequences. The prisoner, in defence, could offer no explanation why he was in the engine-room without orders at so early an hour. He denied having heard any order that he was not to go into the engine-room, or that he had touched either the safety-valve or blast, but admitted that he put on fresh fuel. When he went down the fires were burning up. He stopped there, and thought it was later than it was. He put the donkey at work, and was rigging the pump when Mr. Ware came. He threw himself on the mercy of the court. The court were of opinion that the prisoner had disobeyed orders, and by his neglect caused the damage sustained, and consequently sentenced him to be degraded to the second-class and to be imprisoned and kept to hard labour for three months.

NAVAL PRIZE MONEY.—The *Gazette* contains a notice that preparations are now being made for the intended distribution of an award for the destruction of pirates in the China seas, by Her Majesty's ship Sampson, on the 4th and 6th of December, 1856, 22nd of April and 8th of June, 1857.

THE EPSOM DOWNS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Riding on Epsom Downs on the Derby Day, it struck me what a splendid place it would be for a review, on a large scale; of Rifle Volunteers.

Would it not be a glorious sight to see 30,000 gallant fellows, completely equipped, formed in line of contiguous battalion columns on "the Hill," stretching far away towards "Tattenham Corner," thousands of gay equipages round the course,—in short, the Derby Day once again graced with the presence of Her Most Gracious Majesty, and the flower of British chivalry?

Would it not be imposing to see the massive columns moving down the slope near "the Road," and marching past along the course; our beloved Queen, surrounded by a brilliant retinue, and surmounted by a background of lovely faces, forming a perfect mountain of beauty in the Grand Stand, smiling her approval on her devoted Volunteers.

Would this not be better than stuffing a mass of Volunteer corps into Hyde Park, where no one could see them?

Look then at the advantages and facilities. Everyone knows his way to Epsom Downs. Two great railways, thoroughly up to the work, could easily take both Volunteers and spectators to the ground. Those who wish to try their hands at an encampment or a bivouac might go down the day previous. The chains that are used to keep the course would answer to keep the ground. All appliances are at hand.

The beauty of the picture in imagination, and the facility of converting it into a reality, must be my excuse for troubling you with these suggestions.—I am, &c.,

AN OLD BRIGADIER.

THE VOLUNTEER SALUTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Since the establishment of the Volunteer force, orders have been issued to the troops in almost every district to pay the same compliments to the officers of "Volunteer corps," when in uniform, that they pay to their own officers and to the Militia. These orders are obeyed by the soldiers with pleasure, and I may also mention that I have been a witness to "regular" officers being saluted by Volunteers. But a most absurd and improper practice appears to prevail of foolish young "private" Volunteers appearing at places of public amusement with officers' swords and belts, which renders it difficult for "soldiers" to distinguish "officers" from "privates."

At the flower show at the Crystal Palace on Saturday last, some scores of the London Rifle Brigade appeared as officers.

It is to be hoped that the gentlemen in authority, in every corps, will adopt measures to prevent so unsoldierlike a practice, and to fine any member who, when he appears in uniform, is not properly dressed.—I am, &c.,

I. M. B.

THE MILITIA.

The 3rd, or Westminster, Light Infantry Militia has just completed its annual period of training at Richmond. The men were highly complimented by Viscount Chelsea, their commanding officer.

The Suffolk Militia Artillery, under the command of Lieut.-Colonel A. Shafto Adair, Aide-de-Camp to the Queen, have been officially inspected at Portsmouth by Colonel Fitzmayer, commanding the Royal Artillery in the south-west district. The men were marched out to Southsea Castle, and made practice with shot from one 24-pounder gun, two 32-pounder guns, and two 68-pounders (95 cwt. guns), the latter throwing solid shot at 1900 and 2000 yards' range. Shell practice was also made at 1000 yards from a 65-cwt. 8-inch gun, on the south-east advanced work of the castle. The result of the firing was excellent, notwithstanding a strong breeze prevailing at the time, and which compelled the gunners to make a considerable allowance for the deflection of the shot from the true line of flight.

Colonel Lord Frederick Paulet, of the Coldstream Guards, has inspected the Royal Berks (7th) Regiment of Militia, which musters about 500 rank and file, and has been under 27 days' training at Reading. The regiment assembled on the Reading cricket-ground, and shortly after ten o'clock, they formed into line and received Colonel Lord Paulet with a general salute. A variety of evolutions were gone through, and the regiment having marched past, headed by the band, the gallant colonel addressed the men and complimented them on the proficiency to which they had attained. The regiment will be disembodied to-morrow.

The 2nd Middlesex Militia, under the command of Lieut.-Colonel the Hon. George Byng, was inspected in review order, on Friday week, by Colonel Haygarth, of the Scots Fusilier Guards, who, on the conclusion of the evolutions (field) expressed his high satisfaction at the precision and steadiness with which the various movements had been executed, and his approbation of the general appearance and soldierlike bearing of this regiment. Considering that this regiment has for the first time had the Enfield rifle placed in its hands, it redounds greatly to the credit and zeal of both officers, men, and the instructor of musketry, that so much efficiency and discipline should have been attained in the very prescribed period of the official 27 days' training, which, in fact, is not more than 21 days' actual drill. The regiment was disembodied on Saturday.

The Northumberland Artillery Militia will be moved from Tynemouth to Cork, there to be stationed for artillery practice during the summer.

Colonel Crofton, of the 11th Regiment of Foot, inspected the 1st Devon Militia, under the command of Lieut.-Colonel Davie, M.P., in a field at St. Thomas, near Exeter, on Thursday week. After going through a variety of evolutions with great precision, the gallant colonel addressed the regiment, congratulating the men on the proficiency they had attained, and observing that it would be his duty and pleasure to make a most favourable report of them to His Royal Highness the Commander-in-Chief.

A few days ago the Royal Cornwall and Devon Miners' Artillery Militia Regiment, under the command of Lieut.-Colonel Sir Colman Rashleigh, was inspected at Truro, by Colonel Pester, commanding the Royal Artillery of the Western District, who warmly praised the men for the military skill which they displayed. The conduct of the men since their embodiment has been excellent.

The West Norfolk Militia was disembodied at Norwich on Saturday.

The Essex Rifles Militia were reviewed on Friday week by Col. Wood, commandant of the camp at Colchester. The regiment was disembodied on Saturday, as was also the West Essex Militia.

The West Suffolk Militia were disembodied on Saturday at Bury St. Edmunds.

The 1st or Royal East Middlesex Regiment of Militia was inspected on Monday last, on Hampstead Heath, by Col. Haygarth, who expressed himself much pleased with the general appearance of the men, and the creditable manner in which they went through the various evolutions under the command of Colonel Alcock.

The Queen's Own Light Infantry (2nd Tower Hamlets), Colonel the Earl of Wilton, G.C.H., were inspected last week by Colonel Bradford, Grenadier Guards, who expressed himself highly pleased with the general efficiency of the regiment.

The Chatsworth Rifles, or 2nd Regiment of Derbyshire Militia, assembled last Thursday week, at Chesterfield, for their annual period of training.

The Hampshire Militia Infantry has just completed its annual period of training, and the men have returned to their homes. There was an excellent muster.

The 1st Devonshire Regiment of Militia has just completed its annual period of training at Exeter, under the command of Lieut.-Colonel Ferguson Davie, M.P. The regiment consists of about 550 men.

The Royal Caithness, Sutherland, and Cromarty Rifles will assemble at Dingwall on the 7th of June, for training, under the command of Lieut.-Colonel Ross.

The Royal Aberdeenshire Highlanders will assemble, under the command of Lieut.-Colonel Erskine, for 27 days' training, on Monday next.

A detachment of the Staffordshire Militia has proceeded from Portsmouth to Portland and Weymouth, to relieve a detachment of the East Kent Militia, which returns to headquarters at Portsmouth.

On Thursday week, at Richmond barracks, previous to the dismissal of the 1st Royal Surrey Militia at the conclusion of its annual training, the regiment, upwards of 500 strong, under the command of Lieut.-Colonel Evelyn, was minutely inspected by Lieut.-Colonel Carleton, of the Coldstream Guards. The ordinary manœuvres of a field-day, including some light infantry movements, were performed with celerity and precision, and the inspecting officer expressed unqualified approbation at the high degree of proficiency attained by the regiment.

The Northumberland Light Infantry Militia, under the command of Lieut.-Colonel W. M. Bigge, having completed their 27 days' training, was disembodied at Alnwick on Monday. The regiment underwent an inspection on Saturday by Colonel Henry Cooper, of the 45th Regiment, and made an extremely creditable appearance while under arms.

The Northumberland Artillery Militia, at present at Tynemouth Castle, have got the route to Cork. They will leave Tynemouth for Ireland the latter part of this week.

Leitrim. The Right Hon. the Earl of Granard, K.P., Her Majesty's Lieutenant for the County Leitrim, has appointed to the Leitrim, Rifle Regiment of Militia Edward Quinn, Gent., to be Ensign, vice Morehead, resigned.

Sligo Militia. This regiment, which has been assembled for training since the 1st of May, was inspected on Wednesday, 24, by Colonel Mauleverer, C.B., 30th Regiment. Colonel Knox Gore, commanding the regiment, received the inspecting officer with the usual honours, and at the conclusion of the field manœuvres, Colonel Mauleverer addressed the regiment in highly complimentary terms upon their progress and efficiency.

Stirlingshire.—The annual inspection of the 90th Stirlingshire Militia or Highland Borderers, took place on Monday morning last, by Lieut.-General Mansel, who was attended by the following staff: Colonel Bunbury, Colonel Cuppage, R.A., Capt. Mansel, Major Gamble, Major Carlton, and Major Eteson. The regiment assembled about half-past nine, and after marching past at slow and quick time, were put through a series of battalion movements, which in spite of its blowing almost a gale, were performed with admirable precision. The regiment were then drawn up in line, advanced, and gave a general salute; they then broke into open columns of companies, and the general dismounting minutely inspected the whole. At the conclusion the general expressed his entire satisfaction with the state of the regiment to Lieut.-Col. Sir Alexander Maitland, the officer in command. The general afterwards inspected the books of the regiment, and partook of luncheon at the mess-room. The following was the strength—20 officers, 53 non-commissioned officers, and 500 bayonets.

We find that in our last number we unwittingly did injustice to the Northumberland Light Infantry Militia, whose name was connected with a riot at Tynemouth, whereas it was the Northumberland Artillery who were concerned in the disturbance. The former regiment has just completed its period of training at Alnwick under Colonel Bigge.

Antrim Artillery.—On Thursday last the half-yearly inspection of the Royal Antrim Artillery took place at Shorncliffe, by Lieut.-General Mansel, attended by his usual staff—the regiment being under the command of Viscount Massareene and Ferrard, Lieut.-Colonel and Commandant. The regiment paraded for inspection at 10 a.m., when the general rode down the front rank, returning by the rear, and minutely inspected the whole; they then broke into open columns of companies right in front, and marched past in slow and quick time. The gallant general was pleased to express his approval of the appearance of the regiment, and the manner in which the different movements were executed. They then marched to the gun-shed, and were put through the great gun exercise with the 18-pounder field battery guns, and concluded by firing five rounds from each gun. The general and his staff dined, by invitation, at the mess in the evening. This concludes the half-yearly inspection of the regiments in camp. A private soldier, named John Wilson, of the Royal Antrim Artillery, committed suicide on Monday last by cutting his throat with a razor. The unfortunate deceased, who was but twenty-three years of age, and who only joined the regiment from the depôt about three months, has been in hospital over eighty days of that period. No cause can be assigned for the rash act. An inquest was held by Thomas Thorp Delasaux, Esq., coroner for East Kent, on Tuesday last, when the jury returned a verdict of temporary insanity.

The Militia Gazette.

WAR OFFICE, PALL MALL, May 29.

2nd Regiment of Derbyshire Militia—G. L. Rickets Wilkinson, Gent., to be Quartermaster.

Royal South Gloucester Light Infantry Regiment of Militia—Lieutenant Arthur Charles Nelson Goldney, to be Captain, vice Lovesy, resigned; Lieutenant William Robinson Partridge, to be Captain, vice Berkeley, resigned.

Prince Albert's Own Leicestershire Yeomanry Cavalry—Lieutenant George Henry Finch to be Captain, vice Welby, resigned; Cornet Richard Pretyman Apthorp to be Captain-Lieutenant, vice Stratford, resigned; Cornet Charles Phillips to be Lieutenant, vice Finch, promoted; the Hon. Charles Powys, late Major 9th Lancers, to be Cornet, vice Apthorp, promoted; Edward Finch Dawson, late Captain 6th Dragoons, to be Cornet, vice the Hon. Noel, resigned; George Warwick Hunt, late Captain 4th Light Dragoons, to be Cornet, vice Littledale, promoted; Thomas Herbert Watson, Gent., to be Cornet, vice Phillips, promoted.

Memorandum.—3rd or Royal Westminster Light Infantry Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Captain Charles Ralfs.

5th or Royal Elthorne Light Infantry Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the commissions held in this regiment by Adjutant William Bell and Lieut. Octavius Weld respectively.

Queen's Own Light Infantry Regiment of Tower Hamlets Militia—Charles William Hawes, Gent., to be Lieutenant, vice Leslie, promoted.

Haddington, Berwick, Linlithgow, and Peeblesshire Artillery Militia—Second Lieutenant Archibald Dickson to be First Lieutenant, vice Sir Samuel Home Stirling, Bart., promoted; David Milne Home, jun., Esq., to be Second Lieutenant, vice Blair, resigned.

West Kent Regiment of Yeomanry Cavalry—William Taylor Prentis, Esq., late Captain 2nd Dragoon Guards (Scots Greys), to be Lieutenant.

WAR OFFICE, PALL MALL, June 1.

2nd Regiment of the Duke of Lancaster's Own Militia—Lieutenant Robert William John Barlow to be Captain, vice Frank Cavendish Ward, resigned; May 15.

North York Artillery Militia—John Woodall Woodall, Esq., to be Captain; May 1.

King's Own Light Infantry Regiment of Militia—Ensign James Henry Morrell, to be Lieutenant, vice Gibbon, retired; May 28.

1st, or Royal East Middlesex Regiment of Militia—Memorandum: The Queen has been graciously pleased to approve of the Commission held by Captain Edwin Dinning Cole, in this Regiment, being cancelled. Cancelled 26th May.

1st Durham Regiment of Militia.—The Queen has been graciously pleased to accept the resignation of Colonel His Grace the Duke of Cleveland, K.G.

VOLUNTEERS.

METROPOLITAN.

London Scottish.—It was unanimously resolved at a meeting of this corps on Wednesday last to offer special facilities to Scottish artisans willing to join, of whom there are many in London. About 70 of this class, well drilled and soldierlike in bearing, speedily availed themselves of the invitation to join the corps, which now numbers nearly 500 members, besides honorary members. After the meeting Lord Elcho marched four companies to the Regent's Park, preceded by the pipers of the Scots Fusilier Guards. The shooting will commence at once on Wimbledon Common.

London Irish.—At a meeting of the sub-committee of finance held on Friday week, Mr. Samuel Lover in the chair, the hon. secretary announced that since the last meeting he had paid to the bankers the sum of 250*l.*, including the following subscriptions and donations: Lord Boyne, 20*l.*; Lord Trimleston, 10*l.*; Sir A. Shafto Adair, 5*l.*; Colonel Adair, 5*l.*; Mr. Bruen, M.P., 10*l.*; Mr. E. K. and Lady Louisa Tenison, 15*l.*; Mr. Justice Keating, 10*l.*; Colonel H. White, 10*l.*; Mr. T. M. Gresham, Raheny Park, Dublin, 20*l.*; Mr. A. R. Woodroofe, Dublin, 10*l.* 10*s.*; Viscount Castlerosse, 10*l.*; the Hon. Justice J. A. Fitzgerald, Dublin, 10*l.*; Sir Roger Palmer, 10*l.*; Lord Courtown, 5*l.*; Lord Ashtown, 10*l.*; His Excellency the Earl of Carlisle, 10*l.*; the Earl of Clonmel, 10*l.*; the Right Hon. H. Corry, M.P., 10*l.* 10*s.*; the Earl of Darnley, 10*l.*; Lord Dunsany, 10*l.*; Viscount Dillon, 10*l.*; Mr. Justice Willes, 5*l.* 5*s.*; Sir De Lacy Evans, M.P., 10*l.* 10*s.*; Rev. Joseph Marshall, 5*l.*; Mr. Hugh M'Calmont, 10*l.* 10*s.*, &c. He also announced that he had received the following additional subscriptions to the band fund:—the Marchioness of Donegal, 5*l.*; Lady Poltimore, 2*l.*; Lady L. Tenison, 5*l.*; Lady H. Ashley, 2*l.*; Sir Justice Sheil, 3*l.* He stated that the Chief Commissioner of Works, Mr. Cowper, M.P., had granted permission to the corps to parade in the Regent's Park on Saturdays.

CUMBERLAND.

3rd Cumberland Rifle Volunteers, or Skiddaw Greys (Keswick).—On the 24th inst. this corps had a grand field day in honour of her Majesty's birthday. They assembled at 2 o'clock and marched under the command of Major Wake to Stable Hill (a beautiful site on the margin of Derwentwater Lake), preceded by their brass and drum and fife bands. After performing a few simple movements in close order, the corps extended from the centre, halted, fired, and while retiring formed square, giving their imaginary foe a warm file fire, followed by a volley from the kneeling rank. They then drew up in line for the purpose of receiving a handsome flag, which was gracefully presented by Miss Ellen Spedding, of Merihouse, in the name of the young ladies of Keswick.

The commanding officer, on receiving the flag and acknowledging the honour done to the corps by a gift so handsome, said the value of it was enhanced in the eyes of himself and his comrades by being received from the hands of the grand-daughter of the Commandant of the old Keswick Volunteers or Cumberland Rangers, whose memory he well knew lived in the hearts of the survivors, of whom the majority were now on the ground.

The corps then passed in review by sub-divisions, the officers saluting the flag and donors in passing, re-formed line and fired a volley in honour of the day, concluding the proceedings by advancing to the the general salute, "God save the Queen," and three cheers.

Arms were then piled, and at the sound of the "Roast Beef of Old England," the Volunteers both ancient and modern, about 100 in number, adjourned to a spacious tent and did ample justice to the substantial fare provided by their officers. The festivities of the day were concluded by a ball in the Oddfellows' Hall, which was numerously attended.

DEVONSHIRE.

First Devon Mounted Rifle Volunteers.—This corps assembled on the Queen's birthday to be sworn in, and to show to the friends and supporters of the corps a few movements, intended rather as an illustrative drill than as a parade for review. Colonel Honeywood, an old and much respected Indian Cavalry officer, kindly consented to take the post of inspecting officer, and spoke favourably of what had been done in so short a time. The services of the corps were tendered about Christmas last by Sir Thomas Dyke Acland; his son, on being appointed Captain, passed through the Volunteer course at Hythe in February. But a number of questions affecting the drill and equipment of Mounted Rifles arising in the meantime, the corps did not receive their arms, and could not order their uniform and accoutrements till very recently. The company assembled in rank entire, told off by fours, proved their ranks as the would be when dismounted; "one" and "two" front rank, "three" and "four" rear rank; odd numbers right files, even numbers left files, as usual. Each four is a complete unit, constituting what the French call "*camarades de combat*," holding each other's horses, and supporting each other in firing, when on foot. The line advanced, diminishing front to single files, to pass through a gap in a hedge, and increasing to twos, fours, sections, or subdivisions, and company as they approached the inspecting point. After advancing and retiring by fours, and reforming to the pivot and reverse flank, the company illustrated the new mode of dismounting to skirmish laid down in the manual of instructions prepared by Colonel Lysons, suggested, we believe, by Colonel Douglas. A flank movement by twos to the left was then executed, and the left or reverse flank files dismounted to skirmish on the right or pivot flank. The reason for dismounting the left files appeared, on a retreat being sounded. The right files wheeled about, bringing round the led horses into the most convenient position for mounting on the near side. The column, forming up into fours, then galloped across the ground, changed direction and reformed in a hollow, the right files taking their turn to skirmish to the new front on the rising ground. Other simple modes of advancing and retiring without exposing a compact mass of horses were shown; and the drill without arms concluded with a hand canter in line. After a few moments for refreshment, a dozen active men were selected, and rifles put into their hands on horseback for the first time. They cantered to the top of a hill about 500 yards in advance, and fired, from a clump of trees, with blank cartridge, at a

Digitized by Google

detachment of yeomanry cavalry who were coming up the hill and charged at the riflemen. The dismounted skirmishers remounted, and the whole retired across a valley to a wood, in front of which they emerged through a gate in less than two minutes. Alternate files again dismounted, and advanced, while the horses fell back into the wood. The dismounted men then lined the fence of the wood, and kept up a running fire, moving along the edge of the wood and the adjacent fences, till they regained the original main post, where they found the horses which had passed by the rear, out of sight. The skirmishers again advanced into open ground, when they were overtaken by a charge of cavalry, and formed rallying squares, the horses in the lane behind being covered by more dismounted men. The company had not practised any but the simplest drill formations; and had received no notice of the application they were to make of their previous instruction. The absence of confusion, and the prompt correction of mistakes made by one or two individuals, were very creditable to the drill instructor, Sergeant-Major Draycot, late of the 10th Hussars. The result of this experiment is to show the benefit of simple elementary drill, and of not attempting too much for the sake of show. A proof is also afforded of the keen interest which the British yeomen may be led to take in the combined use of the horse and the rifle, when this intelligence is appealed to by practical illustration. The dress and equipment of the corps are of a simple and practical character. A kessi, tunic and trowsers of undyed moorland woollen cloth, extremely strong, with ample pockets, dark green cloth facings edged with red piping, and no braid, price 2*l.* 4*s.*; leggings, making straps needless, price 6*s.*; belts, made by Messrs. Cuff and Son, Cockspur Street, with Brater's waistbelt, so that the bayonet, frog, and ball-pouch may be freely shifted from side to side, and the weight thrown on the hips or shoulders at pleasure, price 12*s.* A small horse-cloth, 4 feet 6 inches by 3 feet 6 inches, attached to the cantle of a common saddle, so as to cover horse and saddle and roll up or detach easily; a square piece of macintosh cloth, with pockets rolled up, 42 inches long, and containing a complete change of clothes; these two last articles were devised by Franklin, harness-maker, Exeter, at a very moderate cost, and weigh, when the roll is filled, 10 lbs. A coat or cloak on a pattern partly Austrian, partly Sardinian, given by Colonel Hudson, completes the equipment. It should be added that there is no distinction except in the badges of military rank, between the dress of the privates and that of the officers, and that each member of the corps provides his own clothing without aid from the subscription fund. After the drill was over the corps and the visitors proceeded to march by the range, and to open the new roads cut by the proprietor through his woods for the convenience of the corps; the whole preparation of the range including a shed for the shelter of the members when practising, and for their horses, being provided without expense to the corps. The corps were then sworn in, and a royal salute fired with cannon, the corps presenting arms, and giving three cheers. A dinner of course ended the day.

HAMPSHIRE.

5TH HAMPSHIRE RIFLES.—Whit-Sunday was a great day at Portsmouth, for the Volunteers of this town, as well as those of the neighbouring towns of Havant and Fareham, turned out quite strong on the Governor's green, previous to attending divine service at St. Thomas's church. The Portsmouth Rifles were under the command of Major Vallancy, Lieut. Ford, and Ensign Griffin. The visiting corps of Havant and Fareham were under the command of Lieuts. Longcroft and Kilsall, and combining with the Portsmouth Rifles mustered altogether about 250 effective men, well up in their drill and in full uniform. On Wednesday last the Portsmouth effectives were inspected on Southsea Common, at 7 o'clock, P.M., by the Governor of the Garrison, Lord Wm. Paulet. Long before the appointed hour hundreds of well-dressed people had assembled; but on the Volunteers, with their band at their head, marching upon the Common, the crowd assumed dimensions only to be equalled on very extraordinary occasions. The demonstration on the part of the inhabitants of this garrison-town was unmistakeable, and proved how much the Volunteer movement is appreciated at Portsmouth. On arrival of the general attended by his staff, the corps presented arms, the band played the National Anthem, and gave a general salute. The marching past was very well done, and the various manœuvres through which the corps was put to test its efficiency drew from the general, at the conclusion of the inspection, his approbation of their steadiness and soldierly qualities. The only drawback to this otherwise gratifying display of patriotic feeling was the very inefficient manner in which the ground was kept.

NEWPORT RIFLE COMPANY.—The Newport Company of Rifle Volunteers have now formed their band, consisting of 15 performers, who were sworn in on Saturday last, when they received their instruments, and held their first practice on Tuesday evening. The company's drill is as usual, on Mondays, at Carisbrooke Castle. The preliminary drill, early mornings and evenings.

KENT.

SANDWICH.—A gathering of an interesting character took place here on Thursday week. It was the occasion of a volunteer dinner at the Bell Inn, inaugurated by the 2nd (Sandwich) Cinque Ports Artillery Corps. Each member had the privilege of inviting a friend from another corps. Upwards of 120 sat down. The company embraced members of the Royal East Kent Mounted Rifles, the 2nd, 3rd, 4th, and 6th Cinque Ports Artillery, and the 2nd and 24th Kent Rifles. Major Thompson (2nd Cinque Ports Artillery) presided, supported on the right by the Mayor of Sandwich, and on the left by Captain Sayer, R.N. Several officers of the line were also present, and many of the leading residents. The proceedings were enlivened by some excellent singing by members of the corps in attendance, and the speeches throughout the evening were sensible and manly.

The 5th Corps of Cinque Ports Rifle Volunteers have received 60 long Enfield Rifles, pattern 1853, from the War Department, and have commenced active drill with the same. The Sandgate and Cheriton Company of Kent Artillery Volunteers attended church on Whit-monday, headed by their fife and drum band; they dined together at the Fleur-de-lis inn, in the afternoon.

STAFFORDSHIRE.

21ST STAFFORDSHIRE VOLUNTEERS (RUGELY RANGERS).—The members of this corps assembled on their parade-ground (the Talbot Green) for the first time in their new uniform on Whit-Monday, when, after having been put through several evolutions by Lieutenant Landon, they marched to Hawksyard Park, the seat of their captain, T. Spode, Esq., about two miles from Rugely. On arriving in front of the Hall, the captain invited them to a plentiful supply of refreshments. After they had done ample justice to it, he marched them back to the Shrewsbury Arms Hotel, headed by their brass band (presented to the corps by the captain) where he had provided a *dejeûner* of the most *recherché* description for them. The assembly-room was most tastefully decorated with evergreens under the supervision of Mrs. Spode, who had made several beautiful devices in laurels and flowers including a crown, Staffordshire knots, a V. R. and bugle, and the escutcheons of the officers painted upon white satin. There was a most beautiful display of greenhouse plants upon the tables from the far-famed gardens of Hawksyard Park. Several ladies, including the wives of the officers and their friends, graced the room with their presence during dinner. Ensign Gardner in proposing the health of the "Ladies," remarked very appropriately upon the kind co-operation and assistance given to the corps by Mrs. Spode since its formation. Captain Spode, in responding to the toast, said it was Mrs. Spode's intention, so soon as opportunity served, to offer prizes for the best marksmen in the corps. The usual toasts having been disposed of, and a very convivial evening spent, the company separated highly gratified by their captain's bountiful liberality. The rifles having now arrived, the manual and platoon exercises will be commenced immediately.

WARWICKSHIRE.

FORMATION OF A RIFLE CORPS AT RUGBY SCHOOL.—Ever since the meeting which was held some time ago in London, about the formation of rifle corps in our great public schools, there has prevailed a general feeling among the authorities here that Rugby should not be behind her fellows, Eton and Winchester, in patriotism; and perhaps even earlier than this may the first agitation of the movement be dated. No doubt it has met with some opposition, even among the boys themselves, but on the whole the proposition has given satisfaction. About a fortnight ago Dr. Temple issued a notice to the effect that a rifle corps would be formed, provided that 50 would be found willing to join it. Subjoined are the regulations:—

"1. The charge for drilling and other current expenses will be 10*s.* a half-year.

"2. No uniform or accoutrements will be needed at present, but next half-year each member of the corps will be required to purchase a musket and bayonet, a belt, and some simple uniform hereafter to be determined. The price of the whole will not be allowed to exceed 30*s.*

"3. Whatever arms are procured will be in the custody of an officer appointed by the head-master.

"4. No one may join who is under 16 years of age or 5 ft. 4 in. in height.

"5. No one may join without written permission from home sent to the head-master.

"6. No one (except on the present occasion, or within a quarter of leaving the school) may join for a shorter period than half a year.

"7. There will be six drills in the week, each lasting half an hour, beginning a quarter of an hour before calling over, and ending a quarter of an hour after.

"8. Each member must enter his name for three drills, and must attend for two of those three.

"9. Precise punctuality in attendance, exact obedience and absolute silence in the ranks, will be enforced by fines not exceeding 6*d.* each.

"10. There will be no practising with the rifle at present, but it is intended, if possible, to make arrangements next half-year for occasional practice by those who have learnt the drill."

On Wednesday, the 9th ult., Dr. Temple addressed all those who wished to join in the school, where he stated that if the hours for drill were not found convenient they might be changed, and called on the captain of the "Eleven," Mr. F. H. Bowden Smith, as the head of the cricketing interest, to say whether he would like them altered. He suggested that the first drill on each half-holiday should be retained as originally intended, and in lieu of the second that they should have one in the evening of every whole school-day.

On Thursday the members again met, and Dr. Temple said that he thought it would be better not to follow the example of the Oxford University Corps in electing their officers at once, but to defer this until they saw who were the most proficient in their drill, for which purpose they might meet again in a fortnight.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, MAY 29.

2nd Manchester, or 28th Lancashire Rifle Volunteers—John Willis, Gent., to be Ensign.

3rd Manchester, or 40th Lancashire Rifle Volunteers—The Hon. Algernon Egerton, M.P., to be Lieut.-Colonel.

47th Lancashire Rifle Volunteers—John Mortimer Wilson, Gent., to be Ensign, vice McGill, promoted.

66th Lancashire Rifle Volunteers—John William Hayward, M.D., to be Honorary Assistant-Surgeon.

2nd Battalion Lincolnshire Rifle Volunteers—Captain Anthony Willson to be Lieut.-Colonel.

Wiltshire Volunteer Rifle Corps—4th Company—William Henry Colborne, Esq., M.D., to be Honorary Assistant-Surgeon. 6th Company—Aynott Chitty, Gent., to be Honorary Assistant-Surgeon. 9th Company—William Adye, Esq., M.D., to be Honorary Assistant-Surgeon. 14th Company—The Rev. Richard Seymour Conway Chermside, Clerk, to be Honorary Chaplain; William John Blake French, Gent., to be Honorary Assistant-Surgeon.

9th Cumberland Rifle Volunteers—Joseph Spencer, Esq., to be Captain-Commandant.

6th Westmoreland Rifle Volunteers—James Bousfield, Gent., to be Lieutenant; Fleming Green, Gent., to be Ensign.

39th Middlesex Rifle Volunteer Corps—the Rev. Robert Maguire to be Hon. Chaplain.

Victoria Rifles—The Rev. James Bolton, to be Hon. Chaplain.

Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Captain Henry Jacob Jordan.

1st Suffolk Rifle Volunteer Corps—John Henry Josselyn, Gent., to be Ensign.

5th Hampshire Rifle Volunteer Corps—William Augustus Raper, M.D., to be Honorary Assistant-Surgeon.

12th Company of the Hampshire Rifle Volunteers—Sir William Wellesley Knighton, Bart., to be Lieutenant.

13th Company of the Hampshire Rifle Volunteers—William Henry Humphery, Esq., to be Captain.

21st Aberdeenshire Rifle Volunteer Corps—The Rev. James Mitchell to be Honorary Chaplain.

Ayrshire Rifle Volunteers, 9th Company—James Young Deans, Gent., to be Captain; James Wilson, Gent., to be Lieutenant; John McMillan, Gent., to be Ensign; Rev. John Symington, to be Hon. Chaplain; John Borland, M.D., to be Hon. Assistant-Surgeon.

[The following appointment is substituted for that which appeared in the *Gazette* of the 11th day of May ult.]

Worcestershire Volunteer Rifle Corps, 17th Company—William Boulton, Gent., to be Lieutenant.

[The following appointment is substituted for that which appeared in the *Gazette* of the 22nd day of May ult.]

1st Company of Buteshire Rifle Volunteers—John Coombe Maddever, Esq., M.D., to be Hon. Assistant-Surgeon.

WAR OFFICE, PALL MALL, JUNE 1.

6th Herefordshire, or Leominster, Company of Rifle Volunteers—George Vincent Fosbery, Esq., late Lieutenant in Her Majesty's 4th Bengal European Regiment, to be Lieutenant; Henry Moore, Esq., to be Ensign; May 4. The Reverend John Pierrepoint Taylor, to be Honorary Chaplain; May 5. Henry Vale James, Esq., to be Honorary-Assistant-Surgeon; May 10.

Oxford University Rifle Volunteer Corps—Lieutenant Charles Musgrave Harvey to be Captain, vice Lane, resigned; Lieutenant Eyre William Hussey to be Captain, vice Warner, resigned; Ensign Charles Thomas Luck to be Lieutenant, vice Harvey, promoted; Ensign Henry Emerson Westcar to be Lieutenant, vice Hussey, promoted; Sergeant William Frederick Traill to be Ensign, vice Viscount Adare, promoted; Sergeant the Hon. Edward Stanhope to be Ensign, vice Luck, promoted; Sergeant Byam Martin Davies to be Ensign, vice Westcar, promoted; Sergeant Thomas Kennett Were to be Ensign; Sergeant Francis Brandt to be Ensign; May 30.

5th Oxfordshire Rifle Volunteer Corps—Charles Edward Thornhill, Esq., to be Captain; William Elias Taunton, Esq., to be Lieutenant; James Clinch, Banker, to be Ensign; May 23.

29th Lancashire Rifle Volunteers—Ensign William Elsworth Stevenson to be Lieutenant, vice Fair, resigned; William Henry Hincksman, Gent., to be Ensign, vice Stevenson, promoted; May 22.

10th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Thomas Brooke, Esq., to be Captain; 14th May. Frederick Greenwood, Gent., to be Ensign; April 13.

West Riding of Yorkshire Rifle Volunteers (1st Battalion)—Temple Chevalier Paley, Gent., to be Surgeon; May 21.

Memorandum.—By order of the Vice-Lieutenant of the East Riding of Yorkshire, the Commissions of the following Officers of the Hull Brigade of Artillery Volunteers, gazetted on the 18th May, should bear the following order:—Captains—Alexander Samuelson, John Thomas Dobson, Edward Augustus Dearman Broosbooft, Dudley Robert Smith, Edward Dannatt, Joseph James Spratt; First Lieutenants—Henry Frederick Smith, James Coleman, George Christopher Roberts, Thomas Eley Sykes, Frederick Brandt Grotrian, William Peter M'Bride; Second Lieutenants—Charles James Todd, John Dalton Holmes. Henry Cooper Gleadow, Henry Bennett, Joseph William Pettingell, James Thomas Abbey.

West Middlesex Rifle Volunteer Corps—Alfred Wills, Gent., to be Lieutenant; April 16.

London Irish Rifle Volunteer Corps—Lord Otho Augustus Fitzgerald to be Captain; 4th May.

33rd Middlesex Rifle Volunteer Corps—Edward Bernard Lewin Hill, Gent., to be Lieutenant; William Alexander Hall, Gent., to be Ensign; 30th April.

1st Hampshire Rifle Volunteers.—Lieutenant Charles Simeon to be Captain. William Barrow Simonds, Esq., to be Lieutenant. William Russ, Esq., to be Ensign; 29th May.

2nd Hampshire Artillery Volunteer Corps—William Hooper, Esq., late Captain Royal Artillery, to be First Lieutenant. Edwin Galt, Esq., to be Second Lieutenant; John William Moore Miller, M.D., to be Honorary Assistant-Surgeon; 29th May.

5th Hampshire Rifle Volunteers—Reverend John Poulett McGhie to be Honorary Chaplain; May 29.

4th Durham Rifle Volunteers—William Trotter, Esq., to be Captain-Commandant; May 24.

6th Durham Rifle Volunteers.—Lieutenant Charles William Anderson to be Captain; Ensign Cuthbert Young to be Lieutenant, vice Anderson, promoted; Robert Blagdon Dawson, Gent., to be Lieutenant; Archibald Stevenson, Gent., to be Ensign; the Reverend James Carr to be Honorary Chaplain; May 24.

Kent Rifle Volunteers, 26th Corps (Battalion)—Ensign Charles Henry Martin, to be Captain, vice Travers, resigned; Adam Allchin, Gent., to be Lieutenant, vice Keen, resigned; John Nunn, Gent., to be Ensign, vice Martin, promoted; May 25.

Glamorganshire Rifle Volunteers (8th Company)—Richard Partridge, Gent., to be Lieutenant, vice Powell, resigned; Robert Thomas Rees, Gent., to be Ensign, vice Partridge; 25th May.

2nd, or Hawarden Company of Flintshire Volunteer Rifles—Thomas Moffat, M.D., to be Honorary Assistant-Surgeon.

4th Lanarkshire Rifle Volunteers (Glasgow)—Robert M'Taggart, Gent., to be Lieutenant, vice James Ranking, promoted; May 22. John M'Gregor, Gent., to be Ensign, vice David Winton, promoted; Alexander Finlay, Gent., to be Ensign, vice William G. Murray, promoted; May 28.

69th Lanarkshire Rifle Volunteers (Glasgow)—Thomas Barclay, Gent., to be Ensign, vice John Grant, resigned; May 22.

78th Lanarkshire Rifle Volunteers (Glasgow Old Guard)—Walter Buchanan, Esq., to be Captain; George Crawfurd, Gent., to be Lieutenant; John Gilmour, Gent., to be Ensign; May 28.

84th Lanarkshire Rifle Volunteers (Glasgow)—Alexander Findlay, Gent., to be Lieutenant; James Thomson, Gent., to be Ensign; May 28.

87th Lanarkshire Rifle Volunteers (Busby)—James Hall, Esq., to be Captain; William Wakefield, Gent., to be Lieutenant; Alexander Miller, jun., Gent., to be Ensign; May 28.

89th Lanarkshire Rifle Volunteers (Glasgow)—Thomas Bryson Butler, Esq., to be Captain; John Gemmill Stevenson, Gent., to be Lieutenant; Frederick Anderson, Gent., to be Ensign; May 29.

1st Perthshire Rifle Volunteers—Isaac Wallace, M.D., to be Assistant-Surgeon; May 26.

9th Perthshire Rifle Volunteers—James Wedderburn Ogilvy, Esq. to be Captain; May 26. George Gilbert Ramsay, Esq., to be Lieutenant; William Japp, Esq., to be Ensign; Reverend James Ramsay to be Honorary Chaplain; May 29.

11 Perthshire Rifle Volunteers—John Campbell, Esq., to be Captain; James Macfarlane, Gent., to be Lieutenant; Alexander Macfarlane, Gent., to be Ensign; May 26.

12th Perthshire Rifle Volunteers—John Holt Skinner, Esq., to be Captain; Dougal Mac Gregor, Gent., to be Lieutenant; James Charles Hands, Gent., to be Ensign; May 26.

1st Zetland Rifle Volunteers—Robert Bell, Esq., to be Lieutenant; Arthur James Hay, Esq., to be Ensign; 24th April.

1st Orkney Artillery Volunteer Corps—John George Heddle, Esq., to be Captain; Alexander Bain, Esq., to be First Lieutenant; Andrew Gold, Esq., to be Second Lieutenant; May 1.

Wigtownshire Rifle Volunteers (1st Subdivision)—Samuel Snowdon, M.D., to be Honorary Assistant-Surgeon; May 15.

1st Sutherland Rifle Volunteer Corps—Thomas Mackenzie to be Lieutenant; Donald Taylor to be Ensign; May 24.

[The following appointment is substituted for that which appeared in the *Gazette* of the 3rd day of April last.]

5th Company of Cinque Ports Rifle Volunteers—Charles George Perceval, Esq., late Lieut.-Colonel in the British German Legion, to be Captain; March 30.

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12*s.* each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

MOUNTED RIFLEMEN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—On the 5th of May the ARMY AND NAVY GAZETTE, which has given so many sensible hints to Volunteers, contained a letter of three columns on "Mounted Riflemen and Yeomanry Cavalry," signed by "Irregular." I felt that it would be presumptuous in a civilian to offer to discuss in your paper the military questions raised by the writer as to mounted riflemen. But as regards the writer's suggestions that more troop-drill and a better system of inspection are required for the yeomanry cavalry, I not only concur with him after twenty years' experience of the deficiency of the present system of permanent duty, but have repeatedly urged those very points both on colonels of regiments and at head-quarters. As regards "irregular cavalry," it may be admitted that nothing more is required than to render the yeomanry instruction more practical; and perhaps the first step should be to begin with the open ride and the first few lessons of the riding-school, which can be practised in any field, and appear to interest young farmers, as tending to improve the value of their young horses. But your correspondent condemned the whole principle of mounted riflemen, giving reasons which proceeded on a misconception of the objects aimed at in the organisation of such a force, and on a want apparently of acquaintance with the habits of the class of men who clothe and equip themselves as mounted riflemen. The report of what has been already done in Devonshire will show that mounted riflemen do not dream of firing from the saddle, nor of leading their horses while they fire on foot; that they do not wear straps, nor carry a sword in addition to a bayonet; and certainly they can point to lanes which would puzzle the driver of the four-horse waggon, which it is proposed to substitute for the active little horse of the hill country.

Is not the true solution of the problem of the "Horse and the Rifle" that two systems of rural Volunteers are needed, one "cavalry dismounted," the other "infantry mounted?" the preponderance of the cavalry or the infantry element depending on the nature of the country, the woods and banks, or the downs and open plains. In the one case the rifle comes first, and the bayonet next; in the other, the lance or the sword aided by the breech-loader. But, in either suposition, the young farmer must be attracted by the pleasure he takes in his horse and his gun; and his officers must not forget that it is only the trained rider on the trained horse who can be an effective swordsman.

I am, &c., A MOUNTED RIFLEMAN.

The Lords of the Admiralty have resolved to commence actions against two firms for having broken the terms of their contract in reference to the wood employed in building the gun-boats.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.

EDITED BY W. H. RUSSELL, ESQ., LL.D.,

(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.

On Monday, and during the Week, IT'S AN ILL WIND THAT BLOWS NOBODY GOOD; Messrs. A. Wigan and J. L. Toole; Mrs. Wigan and Miss H. Simms. After which OUR FEMALE AMERICAN COUSIN; Miss Julia Daley (the American Actress). To conclude with GOING TO THE DERBY. Commence at Seven.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly, Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0	8	6
D or E flat ditto	0	6	6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1	1	0
No. 2, Light Infantry Model	1	8	0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s*., or strongly electro-plated, 63*s*.; green cord and tassels, 3*s*. 6*d*.; silk ditto, 8*s*.; enamelled leather case, with strap and buckle, 12*s*. Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

We must deal, on another occasion, with the communication of our correspondent, "WHITEHALL," upon prize-money. In our former remarks relative to prize-money undistributed, we referred only to proceeds which had been condemned. Our correspondent refers to a question for the Legislature, and not one relating to any departmental distribution.

"J. H. L." The extreme length of "J. H. L.'s" communication upon the purchase system alone renders it impossible for us to insert it.

Mr. Grantley Berkeley must really excuse our devoting any portion of our columns to the discussion of the disputed question as to who is the "Head of the Berkeley Family."

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 2, 1860.

The following scheme for the organisation of an effective Navy to secure the objects indicated by the writer, which no ordinary combinations appear to threaten at this period, has been communicated to us, and appears to us worthy of deep consideration. We therefore give it a prominent place in our columns:—

In developing the military maritime power of a nation, the grand objects to be held steadily in view are the formation of two nuclei; the one, which shall be the basis of an unlimited extension of its active power; the other, of its reserve, as the exigencies of the period may demand.

The bases on which these results can alone be attained in this country are:—

1st. The formation of a Standing Navy, never to be reduced beneath a fixed standard—whatever may be the temporary aspect of the political horizon—to which irregulars, or men enlisted for brief terms of service, can be attached, their numbers fluctuating with the exigencies of time and circumstances.

2ndly. The formation of a Coast-Guard or Standing reserve under similar conditions, which should become the nucleus of whatever additional irregular reserves may be deemed requisite.

The minimum to which the permanent and available personnel of our Navy can prudently be reduced, to enable the country to pursue a path of integrity and dignity, instead of periodic panic and expediency, whether we consider the vast navies arising around us, or the magnitude of the interests at stake, on which depends our very being as a nation, to say nothing of our extended colonies and commerce—is 110,000 men, exclusive of whatever number of boys may be required to feed the Standing Navy.

This permanent force should be organised in the following manner:—

	Men.
Four Divisions of Standing Navy... ... (Boys, as required to meet demand, unlimited.)	40,000
Irregulars attached to Standing Navy, say	20,000
One division of Coast Guard or Standing Reserve	10,000
Irregulars attached to Standing Navy, say	20,000
Royal Marines (the back-bone of the Service)	20,000
Total available force to meet aggression or emergency	110,000

The four divisions of the Standing Navy, each of 10,000 strong, to be permanently established in barracks to be built at Pembroke, Plymouth, Portsmouth, and Sheerness, and to be employed in ships belonging to their respective ports; each division to be divided into sub-divisions of 500, and companies of 100, besides which its complement of (about) 5000 irregulars will always remain attached, and complete their small arm and great gun drills before embarking.

The crews of men-of-war to be composed of two-thirds of men belonging to the Standing Navy, and one-third of the Irregular; those of transports, of one third of the first named, and two of the second.

Thus, in time of peace, the crews of either will be marched on board the hour they are required, disciplined and drilled under their respective officers; and in time of war, if not the entire crew, the skeleton of what the reserves may in a few days render almost equally efficient.

To carry out this scheme, it is proposed that the continuous service men be at once embodied, to form the four divisions of the Standing Navy, so far as their numbers permit, under their present engagements regarding time and pay; the remainder of the seamen in the Royal Navy to be attached as irregulars under their existing agreements. All boys to be bound to serve ten years in either force, as requisite, from the age of twenty,

In future, men to be enlisted for the Standing Navy for ten years, in the Irregular for three; either liable to unlimited service during war.

It is to be borne in mind, the number of irregulars, whether attached to the Standing Navy, or Standing Reserve, is to be regulated by the exigencies of the Service, and that the Government is to take the Transport Service into his own hands; at least so far as will ensure employment to that portion of the 20,000 irregulars not absolutely required in time of peace for active service in men-of-war; but it is as well to remember that the path to profound peace lies at this moment, as far as human foresight can portend, through profound war.

Any misgivings as to the man-of-war's man,—we use the term advisedly,—of the present day being disinclined to such a system, offering as it does the advantages of a permanent home and port, together with regularity of leave and possibility of a rational discipline based rather on reward than fear, are only advanced by those who do not comprehend him. Though comparatively swamped amongst the heterogeneous collections lately swept on board our squadrons, owing to the vast and sudden increase of our Navy, he is sighing to be rescued by some firm but temperate and honest system from the present disorganisation and mutiny by which he is surrounded, and which entails on him a life of drudgery, disgust, and uncertainty. The Standing Navy should be officered in the following manner, each division to consist of

Admiral.	Captains.	Commanders.	Lieuts.	Sub. Lieuts.
1	60	80	300	(as required)

The officers of the four divisions, together with 44 flag officers for the various departments and commands, should alone comprise the active list, viz.:—

Admirals.	Capts.	Comdrs.	Lieuts.	Sub-Lieuts.	Masters.
48	240	320	1200		(unlimited)

and are always to be kept on active service and full pay, subject to compulsory but liberal retirement at 60 for the first two grades, and 50 and 40 respectively for the next two; save in actual war, when it may rest with the Admiral of the Fleet to retain an officer in command with the concurrence of the Board.

Officers, together with their men, to be drafted for sea-service, either in men-of-war or transports, by rollster, the present monopoly of healthy stations and desirable commands being thereby avoided.

A liberal furlough, on two-thirds their full-pay, to be granted them on return from foreign service.

Those accepting half-pay to be incapacitated from active employment, save in the Transport Service or Coast Guard; but they are never to be allowed to re-enter the active list in time of peace, save at the bottom of the list of the grade to which they belonged, or in war, should their services be required, at the position which they formerly occupied.

Death vacancies on foreign stations to be awarded to the seniors then serving.

We now come to the division of Coast Guard or Standing Reserve, which is to be permanently fixed at 10,000 men, and officered from the half-pay lists. It should be organised in companies of 100, their depôts being divided among those seaports and portions of the coasts which, a due regard being had for their immediate revenue duties, would afford the most facile points on which the irregulars in the coasting and foreign trade, amounting to 200 per company, may be concentrated. In the event of war, the men only would be drafted into active service, the officers remaining to organise further levies.

At first sight, not the least obstacle in the formation of a Standing Navy is dealing with the 2000 officers on the so-termed active lists; only 980 of whom are in professional employment, whilst 246 are above the age of 60; and a copious plan of retirement must therefore precede the organisation of a Standing Navy.

But were compulsory retirement, as before alluded to, to be carried out, together with that of all officers who have not served afloat in their respective ranks for the last five years, which would not affect officers serving at the conclusion of the Russian war, when nearly all those whose services could have been beneficial to the country were employed, the proposed active list of lieutenants would be 500 short, and the captains and commanders incomplete.

Of course the old hue-and-cry of injustice to old and deserving officers will be raised; but the greater number of those composing the so-termed active list, have attained their present rank, whatever it may be, with the deliberate intent and open proclamation of never serving again; and have settled down in domestic life to enjoy their scanty annuity, periodically besieging the Admiralty with some imaginary grievance; thereby keeping up a perpetual irritation, which will eventually lead to ultimate retirement with a step in rank and increased pay. And be it also remembered, that not above one-half of the above 1000 unemployed officers are old; there are

Digitized by Google

many of them in the prime of life, who either unsuccessful in their profession or disliking it, or from want of interest, or having gained a certain rank which satisfies them, and having private fortunes, have no intention of ever serving again, unless something very tasty offers to tempt them from their Club or "placens uxor"; in other words, if it will ever suit their convenience to serve, they will do it; if not, they consider it their prerogative to hang on, and that their former services entitle them to constitute themselves State pensioners, at the greatest possible advantage to themselves, and, as everyone must perceive, the greatest possible detriment to the Navy.

Now, whilst yielding to none in desiring justice to men who have served their country, we also desire justice to the nation.

We emphatically deny the right of these officers who have remained inactive for such lengthened periods, whether optionally or from want of interest, to paralyse the Navy. That in many cases their lot in life has been hard and ungracious; that they have been the tools of nepotism and corruption; we will not deny: but we cannot be responsible for the ruling vice of the age, and we claim for the present generation—the one who must stand the consequences—the inalienable right of fighting its own battles, not with undisciplined hosts, and bows and arrows, but organised levies and rifled cannon.

That the golden opportunity for the formation of a Standing Navy was lost at the close of the Russian war, few will be inclined to deny; as well as that any plan, however admirable, will meet with the sturdy and organised opposition of all officers who may come within the prescribed limits of retirement. That our Navy may be snatched from a humiliating and perilous status by a firm but temperate grasp, is as certain as that in its present condition it will not stand the rude shock of sudden hostilities; whilst, were a permanent organisation given to it, we should be enabled with comparative ease to grapple the navies of Europe.

An article has appeared in the current number of the "Cornhill Magazine," entitled, "London the Stronghold of England," to which we would invite the attention of our readers.

We had occasion some time back, whilst discussing the subject of "National Defence," to remark upon the inequality and relative merits of certain pamphlets treating of this important question, as fairly instancing the comparative value which may be attached to such *brochures*, and with a view to guiding those of our readers who might feel an interest in the subject to a judicious selection of works of this description; it is therefore with considerable satisfaction that we are enabled to point to the article in question, not only as demonstrating how, by the adoption of a style at once clear and concise, and by the exclusion of all irrelevant matter, an important subject may be agreeably and profitably discussed, but as containing some appropriate and valuable suggestions. The object of the author is twofold: to establish the paramount importance of preserving our metropolis at all cost from the hands of the invader, and of demonstrating how for half a million sterling this object may be effected. The first part of the article then, if not very original, is at least interesting, as containing a succinct summary of the reasons for regarding London as the stronghold of England; while it prepares us to listen with attention and satisfaction to such suggestions as the author has to make in the latter portion of his article, with a view to securing the safety of this stronghold.

Having shown us the necessity of providing some more adequate means of defence for our metropolis than at present exist, he proceeds to suggest how London should be fortified; not, he tells us, "by an immense bulwark, like a great wall of China, provided with ditch, drawbridge, and barred gates . . . . On the contrary, now, thanks to our railways, our long-range guns, and to our Volunteers, the fortifications which are necessary to secure London may be so unobtrusive and so removed from the main highways, that no Londoner, save such as know what fortification really is, would ever realise the fact that they were in any way connected with its defence . . . . We only want half-a-dozen tolerably large forts, well placed to form, as it were, the salient points of our defence—one on Shooter's Hill, one on Norwood Hill to the south of the Crystal Palace, one at or near Wimbledon, a fourth somewhere near Harrow, then at Mill Hill, and our last within a good range of Enfield" (p. 648). These permanent works "should be armed with heavy long-range guns, and should besides contain surplus stores of both guns and ammunition for the armament of other works." The "other works" here referred to are earthen works, more or less permanent in their nature, situated between the large forts, and so completing the chain, and either armed with guns at once upon the completion of the enceinte, or, to reduce the cost by avoiding the necessity for constructing permanent magazines and stores, supplied with guns and ammunition from the main permanent works, when occasion might require it. The chain of fortification might be rendered still more complete by the construction of a few still smaller works, either inclosed or open at the gorge: "we should then have London surrounded by a series of strong points of resistance, consisting of a chain of detached works, with large intervals between them, through which our regular and irregular troops might advance and retire, and act with a perfect certainty of success" (page 350).

Such is briefly an outline of the plan proposed in the "Cornhill Magazine," the expense of which is estimated at 480,000*l*., and the advantages of which we may best sum up in the author's own words. "We have London surrounded by a cordon of detached forts, showing in every direction an armed front. We have water communication from east to west of the position, and ample communication by railway and telegraph in all directions, and to every fort. The leading lines of railway, and the river, are everywhere barred, and these lines put us in communication with our great camps at Aldershot, Colchester, and Shorncliffe. Within our circle of forts we have in materiel the whole resources of the nation in artillery, military stores, small arms, and ammunition; and, as regards the personnel, we include the head-quarters of the Artillery, our picked troops, the Guards, the Engineers, the largest companies of Volunteer corps in the country, and, finally, a population of 3,000,000, from which to recruit; and with such a position to defend, every man might be a soldier. We have also the means of obtaining unlimited supplies of all kinds from the country, and of despatching troops in different directions; for the idea of investing a position of such extent and situation could not for a moment be entertained by any army that could be introduced into this country" (pp. 650-51). Not the least merit of this plan is the important and prominent position which it assigns to the Volunteers, whose services would by its adoption become more practically valuable than from the constitution of the force they could probably be made in the open field. Our readers will do well to read the article, which demands a perusal from all who take an interest in the subject.

The *Moniteur de la Flotte*, or M. Xavier Eyma, using the recent occurrences on the coast of Sicily as a text, preaches us a sermon on the new principles of maritime law, and of the police of the sea, which it is supposed England has adopted in consequence of the course pursued by our officers on the occasion of Garibaldi's invasion.

The writer, fortifying himself by the fact that the Chamber of Deputies of Berlin recently expressed a wish to the Prussian Government, that it would take every occasion to enforce the principle of the inviolability of property and of person on the sea in time of war, proceeds to remark, that following strict law and antique notions, the seizure of the two ships in which Garibaldi transported his volunteers into Sicily, their disembarkation without having the commission of any government, and their descent with arms in their hands on the territories of a state then at peace with other nations, constitute so many cases of violation of the police of the sea, and that the duty of every officer of a man-of-war, no matter what his nation, meeting the expedition at sea under such exceptional circumstances, was to have seized the vessels, and handed them over to the tribunals of his country.

Therefore, says the *Moniteur*, the Neapolitan officer, when he suggested to the English commander at Marsala, that he should visit the invading ships, gave him an admirable opportunity of exercising the general police of the sea, of which England has always shown herself so jealous. The English captain refused, on that occasion, in the interests of the liberty of the sea, to assure himself that the ships in question had a right to the flag they carried, or that they were lawfully employed; and the English Government not only approved of the conduct of the officer, but Lord John Russell declared to Parliament his belief that there was a strong similarity between the descent of Garibaldi and that of William III. at Torbay. The *Moniteur* argues that England will henceforth have no right to oppose the full recognition of what it calls the liberty of the seas. We have only to observe that the *Moniteur* labours under a strange hallucination, if it imagines that an English officer in waters commanded by a friendly flag would undertake to perform a duty which it was clearly incumbent upon the officer commanding the ships-of-war of the power in whose port he was anchored to execute. What would be thought of an English officer in command of a superior force cruising off a coast belonging to the British Crown, if he were to apply to the commander of a French force in a British port to ascertain the nationality of two ships, which were actually disembarking armed bands with a view to insurrection? Had a British man-of-war met Garibaldi's vessel in the open sea, it would have been her duty to visit her; but, as yet, international law has not decided the exact limits between such an expedition as that of Garibaldi and the landing of the present Emperor of the French at Boulogne. Would an English officer have been justified in seizing the vessel in which Prince Napoleon and his confederates were sailing to effect an armed descent on the shores of a friendly power? The *Moniteur* must have some stronger illustrations ere it can pretend that England has consented to abandon a right in open sea, which she, in common with all civilised maritime powers, has exercised in the interests of humanity.

The members of the Royal Commission appointed to inquire into the state of Her Majesty's Dockyards are Mr. Ricardo, M.P., chairman, Lord Giffard, Sir Henry Willoughby, M.P., Captain R. S. Robinson, R.N., late in command of the steam-reserve at Devonport, and Mr. Dagleish, M.P. Mr. Arthur Price is to act as secretary to the Commission.

An establishment of musketry instruction for the troops in the Bengal presidency has been organised. Lieut.-Colonel T. B. Butt, 79th Highlanders, will be the Chief-Inspector, and the District-Inspectors are Major Cassidy, 34th Regiment; Major Crosse, 88th Regiment; Captain Gordon, late 49th Native Infantry; and Captain W. Croker, 27th Inniskillings.

Major-General Gascoigne resigns the command of the Dublin district on the 1st of July. No arrangement respecting his successor is yet made, but a rumour refers pointedly to Sir Richard Airey, now Quarter-master-General.

Major Edward Fellowes, unattached, formerly of the 11th Hussars, has been appointed Assistant-Adjutant-General at the Cape, and will be stationed at King Williamstown.

Captain R. Atkinson, 12th Regiment, is acting as Brigade-Major at Sydney, in the room of Major Nasmyth (of Silistria fame), who has retired from the Army.

Captain R. J. E. Robertson, of the 60th Rifles, has been appointed Assistant Military Secretary to Major-General Pringle Taylor, Commanding the troops in Jamiaca.

Captain Image, 1st battalion 21st Fusiliers, has been provisionally appointed Brigade-Major at Barbadoes, in succession to Captain Beresford, 49th Regiment.

Captain S. H. Clerke, 21st Fusiliers, has been provisionally appointed Aide-de-Camp to Sir A. Cloete, commanding the troops in the Windward and Leeward Islands, in the room of Captain Gostling, 49th Regiment, resigned.

We venture to suggest to the compiler of the Official Monthly Army List the propriety of restoring to the list of Generals, the name of Sir Hugh Rose, which he has struck out, we are sure, without that "authority" which his front page so prominently boasts.

From the answer given by Mr. Secretary Herbert to Colonel Knox, it appears that the plan of selecting Lieut.-Colonels of regiments is, after all, likely to be carried out as soon as machinery for the more close and efficient inspection of regiments abroad shall have been organised.

We find that Rear-Admiral Sir Robert L. Baynes, the Commander-inChief on the Pacific station, has given Commander Lambert's death vacancy to his flag-lieutenant, Frederick W.Richards, a young officer of 1855. This is an act which, according to the rules of the Service, no one can find fault with, as an admiral almost invariably promotes the officers on his staff in preference to those merely serving under his command; but the case immediately under our notice bears with peculiar hardship upon Lieutenant Lewis Moore, the first-lieutenant of the Vixen, an officer who had attained his present rank about the time, if not before, Commander Richards entered the Navy. Lieutenant Moore has lost two commanders by death, and therefore has had separate command of the ship on both occasions.

Mr. Godley has made some "remarks" upon Mr Elliot's memorandum appended to the Report of the Committee on the Military Defence of the Colonies, in which he elaborately supports the views expressed by himself and Mr. Hamilton in that Report, as distinguished from those of Mr. Elliot.

The promotion of Captain Sackett Hope to the list of flag officers on reserved half-pay, and that of Capt. Robert Fanshawe Stopford (1840) to the active list of Rear-Admirals, with the death of Captain Stephen Grenville Fremantle(1842), will give the increased half-pay of 14*s*. 6*d*. per diem to Captains Bartholomew James Sulivan, C.B., Henry Bagot, and the Hon. Walter Bouchier Devereux. All these officers are of the seniority 1845. Captain Devereux is still a very young man for the standing he holds in the service, but he has never done a day's duty in his present rank.

THE ARMY ESTIMATES.

The House of Commons was on Thursday occupied, during the whole of a protracted sitting, in the discussion of the Army Estimates, in the course of which many subjects of great interest to the Service were brought forward. We append a summary of the observations with which they were respectively introduced, together with a full report of the speech of the Secretary for War, in which they were very comprehensively replied to.

The debate arose on the motion for going into committee of supply on the Army Estimates, when, in the first place, Major Edwards inquired of the Secretary for War whether any correspondence had passed between the War-office and the Treasury, or any other department of the Government, respecting the omission from the estimates of the usual vote for the annual training of the Yeomanry Cavalry, and, if so, whether he had any objection to produce such correspondence.

Sir John Trelawny then called attention to the effect of selection of lieut.-colonels of regiments upon the relative positions of the Guards and Line in cases of exchange, and asked several questions relating thereto.

General Peel urged upon the Government the necessity of maintaining the Militia in a state of the most perfect efficiency, regard being had to the peculiar circumstances of the country. He congratulated the Secretary for War on the success of the Volunteer movement, which he described as a "magnificent army," but he expressed an earnest hope that it would not be allowed to supersede the old constitutional reserve of the kingdom.

Mr. John Locke advocated the claims of the artificers of the Land Transport Corps, organised during the Crimean war, for the non-fulfilment of the conditions upon which their services had been enlisted.

Mr. Deedes, reverting to the subject mentioned by Major Edwards, said that the impression out of doors with regard to the Yeomanry Cavalry was, that the War Department intended to show hostility to the frequent training of that corps. If the War Department meant to say that in consequence of the Volunteer movement (which had his entire approval), the Yeomanry were to receive no training, the candid course would be to say so at once, and not keep the force any longer in suspense.

Sir De Lacy Evans brought under notice the recent appointment of General the Hon. C. Grey to the colonelcy of the 3rd Buffs, and invited the Secretary for War to state the cause of that particular distinction. He was not prepared to deny that General Grey had rendered important services as private secretary to the Prince Consort, but these were not military services. The late Lord Raglan had laid it down that distinguished services in the field constituted the first claim to that military preferment of which General Grey had become the subject—that services in the colonies gave the next claim, and services chiefly at home the last. But this wise regulation had been set at nought in the present case, although there were fourteen general officers senior to General Grey, who had seen a great deal of service, and who had commanded brigades and divisions in the Crimea. It had been said, as a justification for the appointment, that the gallant general had offered to serve in the Crimea; but so had every other general officer; and unless that offer was followed up by action, as in the case of Sir Arthur Wellesley, who threw up his lucrative office of Secretary for Ireland to join a foreign expedition, it really amounted to nothing at all. The appointment of General Grey had given rise to a great deal of dissatisfaction out of doors; and if such nominations continued to be made, it might become a question with Parliament whether so large a number of colonelcies should be maintained.

Mr. Adderley directed attention to the report of the committee on the military defences of the colonies, and asked whether the Government intended to act upon the report, and, if not, what they intended to do on the subject. Having stated the substance of the report, and having dealt with the objections of Mr. Elliot, one of the members of the committee, the right hon. gentleman gave it as his opinion that of the 15 millions to be voted this year for the Army, four millions were useless. He contended that the colonies ought not to be exempted from liability to contribute their own share towards the expenses of their defence.

Lord Robert Cecil expressed himself in favour of extending protection to the colonies, and instanced the Cape colony, where, he stated, a number of independent or republican states had been created, contrary to the wish of the colonists, and against which the Imperial Government was bound to provide some protection. He deprecated any suggestions which would have the effect of weaning the colonies from the mother country.

Mr. Chichester Fortescue agreed with the observations which had fallen from the last speaker, and said that the reason for keeping up a military force in the colonies was not the problematic risk of a great European war, but the danger which might ensue from the pressure of hostilities with formidable native tribes.

Mr. Arthur Mills thought the subject of military defences for the colonies was a proper one to be considered by a select committee of the House.

General Upton asked if it were the intention of Government to recommend to Her Majesty a revision of the Warrant dated July 1, 1848, with a view to its improvement, and especially to increase the rates of pension of non-commissioned officers and privates discharged the service in a helpless condition.

Mr. Williams apprehended that the country must have lost its "pluck," to have abandoned itself to a fear of foreign invasion, when 140,000 men were enrolled for the regular Army, and the other defences, including the Volunteers, amounted to 200,000 more. He saw no reason why the British colonies should not provide the means of their own defence in the same manner as the Dutch colonies.

Colonel Knox expressed his hope that the Secretary for War would state what course he intended to pursue with regard to the purchase system. He understood that the purchase system was to stop at the rank of major, and that future advancement was to be by selection. Against the latter system he protested, because he considered that selection meant jobbery.

Sir Charles Napier replied to Mr. Williams, and assured him that the country was by no means too much defended, as the Army was not sufficient, while the naval force was far too limited.

Sir Lawrence Palk censured the Government for having delayed the defences of the country, and urged the necessity of at once communicating to the House what works they proposed to undertake, and how they contemplated meeting the expenditure.

Mr. Sidney Herbert rose to reply to the various interrogatories put to him. He said:—"In answer to the last two speakers, I venture to say, in spite of the hard words of the hon. gentleman opposite, that I have not in any way shirked or evaded my duty. I have given every attention to the subject, which is one of immense importance; and I think no gentleman will consider the Government ought to have laid the report of the commissioners on the table without at the same time being prepared to state the course they proposed to adopt. The report is, I believe, so far advanced in printing that I shall be able to lay it on the table next week, but it would not be right to do so until I could state the course we propose to take with regard to the recommendations contained in it. In answer to the question of the hon. member for West Norfolk (Mr. Bentinck), I may say that I never intended to ask the House to vote a lump sum without knowing the details. I inserted a lump sum because when we were about to deal with the report of commissioners which contemplated works on a large scale, it was necessary for me to put a vote in the Estimates which might be necessary if any action were taken upon the report, but which must be altered in its proportion and distribution according to subsequent decision. I proposed a vote, but I do not think the House ever anticipated that I should ask them to grant it until all the details were explained. The details shall be given before the House is asked to pass any vote upon the subject. The questions raised have been so numerous that I hardly know where to begin. (Hear.) I think the hon. gentleman opposite began by asking whether I could produce the correspondence that had taken place as to the Yeomanry not being called out for training this year; and another hon. gentleman said there was great alarm in the regiment he commanded lest the Government should intend to do away with that constitutional force altogether, and that the men were falling away in consequence. The omission to call out the Yeomanry is not without precedent. It has occurred several times within my recollection, and no further back than 1857. The Yeomanry, however, have gone on and flourished since that time, and I should be sorry that any step taken by the Government, as this has been, under pressure, should lead to the impression that they undervalued the services of the force, or that it was not intended to call them out again. I believe it is a most valuable force. It may be a matter of consideration whether improvements in its organisation might not be introduced, but the Government has a high opinion of the value of the Yeomanry corps, and would not desire at all to discourage them. This year I have been under severe pressure to provide *matériél*, so that I was glad to avail myself of every source that would enable me to meet what is most important—the permanent defence of the country. The hon. baronet behind me has referred to exchanges of officers from the Guards to regiments of the Line. I know that of late years the Guards have been very severely dealt with, and no one is more responsible for that than myself, for I felt it my duty on former occasions to deal with great severity towards the Guards. But just look at the difference which the Warrant of 1854 has made. Before that time the Guards, having always a step in Army rank in advance of the Line, and in attaining by brevets the rank of major-general, they did occupy a position in the list of major-generals quite disproportioned to their number. But the Warrant of 1854 did away with all that. It is true they can exchange into the Line, but how seldom do you find that done unless under very exceptional reasons? A lieutenant-colonel of the Line is qualified to become a full colonel, but if he exchanges with a lieutenant-colonel of the Guards, he is qualified for nothing. That has made a very great difference with regard to these exchanges, and the gallant officer opposite has written an able pamphlet in which he complains of the effect of the change which has taken place. I feel, therefore, that when speaking of this ancient corps, many of whose special privileges have been taken from them during the last few years, and when I recollect that I have been the instrument of doing things that have pressed hardly upon them, I am bound to say something for them. The hon. member for Lambeth spoke of the great advantages possessed by the Guards, and seemed to deride their services, as if they consisted of little else than marching from the Tower to Windsor, and from Windsor to the Tower. The hon. member, in so speaking, was utterly forgetful of the duties which they have to discharge. Whenever there is an important service to be performed, an expedition to be undertaken, we uniformly go to the Guards, as a corps which we are sure to find in the finest state of discipline and efficiency. I was asked by the hon. baronet (Sir J. Trelawny) whether or not aides-de-camps were subjected to examination. I have to reply that, not only are they subjected to examination, but to one of some importance, and which exceeds in extent that of almost any other country in the world. They are examined, not on military matters only, but in languages and other accomplishments. I find that in Prussia, for example, which is the most examining country in the world, and where there is an almost pedantic adherence to theoretical tests, there is no examination for aides-de-camp. It is, however, strictly carried out with us, and I believe it is attended with very great advantages. A gallant officer opposite spoke of the expense of the disembodied Militia, but he also said that, after all, if it was found to be of service for recruiting the Army he did not see how it could be abolished without detriment to the public service. There used to be a vast amount of men in this department on paper, who were maintained in this position because it was said that if that number of men no longer existed the difference would be filled up by men who would only enlist to abscond. All these paper men had now been struck off. I do not know it officially, as the returns have not yet been sent in; but I have reason to believe that all the men have been struck off who do not really exist, and who have either deserted or gone over to the Line. I have also just sent out a circular to the colonels of disembodied Militia, containing the most stringent regulations against recruiting parties attempting to induce disembodied militiamen to leave the Militia to join the Line, because I think there is no more use in asking a militiaman to go to the Line than there would be to ask a man to leave one regiment for another. (Hear, hear.) The officers of the Militia, when they know that they are protected from that invasion, will have recourse to a class of men not very valuable for the line, but valuable for the militia—men of fixed habits, and whose characters are known. (Hear, hear.) In this matter I think that not only the House, but the public out of doors are run away with by the comparison which they make between an embodied and disembodied regiment. It is said that 28 days' pay will not make an efficient soldier—no one says it will. If you want to make an efficient soldier, pay him all the year round; but if you want a reserve that will not cost much, and which by further training can be made efficient men, then I say the system of 28 days' pay will, as near as possible, combine the two objects of cheapness on the one side, and a certain advance towards efficiency on the other. The honourable member for Lambeth complains that the two sides of the House uniformly support each other when the Estimates come to be considered, and that the economy of the Service cannot in consequence be carried out; for whatever difference of opinion there may be on other questions, they are always, he says, sure to combine to maintain the Estimates. Now, I think I can explain this by saying that on other questions we are more or less regulated by party feelings, but that no one can shut his eyes to the necessity that exists of having this country at all times in such a state of defence as to make it secure against the aggressions of an enemy. The right hon. gentleman (General Peel) has referred to the system of reliefs, of which he complained. All I can say is that, though the rules which have been laid down for reliefs are adhered to as closely as possible, there are often disturbing causes at work that prevent them being regularly carried out. Thus, the Indian war, the Russian war, and the Indian mutiny very materially disturbed the arrangements that had been made, and at one time during the Russian war we had not more than 24,000 troops in England. This arose because, with a small establishment, we were attempting to carry on a great war. We are told of those times when, during the administration of Wellington and Peel, the military and naval expenditure of the country was so much less than at present, the Army Estimates being 11,000,000*l.* less than now; but we must recollect that this great reduction took place when the whole face of Europe was exceedingly pacific; and we must also recollect that for that state of things we are now paying, for it was the lowering of our stores and the reduction of our armaments in those times that have imposed on us now the heavy burdens we are called to bear. We have been for years at the War Office striving to retrieve this error, for we were deficient in stores in every part of the world, and it is an error that I trust we shall not fall into again. I think we are bound to look most closely to every item of our vast expenditure; but I confess that I find great difficulty in carrying out this object, in consequence of the claims that are constantly put in now by one class of officers and now by another, all of which would go to increase greatly our military expenditure. The Secretary for War, however, is bound to recollect that we have got the most expensive and most highly paid army in Europe, and that every time the cost of that army is increased the effect is to diminish its numbers. A question has been put to me about the Land Transport Corps. I had thought that the question of the Land Transport Corps was long since settled, and I confess I was somewhat alarmed when I was charged with not having kept good faith with the persons making the claims now urged. An honourable gentleman spoke of their being promised six shillings a day, and that the agreement was that they were to be taken for two years, but that agreement, it turned out, was only to be carried into effect provided their services were required. Then the hon. member for Greenwich got up with a gigantic placard in his hand, and I confess I was somewhat alarmed again, thinking it almost impossible but that some recruiting zealot, regardless of truth, had made some promise of a three months' gratuity on service for two years. Not a bit. The placard agreed with the attestation. The Government had adhered to their bargain, and there was not a shadow of a case of grievance against them. Lord Panmure appointed a board of officers to consider the complaints of these men. They refused to acknowledge the authority of a deputation or a committee, for these men had got into the lawyers' hands. But they heard every individual, and they settled their claims satisfactorily. I now come to the question which my hon. and gallant friend (Colonel Lindsay) brought under the notice of the House relative to the officers who, in 1826, accepted unattached rank on half-pay, the Government having thought it necessary to relieve the list. My predecessor in office thought that the case on the part of these officers was a good one, and he referred it to the Treasury, who refused the claim. I am, therefore, impartial in the matter. I thought there was a doubt upon the interpretation of the general order, but I think, upon the whole, that the Treasury was right. No one would have made so improvident a proposal as that these officers should be promoted by steps of unattached rank, and should have, not only the advantages of half-pay, but also the advantages of full-pay during that time. Two years before that period a rule was established requiring six years' service as field-officer before a man could become a major-general. These officers thought it a hardship that they should go upon half-pay and lose 4*s.* 6*d.* a-day for so many years. But they got their steps in promotion, they were freed from foreign service, and they rose in rank to be brevet officers. The hon. and gallant gentleman says they did not intend to marry, but that was their misfortune. What was the object of the rule? A man was to serve six years as a field-officer, because the experience of a field-officer's rank is necessary to make a general officer. If the Government guaranteed to them a dispensation from the six years' service as field-officers, they would not only have all the advantages of half-pay and full-pay, but another advantage which full-pay could not procure for them,—namely, the dispensation from service as field-officers. This would be a solution of the problem that has puzzled so many people—how to eat your cake and have your cake. They would gain a step in rank,

Digitized by Google

they would be receiving their half-pay at home, and at the end of the period they would be in as good a position as an officer who had been under a grilling sun in the East or West Indies, or had served in the most unhealthy climate. Although there might be a doubt on the words of the general order, I think the Treasury upon the whole came to a wise and just decision in this particular case. With regard to the question of the compulsory retirement of medical men at 55, the Warrant gives them great advantages in a higher half-pay. There is, too, this to be said, that, although the rule may be said to be an arbitrary one, it is not only advantageous to the soldier, but to the medical profession, as it entails more rapid promotion in the regiment, and gives the soldier the benefit of the services of men in the vigour of their age. I now come to the question raised by my hon. friend, who says we have been doing a great injustice unwittingly to some of the colonies. There are in the Estimates all the sums that the different colonies pay in aid of the military expenses of the colony, and which are paid under arrangement into the Exchequer. The particular colony of Victoria, which is, I admit, one of the most liberal, does not appear on that page, because the sum is paid into the Exchequer, either as colonial allowances, or to cover the whole pay and allowances. When the regiments are serving in India the payment is left blank, because the Indian Government undertakes the payment. When a regiment in Australia is paid entirely by the Australian government, it ought to stand with that explanation against it; but there is this difficulty in the way—we make our Estimates for the year to come three or four months before the Estimates are agreed to. We ought to know beforehand what the colony intends to do. The colony at different times, either from local financial difficulties or other causes, has taken different views; and we, of course, are not aware whether by a vote they may not decline to advance this money. If, however, we could come to a clear and definite arrangement for a payment extending over a certain period, the difficulty would be got rid of. I, for one, should be glad to see a colony so public-spirited receive full credit for its liberality on the estimates. I will not now enter upon the subject of colonial defences introduced by the right honourable gentleman (Mr. Adderley) — a subject of all others requiring the most careful, deliberate, and delicate handling. It would be taken very ill in the colonies if the Government, without consulting them and giving them an opportunity of pointing out any exceptional circumstances, were to announce that they were going to apply a Procrustean rule to them as to the payment by them of the expenses of colonial defences. We have the advantage of the labours of the committee, and the very clear and able rule they have laid down, and, on the other hand, we have the exceptions taken by one of the committee to some of the opinions in the report. If the world were ruled by logic the arguments might be very good, but men have feelings and passions which must be taken into consideration, and upon no subject is it more necessary to act with care and caution than upon one so largely appealing to the interests, feelings, and hopes of the different colonies that compose our colonial empire. I come now to the question of the artillery corps. I must say that a deal of the argument of my hon. and gallant friend I thought extremely sound, but I cannot help suspecting that he, as an artillery officer, did not examine both sides of the question. The artillery and engineer officers are a peculiar body, and have almost a monopoly of a vast number of places and appointments to which they are fully entitled by their attainments, but from which officers of the Line are excluded. They are a seniority corps, without purchase and without selection, and the result is that until a great augmentation of the force has made the junior officers young men you have men of very advanced age in the upper ranks. The average age of the full generals of artillery was, I believe, lately 84 years. The average age of 16 officers commanding brigades, answering to the colonels of regiments, was 78; and of 16 unattached officers 71 years. The three supernumeraries are, I believe, all employed. The same observation, of course, applies to the engineers. The pay of artillery officers is very high. A brigade of artillery, which answers to a battalion of the Line, has a colonel, who is generally on leave, another colonel in command, and four lieut.-colonels. The officers of artillery enjoy an entire monopoly of the staff of their own corps. It would not do to make an officer of the Line, Adjutant-General of Artillery; but the staff appointments of the Line are open to officers of artillery. Now, these are all decided advantages. The number of artillery officers employed in other departments not strictly military is very large; and I own that, in my opinion, it is only what they are fairly entitled to from their superior attainments. There are 29 officers of artillery on the staff, including Colonel Bingham, Colonel Wodehouse, Colonel Dickson, &c. Colonel Wilford is Governor of the Cadet Company; Colonel Tulloch, Royal gun-carriage department; Colonel Askwith, gunpowder manufactory; Colonels St. George and Rowan, and Lieutenant-Colonels Campbell, Younghusband, and Smythe, War Department; and so on, to the number of 40 altogether, in civil employment. All these things must be taken into consideration as a make-weight against the lesser employment of the staff of artillery officers in other capacities. I think that officers of that corps placed in command in districts where the artillery amount to 4,000 or 5,000 men have a fair claim to consideration, and I believe this matter is now under the consideration of the Commander-in-Chief. As the hon. gentleman (Mr. Connolly) who complained of the scandalous outrage committed on his proprietary rights as the owner of a large fishery, has postponed his motion, I need not go into the question now. His argument is, that when the War Department lease a property, they do so for military purposes alone, and therefore acquire only the right of firing guns or whatever it may be, without any manorial rights. I cannot admit that such is the case. I hold that when the War Department buys land, it buys everything belonging to it, the same as any other purchaser; and I do not see why the public should be robbed of those particular rights, when they pay for them."

General Peel—And pay a great deal more than anybody else.

Mr. S. Herbert.—"A great deal more, no doubt; and therefore I do not see why we should give up any of our rights. I come now to the speech of the gallant officer the member for Westminster (Sir De L. Evans). He said, with great truth, that in a committee upstairs, after we had discussed the subject of the responsibility of the Secretary of State for the appointment of officers of high rank, when he asked whether or not I was responsible for the appointment of General Grey to be colonel of a regiment, I replied that I should prefer to have that question addressed to me in the House of Commons. I thought that if a transaction of that sort was to be publicly questioned it ought to be done where it could be publicly defended. The gallant officer began by reading extracts from the evidence given by Lord Fitzroy Somerset, to the effect that the colonelcies of regiments were given to three classes of officers,—first, to those who had distinguished themselves in war; second, to those who had performed colonial services; and, third, to those who had commanded efficiently and respectably at home. The gallant officer supposed that General Grey's appointment came under the last head. That is a mistake; it did not come under the last head. I have seen it stated in the public prints that General Grey was an officer who was never out of Hyde Park; and by way of cumulating all his offences, that he was a Guardsman. General Grey never was a Guardsman. He was in the Line all his life. He was attached to the 43rd Regiment, and was twice on colonial service with it. He was colonel of the 71st Regiment, and visited Canada with it. He commanded it for nine years. During the whole time General Grey was in the Army, there were only two occasions when there was a foreign expedition of any kind—one was to Portugal, and the other to Canada, when the rebellion had broken out; and he happened to take part in both. I wish to destroy entirely the notion that General Grey has been a stranger to service out of Hyde Park. He comes under the category of having served in the colonies. Lord Fitzroy Somerset laid down correctly the rules which had hitherto prevailed in disposing of these colonelcies. They are not given according to strict seniority. Officers are occasionally passed over by those who are their juniors. That was General Grey's case. He was passed over three or four times, and once by a very excellent officer, who had seen no service—General Breton, who is now in Mauritius. It is said there are officers, senior to General Grey, who can point to long and distinguished service. General Bell's name has been mentioned; but on referring to the *Army List*, I find he is considerably the junior of General Grey. There are officers who have served in the Peninsula, but they have done nothing since. What has any one to say against General Grey? Officer after officer has been appointed with less service than he can show. In answer to the question addressed to me on this point, I may say that the Secretary of State is responsible for these appointments, but that he acts on the recommendation of the Commander-in-Chief. The Duke of Cambridge said to me, 'I think General Grey's services are such that he ought not to be passed over any longer; I think nothing could be more wrong than to make him colonel of a regiment on the ground that he has a place at Court.' No one can deny that. 'But,' he added, 'it would be most unjust to refuse him the place if he has otherwise a title to it, because he has an office at Court.' I asked His Royal Highness whether, if General Grey were General Smith, with no place at Court, and unconnected with any known family, but with some service to point to, he would be entitled to the place, and the answer was that he would have got the appointment before this. Therefore, merely because a man happens to possess a place at Court, and there may be an outcry in the public prints about his getting any other place, it would be a shabby, cowardly thing not to give him a post of this sort when it falls vacant; and he has otherwise a fair claim to it. Once lay down the rule that a man who has a place at Court is not to receive the reward to which he is otherwise entitled for service in the Army, and what will be the result? Her Majesty has surrounded her children with officers of distinction. The Prince of Wales is attended by General Bruce and Major Teesdale, Prince Alfred by Colonel Cowell, Prince Arthur by Major Elphinstone. Well, once make it the rule that the moment a man accepts a Court place a black mark shall be set against his name, that his past service shall not count, that he shall be debarred from receiving the legitimate honours of his profession, and you exclude from the places which it is the interest of the country to have filled by the best men the very officers whom you would yourselves select, as the best persons to discharge the duties. Nothing could be more unjust than to lay down such a rule. The gallant officer who brought this matter forward said I spoke to him so confidently he supposed I had a good case. I believe I have a good case, and I repeat it would have been a mean, shabby, cowardly thing to have refused an officer, on account of name, position, or connection, that reward to which, in the ordinary course of service, he was fairly entitled. It has been said that Sir H. Inglis has been recommended to the colonelcy of a regiment out of his turn. I own that such a step may be taken exception to; but as the gallant officer had returned from India with broken health, and as this was the regiment with which he defended Lucknow, both the Duke of Cambridge and myself were of opinion that it would be a just and graceful act to offer him, although out of his turn, the command of the regiment with which he had been so honourably associated. I will not now make any further observations; but, after this long discussion, I trust the House will allow me to take, at any rate, the first vote. The difference in the number of men is very small, only about 2000. The discussion may be taken on the next vote for the pay, and we shall then have taken one step in considering these Estimates."

Mr. Disraeli said that he had no particular predilections in favour of General Grey, as that gallant officer had many years ago defeated him in three contested elections. At the same time he could not bring himself to the conclusion that persons in the position of General Grey were to be deprived of the fair rewards of their profession because they had been selected to offices in the royal household. If this principle were to be adopted a very inferior class of military men would be found about the person of the Sovereign and the other members of the royal family.

In the course of the discussion in committee which followed, Colonel Knox reminded the right hon. gentleman that he had not answered his question respecting the new purchase system. Mr. S. Herbert said that he had stated on a former occasion that the new system would require considerable preparation, and that it would render necessary increased inspection of the regiments in the distant colonies. He had in nowise departed from the views which he had previously announced on the subject. In reply to General Upton, Mr. Herbert said he could not hold out any hope that the Government would increase the rate of pensions. His opinion was that the most economical mode of increasing the efficiency of the Army was to spend the money on pay instead of on pensions. The case of the disabled men certainly deserved consideration.

Colonel Lindsay wished to point out a great hardship to which officers serving on the staff were at present liable. An officer on the staff received the half-pay of his regimental rank and the staff-pay besides; in the case of a lieutenant-colonel it would amount altogether to 400*l*. a-year; but when his five years of service on the staff were up, and he was removed, he sank back at once to the half-pay of his regimental rank—about 200*l*. This was a grievance under which many officers suffered, and he would suggest that officers, when removed from the staff, instead of sinking back on the ordinary half-pay, should have something between half-pay and the pay which they enjoyed as staff officers, so as to make their position more agreeable to them. There was also another hardship to which they were liable. When a sudden emergency arose, like the Indian mutiny or the China war, a number of officers educated at the Staff College were placed on the staff; the difficulty was suddenly arranged or got over; and these officers being removed from the staff before their five years were up, were liable to see junior officers to themselves passed over their heads.

Sir J. Trelawny said that, as this vote included the case of General Grey, he was disposed to say "No" to it, in order to enter a protest against its being supposed that the defence set up by the Secretary for War was at all satisfactory. The right hon. gentleman said that General Grey's being connected with the Court was no reason for his not being a fit man for the appointment; but what he ought to satisfy the House of Commons of was, not only that he was a fit man, but that there was nobody available at the time more fit.

Lord Hotham justified General Grey's appointment, and after some further conversation upon various incidental points, the House adjourned.

THE WHITWORTH GUN.

Last Saturday was a very unpropitious day for trial of a gun, either at long or short range; but as the Lords of the Admiralty had, in compliance with a request lodged with them by Mr. Whitworth, made all the necessary arrangements for testing the iron sides of the floating battery Trusty against any missile that the inventor of the new gun could bring to bear against them, it was deemed right to proceed with the experiments which, as far as they went, must have proved highly satisfactory to the competitor with Sir William Armstrong for fame. Having mentioned the name of Sir William, we may as well at once say that, although many have asserted he has succeeded in penetrating the iron plates as effectually as Whitworth, others have as confidently stated that he has done no such thing. We have not been present at any of his experiments, and therefore cannot commit ourselves to the expression of a decided opinion; but it would be as well if the Government were to satisfy the public mind on this point, so that it might be disabused of all ideas of jobbery and undue favouritism.

The Duke of Somerset, accompanied by Rear-Admiral the Hon. F. T. Pelham, C.B.; Captain Charles Frederick; Rear-Admiral Sir Thomas Maitland, C.B.; Rear-Admiral Sir Baldwin Walker, K.C.B., Comptroller of the Navy; and Mr. Lloyd, Engineer-in-Chief of the Navy, arrived in the Vivid, about one o'clock, at the scene of operations near the Great Nore. Previously, however, to their lordships' arrival, a few shots had been fired. Mr. Whitworth's gun was on board the Carnation, gun-boat, in which were embarked Captain Hewlett, the efficient and indefatigable captain of the Excellent, gunnery-ship; Captain Schomberg, of the steam reserve at Sheerness; Mr. Bidder, the President of the Institution of Civil Engineers; Captain the Hon. George Wrottesley, R.E., and others. The Carnation was not exactly the vessel adapted to make "good weather" of it during the heavy squalls which were during the whole day rushing across the mouth of the Thames; and it may therefore be readily believed that the trials were conducted under difficulties. The weather could scarcely have been worse. We were favoured with thunder, lightning, hail, rain, and wind, with the natural consequence, a nasty short tumbling sea, which would have caused a craft of heavier tonnage than the Carnation to have been something more than "lively."

The following is an account of the experiments and of the result of the firing:—

The first shot, which was from the 80-pounder of Mr. Whitworth's own manufacture, and which produced such marvellous results at Southport in February last, was fired with a 12 lb. charge of powder by Captain Hewlett, at the Trusty from a distance of 200 yards. As soon as all danger from flying splinters was over, and the smoke passed away, an examination was made, which showed that the shot had struck on the edge of two plates, passing clean through the 4½ inches of wrought iron, and starting both plates 1½ inch outwards. After passing through 11 inches of the oak backing the shot struck against a thick iron bolt and glanced off, remaining buried in the framing between the plates and the inside of the ship. The next shot fired from the Carnation was with a charge of 14 lbs. of powder, and struck the centre of one of the armour plates. This went completely through plates, timber, and all other resistance, and rolled on to the main deck of the Trusty. The hole it made was a very clean one, and about the size of the shot. It covered the deck with splinters of wood and iron, and at once proved that safety to life was not to be obtained under the shelter of 4½-inch iron plates, as now fitted to the sides of ships when fired at by the new gun. The shot was subsequently taken on board the Vivid, and submitted to the inspection of the Lords of

Digitized by Google

the Admiralty, and only exhibited a slight indentation. The third shot was fired in the presence of the Duke of Somerset and his colleagues, who made their appearance by the time the gun was ready for this stage of the trial; but, perhaps owing to some over-anxiety to take a good aim, or from a desire not to hit too low, and thus introduce into the programme the sinking of Her Majesty's ship Trusty, the shot went clean over the battery, and went spluttering away a mile or two to leeward, in the direction of Shoeburyness. The fourth shot passed through the iron and wooden sides, and lodged in a deck-beam, where it was left. The fifth shot again went through everything, beginning with the centre of a plate, and carried into the main deck of the vessel a shower of splinters that, in the case of an action, would have dealt destruction to all around.

The Lords of the Admiralty and Sir Baldwin Walker made a minute inspection of the Trusty after this the last shot was fired. They took a careful note of the scene shown on the deck, and quietly pondered over the holes perforated in the sides of one of the vessels which had, up to that time, resisted the effects of every round shot hurled against them from the ordinary smooth-bored gun. Their lordships were thoroughly satisfied with the result, and Mr. Whitworth accompanied them in their yacht to Woolwich, and no doubt during the trip imparted to them a portion of the valuable knowledge he possesses on questions connected with offensive and defensive warfare. One point above all must have struck their lordships, and that is, if the French or any other nation contrive to produce a gun of equal powers with that of Mr. Whitworth, we must set our wits to work and bring out some plan by which shot and shell may be made to glance off, or, at all events, be prevented from penetrating the plates with which, in future, our ships may be incased.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-ves., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific.
Amphion, 36, sc., Capt. T. Cochran, 1857, Mediterranean.
Archer, 13, sc., Capt. W. N. W. Hewett (acting), Coast of Africa.
Ardent, 3, st.-v., Com. J. E. Parish, 1857, S. E. Coast of America.
Argus, 6, st.-v., Com. H. F. W. Ingram, 1856, Mediterranean.
Ariadne, 26, sc., Capt. E. W. Vansittart, 1856, Channel Squadron.
Arrogant, 47, sc., Commod. W. Edmonstone, Ascension.
Asia, 84, Capt. G. T. Gordon, 1846, Portsmouth.
Assistance, sc. store-ship, Com. C. J. Balfour, 1859, East Indies.
Assurance, 4, sc., Com. C. M. Aynsley, 1856, Mediterranean.
Atalanta, 16, Com. T. M. S. Pasley, 1855, Devonport.
Atholl, 4, Com. E. Wilson, 1845, Greenock.
Bacchante, 51, sc. Rear-Admiral Sir J. Maitland, C.B., Capt. D. M. L. Mackenzie, 1859, Portsmouth.
Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. H. P. Knevitt, 1855, East Indies.
Barraconta, 6, st.-ves., Com. W. Wood, 1854, Woolwich.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service.
Blenheim, 60, sc., Capt. F. Scott, C.B., 1848, Coast Guard.
Boscawen, 70, Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., Capt. R. A. Powell, C.B., 1855, Cape of Good Hope, ordered home.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Brilliant, Com. C. H. Gardner, 1848, Naval Reserve Training Ship.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1849, Portsmouth.
Brune, st.-ves., Lieut.-Com. E. F. Lodder, 1854, Coast of Africa.
Buffalo, screw, Mas.-Com. A. Brown, 1854, particular service.
Bulldog, 6, st.-ves., Capt, Sir F. L. McClintock, 1854, Portsmouth.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. F. Peel, 1855, S.E. Coast of America.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, Mediterranean.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.
Caradoc, 2, st.-ves., Lieut.-Com. C. M. Buckle, 1847, Mediterranean.
Castor, Com. J. Palmer, 1855, Naval Reserve Training Ship.
Centaur, 6, st.-v., Com. E. D'o, D'a, Alpin, 1853, East Indies.
Centurion, 80, sc., Capt. H. D. Rogers, C.B., 1846, Channel Squadron.
Chesapeake, 51, sc., Vice-Admiral J. Hope, C.B., Capt. G. O. Willis, 1856, East Indies.
Clio, 22, screw, Capt. T. Miller, 1855, Pacific.
Clown, sc., gunboat, Lieut.-Com. W. F. Lee, 1855, East Indies.
Cockchafer, 2, sc. gunboat, Lieut.-Com. H. L. Holder, 1854, East Indies.
Conqueror, 101, sc., Capt. E. S. Sotheby, C.B., 1852, Channel Squadn.
Cordelia, 11, sc., Com. C. E. H. Vernon, 1855, Australia.
Cornwallis, 60, sc., Capt. G. G. Randolph, C.B., 1854, Coast Guard.
Cossack, 20, sc., Capt. R. Moorman, 1857, N. America and W. Indies.
Cressy, 80, sc., Capt. the Hon. C. G. J. B. Elliot, C.B., 1841, Meditrn.
Crocodile, 8, rec.-sh., Com. W. Greet, 1854, off the Tower.
Cruiser, 17, sc., Com. J. Bythesea, 1856, East Indies.
Cumberland, 70, Capt. C. F. Schomberg, 1851, Sheerness.
Curaçoa, 31, screw, Capt. A. Phillimore, 1855, S.E. Coast of America.
Cyclops, 6, st.-ves., Capt. W. J. S. Pullen, 1856, East Indies.
Dasher, 2, st.-ves., Com. P. De Saumarez, 1845, particular service.
Dauntless, 31, sc., Capt. L. G. Heath, C.B., 1854. Coast Guard.
Dee, 4, tr.-sh., Mast.-Com. T. C. Pullen, 1844, particular service.
Diadem, 32, sc., Capt. J. H. Cockburn, 1850, Channel Squadron.
Donegal, 101, sc., Capt. H. Broadhead, 1846, Channel Squadron.
Doris, 32, sc., Capt. E. Heathcote, 1852, Mediterranean.
Dove, 2, gunboat, East Indies.
Drake, sc., gunboat, Lieut.-Com. A. R. Blane, 1856, East Indies.
Eagle, 50, Capt. E. Tatham, 1854, Coast Guard.
Edgar, 91, sc., Rear-Adm. J. E. Erskine, Capt. J. E. Katon, 1856, Channel Squadron.
Edinburgh, 58, sc., Capt. E. C. T. D'Eyncourt, 1849, Coast Guard.
Elk, 12, Com. H. Campion, 1855, Australia.
Emerald, 51, sc., Rear-Admiral Sir A. Milne, K.C.B., Capt. A. Cumming, 1854, North America and West Indies.
Encounter, 14, sc., Capt. R. Dew, 1858, East Indies.
Esk, 20, sc., Capt. Sir R. J. Le M. M'Clure, C.B., 1850, East Indies.
Euryalus, 51, sc., Capt. J. W. Tarleton, C.B., 1852, Special Service.
Excellent, 46, gunnery-ship, Capt. R. S. Howlett, C.B., 1850, Ports mouth.
Exmouth, 90, sc., Capt. J. A. Paynter, 1854, Mediterranean.
Fairy, screw-yacht, tender to Victoria and Albert yacht, Portsmouth.
Falcon, 17 sc., Com. A. G. Fitzroy, 1857, Coast of Africa.
Fawn, 17, sc., Com. R. P. Cator, 1858, Australia.
Ferret, 8, Com. W. E. Fisher, 1856, particular service.
Firebrand, 6, st.-ves., Com. J. M. Bruce, 1855, particular service.
Firefly, 4, st.-ves., Com. A. L. Mansell, 1855, Mediterranean.
Firm, sc., gunboat, Lieut.-Com. W. R. Boulton, 1854, East Indies.
Fisgard, 42, Commod. Hon. J. R. Drummond, C. B., Woolwich.
Flamer, sc. gunboat, Lieut.-Com. H. M. Bingham, 1851, East Indies.
Flying Fish, 6, sc., Com. C. W. Hope, 1854, Portsmouth.
Forester, 2, sc. gunboat, Lieut.-Com. A. J. Innes, 1853, East Indies.
Formidable, 84, Capt. R. B. Watson, C.B., 1842, Sheerness.
Forte, 51, sc., Rear-Admiral Hon. Sir H. Keppel, K.C.B., Capt. E. W. Turnour, 1857, Cape of Good Hope.
Forward, 2, sc., Lieut.-Com. C. R. Robson, 1851, South America.
Furious, 16, st.-ves., Captain O. J. Jones, 1855, East Indies.
Fury, 6, st.-v., Com. J. C. Wilson (acting), East Indies.
Ganges, 84, Rear-Admiral R. L. Baynes, C.B., Capt. J. Fulford, 1848, Pacific.
Gannett, 11, Com. E. H. G. Lambert, 1854, Mediterranean.
Gladiator, 6, st.-ves., Com. H. D. Hickley, 1858, N. America and W. Indies.
Gorgon, 6, st.-v., Com. B. C. T. Pim, 1858, N. America and W. Indies.
Grappler, 2, sc., Lieut.-Com. A. P. H. Helby, 1849, Pacific.
Grasshopper, sc. gunboat, Lt.-Com. J. C. Tucker, 1855, East Indies.
Greyhound, 17, sc., Com. F. W. Sullivan, 1859, Channel Squadron.
Growler, 2, sc. gunboat, Lieut.-Com. H. E. Crozier, 1854. Mediterran.
Hannibal, 91, sc., Rear-Admiral G. R. Mundy, C.B., Capt. A. Farquhar 1849, Mediterranean.
Hardy, 2, sc. gunboat, Lt.-Com. A. G. Bogle, 1855, East Indies.
Hastings, 60, sc., Com. C. M. Luckraft, 1855, Naval Reserve Training Ship, Liverpool.
Haughty, 2, sc. gunboat, Lieut.-Com. G. D. Broad, 1851, East Indies.
Havock, 2, sc. gunboat, Lieut.-Com. C. Fairholme, 1851, East Indies.
Hewke, 60, sc., Capt. W. Crispin, 1852, Coast Guard.
Harald, 8, sur.-ves., Capt. H. M. Denham, 1846, Fcejee Islands.
Hecate, 6, st.-ves., Com. A. H. Hosken, 1853, Woolwich.
Hermes, 6, st.-ves., Com. W. E. A. Gordon, 1854, Woolwich.
Hero, 91, sc., Capt. G. H. Seymour, C.B., 1844, Devonport.
Hesper, sc. st.-ship, Master-Com. J. Loane, 1846, East Indies.
Hibernia, rec.-ship, Rear-Admiral H. J. Codrington, C.B., Capt. F. Warden, C.B., 1845, Malta.
Highflyer, 21, sc., Capt. W. A. Heath (acting), East Indies.
Himalaya, sc. store-ship, Capt. J. Seccombe, 1859, particular service.
Hogue, 60, sc., Capt. R. J. J. G. Macdonald, 1854, Coast Guard.
Hydra, 6, st.-ves., Com. R. V. Hamilton, 1857, North America and West Indies.
Icarus, 11, sc., Com. N. Salmon, V.C., 1858, North America and West Indies.
Illustrious, 72, Com. H. C. Harston, 1845, North America and West Indies.
Imaum, 72, Commod. H. Dunlop, Com. H. J. Grant, 1855, rec.-ship, Jamaica.
Impregnable, 104, Vice-Adm. Sir B. Reynolds, K.C.B., Capt. Lord F. H. Kerr, 1852, Devonport.
Imperieuse, 51, screw, Rear-Admiral L. T. Jones, C.B., Capt. R. Maguire, 1854, East Indies.
Implacable, 72, Com. J. W. Dorville, 1853, Training Ship, Devonport.
Industry, st.-v., 2, st.-ship, Mast.-Com. G. J. Hodges, 1841, particular service.
Inflexible, 6, st.-v., Com. G. A. C. Brooker, 1856, East Indies.
Intrepid, 6, sc., Com. J. H. Maryat, 1855, Mediterranean.
Iris, 26, Commodore W. Loring, C.B., Australia.
Jackal, 4, st.-v., Lieut.-Com. J. Simpson (C), 1845, particular service.
James Watt, 91, screw, Capt. E. Codd, 1831, Mediterranean.
Janus, sc. gunboat, Lieut.-Com. D. G. Davidson, 1855, East Indies.
Jasper, sc. gunboat, Lieut.-Com. W. H. Pym, 1849, West Indies.
Kestrel sc. gunboat, Lieut.-Com. H. Huxham, 1855, East Indies.
Lapwing, 4, screw, Com. M. F. O'Reilly, 1856, Mediterranean.
Leopard, 18, st.-v., Rear-Admiral Sir S. Lushington, K.C.B., Capt. F.B. Wainwright, 1856, S.E. Coast of America.
Leven, 1, sc. gunboat, Lieut.-Com. J. S. Hudson, 1854, East Indies.
Liffey, 51, sc., Capt. G. W. Preedy, C. B., 1855, Mediterranean.
Locust, 3, st.-ves., Lieut.-Com. J. B. Field, 1846, particular service.
London, 90, sc., Capt. H. Chads, 1848, Mediterranean.
Lynx, 4, sc., Lieut.-Com. H. Berkeley, 1854, Coast of Africa.
Lyra, 9, sc., Com. R. B. Oldfield, 1855, Cape of Good Hope.
Madagascar, store-ship, Capt. R. D. White, 1856, Rio Janeiro.
Mæander, 44, Capt. W. F. Burnett, C.B., 1854, Ascencion.
Majestic, 80, sc., Capt. W. R. Mends, C.B., 1852, Coast Guard.
Magicienne, 16, st.-ves., Capt. J. E. Commerell, (1859), E. Indies.
Marlborough, 131, sc., Vice-Admiral W. F. Martin, Capt. W. H. Stewart, C.B., 1854, Mediterranean.
Mars, 80, sc., Capt. J. N. Strange, 1854, Channel Squadron.
Medina, 4, st.-ves., Capt. T. A. B. Spratt, C.B., 1855, Mediterranean.
Megæra, 6, sc., Com. S. H. Henderson, 1855, Portsmouth.
Melpomene, 50, sc., Capt. C. J. F. Ewart, 1855, Mediterranean.
Mersey, 40, sc., Capt. H. Caldwell, C.B., 1853, Channel Squadron.
Mohawk, 4, sc., Com. E. H. Howard, 1857, Mediterranean.
Monarch, 84, Vice-Ad. E. Harvey, Capt. H. Harvey (1852), Sheerness.
Monkey, st.-tug, Sec. Mas. G. Syndercombe (act.), Woolwich.
Mutine, 17, sc., Com. W. Graham, 1858, Pacific.
Naiad, 42, store-sh., Mas.-Com. W. W. Dillon, 1843, Callao.
Nautilus, 6, Lieut.-Com. W. B. Grant, 1852, apprentice-ship.
Neptune, 91, sc., Capt. F. A. Campbell, 1857, Mediterranean.
Nereus, 42, store-depôt, Mas.-Com. J. C. Barlow, 1853, Valparaiso.
Niger, 14, sc., Capt. P. Cracroft, 1854, Australia.
Nile, 90, sc., Capt. E. K. Barnard, 1857, North America and West Indies.
Nimrod, 6, sc., Com. R, J. Wynniatt (1859.), East Indies.
Oberon, 3, st.-ves., Lt.-Com. F. G. C. Paget, 1852, S. Co. of America.
Odin, 16, st.-ves. Capt. Lord J. Hay, C.B., 1854, East Indies.
Opossum, 2, sc. gun-boat, Lieut.-Com. G. D. Bevan, (acting), E. Indies.
Orion, 91, sc., Capt. J. B. E. Frere, 1854, Devonport.
Osborne, st.-ves., Mas.-Com. C. H. K. Bower, 1842, Portsmouth.
Pearl, 21, sc., Capt. J. Borlase, C.B., 1855, East Indies.
Pelorus, 21, sc. Commodore F. B. P. Seymour, 1854, Australia.
Pembroke, 60, Capt. E. P. Charlewood, 1855, Coast Guard.
Perseverance, 2, troop-ship, Com. E. R. Power, 1850, Portsmouth.
Persian, 12, Com. E. Hardinge, 1856, Cape of Good Hope.
Pioneer, 6, screw, Com. H. A. Reilly, 1858, East Indies.
Plumper, 9, screw, Captain G. H. Richards, 1854, Pacific.
Porcupine, 3, st.-ves., Capt. C. H. Otter, 1854, particular service.
Princess Charlotte, 104, M.-Com., H. G. Thomsett, 1854, Hong-Kong.
Promotheus, 5, st.-ves., Com. S. S. Skipwith, 1856, Coast of Africa.
Pylades, 21, sc., Capt. M. de Courcy, 1852, Pacific.
Quail, 2, sc., gunboat, Lieut.-Com. N. Osborn, 1856, Mediterranean.
Queen, 86, sc., Capt. C. F. Hillyar, 1852, Mediterranean.
Racer, 11, sc., Com. A. M'. L. Lyons, 1858, North America and West Indies.
Racoon, 21, screw, Capt. W. C. Chamberlain, 1856, Mediterranean.
Ranger, 5, sc., Com. H. R. Wratislaw, 1858, particular service.
Recruit, 8, st.-ves., Com. D. Spain, 1856, Mediterranean.
Renard, 4, sc., Com. J. G. Goodenough, 1858, East Indies.
Renown, 91, sc., Capt. A. Forbes, 1846, Mediterranean.
Retribution, 28, st.-ves., Commod. H. E. Edgell, C.B., East Indies.
Rhadamanthus, 4, st.-ves., Master-Com. F. R. Sturdee, 1843, particular service.
Ringdove, 4, sc., Com. R. G. Craigie, 1856, East Indies.
Roebuck, 6, sc., Com. F. Marten, 1854, East Indies.
Rolla, 6, Lieut.-Com. C. G. Nelson, 1854, Portsmouth.
Royal Adelaide, 104, Rear-Admiral Sir T. S. Pasley, Bart., Capt. W. J. Williams, 1841, Devonport.
Royal Albert, 121, sc., Rear-Admiral Sir C. H. Fremantle, K.C.B., Capt. H. J. Lacon, 1856, Channel Squadron.
Russell, 60, sc., Capt. G. Wodehouse, 1854, Coast Guard.
St. Jean D'Acre, 101, sc., Capt. T. P. Thompson, 1847, Mediterranean.
St. Vincent, 102, Rear-Admiral the Hon. G. Grey, Capt. T. Wilson, 1853, Portsmouth.

Wrangler, 4, sc., Com. H. H. Beamish, 1858, Sheerness.

HOUSE OF COMMONS.—FRIDAY.

THE CHINESE WAR.

Sir Henry Willoughby urged the necessity of the Government laying on the table an estimate of the probable expense of the war with China, and said that if that course should not be taken he would submit a distinct motion on the subject.

Mr. Sidney Herbert declared that it was his intention to present an estimate in a short time.

ENLISTING RECRUITS.

Mr. W. B. Sheridan complained of the sharp practice resorted to by recruiting-sergeants, and instanced the case of a youth of sixteen, who he said had been drugged, and induced to enlist, but whom the surgeon, on his being brought before him, refused to pass.

Mr. Sidney Herbert did not doubt that in some cases men who enlisted might wish to break the contract into which they had entered. This was the case with engagements of another description—apprentices frequently took a dislike to their trades, but the law would not allow their indentures to be cancelled, and in the same way the soldier was bound to abide by the terms of his attestation. If a clear case of fraud were made out he always felt it his duty to bring it under the notice of the Commander-in-Chief.

Lord Hotham and Colonel Dickson expressed an opinion that it was almost impossible that a man could be fraudulently enlisted under existing arrangements.

GENERAL OF THE GUARD.

Major Stuart Knox wished to know whether the office of General Guard would be filled up after the five years' service of the officer now holding that command should have expired.

Mr. Sidney Herbert said that the matter would be considered, but his own opinion was in favour of the present system.

ARMY ESTIMATES.

The House went into committee of supply on the Army estimates, and the sum of 220,000*l.* (in addition to 100,000*l.* already voted) was proposed for miscellaneous charges.

Sir Frederick Smith, adverting to the sum required in this vote for the purchase of horses (105,000*l.*), said that the total charge for the remount during the last five years was 1,054,000*l.* On inquiring into the subject, he was surprised to find that our cavalry horses lasted a shorter time than those of any other country, although the forage and stables in England were better, as well as the breed of horses.

Mr. Sidney Herbert reminded the honourable and gallant member that Englishmen drove and rode faster than the people of any other country, and also worked their horses more severely when young.

Mr. Williams moved that the sum of 5750*l.* for repayment to the Indian government for the force maintained at Labuan should be omitted from the vote.

The House prepared for a division, but the honourable member for Lambeth was unable to find another teller, and consequently none took place, and the vote was agreed to.

On the question that the sum of 220,000*l.* (in addition to 100,000*l.* already voted) be granted for defraying the expense of the embodied militia, Colonel Dickson argued that the mere 28 days' training assigned to the disembodied militia was useless, and the money paid for that purpose was absolutely thrown away.

General Peel concurred in the opinion that 28 days' training was insufficient.

Colonel Sykes was not disposed to attach too great importance to mere mechanism. It should be remembered that the revolutionary armies of France, composed chiefly of raw and untrained recruits, beat the well-trained Austrians.

Mr. Sidney Herbert reminded hon. members that the note before the committee referred to the embodied militia, while they had been discussing the disembodied militia. He hoped that the regiments returning from India would enable the Government to maintain a permanent regular force, and to dispense with embodied militia altogether. The embodiment of the militia should be confined to cases of great emergency.

The vote was agreed to on the question that the sum of 34,000*l.* (in addition to 34,000*l.* already voted) should be granted for the Volunteer corps.

Mr. Selwyn pointed out the necessity of providing practice-grounds for Rifle Corps, and suggested that the Government should introduce and pass a bill giving compulsory, or, at least, permissive powers, for this purpose.

Mr. Griffith asked under the advice of what military authority the addition of 200 foot riflemen had been made to the Wiltshire Yeomanry Cavalry.

Mr. Sidney Herbert said that the arrangement had been suggested by the colonel of the regiment, approved of by Sir James Scarlett, and sanctioned by the Commander-in-Chief in the nature of an experiment. The suggestion of the hon. and learned member (Mr. Selwyn) relative to practice-grounds for Rifle Corps should receive the consideration of the Government.

The vote was agreed to, and the Chairman was ordered to report progress.

. By the removal of Captains Sackett Hope and Robert Fanshawe Stopford to the flag list, and by the death of Captain Charles Barker (1850), the following officers are placed on the increased half-pay of 12*s.* 6*d.* per diem, viz. :—Thomas Edward Laws Moore, Charles Farrel Hillyar, and Richard Robert Quin.

WICKHAM—May 24, at Stirling, the wife of Major Wickham, 33rd Regiment, of a daughter.

MARRIAGES.

BUCK—THACKER—May 23, at the parish church, Hove, by the Rev. James Vaughan, assisted by the Rev. Walter Kelly, vicar, Mr. William Buck, of New Cross, Kent, only son of the late Mr. William Buck, of H.M.'s Dockyard, Deptford, to Mary Elizabeth Carr, eldest daughter of Mr. William Thacker, Devil's Dyke, near Brighton.

HEREORD—THOMSON—May 23, at Prestbury Church, by the Rev. A. F. Thomson, assisted by the Rev. John Edwards, vicar of the parish, Captain Ivan Herford, of Her Majesty's 90th Regiment of Light Infantry, only son of the late Lieut.-Colonel Herford, C.B., formerly of the 23rd Welsh Fusiliers, to Marion Jane Caldwell, fourth daughter of the late Dr. Anthoney Todd Thomson.

SANDWITH—HARGREAVES—May 29, at St. Stephen's, Paddington, by the Lord Bishop of Labuan, assisted by the Rev. Harvey Brooks, M.A., incumbent, Humphry Sandwith, Esq., C.B., D.C.L., Colonial Secretary of Mauritius, to Lucy Ann, youngest daughter of the late Robt. Hargreaves, Esq., of Accrington, Lancashire.

WILLIAMS—JONES—May 19, at All Souls', Langham Place, the Rev. J. Williams, vicar of Gringley, Notts, to Mary, daughter of Vice-Admiral the Hon. Alexander Jones.

DEATHS.

BARKER—May 28, at 71, Grosvenor Street, Captain Charles Barker, R.N., aged 49.

BAYLEY—May 29, at St. Leonards, aged 78, William Butterworth Bayley, Esq., for many years a Director and at one time Chairman of the Hon. East India Company.

BOULTBEE—May 24, at Warwick, aged 71, Joseph Moore Boultbee, Esq., Lieut.-Colonel 1st Warwick Militia, of Springfield, in the said county.

CAMPBELL—May 9, at Abbeville House, Lorrha, Mary, widow of Colonel John Campbell, of Blackhall, Kincardineshire.

COLLINS—May 18, at the Curragh Camp, Ireland, Captain John Collins, of H.M.'s 26th Cameronian Regiment, aged 28, having been mortally wounded by a stray bullet while in the performance of his duty when at rifle practice.

COTTON—May 24, at Impington Hall, Cambridgeshire, aged 51, Alexander Cotton, of Landwade, in that county, Lieutenant R.N.

FITZGERALD—May 22, at 2, Harriet Street, Lowndes Square, James William, the infant son of Major William Fitzgerald.

HEYWOOD—May 23, at Stock, near Ingatestone, William Arthur Heywood, eldest son of the late Captain Heywood, of Colchester, aged 55.

MACKECHNIE—May 21, at Torquay, Captain R. W. Mackechnie, H.M.'s 5th Regiment Bombay N.I., aged 39.

MCDONALD—May 27, at Clarence Square, Gosport, Jane, the beloved wife of Thomas W. McDonald, Esq., Deputy-Inspector-General of Hospitals and Fleets.

PRIESTLEY—April 12, at Lahore, India, on his way to join the head-quarters of H.M.'s 46th Regiment, Ensign Francis Lloyd Priestley, fourth son of John Priestley, Esq., of Hirdrefaig, Isle of Anglesey, aged 19.

RIACH—March 25, on board the Istambool, at sea, James Pringle Riach, jun., Esq., of Bombay, son of the late Major W. A. Riach, 79th Regiment.

TIMBRELL—May 30, at Clifton, Captain C. W. Timbrell, of the Bengal Artillery, aged 38.

WARDEN—May 30, at the "Elms," Southsea, John Warden, Esq., R.N., aged 77.

WHITEHEAD—April 17, at Trichinopoly, Lieutenant George W. H. Whitehead, 34th Madras Light Infantry, eldest son of Walter H. Whitehead, Esq., Liverpool, aged 22.

By advices from Hong Kong, of April 11th, we learn that the battalions of the Military Train are being organised to form the nucleus of the transport of the army in China. Native drivers and animals are being collected; each troop being sent to a separate district to collect ponies and men with which to form a complete battalion.

General Sir C. and Lady Straubenzie arrived at Malta on the 23rd ult., from China, by the Peninsular and Oriental steamer Ripon, and continued their voyage for Southampton on the same day.

A Correspondent writes, "Many hints have been offered to the Editor of the ARMY AND NAVY GAZETTE, and remonstrances made on the proper application of the Regent's allowance in aid of Officers' Messes. I think it will be found on searching the records of the day that what led to that allowance originally was exclusively the cost of WINE to officers of the Army at home by reason of the Duty from which the Navy and Officers abroad were exempt; and the allowance was meant as a compensation on a very small allowance. If so, it is for consideration whether it is reasonably applicable to relief from mess expenses generally."

The steam-rams now in course of construction by Napier of Glasgow, and by the Thames Iron Shipbuilding Company (Limited), should have been, according to the terms of the respective contracts, ready for launching this month; but it is stated now, owing to various circumstances, that it is problematical if they will be ready to take the water any time this year. The contractors were bound by an enormous sum to complete their work at the specified period. They are now at the mercy of the Lords of the Admiralty.

Officers' bills discounted. Reversions purchased.
Life insurances effected free of charge.
Wines and all mess supplies furnished.
Every description of army business transacted.

FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O.M. 236 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9½ knots on a remarkably light consumption of fuel, being 2½ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to CURRY, KELLOCK, & Co., Brokers, Liverpool.

FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—700 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to

CURRY, KELLOCK, & Co., Brokers, Liverpool.

CUNNINGHAM'S PATENT SELF-REEFING TOPSAILS, &c.

Copy of a letter from Captain J. M. OUTRIDGE, of the Champion of the Seas, 1946 tons register, belonging to Messrs. J. BAINES & Co., dated Liverpool, April 14, 1860.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7s. 6d. to J. LOCK's City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Itlilien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund	... ...	£1,684,598 2 10
Annual revenue	... ...	289,231 13 5

Annual average of new assurances effected during the last ten years, upwards of half a million sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the office daily, at half-past one.

LONDON, 82, King William Street, E.C.
EDINBURGH, 3, George Street (Head Office).

Gen. Edw. Wynyard, C.B.	Wilbraham Taylor, Esq.
Archibald Hair, Esq., M.D., late Royal Horse Guards.	Lt.-Col. F. S. Sotheby, C.B.
Wm. Chard, Esq., Navy Agent.	Gen. Sir George Pollock, G.C.B.
Maj. William Lancey, R.E.	Rear-Adm. Michael Quin.
Gen. H. G. A. Taylor, C.B.	Vice-Adm, Sir G. R. Lambert, K.C.B.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.

WILLIAM M. JAMES, Secretary.

13, Waterloo Place, London, S.W.

INDIA.—OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.

Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.

C. DOUGLAS SINGER, Secretary.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.; and at Messrs. PARIS & Co., 10, St. James' Street, S.W.
EDINBURGH, 5, George Street.
DUBLIN, 65, Upper Sackville Street.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King Street, Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application. CHARLES INGALL, Actuary.

VOLUNTEER-SERVICE CLUB.—Members are informed that the CLUB was OPENED on the 15th inst., at 53, St. James's Street, S.W.

Officers holding commissions in Volunteer corps, and Gentlemen, being effective or non-effective members of such, are eligible for admission.

The Lieutenancy of Counties, and Officers belonging to the Yeomanry and Militia, are likewise eligible.

Admission by ballot.

The Annual Subscription is six guineas.

The annual subscription of members having no residence in London, and living beyond a radius of sixty miles therefrom, is three guineas.

There is no entrance fee, and no liability beyond the annual subscription.

The Club-House is now open for the accommodation of members.

Lists of rules and regulations, and every information, may be obtained at the Club-House, on application to the Secretary.

At a special meeting of the committee held on the 7th inst.—Lord ELCHO, M.P., in the Chair—the following noblemen and gentlemen were nominated a sub-committee to carry out the new arrangements:—

Sir Ralph Anstruther, Bart.
Captain the Hon. T. C. Bruce.
Major Brewster.
Dr. John Rose Cormack.
Lieutenant-Colonel Lord Elcho, M.P.
Thomas S. Egan, Esq.
Lieutenant-Colonel the Earl Grosvenor, M.P.
Lieutenant-Colonel G. M. Hicks.
Alexander Stavely Hill, Esq., D.C.L.
Lieutenant-Colonel the Hon. C. H. Lindsay.
Lieutenant-Colonel Viscount Ranelagh.
Captain Josiah Wilkinson.

By Order, WILLIAM DE CARTERET, Secretary.

Club House, 53, St. James's Street, S.W., May 16, 1860.

CRICKET.—REGIMENTAL OUTFITTER.—JOHN LILLYWHITE'S CRICKET WAREHOUSE, 5, Seymour Street, Euston Square, London, N.W. Every article connected with British Sports may be had. Illustrated Lists of Prices post free. John Lillywhite has lately been specially appointed to supply several of H.M. Regiments at home and abroad.

CRICKET.—J. D. BARTLETT, Manufacturer of the Repercussive and Cane-handle Bats, which are acknowledged by our best Cricketers the best driving bats ever made. They have a beautiful spring in the handle, and are warranted not to break. Clubs, Schools, and Regiments supplied at reduced prices, wholesale and for exportation.—171 Waterloo Road, S.W.

Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

MILITARY BAND INSTRUMENTS.

J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.

J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.

Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35, Henrietta Street, Covent Garden, London, W.C.

TO THE MEMBERS OF VOLUNTEER RIFLE CORPS.

Just published, price 6d.

THE BUGLE CALLS, AS USED IN LIGHT INFANTRY FIELD EXERCISES, with Words adapted and arranged to be Sung to them, which will be found a great assistance to the memory, as the distinguishing characteristics of each "Call" can thus be quickly learnt and easily remembered. Arranged by J. BROOKS (12th Middlesex Rifles).

Published by R. COCKS & Co., 6, New Burlington Street, Regent Street, W., and also to be had of J. WILLIAMS, 123, Cheapside, E.C.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

LANDED INVESTMENTS AND COUNTRY PROPERTIES.

MR. W. A. OAKLEY respectfully announces that he has great demand for LANDED PROPERTIES, Residential Estates, Farms, Hunting Boxes, Shooting Quarters, Advowsons, &c., and will be glad to receive the detailed particulars of such from landowners, proprietors, solicitors, trustees, and others, with the understanding that no charge whatever is made them, unless a treaty be concluded by Mr. Oakley, and then merely the usual commission, nothing without; and such commission to be paid to Mr. Oakley only on completion of purchase through his agency.—Auction and Land Offices, 8, Regent Street, Waterloo Place, London, S.W.

MONEY TO LEND AT 5 PER CENT.—TO OFFICERS, NOBLEMEN, AND GENTLEMEN.—If you require money upon real estate for any term of years, or upon reversionary interests—life estates or marriage settlements; or if you want ADVANCES, LOANS, or DISCOUNTS for short periods on Bonds, joint notes, or bills of exchange, you can apply personally between 1 and 5 o'clock daily, or by letter addressed, MR. COLLINS, 13, Duke Street, St. James's Square, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to MR. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel, without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28A, Regent Street, Piccadilly, W.

The following Soldiers' Daughters were Elected into the Home on the 31st ult.:—

	Votes.
Martha Hamilton, 74th Regiment, total orphan	3722
Ada M. Beacom, 27th Regiment, ditto	3680
Mary Ann Rudman, 62nd Regiment, ditto ...	3580
Mary Elizabeth Malone, R.A., ditto	3500
Catherine O'Brien, 82nd Regiment, ditto ...	3466
Georgiana Anne Reid, Scots Greys, ditto ...	3455
Ann Hamilton, 74th Regiment, ditto	3408
Catherine Elizabeth O'Brien, R.A., ditto... ...	3340
Martha Rudman, 62nd Regiment, ditto	3309
Rachel Russell, 53rd Regiment, ditto	3263
Eliza Tate, 60th R. Rifles, motherless	3202
Mary James, 1st Life Guards, fatherless... ...	2704

Though the objects of the Soldiers' Daughters' Home are essentially national, yet the Committee grieve to state that from the National Exchequer no assistance whatever is received, either through the War Department or the Committee of Council on Education.

An application to the Commissioners of the Patriotic Fund for a grant was refused, on what grounds the Committee of the Soldiers' Daughters' Home are at a loss to understand, inasmuch as the Royal warrant, by which the Commissioners of the Patriotic Fund were authorised to receive voluntary subscriptions, distinctly declares that one of the objects of that fund should be "to increase, extend, or make additions to any of our royal or other charitable institutions already founded for similar purposes within our United Kingdom." It is, therefore, the more needful for the friends of the soldier, and for the advocates of a sound, scriptural, and industrial education, to rally round the managers of the Home, and so to increase its income, that no soldier's motherless daughter shall be refused admittance.

The Committee beg to add that there are now upwards of 100 candidates for admission to the Home, principally the daughters of soldiers in India, and whom they are unable to admit for want of funds. Under these circumstances they urgently and confidently appeal to the friends of the soldier for immediate assistance.

The Soldiers' Daughters' Home is open to visitors from 10 o'clock, a.m., to 5, p.m., on every day of the week (except Saturday and Sunday).

A donation of five guineas constitutes a Life Governor, with two votes at all elections to the Home.

A donation of two guineas and a-half entitles the donor to one vote for life at all elections.

An annual subscription of one guinea entitles the subscriber to one vote at all elections.

Subscriptions and donations thankfully received by the Treasurer, Sir John Kirkland, 17, Whitehall Place, S.W.; by the bankers, London and Westminster Bank, St. James's Square, S.W., and Messrs. Masterman and Co., Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the office, 7, Whitehall, opposite the Horse Guards, S.W. Post-office orders should be made payable to the Secretary, Mr. John Marsh, upon the Charing Cross post-office.

H. L. POWYS, Major, Chairman of the Committee.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

WINES REDUCED. — Excellent Dinner Claret, 24s. and 30s.; Sherry, Pale or Gold, 24s. and 30s.; Chablis, first quality, 36s.; Still Hock and Moselle, 36s., 42s.; Sauterne, 42s.; Burgundy, 36s., 42s.; Sparkling Champagne, 42s.; Sparkling Hock and Moselle, 48s.; Old Bottled Port, 42s., 48s. per dozen. Carriage paid by rail. Price lists on application. MARSHALL & SON, Importers of Foreign Wines, Purveyors to the Queen, 20, Strand, W.C.

ALLSOPP'S PALE ALE. — FINDLATER, MACKIE, TODD, & CO., beg to announce that they are now prepared to supply ALLSOPP'S PALE ALE of the finest quality in bottles and casks of 18 gallons and upwards. Stores, under London Bridge Railway Station. Entrance, 215, Tooley Street, S.E.

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the Finest Condition of Messrs. HARRINGTON PARKER, & CO., who have REDUCED the Price of this highly esteemed beverage to 4s. 6d. per dozen Imperial Pints.
2s. 9d. ditto Imperial Half-pints.
Address, HARRINGTON PARKER, & Co., 5½, Pall Mall, London, S.W.

TO PRESIDENTS OF MILITARY MESSES.

BAVARIAN TONIC BEER.—This highly popular Tonic Beer is now in its highest perfection; it is pure and refreshing, and is patronised by most of the leading members of the medical profession. Price, for cash, 4s. per dozen quarts, delivered to all parts of London free. Best Devonshire Cider, quarts 7s., pints 4s. Hereford Rough, quarts 8s., pints 4s. 6d.
C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

EAU-DE-VIE.—This Pure PALE BRANDY, though only 16s. per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 34s. per doz.; or securely packed in a case for the country, 35s.—HENRY BRETT & Co., Old Furnival's Distillery, Holborn, E.C. To be obtained only at their Distillery.

ANDREWS' DUBLIN WHISKEY.—Two gallons of the finest old Dublin Whiskey forwarded carriage paid to all parts of England for 40s., case and bottles included. Other qualities at 14s., 15s., and 16s. per gallon, according to age.
ANDREWS & Co., Wine Merchants, recommend the following WINES at the reduced Duties:—Pure St. Julien Claret, free from acidity, 24s. and 28s. per doz.; St. Estephe, superior, 32s.; excellent Pale and Golden Sherry, 26s.; superior do., 30s. and 32s.; very superior Pale, Dry, or Golden Sherry, 36s.; Vino de Pasto, a pure Ammontillado Sherry, 42s.; Old Port, fresh bottled, 30s.; superior old tawny Port, 36s.; pure pale Cognac Brandy, 24s. per gallon; superior old Cognac, 30s. per gallon; choice old Liqueur Brandy, 72s. per dozen.
Priced Lists of all Wines forwarded on application.
ANDREWS & Co., 19, 20, 21, & 22, Dame Street, Dublin.

KINAHAN'S L. L. WHISKY v. COGNAC BRANDY. — This celebrated OLD IRISH WHISKY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s. 6d. each, at most of the respectable retail houses in London, by the appointed agents in the principal towns in England; or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET.—Observe the red seal, pink label, and cork branded, "Kinahan's L. L. Whisky."

CYDER AND PERRY IN THE GREATEST PERFECTION. — Devonshire Cyder, 8s. qrts., 4s. 6d. pts.; Cockagee Somerset Cyder, 14s. qrts.; Old Field Perry, 18s. qrts., 10s. pts.; the real Taynton Squash Perry, 25s. qrts., 15s. pts. Hampers and bottles, 3s. per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.
GALLERY, 179, REGENT STREET, W.

THE VOLUNTEERS' PICTURE FRAMES. —The Cheapest House for every description of Picture Frames. Country dealers supplied with every description of Gold and Fancy Wood Moulding. Three-quarter Gilt Beads at 7s. per doz. 6 feet, at GEORGE REES, 129, Drury Lane, W.C.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald*.
Liverpool, 134, Duke Street.

YOUTH, BEAUTY, AND ARTICULATION.—Mr. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10s. per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10s. 6d. per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11s., 22s., and four quantities in one for 33s. Attendance daily, from 10 till 6.

TEETH. — MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.

Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.

Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post freee for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

A BOON TO NERVOUS SUFFERERS.

Frames of every description, suited to the above, at wholesale prices. Shippers and exporters supplied. An Illustrated Guide to Fine Art Furnishing, of 2000 works, forwarded on receipt of stamp.—PAUL JERRARD & SON, Fine Art Gallery, 170, Fleet Street, E.C.

NEW WORK by the AUTHOR of "CURIOSITIES OF WAR."

Preparing for early Publication in Monthly Parts, price One Shilling, with fac-simile Illustrations printed in Colours,

MEDALS OF THE BRITISH ARMY,

AND

HOW THEY WERE WON.

BY THOMAS CARTER,
AUTHOR OF "CURIOSITIES OF WAR, AND MILITARY STUDIES."

"What is a ribbon worth to a soldier?
Everything! Glory is priceless!"—SIR E. B. LYTTON.

NO general history of these Distinctions having been yet attempted, it is considered that a Work which shall afford a clear insight into the circumstances under which such Honours were gained is likely to be received with favour by the public, when accompanied by fac-similes printed in colours of the Medals and Ribbons, and interspersed with notices of Regimental and Individual Acts of Heroism, and Military Statistics of an interesting character.

In order to render this National Work generally accessible, it will be published in Three Sections, of about Five Parts each, commencing with the Crimean Campaign:—the First Section, containing "THE CRIMEAN CAMPAIGN," Dedicated, by Permission, to MAJOR-GENERAL THE HON. SIR JAMES YORKE SCARLETT, K.C.B., Adjutant-General of Her Majesty's Forces, &c., &c.—to be followed by the remaining two portions, the one comprising the Services enumerated in the General Order of the 1st of June, 1847, from the Battle of Maida, and terminating with Waterloo—Dedicated, by Permission, to HIS GRACE THE DUKE OF RICHMOND, K.G.;—the concluding Section being devoted to the Campaigns in India, Egypt, China, &c., from 1799 to the suppression of the Indian Mutiny, and including the Medals accorded with annuity, gratuity, or otherwise, for distinguished conduct and long service.

When completed, the series will form a handsome volume, elegantly illustrated, which will contain a record of unsurpassed Military Prowess; and it is anticipated that such an attempt to perpetuate the memory of the brave, by bringing together the gallant deeds of officers and men, will meet with patronage from a public so deeply indebted to, and interested in, the proud achievements of the British Army.

NO MORE MEDICINE

FOR INDIGESTION (DYSPEPSIA), HABITUAL CONSTIPATION, PALPITATION, NERVOUS, BILIOUS, AND LIVER COMPLAINTS, DEBILITY, DROPSY, COUGH, ASTHMA, CONSUMPTION, BRONCHITIS, SORE THROAT, FEVERS.

DU BARRY'S DELICIOUS HEALTH RESTORING

REVALENTA ARABICA FOOD.

Certificate No. 36,418. In chronic dyspepsia (indigestion), nervousness, palpitation, constipation, diarrhœa, bilious and liver complaints, cough, debility, asthma, and incipient consumption, we find it the safest remedy. Andrew Ure, M.D., F.R.S.; Dr. Harvey; Dr. Bright; Dr. Shorland; Dr. Campbell; Mr. S. E. Smith, M.R.C.S.L.

We extract a few out of many thousand cures:

Cure No. 1771. Lord Stuart de Decies of many years' dyspepsia. Cure No. 49,832. "Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting, have been removed by Du Barry's excellent Food." Maria Joly, of Lynn, Norfolk. Cure No. 53,816. Field Marshall the Duke of Pluskow, of dyspepsia, constipation, nervousness, and liver complaints. Cure No. 47,121, Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. Cure No. 54,816. From the Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk: In all cases of indigestion, and particularly when the liver is affected, I consider it the best of all remedies.—JAMES T. CAMPBELL.

FOX HUNTING.

Now ready, Second Edition, with Portrait and Illustrations, 8vo. 15*s.*

REMINISCENCES OF THE LIFE OF THE LATE THOMAS ASSHETON SMITH, Esq.; OR, THE PURSUITS OF AN ENGLISH COUNTRY GENTLEMAN. By SIR JOHN E. EARDLEY WILMOT, Bart.

"Sir Eardley Wilmot has compiled a series of graphic incidents and sketches of the life of Thomas Assheton Smith—a name that will long be remembered, not only by the farmers and riding men of the counties he hunted, but by all who are disposed fairly and justly to appreciate the lights and shadows which constitute the character of 'The English Country Gentleman.'"—*Quarterly Review.*

Dick Christian.—"No man that ever came into Leicestershire could beat Mr. Smith."

Nimrod.—"That most conspicuous sportsman of modern times, Thomas Assheton Smith; combining the character of a skilful sportsman with that of a desperate horseman, perhaps his parallel is not to be found; and his name will be handed down to posterity as a specimen of enthusiastic zeal in one individual pursuit, very rarely equalled."

The Druid.—"He was the mightiest hunter that ever 'rode across Belvoir's sweet vale' or wore a horn at his saddle bow."

Delme Ratcliffe.—"I could nowhere find a more fitting model for the rising generation of sportsmen. He was an instance of the very rare union of coolness and consummate skill as a huntsman, combined with the impetuosity of a most desperate rider; and not only was he the most determined of all riders, but equally remarkable as a horseman."

JOHN MURRAY, Albemarle Street.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives 25 PUPILS to educate for the Royal and Indian Navies, the Army, Woolwich, and Addiscombe. Terms, 70, 80, and 100 guineas, according to age. Upwards of 70 pupils have passed sine 1854.—St. Mary's Hall, Southsea, Hants.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil thea lvantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

VOLUNTEER CORPS.—Contracts entered into for the equipment of entire regiments. Single suits supplied.

PORTABLE FURNITURE.—An Illustrated Catalogue, with design, size, and price of every requisite for the barrack-room forwarded on application.

MESSRS. OSLER, 45, Oxford Street, London, W., beg to announce that their NEW GALLERY (adjoining their late premises), recently erected from the designs of Mr. Owen Jones, is NOW OPEN, and will be found to contain a more extensive assortment of GLASS CHANDELIERS, Table, and Ornamental Glass, &c., than their hitherto limited space has enabled them to exhibit.

ICE, and REFRIGERATORS for preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY, now removed to 140, Strand, W.C., of the best make and at the lowest cash prices. No agents are appointed in London for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2*s.* 6*d.*, 5*s.*, 9*s.*, and upwards, forwarded any distance into the country by "goods" train, without perceptible waste. Wine-coolers, Ice-cream Machines, Ice Planes for sherry-cobblers, freezers, moulds, &c. Detailed printed particulars may be had, by post, on application to the WENHAM LAKE ICE COMPANY, 140, Strand, London, W.C.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.

Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, June 2, 1860.

☞ *The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance, postage not included. Post-office orders to be made payable to* JOSEPH SMITH.

SOME of the special complications which might have been expected to arise out of the very peculiar and anomalous position of the Indian army with reference to the English administration at home, are at this moment clouding the horizon in China, and promising to raise as nice a little storm as was ever conjured up by our War Office wizards, with all their practised ingenuity in the cabalistic art of how not to do it themselves, and how to prevent any one else from doing it for them.

Men, stores, artillery, and commissariat have been sent from this country to China with a splendid prodigality, which would have made our hearts to rejoice in the olden time of Crimean destitution. Men, stores, artillery, and commissariat have also been sent from India with rival profusion, and London and Calcutta vie with one another in efforts of liberality which must disturb Joe Hume's rest in his grave.

As for the men and the artillery, the more the merrier. By the time garrisons have arrived and been left at Canton, Hong Kong, Cowloon, Shanghae, Chefoo, and the various other and sundry strategical posts and depôts to be occupied; and when cholera, fever, and sun-stroke, have done their worst; there will not probably be any superabundance of men or material. And for stores, a little more porter, rum, and lime-juice, will do us no harm; for what Johnnie can't consume, Jack can become heir to. But the dose of Commissaries, English and Indian—there's the rub! Too many cooks will spoil the broth. Our goose will be cooked after an astonishing fashion; roast, curried, or devilled, as English or Indian happens to get the upper hand. There will be such a hash as only English cooks could imagine or compound; such a mess as creates fear and wonder in our allies, whose notions of cookery are less original or extravagant.

The English Commissaries are armed with imperial authority; the Indian Commissaries are nominated by the Indian Viceroy; the former are in possession, but the latter have the ear of the general. The former bear the Crimean brand on their downcast brows; the latter are radiant with Delhi and Lucknow successes. The former are civilians, with their noses on the War Office grindstone; the latter have the prestige of military rank, and having a resource besides the Commissariat, they can speak out without being utterly ruined by their rashness. The former have a Deputy-Commissary-General at their head, and claim the command; the latter, though under an Assistant-Commissary-General, conceive it derogatory to serve; and they moreover expect from India a Commissary-General, who will unquestionably be the senior; they may, nevertheless, be out-manœuvred, as the British Commissary holds the keys of the military chest from the Treasury, and his appointment from the Minister for War.

In such jeopardy stand the prospects for the subsistence of the Army. The Transport, as means by which the subsistence shall reach the Army, is not without its little difficulties also. It appears that the Commissariat is to undertake its old duty of providing the entire transport—a duty temporarily usurped by the Land Transport Corps in the Crimea. This corps is represented in China by the Military Train, a cavalry corps which fights after the ancient British fashion, from their chariots; by the Chinese Coolie corps, some 3000 or 4000 strong, biped beasts of burden of incomparable value; and some 3000 or 4000 ponies, rough and ragged, collected on the coast of China, Japan, and the Straits, for Commissariat stores and baggage. These splendid troopers, with their dragoon officers; these funny, nondescript, but efficient Coolies, under officers of the Madras Army; and this tag-rag and bob-tail of pack-ponies, are all to be indiscriminately dammed up in a heap, and to be put somehow under the Commissariat.

Such are the primary discordant elements with which the military machine in China is to be kept going, and discordant as they are, we nevertheless fondly hope they may answer somehow. We don't exactly see the way, but we have great faith in British pluck and bottom getting us somehow out of the messes British stupidity constantly gets us into. We can only compare our administrative machinery to an old French diligence which, with much jangling, with twice too many horses pulling in every direction; in spite of hard roads, much jolting, cursing, noise, and friction; did by some incalculable series of Providential interventions, generally escape from the smash it deserved to the end of its journey. But if, unlike the French diligence, our machine does break down or upset, who will be to blame? Who shall we hang? Not—we make a timely protest—the ill-matched team. They, poor devils, will be sorely goaded and strained enough in their unhappy task. It might be well this time to look after the author of the awkward machine; to look at home to see who has concocted the ill-contrived and worse adapted plan; and, by way of commencing in time, the Committee on Military Organisation, now sitting, might vary its theoretical evidence about military matters in general, with a postscript on their application to the campaign in China in particular—*verb. sap.* It will be a grand opportunity for Sir James Graham.

In another place will be found the commencement of a paper on the organisation of the Indian Army from the pen of a distinguished officer, who, to the practical knowledge of a soldier, adds the large views of a diplomatist and statesman. We are overwhelmed with projects from various quarters relating to this question, which we firmly believe to be most intimately connected with the safety and future prosperity of the whole empire; but although we cannot quite agree with the whole of the arguments nor approve of all the views advocated by and enforced by those who would maintain or restore the Indian Army, and a large local European force: we have shown, by our previous remarks on those questions, that our sense of the difficulties of amalgamation induces us to regard that scheme with diffidence.

The adoption of the principle will, we believe, be attended with the most serious impediments, not merely local, but general and constitutional; but still it is the only alternative which seems open to us, and we await with much impatience the statement which Sir Charles Wood is about to make, in the preparation of which he has sought counsel and aid from every quarter, and has put into play the machinery of every government department in Europe or in India, from which assistance could be procured.

The returns which have been laid upon the table of the House are full of topics for reflection. In the first place, we have an exceedingly able report from the Political and Military Council of India, in which the whole of the arguments for the amalgamation and absorption of the local army are combated with vigour, and in which, indeed, the Council go so far as to restore the old native army, and make the local European force two-thirds of the whole of European infantry, reserving the Artillery and Enfield Rifles to the Europeans exclusively. They insist on the paramount authority of the Viceroy, subject to no control except that of the Secretary of State for India. They recommend the appointment of a Minister for War, and would change the title of the Viceroy, or superadd to it that of Captain-General of the Forces in India; and they consider it questionable whether there should not be separate commanders for the Punjab, for the north-west provinces, and for Bengal, with two for Bombay and Scinde, and two for Madras. Sir John Lawrence and Captain Eastwick, however, think that all the native infantry regiments should be organised on the irregular system; Mr. Willoughby would exempt the regiments which remained faithful; but a small minority of two, dissenting from the larger minority, approve of Lord Canning's proposition for the organisation of the Bengal Army, and disapprove of the system of irregulars. Mr. Hammack, to whom was assigned the task of computing the comparative cost of a local and a Queen's army, has fixed rather a high sum, as the excess of the expense of the former over the latter, which he appears to substantiate, notwithstanding some objection by Sir Alexander Tulloch. The extracts of letters from Lord Elphinstone, Lord Clyde, Sir Patrick Grant, Sir Hugh Rose, and Sir W. Mansfield, are all in favour of an amalgamation, and in expressing their opinion they are sometimes obliged to use language which may be considered derogatory to the *esprit de corps* and the discipline of the late Indian Army. But when Lord Clyde points out the want of loyalty in the old European soldiers in the local army, who did not come forward to give information respecting the mutinous spirit in their regiments as an evidence that local European soldiery cannot be trusted; he overlooks the fact that the Queen's troops may become localised in feeling after a six or seven years' service in India, and that a mutiny in British regiments, masters of the situation, would be an evil greater than any to which our empire has hitherto been exposed.

A violent outcry has been raised against Lord Clyde, because he stated that the Inspecting-Generals were unanimous in reporting that Sepoy officers were incompetent to organise young British battalions or cavalry regiments. But Lord Clyde distinctly declares that the Indian officers are not in sufficient numbers to look after the new local regiments; and that the uncertainty of their position was to the last degree prejudicial to them; and he certainly never made any accusation against the morale of these officers so strong as that of Sir John Lawrence, Mr. Willoughby, and Captain Eastwick, who declare that many European officers with native troops are useless, because their idle garrison life generates habits prejudicial to discipline, and affords a bad example to the native soldiers. In answer to those extracts, are most powerful replies by Sir John Lawrence, Colonel Durand, and Captain Eastwick; none of them advert to the fact, which we state positively and distinctly, that a portion of the Queen's troops were implicated with the discontented soldiers of the local army in their mutinous designs, and promised them assistance. But it is Sir James Outram who combats with the greatest force of authority, the largest amount of experience, the strongest grasp of intellect, the widest variety of illustration, and the most powerful argument, the whole of the proposals for amalgamation, and the reasoning of those who recommend them.

In these papers will be found the nidus of all the arguments which can be used in the forthcoming debate, and in our next number we propose to give a *resumé* which will enable our readers who may not be intimately acquainted with the state of the case to appreciate the value of the positions maintained by the friends of a local Indian Service, and by its opponents, who see in an amalgamated army the sole means of security for our Indian empire.

The communication from a distinguished Indian officer, to which we have already called attention, in our present number is only an *exposé* in a new form of the ideas of those who resist amalgamation.

Although nothing is yet settled respecting the vacant regiment of Guards, we believe it is most probable that the Duke of Cambridge will be moved from the Scots Fusilers Guards to the Coldstreams, of which his father the late duke was for many years colonel. To the colonelcy of the Fusilier Guards either Lord Clyde or the Marquis of Tweddale will not improbably be appointed. There will be two Line colonelcies vacant in consequence of the death of Sir William Chalmers, and after a recent appointment more than ordinary curiosity is manifested as to the kind of officers in whose favour the selection will be made.

THE ARMY.

King's Dragoon Guards. We are sorry to have to report the death of Cornet Riversdale Elliot, a promising young officer of this regiment, at Madras, on the 30th of April. He was the third son of Mr. John Lettsome Elliot, of Pimlico, and had been more than two years in the regiment. Captain Bradbury, Lieutenant Grews, and Cornet Sedley, have left Madras for China.

8th Hussars. Brevet-Major Clowes has obtained eighteen months' leave to England.

10th Hussars. The detachment stationed at Woolwich, are ordered to be in readinesss to leave for Aldershot Camp.

14th Light Dragoons. The head-quarters division has arrived at Newbridge.

Royal Artillery.—The following removals of officers of Royal Artillery are ordered to take place, viz. :—Lieut.-Colonel Mountain, from Malta to Shorncliffe; Major Bolton, from Woolwich to Malta; Captain Cardew, from Portsmouth to Woolwich; Captain Tweedie, from Bengal to Portsmouth; Lieutenant Stirling, from Aldershot to Gibraltar.

The I Battery of Artillery has left Norwich for Woolwich. Captain Phelips, Lieutenant Leacock, Lieutenant Schack, and 106 non-commissioned officers and gunners belonging to the 1st Brigade Garrison Artillery, on Wednesday returned to Woolwich, having terminated a course of experimental gun practice at Shoeburyness.

Royal Engineers. — The following alterations have recently taken place in this corps, viz. :—Lieut.-Colonels: Burgmann, on passage to the Mauritius; White, on passage to the Cape of Good Hope; Brown, C.B., on passage to the West Indies. Colonel Harness, C.B., arrived from India on sick leave. Majors: Armit, from Jamaica, on sick leave; Collison, from Corfu, on leave. Captains: F. E. Cox proceeded to Turkey on special service; James, to Carlisle, on survey; Barber, on passage home from the Mauritius, on sick leave. Lieutenants: Webber, Festing, Walker, and Sitwell, returned from India, on leave; Berkeley, on passage from India; Paterson and Crozier, on passage from India to the Mauritius; Goodall, on passage to Jamaica; Peters, removed from Weymouth to Aldershot; Hamilton, on passage to Mauritius; Haslett and Halg, from Chatham to Aldershot. Adjutant Moore and Veterinary Surgeon Mayer to Aldershot. The 4th company, on passage from India to England; 11th company, removed from India to the Mauritius; 13th company, from Dublin to Edinburgh; 21st company, removed from India to the Mauritius. The 18th company having completed the erection of coast defences at Weymouth, has removed to Aldershot.

Lieutenant J. H. Maitland, who has recently arrived on sick leave from India, has been appointed second field-work instructor at the Royal Engineer establishment.

Captain C. E. Harvey, now doing duty with the Royal Engineers at Portsmouth, succeeds Captain C. E. Gordon in the adjutancy of the Royal Engineers at head-quarters.

Coldstream Guards. Captain the Hon. W. Feilding and Lieutenant Buller will shortly obtain promotion by the retirement of Lieut.-Colonel Byng.

Scots Fusilier Guards. Lieut.-Colonels Haygarth and Mure are about to retire from the Service, by which Captains Campbell and Tottenham, and Lieuts. Elwes and Stracey obtain promotion.

20th Regiment. Ensign T. A. Davies has been granted leave from the depôt at Chatham until required to embark with detachments for India.

23rd Fusiliers. Lieut. Tilley has arrived home from India in the Belgravia troopship in charge of detachments of discharged soldiers.

24th Regiment. Ensign W. M. Brander, and Ensign H. F. Bronneker, have been granted leave from the depôt at Chatham until required to embark with detachments for India.

28th Regiment. Lieutenant Webb has arrived in England from Bombay in the Istamboul.

29th Regiment. Major-General Cunynghame, who has been appointed to the command of the Scinde division of the Bombay army, arrived at Kurrachee from Bombay on April 30.

31st Regiment. Lieut.-Colonel Spence, Captain Baldwin, Lieutenants Cassidy, Gould, M'Intyre, Ensigns Tibbets, Maynard, Lieutenant and Adjutant James, Quartermaster Kettyles, Assistant-Surgeon Giraud, Captains M'Bean and Swettenham, Ensigns Huxham, Butler, Gow, and Surgeon Atkinson, and 540 rank and file of Her Majesty's 31st regiment, have arrived at Hong Kong from Bombay in the Athletæ.

35th Regiment. Ensign W. Paste has been granted leave from the depôt at Chatham until required to embark with detachments for India.

42nd Highlanders. Captain Macpherson has arrived in England in charge of about 260 invalids of various regiments from India.

43rd Regiment. Lieutenant H. Garton has been granted leave from the depôt at Chatham until required to embark with detachments for India. Lieutenant Talbot and Assistant-Surgeon Madden, have sailed from Madras for England in the Ascendant.

49th Regiment. Five officers and 124 rank and file have arrived at Aldershot from the depôt at Belfast.

Royal Marines.—The annual field-day and inspection of the Chatham (1st division of Royal Marine Light Infantry, was held on Wednesday by Major-General S. R. Wesley, Deputy Adjutant-General. The battalion, in consequence of the success which has attended the efforts of the various recruiting parties, is now very strong, the number of men present on Wednesday being only a few short of 1100, exclusive of several hundred men absent in hospital, doing duty afloat, or on the recruiting service. At the conclusion of the field-day movements General Wesley expressed to Colonel Rea his unqualified approbation of the manner in which both officers and men had acquitted themselves.

A naval court-martial was held in Malta Habour on the 26th ult., to try Captain Butcher, R.M., of H.M.S. London, on a charge of being drunk on the evening of the 17th ult. The accused pleaded guilty, and threw himself on the mercy of the Court, which condemned him to be dismissed the ship, and placed at the bottom of the list.

52nd Light Infantry. Lieutenant W. Owen of Her Majesty's 52nd, Sealkote, has been sentenced to be reprimanded for "over indulgence in wine." When in a state of intoxication he entered, without permission, the sleeping apartment of Ensign J. C. W. Lever, of the same regiment, when that officer was in bed, and refused to leave the room when desired.

55th Regiment. On Monday 35 officers, 45 sergeants, and 743 privates of the 55th Regiment arrived in Dublin from the Curragh Camp, and proceeded by the Iberian and Foyle for Portsmouth, *en route* for Aldershot, where they arrived on Wednesday. On the departure of the corps from Ireland the following Division Order was issued :—"The 55th Regiment being under orders to proceed from the Curragh on Monday next for embarkation to England, after three years' acquaintance both in camp and in quarters with this corps the lieut.-general is unwilling that the 55th Regiment should pass from his command without expressing to Lieut.-Colodel Hume, the officers, non-commissioned officers, and men his entire approbation of their conduct. Soldier-like in appearance, steady and efficient on parade, and smart in the field—the lieut.-general has always regarded the 55th Regiment as one of the best in his division, and he feels assured, wherever it may be stationed, the same efficiency will be shown, the same discipline maintained, and the same good conduct evinced which have marked its career while under this command, and thereby entitled it to this brief, yet no less sincere acknowledgment of its merits on the part of its divisional general."

56th Regiment. Paymaster Finlay has arrived home from India.

60th Rifles, 2nd battalion. Colonel Butler, Captains Warren and Farquharson, Lieutenants Henderson and Cox, Ensigns Butler, Prust, Morris, Stewart, Dr. Young, and 247 men have arrived at Hong Kong from Calcutta.

72nd Highlanders. Captain Best has arrived home from Bombay, in command of invalid detachments, on board the Istamboul.

75th Regiment. Lieutenant H. P. Dawson and Ensign A. S. Leatham have been granted leave from the depôt at Chatham, until required to embark with detachments for India. Capt. Justice has arrived home in command of the detachments in the Belgravia.

77th Regiment. Ensign O. H. Blount has been granted leave from the depôt at Chatham until required to embark with detachments for India.

81st Regiment. Ensign R. J. M'Donald has been granted leave from the depôt at Chatham until required to embark with detachments for India.

83rd Regiment. Lieutenant Charnley has arrived in England from India in the Istamboul troop-ship.

88th Regiment. Two privates, Daly and Carr, of the 88th at Allyghur, have been sentenced to one year's imprisonment for having stolen treasure to the value of 8000 rupees. The sentence of fifty lashes each was remitted by Lord Clyde, as both are in the first class as regards corporal punishment under the recent order. Another private, Scanlan, was sentenced to one year's imprisonment for having stolen money in his possession.

95th Regiment. Lieutenant Holbrook is reported as qualified as interpreter in Hindustanee.

96th Regiment. Sergeant John Dann, of Her Majesty's 97th, Banda, has been sentenced to four years' penal servitude for having killed two natives.

In the House of Commons on Tuesday evening, the subject of the extra sums paid for cavalry commissions was brought forward by Captain O'Connell, who asked the Secretary of State for War whether he was aware that since the reduction in the price of commissions in the cavalry the amount paid over regulation had increased; and whether it was the intention of the Government to enforce the Act of George III., which made it illegal to give or receive any amount in excess of the regulation price for commissions in the Army. Mr. S. Herbert replied that he was not aware that since the reduction in the price of cavalry commissions the amount paid in excess of the regulation had increased. There had been, perhaps, an increase in particular cases, but there had been a diminution in others, and he thought that it would require longer expeence of the reduced rate before one could decide whether it had had the effect of increasing or diminishing the price of commissions. As to the second question, he thought the Government were bound to reduce, by all means in their power, the extravagant prices which were given for commissions; but he was not at all certain that the Act of George III. provided them with the most effectual weapon for the purpose. He believed that in questions of money, and of the value to be got for money, the provisions of an Act were rarely, if ever, sufficiently stringent and comprehensive to prevent evasion.

In the House of Commons on Tuesday evening Mr. Lindsay moved for a select committee to inquire into the organisation and management of those branches of the Admiralty, War-Office, India-Office, and Emigration Board, by which the business of transporting, by means of shipping, troops, convicts, emigrants, materials of war, stores, and any other similar services is now performed. Sir Michael Seymour seconded the motion. Lord Clarence Paget, in consenting on the part of the Government to the appointment of the committee, intimated his opinion that the present transport system was not quite so defective as Mr. Lindsay had represented it to be. The desirablility of improving the transport service was dwelt upon at some length by Mr. H. Baillie, Sir Henry Willoughby, Mr. Bentinck, and other members. Sir C. Napier urged that the transport service ought to be conducted by a well organised board, totally independent of the Admiralty, who had already too much business on their hands. Sir John Pakington expressed his satisfaction that the Government had assented to the motion, since, in addition to its economical importance an improved system of transport service would probably lead to an improved system of army relief both in India and the colonies. The motion was then agreed to.

Another party of several hundred wounded and disabled troops arrived at Fort Pitt Hospital on Thursday from India, having disembarked at Gravesend from the Istamboul. The corps to which the troops belong are those serving in the Bombay presidency. The following officers arrived with the troops, viz., Captain T. C. H. Best, 72nd Highlanders; Lieutenant F. E. Webb, 28th Regiment; Lieutenant H. G. Boyd, 33rd Regiment; Lieutenant B. Charnley, 83rd Regiment; Assistant-Surgeon Buckell, and Assistant-Surgeon Sharpe. The Istamboul sailed from Bombay March 2. During the voyage 12 deaths occurred on board. Four soldiers, who had been tried by general court-martial in India, and sentenced to transportation, were brought home prisoners. After the inspection of the wounded and disabled troops at Fort Pitt, 19 men were ordered into hospital for treatment, and nine insane men sent to the lunatic asylum.

A fatal accident has occurred at the village of Sholden, about a mile and a half to the west of Deal, through the bursting of a shell fired from Sandown Castle, to John Oxford, who was in the coastguard service. At the inquest Captain Woolsey, of the Royal Artillery, said that the gun was discharged loaded with a shell containing about 2lb. of powder. It was fired at an object at the water's edge, the tide having receded. He considered this to be perfectly safe. He believed the shell exploded when it had gone about 590 yards, and it was so regulated as to burst short of the object fired at. The deceased was upwards, of 800 yards from the spot where the shell exploded. He was at the side, and not in front of where the shell exploded. After a brief consultation the jury returned the following verdict :—"That the deceased was accidentally killed; but the jury were of opinion that shells should not be fired except in the direction of the sea."

Lieut.-Gen. Sir J. F. Love, during the past week, made his usual periodical inspection of the troops stationed in the camp at Colchester. On Tuesday a review of all the troops in camp took place on Middlewick Farm.

Although it has been somewhat tardily granted, we have pleasure in stating that the Government has authorised the donation of six months' batta to the officers, soldiers, and seamen engaged in the Persian expedition, in acknowledgment of the great service rendered by them.

A second and third class sergeant instructor of musketry is ordered to be attached to each of the infantry regiments in the Bombay Presidency.

The examination of candidates for admission to the Royal Military College, Sandhurst, by the Council of Military Education, commenced this week at the Royal Hospital, Chelsea, Major-General Rumley, the vice-president, presiding. There were close upon 40 candidates.

Sir Robert Montgomery has ordered the enclosure of the tombs of the officers who fell at Sealkote in 1857, at the public expense.

We learn by the last mail from Hong Kong that the two French Generals of Brigade had arrived, so that the Staff of Generals of both nations is now complete.

The whole of the troops who are under orders to proceed to India during the present and following month are to be supplied with cholera belts previously to embarkation.

Mr. Mackinnon, who was attached to Lord Clyde as surgeon during part of the Indian campaign, has arrived in England on sick leave, suffering from illness, brought on by service in India.

On the 18th of May a new screw line-of-battle ship, called the Emperor Nicholas, was launched on the Neva from the new Admiralty docks, in the presence of the Grand-Duke Constantine and an immense concourse of spectators. The Emperor Nicholas is of 800 horse-power, and will carry 220 guns.

Rifled cannon have been introduced in the Prussian Army, the experiments made having proved most satisfactory.—*Militär-Zeitung.*

Hanover, following the general impulse, is busily occupied in putting the army on an efficient footing. Manœuvres on a large scale will shortly take place. In the autumn the camp will be pitched at Nienburg on the Weser, which will consist of 10 battalions of infantry, 16 squadrons of cavalry, 36 pieces of artillery, and the corps of engineers.—*Militär-Zeitung.*

The Army Gazette.

WHITEHALL, June 2.

The Queen has been pleased to give and grant unto Lieutenant-Colonel Charles Henry Morris, C.B., late of the Royal Artillery, Her Majesty's Royal licence and permission that he may accept and wear the Insignia of the Imperial Order of the Legion of Honour of the Fifth Class, which His Majesty the Emperor of the French has been pleased to confer upon him, as a mark of His Imperial Majesty's approbation of his distinguished services before the enemy during the late war with Russia.

WAR OFFICE, PALL MALL, June 5.

COMMISSARIAT DEPARTMENT.

Assistant-Commissary-General John William Bovell to be Deputy Commissary-General.

CHAPLAIN'S DEPARTMENT.

Chaplain to the Forces the Rev. Hugh Huleatt to be Chaplain of the Second Class.

Her Majesty has been pleased to accept the resignation of the commission of Chaplain to the Forces by the Rev. William Walrond Jackson, on his being appointed Bishop of Antigua.

ASSISTANT-SURGEONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I wish to call your attention to the position of several assistant-surgeons, which, I believe, has been represented to the head of the medical department; yet, so far, no official order has been issued on the subject. Assistant-surgeons, according to the new Warrant, after six years' service on full pay, obtain the relative rank of captain. Well, an assistant-surgeon of six years' service is gazetted from the staff to a regiment, and on joining he finds an assistant already in the regiment of perhaps only eighteen months' service. Now, in the absence of the surgeon, who is the senior assistant? Surely not the man with only eighteen months' service; if so, then the rank is only brevet, and to all intents and purposes the clause in the Warrant is a dead letter. I believe the intention of the Warrant is, that the rank shall be substantive, and all difficulties on the subject might be easily avoided by gazetting every assistant-surgeon on the termination of his six years' service on full pay, and changing his position in the Army List.—I am, &c.,

In Dubiis.

CAVALRY TACTICS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your leader of the 19th ult. has been read with great interest by many of your readers, and by the cavalry portion of them with thankfulness in having directed public attention to a subject which is worthy the most serious consideration. I did hope that some comment thereon would have appeared in your last impression from some pen more competent to do justice to the subject than my own, but in the absence thereof I beg to offer a few suggestions relative thereto, should you think them pertinent to the subject and worthy of insertion in your truly military journal. The primary question appears to be, the "mobility" of the cavalry, for upon this entirely depends their efficiency now that such long odds are being brought against them as an arm of the Service. The artillery and infantry, with their rifled ordnance and Enfield or Whitworth rifles, and their present scientific course of instruction is not the adversary of a few years ago. Cavalry could then approach within a few hundred yards of either with comparative impunity, now their weapon will reach with deadly effect a thousand yards. Rapidity of movement is therefore the indispensable qualification requisite for the cavalry to render them effective and to ensure them success in any attack; the quicker they are able to pass over the space between them and the enemy, the more effective they are in their charge, and the less destructive the enemy will have been. Your question, sir, "Can nothing be done to lighten the weight which weakens the energy and cramps the activity of the horse," is the one to which I would direct attention on this occasion, leaving the other questions still to be dealt with. I would beg to reply that much might be done to relieve the horse of the intolerable burden which incumbers him, and which most materially detracts from his speed and efficiency.

Our horse appointments are unnecessarily heavy (saddle alone weighing three stone) a great reduction could be made by substituting lighter and superior material in leather; bits and stirrups would do at nearly half their present weight —the shabraque I would have totally abolished, as being a most expensive piece of finery, but utterly useless. In the equipment of the dragoon also a change could be made for the better. First of all abolish the present Victoria carbine, with its concomitant pouch belt, and arm them with a pistol similar to those in possession of the sergeant-majors and trumpeters, or revolver if preferred; by this alone you would relieve the horse of a weight of 10 lbs. The sword might be a little lighter, and if a solid hilt was substituted for that at present in use, it would be an advantage; spurs would do at half their present proportions.

And now I came to the grand point, "the kit." A dragoon, when in marching order (the order in which he is expected to go into action), carries with him a kit sufficient to last him at least twelve months. I am sure that this is not necessary; few circumstances will occur even on active service, in which a dragoon could not well do with a small quantity of baggage, viz., a change of under-clothing for a week or ten days, if detached upon any special service, or upon the advance or retreat of an army. The remainder of his kit would surely be accessible to him within that period, were it carried by other means. I will now state, as briefly as I can, the means that I think would best accomplish this object. It will be admitted that, to be thoroughly efficient as an army, every corps and department should be self-reliant and self-sufficient. To be so, every regiment must have, within itself, the means of transport to enable it to move from place to place without being dependent upon extraneous aid. In order to effect this I would have to every troop of cavalry a good waggon and horses (capacity of waggon and number of horses a matter of detail), which would be at all times under the supervision of the troop officers and non-commissioned officers, same as the other troop horses. This waggon would convey the whole of the camp equipage for the troop, cooking apparatus, residue of men's kits and those of dismounted men (the latter could form a baggage guard), on a march (I am alluding to active service). In camp those waggons would be kept in employment conveying forage and provisions from their respective commissariat depôts to their lines for the use of the troops, and otherwise be usefully appropriated. Allow also a requisite number of those waggons in addition for the conveyance of hospital, quartermasters' and other stores. By this means all superfluous weight would be taken off the horse, sore backs become less frequent, more rapid maching, and general efficiency be altogether accomplished.

The same organisation could be made to apply to infantry, instead of marching them into the battle field incumbered by the weight of, and the free use of his arms impeded by, the knapsack. Apologising for the length of my letter, I am, &c.,

A DRAGOON.

THE GRENADIER AND SCOTS FUSILIER GUARDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In two late numbers of your paper it is stated that a dinner is to take place this month of the officers past and present of the above distinguished regiments, in order to celebrate the two-hundredth anniversary of the formation of these regiments in 1660. Well indeed may the members feel proud at such an event. It strikes me, sir, that never could there be a more appropriate opportunity for the Prince Consort and Duke of Cambridge, as the colonels, to have a history of the origin and services of their regiments published, similar to that which appeared several years ago of the Coldstreams, by the late Colonel M'Kinnon of that corps. Nothing could be more perfect than the history of that regiment; but it is said the late Duke of Cambridge, as its colonel, was not satisfied, and had he lived would have had another one published at his own expense. It is very often remarked how anxious the officers of the present day are to see their services recorded in Hart's Army List. Would it not be equally natural for them to have a record of the services and achievements of their regiments. As the ARMY AND NAVY GAZETTE has not been long in existence, it may be as well to call your attention to this subject. It is now above twenty years when the late king was pleased to command that a history of every corps in the Army should be published, under the direction of the Adjutant-General. Records of all the cavalry regiments were published; and of the infantry of the very old regiments as far as the 23rd Fusiliers; several of the young regiments also appeared; altogether above forty. The Government have now determined to discontinue and abandon the work, which is really a very great pity, having gone so far with it. The sale, we are told, has not paid the expense of publication. A useful work of the kind should not have been given up, when a small annual grant in the Army Estimates, with other assistance, no doubt, would have completed the series. It now rests with the colonels and officers of the different regiments (whose histories have not appeared) to exert themselves, and follow the excellent example of that distinguished regiment, the 52nd, whose history has been noticed in the ARMY AND NAVY GAZETTE. I am given to understand that His Royal Highness the Commander-in-Chief has pronounced it to be the very best record that has yet appeared.

I am, &c., W. R.

RECRUITING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I read the remarks of Mr. Sheridan in the House, regarding the manner in which recruiting-sergeants pursue their avocations. He says, "it was a common practice to enlist ragged youths, and children below the height, age, and capacity required for soldiers," and instances a youth of 16, who was drugged, &c., &c. Referring to the first charge, as to being below the height, I should think that was almost an impossibility; for, though he might pass the doctor having this flaw, as that officer has no means of measuring him; yet, either before or after he has passed the medical examination, he has been, or will be measured by the adjutant of the district; and if below 5 feet 4 inches, even the inspecting field-officer dare not pass the recruit without making a special application to the Horse Guards. Regarding the age, I believe that young lads are frequently enlisted below the age sanctioned by Government. This does not apply so much to the Queen's regiments, as 18 years is the minimum; but for the Queen's Indian military forces, it certainly often happens, as the lowest age a recruit can be enlisted for this force is 20. I have had boys brought before me for examination for this branch of the Service who I have felt convinced were not near 20. But what is to be done? When questioned, each one stoutly affirms that he is so, and is ready to swear to the same. It is a difficult matter to prove that a recruit is under age, though feeling confident in one's own mind that such is the case; and I see no way of preventing this, unless each recruit was obliged to hand in a certificate from the clergyman of his parish; and a sufficient time allowed for inquiries to be made as to its correctness. Regarding the capacity of the recruit; if this gentleman alludes to the weight of the recruit, and breadth of chest, I think he will find, if he will inquire, that each recruit is weighed, and then measured round the chest by the medical officer, and if not at the least 100lb weight, and 30 inches round the chest, he is at once rejected, unless he is enlisted as a drummer, fifer, &c., and then he is always under 18, and his service does not count.

Now I come to the most serious charge, viz., of the recruit being drugged.

Let me state the processes before a recruit is finally enlisted, and then judge whether such a proceeding is likely to be a profitable one for the recruiting-sergeant. The recruit having taken the shilling, is brought before the medical officer for inspection, who can see during the examination whether the man is under the influence of drink or not; if the former, he sends him away at once, with orders for him to appear again when perfectly free from the influence of liquor, and that he has all his intellects clear, and that he is able to answer any question put to him. I am writing from my own experience in this matter, having sent away recruits often from this cause. Well, having passed the surgeon, he is taken to the adjutant of the district for his inspection. Then, twenty-four hours having elapsed from his first taking the shilling, the man is brought before a magistrate, to be attested, who puts to him no end of questions; but this is not all, for the man has then to appear before the inspecting field-officer before he can be finally enlisted, and this officer has the power to reject him.

Now, is it likely that a sergeant would resort to the drugging system in these enlightened days, more especially as he is so well aware of the number of officers the recruit has to be inspected by; knowing also, that if the man stated to either of these officers that he had been drugged, or made drunk before taking the shilling, that a most rigorous investigation into the circumstance would take place by the inspecting field-officer, and if proved, the non-commissioned officer would not only lose his recruit, but his stripes eventually by a court-martial? It strikes me, therefore, that the risk of such a process for obtaining a recruit overbalances the advantages that would be obtained by such a proceeding. —I am, &c.

L. T.

FERGUSSON ON FORTIFICATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your journal there appeared a report of what passed at the United Service Institution, on the 21st inst., when Capt. Tyler read a paper on my system of fortification.

As there was no reporter present but the short-hand writer employed by the Institution, and he took no notes of what Capt. Tyler read, the report of his lecture was, I presume, furnished by himself, to which of course there cannot be the least possible objection.

I have no means of knowing, though I can guess, who is responsible for the report of which I speak. It was furnished to the various daily papers which appeared on Thursday without my knowledge or consent, and I can safely assert conveys a most inaccurate and unfair representation of what then passed.

I am not at the present time going to enter upon the merits of Captain Tyler's paper; when it is published I may do so, though the strange system of exaggeration on which he relies for his refutation of my views is so manifest even in the short report that you have published, that it is probably hardly worth my while to take any further notice of it. But in the meanwhile, as this official report of what I am supposed to have said may mislead others, I beg leave to state most emphatically that I d not retract one single iota of the principle on what my system is based. On the contrary, I am more convinced now than ever of their truth and correctness, and the invention of rifled ordinance has to my mind made this more apparent than before. But I do retract and withdraw the details of the model and the diagrams designed to resist solid shot from smooth-bored guns and vertical shell firing from mortars. These were the modes of attack known when my book was published and my model made, and which from the very conditions of the problem must, if good in 1850, be bad in 1860. A revolution has taken place in artillery in the interim; and if fortification is a real science, it must progress also. Captain Tyler's lecture was wholly occupied with these now antiquated details, and my answer referred to what he said, and to that only. The discussion of these in the present day appears to me to be as useless as it is inopportune.

J. FERGUSSON.

THE DEFENCES OF CEYLON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the ARMY AND NAVY GAZETTE of the 19th ult., you call attention to the fact of there being only 1500 men to garrison the island of Mauritius, and our allies having 15,000 in the adjoining colony, and ask "How, in the event of 'untoward events' occurring, could the general in command hold possession of our dependency?"

That is not the only colony in the East inviting attack. Ceylon is not only a coffee-growing country, but a point at which our great lines of communication meet. It is also a point of no small importance in regard to our possessions in the Indian Ocean and China. Form this station our first reserves ought to be available; and the harbour of Trincomalee, as a central naval station, is not to be despised.

At the first burst of the Mutiny, the Governor of Ceylon sent from his small force one company of Artillery (Maude's), and half of the 37th Regiment, trusting the defence of the island to one company of Artillery, the remainder of the 37th, and the Malay Regiment of Rifles—a proceeding which could not be repeated, if the Ceylon Rifles are changed from a Malay regiment to a Sepoy one, recruited from India.

To defend this colony and its three principal "garrison traps," the general in command has, I believe, at present one company of Artillery, one regiment of the Line, and one colonial regiment; the latter said to be under its strength.—I am, &c.

NEMO.

MEDICAL STORE DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Our military system is gradually finding its level, its inconsistencies vanishing one by one. Crimean disasters and experiences taught us to reconsider a defective military organisation, and directed us to pay more attention to the wheels and springs of the vast machine of war, our Commissariat, Military Train, and Medical Department.

The result of these inquiries has been the remodelling and better paying of so important branches of any army; but yet there remains a vestige of bygone days; another little discrepancy to be looked to: that remedy is required by a branch of the Service denominated "The Military Store Department." Under this appellation you may, doubtless, recognise the old civil branch of the ordnance. The duties of this department are multiform and various, and, as its name implies, it has the charge and distribution of every description of warlike store—ordnance, powder, shot, &c., &c., the clothing of the entire Army, and even the arming of the Navy.

This department has been entirely overlooked in all these changes; whereas its sister, the commissariat, has been improved in almost every respect, and placed on entirely a different footing, both as regards relative military rank as well as social position. Unwittingly a great injustice has been done to its officers, and the consequences are decidedly not beneficial for the Service.

The interior economy of this department is of the most extraordinary and incongruous nature. Its officers, when at home, are regarded quite in the light of civilians, though a recent order permits them to wear a military uniform, if agreeable to themselves; whereas, on being ordered on foreign service, they are placed under the orders of the general commanding the troops at the place where they may happen to be stationed, are subject to martial law, receive military allowance according to their relative rank, and are compelled to wear their uniform. To add to this, the names of their superior officers (to the rank of captain) appear in alphabetical order in the Army List; but, as the two junior ranks bear the (obnoxious to military men) title of clerk, they are not considered worthy of a place in that valuable print.

No other branch of our Army exhibits this apparent incongruity of system. Continental and Indian armies treat their "Military Store," or "Ordnance Civil branch," in a far different manner.—I am, &c.

SPERO MELIORA.

IMPROVEMENTS IN UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Adverting to a letter which appeared in the ARMY AND NAVY GAZETTE of the 19th ult., regarding the recent alteration in the forage caps and overalls of officers of cavalry and artillery, signed "Light Dragoon," I would humbly crave a corner in your next for a word or two on the dress of infantry officers.

It is rumoured that wings are to be restored to us, to be worn on the tunic; if so, it will be a decided improvement; for nothing is more unsightly than the naked shoulders of our present very useful, comfortable tunic; but as I would not wish it to be made less comfortable, I would suggest, in place of wings, a broad plaited gold cord on the shoulders (similar to that worn by engineer officers): this would not interfere with our lying down when on guard, which the wings do; moreover it would assimilate the officers' dress to the men's, who wear shoulder-straps, not wings. Again, by way of assimilating, do away with the absurd, useless sash, of both officers and non-commissioned officers, and substitute for officers a white pouch belt; for, if officers on service are expected to carry a revolver, why should they not have a pouch to carry their ammunition in? And in regard

Digitized by Google

to mounted officers, I would ask where are they supposed to carry their ammunition for the pistols in their holsters?

Again, as to peaks; why should the infantry officer wear a peak to his forage-cap any more than those of the cavalry, artillery, or rifle brigade? All regiments are drilled as light infantry now, and peaks are not considered necessary for the non-commissioned officers or men; and why should not every officer of infantry wear a gold lace band on his forage-cap, with a regimental badge to distinguish him from a staff-sergeant? And while on improvements, I would suggest that every officer should have a pair of black cloth trousers with gold lace stripes (pattern of regimental lace) two inches broad, for full dress; and that a lighter and more becoming head-dress be given to the Line, and something less French.

Touching mounted officers, there are several points to which I would call your attention. Why should an infantry mounted officer have a sword which is of no use on horseback, being far too short, and a great coat he cannot ride in—no place for it or his horse-clothing, &c., on the line of march? Why should not field-officers and adjutants of infantry have a sword, saddle, and great coat, like the Military Train? And why should infantry mounted officers' shakos never be supposed to fall off?—I am, &c.,

AN INFANTRY MOUNTED OFFICER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The boon of the "peakless" forage cap has been extended to all the cavalry and the Military Train. Cannot it be also extended to the infantry? The present infantry forage cap, with its heavy peak, is very like the shako, and is very nearly as heavy in wear as the regulation shako. The peak throws undue weight over the brows, collects perspiration there, and then prevents the free play of sun and wind. Any one who has worn, as the present writer has, the cap with its black, glazed, green-leather-lined peak in a hot climate, can speak feelingly on this subject. On the other hand, the cap is much lighter and more comfortable without the peak, and the eyes soon get accustomed to and strengthened by the air and sun. All necessary protection to the eyes from above is afforded by the brow and eyelid. Take the head-dresses worn by natives of most hot climates as an example—say the fez. There is protection for the back, the weakest part of the head, but none for the forehead, the strongest part. I believe very few men who have become accustomed to the "peakless" cap would ever wish to return to the old one. The non-commissioned officers and men of infantry, moreover, wear no peaks; why should the officers only do so? The argument of its being advisable to have a forage-cap which can be packed, without injury, into a small compass on the march, is applicable to infantry as well as to cavalry.

With reference to another subject which has been discussed in your paper—red facings for Volunteer corps—let me suggest, if no one else has already done so, that both sides are right, and both wrong, too. With red-coated regiments of the Line, blue is the "royal" facing, scarlet is not; but with all rifle regiments scarlet is the royal facing. Now rifles are rifles, whether in green or grey; and it is believed that no Volunteer corps is now entitled to the prefix of "Royal." Surely, therefore, it would have been better if a colour to which no one could object, crimson or bright green, for instance (like the Austrian uniform), had been selected in preference to scarlet, as the prevailing facings for our Volunteers.—I am, &c.,

R. C. R.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I may remark in allusion to letters I have seen in your journal, on the question of peaks, that I have worn caps both with and without peaks at home and abroad, and, from the experience I have had, consider the removal of the peak to be the greatest drawback to the comfort and convenience of the wearer. When one of your correspondents speaks of the smart appearance of the caps now in use, does he consider that smartness is of small importance compared to the eyesight, or the injury which the eyes must sustain to a greater or less extent from exposure to the glare of the sun? Why did the infantry soldiers in the Crimea retain the peaks of the discarded shakos and sew them upon their forage caps, if peaks were found to be useless or inconvenient? Or why do soldiers now, when at ball practice, slip brown paper under their caps, so as to extemporise a sort of peak or shade when engaged in a manner that requires the best use of the eyesight? Perhaps your correspondent will be able to point out the absurdity of their so doing. The peak that he describes as becoming "limp and greasy," invariably lasts longer than any other part of the cap, and can in most cases be put to a new cap after the original is worn out. This, however, is a part of the question I should not have thought it necessary to allude to, had it not been enlarged upon by your correspondent.

In all he says about gold lace stripes being better than those of cloth for trousers, I quite agree with him; but touching the subject of peaks, I very much fear his common sense is overruled by regimental prejudice. Most of your readers, except perhaps a few Light Dragoons, will I think agree with me, that it would be better to protect the eyesight of all ranks, by causing peaks to be put to their caps, than now to deprive the officers of the protection their eyes have heretofore been accustomed to. Most of the French, Sardinian, and other continental soldiers have peaks to their caps, which would not be the case if they were found unnecessary; and why should not English soldiers enjoy the same advantage?—I am, &c.

EX HUSSAR.

TURKISH RIBANDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the House of Commons, on the the 6th inst., Major Stuart questioned the Minister for War relative to the recent upset into the Mediterranean of 20,000 Turkish medals intended by the Sultan for the breasts of British soldiers.

Mr. S. Herbert is reported to have replied as follows:—"The British Government had not undertaken the shipping of the medals, they were shipped by the Turkish government, and the responsibility rested upon that government. The Foreign Office had been requested to communicate to Sir H. Bulwer, in the hope that the Turkish government might be willing to replace them. Meantime, the men entitled to the medals were permitted to wear ribands."

In the beginning of 1859 about 30,000 Turkish medals arrived here from Constantinople. They were at once allotted to soldiers then in the ranks. Battles, wounds, and number of clasps had nothing to say in the matter; consequently, veterans who had previously retired, or been discharged from the Army, were ignored in the distribution—hence great dissatisfaction.

As I have had a good many inquiries on the subject from "old hands," perhaps you will permit me to put a question to the authorities through the medium of your columns, viz., "To what person or department ought Crimean soldiers to apply for Ottoman ribands?"

Having but small chance, I fear, of silver, the forgotten fighting men of Alma, Balaklava, and Inkermann, may perhaps be disposed to put up with silk—on the principle that a little is better than nothing.—I am, &c.

PEDES.

MESS EXTRAVAGANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In a recent leader of one of your cotemporaries, mess extravagance is taken to task. I am not going to defend mess extravagance, but I am the "example" brought forward.

The cavalry seem "the scapegoats" of the Army. The editor says he knew an infantry officer, an honorary member of a dragoon mess, who had to pay 10*s.* 6*d.* for three glasses of wine. Saying so in a leader of course we *must* believe the editor does know what he states. Ah! Yes! But did he interrogate his friend? I much opine not.

From 1844 to 1859 cavalry officers were obliged to pay for a pint of dinner sherry when dining at mess. Does the editor for one moment suppose any bottle of wine was put on a mess table at a guinea a bottle. Honorary members are always included in this regulation, and a book (the wine ledger) is daily laid on the breakfast-table for each dining member to add P (for pints) to his name. I have no doubt an honorary member by drinking claret, moselle, and champagne, a glass of each, might easily incur more to pay than his half-guinea. For what would he have to pay for a Caledonian reunion at the Albany or London Tavern? But I deny any member has, as a general rule. Contrast this statement with what a cavalry officer undergoes at an infantry mess. There it is not compulsory for any one to drink a pint of wine, but a cavalry officer takes his glass of sherry after his soup, whereon A, B, C, and D "go in for their whack." Cheese over, cloth removed; Regent's Allowance over, port introduced; cavalry officer takes a glass, A, B, C, and D do not—had enough; but E, F, G, and H do; and having only had three glasses, cavalry officer has to pay for both lots. If that does not exceed half a guinea, I apologise, and am, &c.,

A DRAGOON GUARDSMAN.

CORPS OF COMMISSIONAIRES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—From returns with which I have been furnished, it is evident that a large number of one-arm pensioners are living in various parts of the country.

If any of these are unemployed, and wish to gain their own living instead of depending, as I am afraid many do, on those charitable institutions which, by the indiscriminate relief they give, destroy the habits of self-reliance and self-respect which characterise the true soldier; they will have no difficulty in securing for themselves a suitable mode of employment, by applying at the offices of the divisions of this corps, established in London, Dublin, Edinburgh, Liverpool, and Manchester.

Although 150 men have already obtained employment as Commissionaires since the first establishment of the system, there is such a demand for them in London that I have been compelled long since to discontinue the restriction at first imposed, of confining the corps to those men who had lost an arm. From the extensive circulation of your journal, especially amongst the members of the Naval and Military Services, your permission to state these circumstances will put every wounded soldier and sailor in posssesion of the information I am desirous to afford them. The staff officers in the various districts have been furnished with copies of the Rules and Regulations of the Corps, so that every pensioner has an opportunity of acquainting himself with them.

I am, &c., E. W.

THE AMALGAMATION OF THE QUEEN'S ARMIES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Since I last addressed you on the subject of the amalgamation of the Home and Indian Armies, Sir Charles Wood has given notice of a motion which, if carried, takes from himself the power of enlisting recruits for India. This settles the question of a local Army as far as European soldiers are concerned; and I suppose few officers would care to belong to an army consisting entirely of natives and without any artillery. All will allow that such an army must be necessarily a degraded service, and inferior to the Imperial Army which comprised all the Europeans, and all the artillery.

The worst friends the Indian officers have at present are those who oppose amalgamation, instead of straining every energy to ensure that the amalgamation (without which our position is and will continue intolerable) is carried out in a fair and honourable spirit.

I grant (if it were possible to conceive such a thing) that if a local army could be organised on such a footing, that one-half or two-thirds of the European troops in India belonged to it, and certain regulations in favour of the former privileges of Indian officers were made and enforced, the service might be tolerable; but as there is no earthly prospect of 40,000, 50,000, or 60,000 European troops being raised for the local Indian army, it is needless to discuss this question. To raise and form such a force would involve enormous expense, for it would be at least two years before the men would be so far trained and disciplined as to admit of the withdrawal from India of an equivalent number of Royal soldiers, during which time, of course, the latter would continue as a charge upon the Indian finances.

But, supposing this did take place, I contend that we should remain an inferior service to the Royal army *par excellence*, without any single person of weight in England to care for us or to represent us. Whatever the Indian Council or the Indian Office may represent, they certainly do not represent the Indian Army, nor is there any prospect of their ever doing so.

In fact we should remember that the real change in our condition was made when the East India Company was abolished. To amalgamate us now with the Royal army is simply to relieve us from a position of inferiority that we never felt as the Company's army, but which has I am sure been painfully apparent to most of us as a local army of the crown.

There are difficulties in the way of amalgamation, but there are equal difficulties (without corresponding advantages) in the way of re-organising the local army.

I have been unable to ascertain any real grounds for supposing that we as officers should suffer by amalgamation. No one seriously believes, I suppose, that any officer in the Indian army will be compelled against his will to serve elsewhere than in India, or on other than Indian pay. No one can really suppose that his promotion will be retarded by any scheme of amalgamation, or that he will be deprived of his claim to pension.

As for staff employment, no scheme could contemplate to place the patronage in India in other hands than those with which it now rests; but it seems highly probable than any plan fairly drawn out would make a certain amount of regimental duty in India a requisite for staff employ in that country, and this is a rule which is much needed at present and since the staff has been open to both armies.

Our present state is simply this—that since 1857, while numerous advantages have been extended to our comrades of the Royal army, we have received no single benefit in exchange, and it is very certain we never shall receive any as a local army.

As a sincere well-wisher of the Army, to which I have the honour to belong, and believing that the interests of the State demand amalgamation, I trust that amalgamation will be carried out; not inconsiderately, or on any crude plan, but on a just and liberal basis, after full consideration by a committee of officers of both Services.—I am, &c.,

AN INDIAN OFFICER.

SCHOOL OF DRILL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The School of Musketry at Hythe is of immense service to the Army, and its sphere of action and usefulness so increases that it becomes necessary to provide a second such place of instruction. The School of Music at Kneller Hall has already benefited the Service, and may, we hope, when it developes itself further, benefit it still more.

Would not a school of drill prove of an importance and usefulness only second to the first-named of these institutions? If the Army reaps advantages from receiving throughout its various branches and regiments, officer, and non-commissioned officer, instructors of musketry from a school for the special training of such, would it not also tend to the good of the Service if something of the kind were instituted for sending forth a supply of really well-trained officers and non-commissioned officers, as adjutants, sergeant-majors, and drill-sergeants?

If such an institution were thoroughly organised, and worked out under an experienced commandant and staff of officers, it effects would, we think, soon tell for good upon the Service. More unity of system would result, and, if encouragement were held out for men of all ranks to avail themselves of the teaching offered, there would be no lack of candidates ready to take advantage of it.

It must be the experience of most officers that a knowledge of drill is seldom thoroughly acquired either at a regiment, or depôt battalion. Commanding officers and adjutants of either pick up that knowledge as best they can, and have too many ever-recurring claims on their attention to afford them the necessary leisure to convey that knowledge to others as they join. How many officers only really learn their own work as drills after they come into command! We have it as the recorded remark of one of England's best soldiers, Sir Charles Napier, that, when the command of a regiment first devolved on him as a major, his drills were "to teach the major, not the men." The same remark holds good as to adjutants; how few are to be met with, when occasion arises, ready made, and qualified?

We venture to hope that some such school of instruction as we suggest may be formed.

If found to answer, its aims might be extended; the keeping of soldiers' accounts, and of regimental books, might be thoroughly taught; knowledge of courts-martial duty and military law worked up, and the internal economy of the orderly room, and of the company, be made to keep pace with a higher standard of efficiency on the parade ground.

It must, we think, be the experience of most officers that a thoroughly good drill is, at present, more of a rarity than, under a system of better development, it need be.

R. W. L.

GOVERNMENT DESICCATING MILLS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The sad disclosures relative to our rotten gun-boats renders it an imperative necessity that a remedy should be pointed out for the future.

I would suggest, through the medium of your much-esteemed paper, that a great outlay on timber be immediately made, instead of getting it in "dribs and drabs;" and that such be appropriated to a thorough drying process.

In the seasoning of all green woods, whether for use in naval or military purposes, I would strongly recommend the erection of Government desiccating mills, as future guarantees for the soundness of our "wooden walls," which in the end would effect a great saving in our national expenditure.

I am yours, &c., ALEXANDER HAY.

We regret to hear that Sir James Outram, who had been suffering severely from bronchitis, had been compelled to proceed to Singapore in the hope of benefiting by the voyage.

Digitized by Google

THE NAVY.

ADMIRALTY, JUNE 2.

PROMOTIONS AND APPOINTMENTS.—Lieutenants A. R. B. Carter and T. W. Simeon, to the Bulldog.

Midshipman H. R. Kelly, to the Greyhound.

Assistant-Surgeons W. D. Roberts, confirmed in the Retribution; J. Farrelly, confirmed in the Mæander; S. Grove, to the Cadmus; and J. Halpin, to the Edgar.

Master's-Assistants F. C. H. Petch and W. L. Bennett, to the Bulldog.

Clerk H. A. Scrivener, to the Bulldog.

Assistant-Clerk F. A. Martin, to the Formidable.

Acting Third-Class Assistant-Engineer F. T. Russell, to the Himalaya, as supernumerary.

JUNE 4.—Chief Engineer R. Roughton, to the Bulldog.

Paymasters J. H. W. Bowman, to the Bulldog; and G. B. Brown, confirmed in the Madagascar.

Assistant-Paymaster S. L. Lancaster, to the Ariadne.

Clerks E. A. Dyer, to the Royal Albert; H. F. Armstrong, to the Algiers; and A. Le B. Corrie, to the Aboukir.

JUNE 5.—Lieutenants A. R. B. Carter, to the St. Vincent; C. Parry and H. R. E. Grey, to the Bulldog.

Assistant-Clerk W. E. Hicks, to the Orion.

JUNE 6.—Captain the Hon. F. Egerton, to the St. George.

Lieutenant W. H. Childers, to the Firebrand.

Surgeon J. D. Cronin, to the Bulldog.

Assistant-Paymaster G. W. Muir, to the Leopard.

Clerk W. Adams, to the Orion.

Assistant-Clerk G. A. Michell.

Engineers A. P. Templeton, promoted to the rank of Second-Class Assistant-Engineer in the Watchful; and W. H. Bambury, promoted to Second-Class Assistant-Engineer in the Princess Charlotte, as supernumerary, for service in the naval yard at Hong Kong.

Second-Class Assistant-Engineer W. H. Steil, to the Bulldog.

Third-Class Assistant-Engineer J. Clark, to the Bulldog; and W. C. Moreton, to the Hecate.

Acting Third-Class Assistant-Engineers J. Galbraith, to the Majestic; J. Turner, to the Ariadne; T. Pringle, to the Flying Fish; and E. C. Legh, to the Bulldog.

JUNE 7.—Vice-Admiral Sir A. Fanshawe, K.C.B., to be Commander-in-chief at Devonport, vice Admiral Sir B. Reynolds, K.C.B., whose period of service has expired.

Master W. C. Pyper to be additional to the Pembroke.

COAST GUARD OFFICE—JUNE 7.

REMOVAL—Chief-Officer Mr. William C. Pyper, Master, from Westhaven to East End Lane.

Acorn was at Amoy when the last overland mail left.

Actæon, by the latest accounts, had gone to the north coast of China.

Adventure was, according to intelligence brought by the last mail, on the north coast of China.

Agamemnon, 91, was at Malta on the 1st of June.

Alacrity, 4, was on the 1st of June at Corfu.

Algerine was in the North China sea when the mail, which has just arrived, left.

Amphion, 36, was, by the last accounts, on the coast of Sicily.

Argus, 6, was on the coast of Sicily on the 1st of June.

Assistance was at Shanghaie at the departure of the last mail.

Assurance 4, was, by the last mail, at Manala.

Banshee, 2, was, by the latest dates, in the Black Sea.

Banterer was at Hong Kong on the 25th of April.

Barracouta, 6, paddlewheel steam-sloop, 300-horse-power, Commander William Wood (recently commissioned at Sheerness), is taken into dry dock to undergo a thorough examination.

Bouncer was at Singapore by the latest accounts.

Boxer, tender, was in Valetta harbour on the 1st of June.

Bulldog, 6, paddle steam-sloop, Captain Sir J. Leopold McClintock, fitting out at Portsmouth for surveying purposes connected with the projected line of telegraph to America, *vid* the Faroe Islands, Iceland, and Greenland, is rapidly progressing with her equipment. A party of Royal Marine Artillery has been embarked on board this vessel for duty. She is to be ready for sea by the 18th inst. The Bulldog has engines by Rennie, and steams 10¼ knots an hour. She was built at Chatham in 1845 after a plan by Symonds.

Bustard, gunboat, was at Ningpo at the departure of the last China mail.

Cæsar was at Naples prior to the 1st of June, waiting for her relief.

Cambrian was at Hong Kong on the 25th of April.

Caradoc was at Malta on the 1st of June.

Chesapeake was at Hong Kong on April 25.

Clown was at Hong Kong on the 25th of April.

Coquette, 4, screw gun-vessel, is now under repairs in Portsmouth dockyard. After removing her boilers, and opening her up, the whole of her timbers abreast of them, and also as far as can at present be seen in their wake, have been found quite rotten. In many parts the decayed wood can be dug out with a shovel. When she is opened up forward and aft, it will be seen whether she will be patched up or broken up.

Cormorant, 4, is preparing at Sheerness for a trial of her machinery.

Coromandel was at Hong Kong on the 25th of April.

Cressy was at Malta on the 1st of June.

Cruiser was stationed on the north coast of China when the last mail left.

Dee arrived at Plymouth on Saturday last, with boilers for the Perseverance, and returned to Portsmouth on the 6th inst.

Doris was in Gibraltar Bay on the 1st inst. On the 24th ult., the Doris was dressed out, and fired a royal salute, in honour of Her Majesty's birthday.

Dove was on the north coast of China, by the latest accounts.

Dover sailed for the Gambia from Woolwich on the 7th inst.

Drake was at Hong Kong on the 25th of April.

Duncan, 101, fitting at Portsmouth, has shipped her Griffiths' propeller.

Dwarf, gun-boat, is to have her engines and boilers taken out, in order to find the extent of rot and other defects.

Edgar, 91, screw, Captain J. Katon, with the flag of Rear-Admiral Erskine, sailed from Spithead on Monday last, at 6 p.m., for the purpose of joining the Channel Fleet, and has passed through the Downs.

Exmouth, steam-liner, arrived at Malta on the 31st ult., from Corfu, and was preparing to leave for Naples to relieve the Cæsar.

Fairy, Royal yacht, has taken out her masts, and is having her decks caulked and payed, preparatory to being placed in dock for her annual embellishment, &c.

Firebrand, 6, Commander Bruce, has left Portsmouth for the West Indies.

Firefly, 4, was, when the mail left, stationed at Beyrout.

Forester was at Hong Kong on the 25th of April.

Furious was a Shanghaie by the last accounts.

Fury was at Hong Kong on the 25th of April.

Gannet, 11, was at Athens by the latest dates.

Geyser will shortly be ready at Devonport for her trial cruise outside the Breakwater.

Hannibal, 91, screw, Rear-Admiral G. R. Mundy, C.B., Captain A. Farquhar. A private letter from this ship says, "The St. Jean D'Arc, Neptune, and Cressy left Malta, destination unknown. Marlborough, Agamemnon, and Terrible remain." The Hannibal was at Palermo on the 2nd inst.

Harrier, 17, screw, has been placed in No. 2 dock, Portsmouth (vacated by Princess Royal), to be overhauled and repaired. This vessel has engines of 100 horse-power, and steams 8 knots an hour. She has the character of being a good sailer. She was employed in the Baltic during the Russian war.

Haughty was at Hong Kong on the 25th of April.

Hecate is expected to be ready to leave Woolwich this day. She has been fitted with an additional poop, and has undergone the most extensive repairs since her last term of commission on the African coast.

Hero, 91, screw, Captain Seymour, at Plymouth, has been outside the Breakwater to test her machinery, and has returned into harbour, where she is fitting with all rapidity so as to be ready shortly for the reception of His Royal Highness the Prince of Wales.

Hesper was in the Canton River on the 25th of April.

Highflyer was in the Canton River on the 25th of April.

Hornet, 17, screw. This vessel is to be brought forward at Portsmouth, and placed in the riggers' hands. She has artificers from the steam factory employed upon her, who are working extra hours to complete her with all dispatch. She was built at Deptford in 1854 after a plan by Walker. Her engines are of 100 horse-power. She was employed in the China Seas, when she was very efficient in annoying the enemy's coast, destroying pirates, &c.

Imperieuse was at Shanghaie when the last mail left.

Impregnable. A telegraphic message was sent on Saturday last to the Commander-in-Chief at Devonport, ordering all the supernumerary midshipmen borne on the books of this ship to be sent by rail to Portsmouth for disposal.

Insolent was at Hong Kong on the 25th of April.

Intrepid arrived at Malta on the morning of the 2nd inst., from Palermo and Marsala.

James Watt, 91, was at Malta on the 1st of June.

Janus was at Hong Kong on the 25th of April.

Kestrel, gunboat, was at Foochow at the departure of the last China mail.

Lark, schooner, at Devonport, is ordered to be broken up.

Leven was at Hong Kong on the 25th of April.

Liffey, 51, was, by late accounts, at the Island of Candia.

London was at Malta on the 1st of June.

Magicienne was at Hong Kong on April 25.

Marlborough was at Malta on the 2nd inst. She hoisted Vice-Admiral Martin's flag on the 30th of May.

Medina was at Malta on the 1st of June.

Megæra left Malta on the 28th May for Corfu with drafts of different regiments.

Melpomene arrived at Malta with the new Commander-in-Chief on the 29th of May.

Minx, iron screw water-tank, for the use of the fleet at Portland, has been berthed alongside the north wall of the steam basin at Portsmouth, preparatory to being placed in dock to make good defects.

Mohawk was at Gibraltar on the 1st inst.

Monarch, 84, flag-ship of Vice-Admiral E. Harvey, Commander-in-Chief at Sheerness, was paid wages on Monday, under the superintendence of Captain Schomberg. The crew has been granted a short leave of absence.

Neptune, 91, was off the coast of Sicily on the 1st of June.

Nimrod was at Shanghae when the last mail left.

Opossum was at Hong Kong on April 25.

Partridge having been found defective, will be replaced in the steam reserve at Devonport by the Porpoise, which is in an advanced state.

Pearl, 21, was at the northward when the last China mail was made up.

Phæton, screw steamer, 51, 400-horse power, has been out of Sheerness harbour, under the command of Captain Schomberg, for a trial of her machinery (built by Messrs. Bolton and Watt). There were present Mr. Langland (the builders' representative), Messrs. Price and Dennen, inspectors of machinery, and Mr. Blaxland, chief engineer of Her Majesty's dockyard. The trial, so far as the ship and machinery are concerned, was of a highly satisfactory nature, but is considered incomplete, owing to the roughness of the wind and sea. Another trial will be made.

Prince Regent, 90, undergoing conversion from a sailing liner to a screw, in No. 3 dock at Portsmouth, has been discovered to be very defective in her bows from the effects of dry rot, and a number of her timbers, with the greater proportion of her bow planking is consequently being removed. This ship, while a sailing vessel, was always considered as having some defective timber about her, and was often very unhealthy.

Princess Royal, 91, screw, left No. 2 dock at Portsmouth, where she has been almost rebuilt abaft, as well as undergoing very extensive repairs amidships. She was built at this yard in 1853, on the same plan as the Algiers. Her engines are by Maudslay, and of 400 horse-power. She now looks like a new ship; but her expenses from first to last have been enormous. She is berthed alongside the sheet jetty in Portsmouth yard for the purpose of being masted.

Queen, 86, screw, Captain C. F. Hillyar, arrived at Gibraltar on the afternoon of the 26th of last month, having been nineteen days on her voyage from Portsmouth. During the whole of her passage she had light and contrary winds; on the 12th, at 1·30 p.m., a man fell overboard from the head of the topmast rigging, hurting himself slightly, when Lieutenant Hooper, who was taking his passage out to join the Marlborough (flag) on the Mediterranean station, gallantly sprung from the poop after the seaman. The man, however, managed to reach the buoy, which had been released as soon as the mishap occurrred, without any aid. Both Lieutenant Hooper and the sailor were picked up, and were on board the Queen in ten minutes from the time of the accident.

Racoon, steam-corvette, was at Malta on the 2nd inst., having arrived the previous day from Leghorn.

Recruit was, by our latest correspondence, at Galatz.

Renown, 91, was at Malta on the 1st of June.

Ringdove was at Hong Kong on April 25.

Roebuck was in the North China sea when the mail, which has just arrived, left.

Royal Sovereign, 131, screw. It is rumoured that this ship is to be brought forward for first-class steam reserve. She was built at Portsmouth in 1857; and is of the same dimensions, and built after the same plan as the Duke of Wellington. Engines, 800 horse-power.

Sampson was at Hong Kong on April 25.

Scourge was at Gibraltar on the 1st inst.

Scout was on the north coast of China when the last mail was despatched.

Scylla, 21, was off the coast of Sicily on the 1st of June.

Slaney was at Shanghae when the last mail left.

Snail was at Gibraltar on the 1st inst.

Starling was at Hong Kong on the 25th of April.

Staunch was in the Canton river on the 25th of April.

St. George, 91, has been removed from Keyham dock so that her fitting out for sea may be proceeded with.

St. Jean d'Arc, 101, was at Malta on the 1st of June.

Terrible left Malta on the 31st ult. with Sir Arthur Fanshawe on board under a salute from the Marlborough. The various ships in harbour manned yards and cheered as the Terrible steamed out.

Victor Emmanuel, 91, was at Corfu when the last mail left Malta.

Vigilant, 6, screw, dispatch boat, was undocked from No. 5 dock Portsmouth, on completion of her repairs on Tuesday last.

Volcano, paddle (late floating steam factory), has been placed in No. 4 dock, at Portsmouth, for examination and repairs.

Wasp, 17, has been detained at Spithead, making good some slight defects.

Watchful was in the Canton River on the 25th of April.

Woodcock was at Shanghae when the last mail left.

Wrangler has left Sheerness for Devonport.

A deputation of the medical officers of the Royal Navy consisting of Dr. Dobie, R.N., Dr. Rees, Deputy-Inspector General, Dr. Nelson, Dr. Beith and Dr. M'William, attended last Tuesday at the Royal Hospital, Haslar, for the purpose of placing in the museum of that institution a marble bust of Sir John Pakington, executed by Baron Marochetti. The deputation was received by Captain the Honourable George F. Hastings, C.B., the superintendent to whom the members were introduced by Dr. Nisbet, the inspector-general, who with the officers composing the medical staff of the hospital was present. The medical officers of the ships at Spithead and in harbour were also in attendance. Dr. M'William in a speech of some length, entered into the merits of Sir John Pakington as an eminent benefactor of the Naval Medical Service, and concluded by depositing the bust in the hands of the authorities, who having previously received the sanction of the Lords of the Admiralty at once took charge of it, and it will be placed in close proximity to that of the late Viscount Melville, who by his acts had also earned the gratitude of the Naval medical profession. Dr. Nisbet, after the forms of presentation, &c., had been gone through, entertained at dinner Captain Hastings, the Baron Marochetti, and the members of the deputation.

By the death of Captain William Wylly Chambers, R.N. (1846), which took place on the 4th inst., Captain Thomas Hope (1852), now in command of H.M.S. Agamemnon on the Mediterranean station, will be entitled when not employed on service to the advanced rate of half-pay of 12*s.* 6*d.* per diem.

The new naval Commander-in-Chief at Devonport, Sir Arthur Fanshawe, K.C.B., is expected at that port to-morrow, and will hoist his flag on Monday, relieving Sir Barrington Reynolds, who during his period of service has gained golden opinions from all classes. Sir Arthur Fanshawe will strike his flag again on Tuesday, and will proceed on leave of absence for six weeks, in order to recruit his health.

The quarterly examination of naval cadets on board Her Majesty's ship Britannia at Portsmouth is about to commence, and those young gentlemen who are sufficiently advanced in their studies will pass out, and be drafted into sea-going ships.

In the event of Vice-Admiral Hope Johnstone hoisting his flag at Sheerness, we have reason to believe that Arthur Jones, Esq. (paymaster 1844), will be nominated as his secretary.

Sir George Pechell has given notice that he will to-night ask the noble lord the Secretary of the Admiralty if there is any intention on the part of the Government to extend to the Navy employed in the operations on the Coast of China the same advantages of extra pay and allowances as are granted to the Army. We do heartily trust that the gallant Admiral will receive a favourable reply, for what with the existence of adverse rates of exchange and other drawbacks, a naval officer finds it a difficult matter to live on his pay on that distant and expensive station.

We are glad to be able to announce the safe arrival at Nigapore, *en route* to China, of the following gunboats: Grasshopper, Bouncer, Havoc, Weazel, Hardy, Cockchafer, Flamer, and Snap, all of which sailed from England in the beginning of November last.

Digitized by Google

MR. G. R. TOVELL ON SHIPBUILDING.

At a late meeting of the members of the United Service Institution, Mr. G. R. Tovell gave a lecture on his improved system of shipbuilding. Mr. Tovell stated that, after much study and observation, he decided that the best form for shipbuilding, in order to secure speed, strength, and loading capacity was that which would partake of the fleetness of the fish and the strength of the water fowl, or the salmon's head and the swan's stern. In referring to the strength of his ships, he stated that the Margaret had been balanced on a single block in mid-length without having sustained the slightest appearance of a strain; and that, on one occasion, when she ran upon the sands at the mouth of the Thames, she was held forward by her anchor while her keel was resting on the ground, and this while she was a loaded vessel with a strong flood tide setting upon her broadside. She was got off without the least injury. In order to show that he had been successful in obtaining speed out of his vessels, he stated that the Margaret, which was only 100 feet long, had gone from Brecon to Bonny at the rate of fifteen knots; that she had also sailed over the race-course from Erith to the Nore and back in one hour and nineteen minutes less time than the same distance had ever been accomplished by any yacht. Mr. Tovell also stated that another ship of his build, the Sisters, of Portsmouth, had gone at the rate of 15½ knots; and another, the Laughing Water, 16 knots. This last ship had run from the Western Islands to the Isle of Wight in seven days, and although only 491 tons register, carried 977 tons of cargo.

Mr. Tovell, with the aid of a diagram, showed how he produced his experimental vessel, the Margaret; he also exhibited eight different models to show that his plans might be adapted to the construction of all classes of vessels, from the small pleasure-boat to the largest merchantman, and the stately man-of-war of three decks. One of the advantages resulting from the adoption of the new system would, according to the lecturer, be a contempt of that enemy dreaded by all sailors, a-lee shore in a gale of wind. Mr. Tovell's method of combining the timbers forming the stern, stern-post, keel, and deadwoods, with other improvements in the art of shipbuilding, appears to have resulted in giving unusual strength to everything that he has built, and that he was anxious to establish a building-yard, in which his principles could be more extensively developed.

THE STANDING NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Let me for one bear testimony to the valuable suggestions contained in your article of the 2nd June upon a Standing Navy. It bears upon its face a sense and practicability, which marks the originator as something more than an Admiralty official. We have lately seen some articles in your paper which had the ancient, fish-like smell appertaining unto that establishment; and the Service will therefore the more rejoice at seeing you take such a theme as that of a Standing Navy upon such independent grounds as those laid down in the article I allude to. There is only one modification that need be suggested, viz., to have no "irregulars," no bashi-bazouks, in the Standing Navy; and to make it consist of 60,000 instead of 40,000 men, leaving the entire force you suggest intact. I hold that we ought not to have less than such a force, and that with such a force in perfect discipline, perfectly trained, we will hold the seas against all the navies of Europe combined, until we are able to bring to bear upon them the prodigious sailor-power of Great Britain. Those 60,000 men-of-war's-men will be to the half a million of seafaring men of these islands, what the spear head is to the shaft; and all men but those who are in their dotage must know in the present day that that spear-head must be of the finest tempered metal, its edge ever keen, and point perfect. To ensure that we must not only have a navy, but an organised and thoroughly disciplined one of officers and men working together, tied together as one perfect whole, thinking alike, and labouring alike. The old ship company system has broken down, it never can return; it was for the days of raw levies and no gunnery, it was before organised navies and steam fleets were thought of; it was admirably adapted for 1804, but will not do half-a-century afterwards. We must replace it with the regimental system—that of the British army. Old admirals may frown, ancient fire-eaters may blaspheme, but come to it we must if they hope to create a contented Navy or a uniformity of discipline. Those obstructors fancy that hanging and flogging will remedy the present evils, of which none of us like to write, and dare hardly speak. In my opinion they will only precipitate mutiny, and some wholesale fatal desertion. There is I say, again but one remedy, the one you have suggested, and which if the Duke of Somerset has the Navy at heart, and looks only to his country's welfare and safety, he will have copied upon the most orthodox foolscap, with a due quantity of margin, and compel his benighted sea lords to learn by heart, and carry out to execution with as little delay as possible. A CAPTAIN OF THE FLEET.

PAYMASTERS' WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR—The Warrant lately published granting honorary rank to paymasters distinctly lays down 10 years' service as paymaster to be the absolute period of service in that rank necessary to enable him to claim the honorary majority. The words are "15 years' full pay service, of which not less than 10 years as paymaster." Nothing can be more positive than this. Still, in direct violation of it, you will find the promotion of Captain Young from H.P. to the honorary rank of major in the last *Gazette*, whose first appointment to paymaster dates from September, 1854, giving him less than 6 years' service in that rank—his total service in all ranks being about 17 years. If you will refer to the Army List you will find there are paymasters of even more than eight years' service as such, and more than 15 years in other ranks, who remain unnoticed. If you will let me know through your columns if service in ranks other than that of paymaster is allowed (as under the old Warrant), to make up the period that may be necessary to complete the 10 years the late Warrant requires in the rank of paymaster, you will much oblige AN OLD PAYMASTER.

CAPTAINS R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Allow me to say a few words regarding the remarks you made on Saturday, the 26th ult., on a statement of the "Present Condition and Prospects of Captains of the Navy."

You observe that the writer of the pamphlet, who is zealous for his own class, puts forth as the foremost grievance of the captains, that they are captains, and you impugn his logic. The observation would have some force if the condition of these officers were an essential, unalterable, condition.

It may seem strange to you, but it is not the less true, that commanders are anxious to become captains, and to follow up their profession, and yet that good officers have, as captains, thought it prudent to decline employment because they had not recovered the pecuniary loss sustained through their last command.

You consider it to be of little consequence whether officers be allowed to count, or not, the time served in the junior grades for half-pay and retirement, as you presume that less pay would then be allowed, and the difference might thus be as six "and half-a-dozen." On what is this presumption founded? Do assistant-surgeons, acting-masters, assistant-paymasters, and assistant-engineers, receive less pay because the time thus served is now reckoned?

You think, sir, that the "mere money estimate" of the British captain's pay, compared with the pay in the American and French Navies, is putting the matter on very "low" ground. The ground may be low; but surely the foundation is good for the argument in hand.

In your opinion, plebeians whose private means are small, should not join the Navy. Even if boys of 13 had much choice in the matter, few persons would, I think, agree with you. As to mooting the subject of pay being *mal à propos*, the information in the *Times*, that the captains serving in China have forwarded a memorial asking for increase of pay, leads me to the opposite conclusion.

Every one will concur that "half-pay is better than none," but few will jump with you to the inference that therefore that half-pay is sufficient.

The pamphlet which you criticised, does not compare "the half-pay of captains with clerks, paymasters, surgeons, and other civilians;" it compares pay with pay, and it is the deduction and not the comparison which is odious. As to it being *infra dig.*, I do not think either side will thank you for the sentiment, and you must allow your readers to smile when they see your rebuke of the writer for his professional *lèse-majesté* on such grounds.—I am, Sir,

ONE of the numerous NAVAL OFFICERS whom you suppose to "have mistaken their profession."

THE COMMANDERS OF THE ROYAL NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Among the various classes of officers who are most hardly dealt with by the Board of Admiralty, I do think the senior commanders have the greatest cause of complaint. They have been incessantly applying for employment, and have been told (as I, for one, can testify) by the First Lords of two succeeding Boards of Admiralty, "they were quite at a loss what to do with them," that, in short, it put them to the puzzle, notwithstanding good testimonials are produced and everything perfectly satisfactory. They get bowed out with the shadow of a promise that their services shall be taken into due consideration with those of others.

The very next morning, and I may say continued from time to time, you see none scarcely but juniors appointed, not only to sea-going ships but coast-guard, agents of transports, packet service, and guard-ships; the four latter of which were formerly reserved for the senior officers, but now they are gradually taking these away, as the *Navy List* will testify. It seems to be a new mode of getting rid of the senior officers by telling them they are too old when they happen to have their ripe intellects, &c., about them; and from late occurrences, as introduced in your last week's paper, I think they would have evinced more discretion than what has been exemplified by Balfour, Berkeley, and Co.

Now, let us look at the facts of the active list of commanders:

Number of commanders	494
Number of employed	210
1st senior half (37 of which are in coast-guard) ...	70
2nd junior half (34 of which are in coast-guard) ...	140

I ask if this is just? There are continual promotions and fresh entries into the Service being made, whilst there is an abundance of officers willing to serve, whom the Board of Admiralty have been trying to shelve upon an extra sixpence per diem, and so relinquish all further hope of employment. But I hope it will not rest there. The truth must come out, and it only requires some spirited member of Parliament, well versed in nautical affairs (by way of striking at the root of the evil), to put the following question to the House—"As to whether all the applications for active service are officially recorded, also to know how it is they do not give a more fair distribution of patronage, instead of clogging the list with a fresh batch of victims;" which is neither just to the Service nor to the country: for, in the first instance, it creates discontent, which spreads throughout, even to Jack himself, who is getting as knowing as his master, and, moreover, it is against the interests of the country, let alone additional taxation, which must naturally ensue.

I remain, &c., BELISARIUS.

MONTHLY PAYMENTS TO THE FLEET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The discussion of public topics in newspapers is apt to degenerate into personal duels between those who take opposite views. I am anxious to avoid this too common error; but nevertheless, having been appealed to by your correspondent "Paymaster," I cannot but ask for space to reply to his two specific questions. First, as to the Edgar my answer is, that the disturbances on board that ship took place after a six-monthly pay-down, and not after a monthly payment. Second, as to his assertion that men frequently leave a home ship for foreign service solely with a view to a good pay-day on their return, I answer that this does not accord with my experience, for I believe in such cases the motives generally are improvement in seamanship, and consequent advancement in rating.

My first letter advocated monthly settlements, mainly on the ground of morality. I wish now to add that, looking to the question of payments in connection with that of discipline, it seems to me abundantly proved by recent experience, that if monthly payments are not adopted we must revert to the old system of monthly pocket-money, and a final pay-off at the end of the commission. The evils of six-monthly payments, unaccompanied by long leave of absence, have been shown in many cases besides that of the Edgar—that of the Terrible is the most recent, she remained four days in the Sound in hopes of recovering her men, after a pay-down, and finally sailed, leaving ninety of them behind. Such facts prove more than a thousand arguments.

I am, &c. STEAM.

THE CARPENTERS OF THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Allow me to express my thanks to you for giving publicity to the grievances of a class of officers to which I belong in your journal of the 26th May last. That was the first time their case has ever appeared in public. I am, therefore, induced to offer a few remarks of my own, in addition to those of your correspondent "Chips."

In order to show the disadvantages a carpenter in the Navy has to struggle against, let me take the case of any two apprentices in any of our Royal yards; the one a shipwright and the other an engineer. Both of these young men may have to pass equally difficult examinations at their first entry into the Service; yet the carpenter must serve 7 years to learn his profession, and the engineer only 5; indeed the latter apprentice is frequently accepted after 4 years, and is then eligible to receive a salary of 104*l.* per annum, or 5*s.* 11*d.* per day. In addition to this sum, if he is called upon to work "check," he receives 3*s.* 6*d.* a-day extra.

Now, sir, I have nothing to say against the rate at which engineer officers are paid by the State; and while disclaiming all ill-will, or wishing to make invidious comparisons, I cannot avoid drawing your attention to what must be the fate of the carpenter apprentice. After serving his seven years in the yard, and perhaps in the receipt of 4*s.* 6*d.* or 5*s.* 10*d.* per day, according to circumstances, he is desirous of entering the Navy, and applies for the situation of a carpenter's mate. He is instantly told by the captain that as he has never been to sea he can only fill a situation in the carpenter's crew, or be rated as a leading shipwright at 1*s.* 10*d.* per day, or 33*l.* 9*s.* 6*d.* a-year; and, if required to work "check," would only be allowed 1*s.* in addition.

Why is this, sir? The only answer that I know is that it has been the custom for years past; but it should be altered, and that speedily, or else the best artisans will leave the Service, as they are now doing, for the better pay of a rival power. Will you allow me, therefore, as an officer of some standing in the civil department to offer a few remarks upon this matter. Thus, in the event of a naval war, you will find that carpenters will be greatly wanted; and allow me to say, that wanted they are likely to be, unless the Admiralty or the Comptroller of the Navy pays them according as the heads of the other kindred departments of the Navy. They ought not only to be better paid, but to be placed in a better position, where they might command respect. I do not mean that they ought to be made ward-room officers, and be adorned with cocked hats, gold lace, or swords, but simply to be placed in a position non-executive, and be paid in accordance. By this means the carpenters would have it in their power to considerably reduce the Naval Estimates under the head of "fittings and repairs," which is not only tremendously large but exceeds the popular conception. I could dilate upon this subject, but fearing to intrude upon your valuable space, I beg most respectfully to subscribe myself KEEL.

COAL FOR THE NAVY.—In the year 1859, 249,527 tons of coal were purchased by the Government for the use of Her Majesty's navy, without reckoning casual purchases made by captains of ships where there are no naval depôts of coal: 188,507 tons were Welsh coal, and 61,020 tons north-country coal. There is commonly three times as much Welsh coal taken for the navy as north-country coal.

GREENWICH HOSPITAL OUT-PENSION.—A vacancy has occurred on the list of officers on the out-pension of Greenwich Hospital for a lieutenant, value 50*l.* per annum, in consequence of the demise of Lieutenant John Jenkins Loney (1807), which occurred at his residence, near Southampton, on the 3rd inst., at the advanced age of 76 years.

DESERTERS FROM THE NAVY.—In the year 1859 the deserters from the Navy were as many as 2338, of whom only 86 were apprehended. 712 of those deserters had received bounty to the amount of 4571*l.* 26 were Kroomen, but the entire number of the foreigners and men of colour cannot be distinguished from the rest.

Rear-Admiral Sir Thomas Pasley, Bart., superintendent of the dockyard at Devonport, struck his flag on board the Royal Adelaide guardship of ordinary at that port, on Friday last, and proceeded on leave. The duties of superintendent will be carried on his absence by Commander Brown, master attendant.

Her Majesty's steam-sloop Hecate has been commissioned for the purpose of proceeding to the Pacific, there to take on board the officers and men of Her Majesty's steam screw-sloop Plumper, which will be brought home by the present officers and crew of the Hecate. The surveying duties will be carried on by Captain George H. Richards in the latter vessel. The Plumper was commissioned in the month of December, 1856, and has only 60 horse-power. The Hecate is a paddle-wheel vessel, and has 240 horse-power.

It is probable that Vice-Admiral Edward Harvey, Commander-in-Chief at the Nore, whose allotted period of three years' service will expire on the 1st of July next, will be preceded in his command by Vice-Admiral of the Blue, William James Hope Johnstone. Admiral Johnstone's last service afloat was that of Commander-in-Chief on the south-east coast of America.

The annual gratuity of 50*l.*, allowed by the Admiralty to one of the foremen of Woolwich Dockyard, has this year been awarded to Mr. Daniel Harding.

THE MILITIA.

The Second West York Light Infantry. This fine militia regiment assembled, for the purpose of undergoing its annual period of training on Monday last. Early in the present week there was a great number assembled on parade —stronger in fact, than during any period of last year's training, there being about 25 officers and nearly 650 rank and file. The regiment has taken possession of the cavalry barracks recently vacated by the 16th Lancers, but in consequence of certain regulations issued from the Horse Guards, the sleeping accommodation is inadequate to the wants of the regiment, and consequently a number of men are allowed their billet-money, and they have procured lodgings in the city.

Review of the East York Militia. This fine regiment was reviewed on the Cricket Ground, in Westwood, Beverley, on Saturday morning last, in the presence of a large concourse of spectators, by General Douglas. The regiment was put through the usual manœuvres, which were performed with great steadiness and precision. The General complimented the regiment on the state of discipline they had attained. The Beverley Rifle Corps acted as a guard of honour on the occasion, and, after the Militia, the General inspected them, and expressed himself in flattering terms to the corps on the steady and soldier-like style in which they went through their various evolutions. On Monday a number of sports were got up by the officers of the Militia.

The Royal Lancashire Artillery. The 1st, 2nd, and 3rd Companies, with the following officers, left Cork, June 6th, in the Cormorant, for Liverpool: Lieut.-Colonel Atchison, Major B. R. Williams; Captains Moore, Holmes, and Walker: Lieutenants Christie, Collins, and Wood; Adjutant Campbell, Dr. Betham, Paymaster Davis, and Quartermaster Blair. The 2nd division of three companies, with the following officers, leave Cork on Saturday (this day), in the Falcon, for Liverpool: Major Middleton, Captain Fosbery; Lieutenants Hutchison, Harrison, and Johnson; Assistant-Surgeon Mitcheson.

The Inverness-shire Highland Light Infantry, under the command of Lieut.-Colonel the Hon. Simon Fraser, assembled at Inverness on the 1st inst., and proceeded to Fort George, where the regiment will be stationed for 27 days' training.

The 2nd Lanark Militia will leave Aldershot on Monday for Lanark, to be disembodied.

The East Kent Militia, under the command of Colonel Rockman, assembled on Southsea Common on Monday afternoon for the purpose of being inspected by Major-General Lord W. Paulet, C.B. At the close Lord W. Paulet, addressing the regiment, said, "He was glad to have had an opportunity of seeing them before they left the garrison for disembodiment, and he was much pleased with what he had seen of them. He was aware they laboured under great disadvantages from having been broken into detachments, but their general discipline, as well as their internal economy, reflected the greatest credit on their officers and themselves. They were a regiment mustering strong in the field, showing 10 companies, or 600 bayonets. The character of the regiment had hitherto stood high, and he trusted that for the short time they would be together, they would endeavour to preserve its good name, and that every man in it would be enabled to return to his home with a good character. It would afford him much pleasure to be able to report so favourably of the regiment to His Royal Highness the Commander-in-Chief." The troops then returned to their quarters.

The Rutland Militia, under the command of Captain the Hon. Henry Noel, were inspected at Oakham on Saturday last, by Lieut.-Colonel Willis, commanding Her Majesty's 84th Regiment, who expressed himself in complimentary terms of their appearance and steadiness.

The Militia Gazette.

WAR OFFICE, PALL MALL, JUNE 5.

Memorandum—2d or Edmonton Royal Rifle Regiment of Middlesex Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held in this regiment by Captain Algernon Edward West.

Kent Militia Regiment of Artillery—First Lieutenant Robert Alured Denne to be Captain, vice Beauclerk, resigned; Second Lieutenant Stephen Matthew Crowet to be First Lieutenant, vice Bartram, promoted.

West Essex Militia—John Barker, Esq., to be Lieutenant.

Royal Renfrew Militia—Robert Watson, Gent., to be Lieutenant, vice Dunlop, promoted.

Royal Sherwood Foresters, or Nottinghamshire Regiment of Militia —The Queen has been graciously pleased to accept the resignation of the commission held by Lieutenant John William Preston.

2nd Regiment of Royal Bucks Yeomanry Cavalry—Fitzroy Clinton Roberts, Gent., to be Cornet, vice Leicester Hibbert, promoted.

Royal Ayrshire Rifles—Robert Duncan Fergusson, Esq., to be Major, vice Hamilton, resigned.

WAR OFFICE, PALL MALL, JUNE 8.

1st or Western Regiment of Norfolk Militia—Ensign John Henry Warnes to be Lieutenant.

Artillery Regiment of Royal Lancashire Militia—Second Lieutenant George Wood to be First Lieutenant, vice Alexander McCandie Campbell, resigned.

4th Regiment of West York Militia—John Parkinson, Gent., to be Ensign.

Memorandum—Royal South Gloucestershire Regiment of Militia—It is Her Majesty's pleasure that Captain Montague Merryweather be removed from the strength of the said Regiment, he having absented himself without leave from the last training.

Leicestershire Regiment of Militia—Joseph Guy Knight, Gent., to be Lieutenant, vice Rawlins, resigned.

Royal Flint Militia—Edward Nunn, Esq., late Lieutenant, 55th Foot, to be Captain, vice Cecil Squire, resigned.

Worcestershire Militia—Lieutenant H. L'Estrange Saunders to be Captain, vice Peel, resigned; Charles Robert Tennant, Esq., to be Captain, vice Davies, resigned.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Henry George Statham, in the above Regiment.

Royal Wiltshire Yeomanry Cavalry—Cornet Lord Henry Frederick Thynne to be Lieutenant, vice Watson Taylor, resigned; George Pargiter Fuller, Gent., to be Lieutenant, vice Bush resigned; Alexander Clelland Macdonald, Gent., to be Cornet, vice Lord Henry Thynne, promoted; Vere Fane Bennett, Gent., to be Cornet.

Memorandum—Oxfordshire Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Henry Frank Otté Golding.

The Edinburgh or Queen's Regiment of Light Infantry Militia—Lieutenant Charles William Cowan to be Captain, vice the Marquis of Lothian, resigned.

THE MILITIA SERVICE.

The estimates for the Militia Service, embodied and disembodied, are laid on the table of the House of Commons as regularly as those for the various branches of the regular Army, with which exception there would seem to be no tangible similarity between the two Services. Any increase in the Army Estimates properly so called is usually voted without much grumbling by the House; but when in Committee of Supply, on the estimates for the Militia, the notice paper is generally crowded with either notices of motion or questions to be answered at the instance of private members. The reason for all this is not readily obvious, but on a closer examination of the subject there exists in our opinion abundant cause for dissatisfaction. Simply to enumerate the grievances, real or otherwise, with which the organisation and maintenance of this force is charged would be an undertaking sufficiently formidable, and we purpose therefore briefly to consider such points as urgently require amendment at the hands of the authorities.

In the first place, then, we would ask why so much of the civil element should be imported into the maintenance of the Militia? Either it is or is not part and parcel of the military force of this country. If it be, then the whole of the charge for its support should be included in the annual supply granted by Parliament to the Crown; whilst, on the other hand, if it be not so considered, but is simply regarded by the authorities at the Horse Guards as a cross between the volunteers and the regulars, then the grant of half a million for the support of the staff of disembodied regiments can only be pronounced an unjustifiable waste of public money. The utility of the Militia has been variously estimated by different governments—by some as a fruitful source from which to draw a supply of seasoned recruits for the cavalry and Line, and by others as a highly valuable auxiliary to the regular Army in periods of exigency and alarm. The latter is without doubt the proper view of the case, and it follows as a simple matter of course, that every precaution which experience dictates should be adopted to prevent the Militia from degenerating on the one hand into a vehicle for the exhibition of party-favouritism, and on the other hand from becoming unpopular with the general public.

In considering the civil question, we would ask by what sound rule or precedent do the Government call on the rate-payers of the country to provide quarters for the staff of the disembodied militia? If it be a portion of the military force of the country, as it most unquestionably is, why adopt one line of policy with regard to the line and quite another as regards the militia? If Government were to call upon the ratepayers of the country to provide quarters, &c., for regiments of the line, over which, after the expenditure of their capital, they should have no control, the idea would be received from north to south with universal derision; and yet, what would, in the case of the line, be considered a simple act of insanity by the authorities, is, in the case of the militia, not only done, but is persisted in, notwithstanding the most uncompromising opposition from the local authorities. Surely this is most unwise. It cannot consist with the principles of a sound policy thus to treat a section of the land forces in a way at once exceptional and equivalent. So long as the authorities at the War Office are in opposition to the local parochial authorities, so long will the militia service be viewed by the public with disfavour, and the uniform of the various corps be regarded with disparagement akin to contempt. There is no valid reason why the whole of the charges for the militia service should not be included in the estimates for the year, and be regularly voted in supply. The constant discussion of the subject by the ratepayers throughout the country is not only irritating but damaging to the cause, and we would therefore urge the authorities to re-consider the matter with a view to its speedy amendment.

Leaving the civil and referring to the military phase of the question, we have been painfully impressed with the frequent occurrence of disturbances between civilians and the embodied militia quartered in different parts of the kingdom. Sometimes these hostile encounters are of a very serious character, and both in seriousness and frequency surpass anything of the kind when the military belligerents are troops of the line. To account for this is no easy matter. One or two regiments have acquired an unenviable notoriety in this direction, whilst others are equally remarkable for their quiet and orderly behaviour. It cannot well be accounted for on the score of difference of race, as that argument would apply with equal force to the soldiers of the line. Nor can the habitual licence of conduct attributable to civilians be pleaded in extenuation, as it is well known that there are very few of even the most turbulent characters who do not bend beneath the inexorable demands of strict and rigid discipline; so that we are forced, much against our inclination, to search in the organisation and discipline of the militia Service for causes sufficiently appreciable to account for the evils of which we complain. The *morale* of a regiment is a much more important affair than is generally imagined. Let the commissioned officers look as if they were playing at soldiers; let the subalterns be manifestly ignorant of their duty; let the captains be so ignorant of their drill as to be quite unable to manœuvre their companies, without the aid of the non-commissioned officers; let the colonels affect a magnificent indifference to the business of their regiments; let niceties of uniform and etiquette be despised, or, at all events, neglected, and the men will soon both see and feel that the power, wielded by the intelligence and position of the gentlemen by whom a regiment is officered, over the men, is but as a rope of sand, and all influence for good is sensibly weakened. As with the men, so with the officers; for, should they find that the staff are inexperienced in the discharge of their duties, or that a disposition is evinced by the officer in command to supplant the wholesome and well-understoood rules of military law by private negociation and intrigue, it is quite impossible that the regiment as a whole can be distinguished for proficiency in those virtues peculiarly belonging to the profession of arms.

In order that the rank and file should be good soldiers, the regiment must be well officered; this is a *conditio sine qud non* to success; and too much care cannot be taken in scrutinising the fitness for command of gentlemen applying for militia commissions. And here it may be proper to remark on another peculiarity in the Service, not, in our opinion, conducive to its well-being, and that is the interposition of the lords-lieutenant of counties between the officer, the Horse Guards, and the Crown. Much of the dissatisfaction existing in militia regiments results from the arrangement. Any officer above the rank of subaltern, is obliged by Act of Parliament to possess a certain property qualification; so that let an officer be poor, and no amount of professional experience can atone for the fault. Once a subaltern always a subaltern, unless you are worth two hundred a-year; and even when a qualification is acknowledged by promotion to the rank of captain, no length of service and standing in the regiment will prevent the cancelling of the commission, should fortune in the interim have been unpropitious. This we do not hesitate to characterise as a great injustice. There must be numbers of officers in the line who do not possess the property qualification required for a captaincy in the militia, and we are at a loss to comprehend the aim of the authorities in framing a Compulsory Qualification Act, having reference to this particular force. Of this however we are perfectly clear that its efficacy is altogether of a negative character. A commanding officer has only to conceive an antipathy to one of his subordinates, look out for a flaw in his qualification, put the lord-lieutenant in motion, who will rouse the Clerk of the Peace, who will communicate with the Secretary for War, who will recommend the Queen to cancel the commission, and some fine morning the officer awakes to find himself denuded of rank, without a charge preferred, or an inquiry instituted.

It will be seen at a glance by the merest tyro in military matters that a power is here conceded to the lords-lieutenant, in conjunction with the colonels, over officers in the militia, with which no colonel in the line is invested, and which may be put to the most ignoble of uses; and it is on account of our belief that it has been so used, that we now comment so freely and stringently on the subject. Whether all the officers holding the rank of colonel or lieutenant-colonel commandant in the militia are sufficiently conversant with the rules of the Service as to know what they can do with propriety, and what they cannot, and above all what they ought and are required to do according to the military code under certain given circumstances, is a question which we confess our inability to answer; but we are quite prepared to state that much requires to be done in the way of learning, and more in the shape of investigation and amendment to place the Militia on a satisfactory basis.

HOUSE OF COMMONS.—FRIDAY.

THE INDIAN MUTINY.

Mr. Vansittart asked the Secretary of State for India, whether the names of those civilians on the Bengal Establishment who were killed in action, murdered, or died from wounds and exposure during the late mutiny, between the 11th day of May and the 19th day of November, 1857, had at any time been brought under the notice of the Government; and, whether he intended to do honour to their memory by the erection of a monument.

Sir C. Wood said that the chairman of the Court of Directors had announced the intention of erecting a tablet in the chapel of Haileybury, to the memory of the civil servants killed during the mutiny, and nothing could be more appropriate than such a monument, in the chapel of the seminary of the civil service. As Haileybury, however, had been given up, and some other site had to be selected for the monument, it seemed difficult to limit it to the civil service exclusively. The question thus assumed larger dimensions, and in consequence nothing had been done. This occurred before the change in the form of the Indian government, and he himself never heard of the matter till it was mentioned to him by his hon. friend (Mr. Vansittart).

THE INDIAN ARMY.

Sir De Lacy Evans expressed a hope that the Secretary for India would introduce his Bill respecting the Local Army in India on some other day than that fixed, namely, Tuesday next, which was a motion day. Perhaps a despatch which had been received by the last mail from Lord Canning, might induce the right hon. gentleman to abstain, even now, from bringing forward the measure. He wished to know whether the Bill had been sanctioned by a majority of the Indian Council?

Sir C. Wood said that, in the present state of public business, he feared he could not find a better day for bringing forward the important question referred to. As regards the Indian Council, he was bound to state that their opinion was adverse to his proposal; at the same time, they had declared that if it should obtain the sanction of Parliament they would do everything in their power to give effect to it.

NATIONAL DEFENCES.

Sir Frederic Smith asked the Secretary of State for War when he intended to lay upon the table of the House the Report of the Commissioners on the National Defences; and whether it was the intention of the Government to present to Parliament in the present session, an estimate for carrying into effect any of the recommendations of the Commissioners.

Lord Palmerston said that he held in his hands the Commissioners' report which his right hon. friend the Secretary for War would lay upon the table in the course of the evening, and he would on an early day explain the course which the Government would recommend the House to adopt relative to this important subject.

ARMY SURGEONS.

Colonel Dickson asked whether the warrant of October 1st, 1858, giving to army surgeons the rank of majors, was meant to be retrospective; that was to say, would a surgeon of 1853 take precedence of a major of 1854.

Mr. Sidney Herbert replied in the affirmative.

The first distribution of the Indian medals to those officers and men who served in India during the suppression of the mutinies has been made to the troops at Chatham garrison entitled to them, the officers and men of the 1st battalion of the 24th Regiment having received their medals from the Horse Guards during the past few days. The whole of the medals are ready to be distributed as soon as the necessary returns from the several East Indian depôts of the officers and men entitled to them have been received by the authorities.

VOLUNTEERS.

METROPOLITAN.

Civil Service Volunteers.—The officers and members of this corps on Tuesday afternoon proceeded from their head-quarters to Greenwich Pier, whence they marched to Blackheath, accompanied by the band of the Woolwich (4th Kent) Rifles, and numerous members of that corps. Notwithstanding the unfavourable state of the weather, a series of evolutions were carried out, and the corps returned to London at eight o'clock.

Volunteer Service Club.—The committee of this club have taken the mansion known as "Crockford's," and the adjoining house, vacated by the Guards' Club. Arrangements are in force to surrender the whole of this beautiful pile to such purpose. The entrance in the centre of the façade in St. James's Street is to be re opened, and a handsome portico erected at its approach. The club for extent and social position will equal any in London, while none can surpass it in its interior attractions. All officers in the Volunteer service, &c., whether followers of commercial pursuits or otherwise, are eligible for the ballot; and all non-commissioned officers and privates not in trade equally so. The annual payment of six guineas for town, and three guineas for country members, does not entail any entrance-fee or any other liability whatever.

ESSEX.

5th Essex Rifles.—The ten members of this corps who are now competing with a view to three—the maximum number allowed—being selected to represent it at the National Rifle Meeting at Wimbledon, have been going on practising, and, as we learn, the shooting has been excellent, and there is every likelihood of there being a close run for the lead. Their own range being limited to 400 yards, the War Office authorities placed the ground at Woolwich at their disposal during the evenings of this week, and the class has been shooting up gradually to the longer distances. Last night they reached 550 and 600 yards, and 20 points were made by the nine members present with 7 rounds, two having made so many as four each. The practice is said to be about the very best that any Volunteers have yet displayed at Woolwich, and this notwithstanding that every evening it rained heavily and the ground was a perfect swamp.

LANCASHIRE.

The members of No. 1 Company 4th Lancashire Artillery Volunteers assembled on Tuesday evening at the North Fort, for the purpose of presenting their late drill instructor, Mr. Venters, with a token of their respect and regard. The present consisted of a splendid silver tankard, of chaste design and elegant workmanship, manufactured by Mr. Mayer, of Lord Street. Upon receipt of the tankard, Mr. Venters expressed his thanks in feeling and appropriate terms.

MIDDLESEX.

West Middlesex Rifles.—At the annual meeting of the members of the West Middlesex Rifles, held at the Court-House, Marylebone Lane, on Monday evening, Lord Radstock, who presided, briefly complimented the members of the corps on their extraordinary prosperity in numerical strength, efficiency, and funds. The secretary (Mr. G. Marriner) read the first annual financial report, which showed a balance in the treasurer's hands, and invested in Exchequer Bills, of 1714*l.* 18*s.* 1*d.* This increased state of their funds drew forth loud and prolonged applause. The noble chairman announced that he had arranged for a company of the corps to be encamped on duty for 24 hours on Wimbledon Common, on the 2nd July; that on Saturday next another brigade field-day would take place; and that a general brigade field-day and sham fight would be held on the 23rd June. Votes of thanks having been accorded to the late council and the volunteer band of the corps, the meeting dissolved.

YORKSHIRE.

1st Battalion West York Rifles.—Major Briggs (late captain-commandant of the York Corps) having received his commission as major of the above battalion, Lieutenant G. Lloyd and Ensign Severn have been recommended to the Lord-Lieutenant of the West Riding for promotion. Three gentlemen were on Wednesday last nominated to the vacant ensigncy, viz. Mr. William Lawton, Mr. R. L. Wood, and Mr. George Braithwaite, and Mr. R. L. Wood was elected by a majority of 1. He will consequently be recommended for the vacant post.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, June 5.

Queen's (Westminster) Rifle Volunteer Corps—Henry Marley Burton, Gent., to be Lieutenant; Joseph Samuel Lavies, Esq., M.D., to be Surgeon.

The London Irish Volunteer Corps—Lieutenant Richard de Freyne Jones, to be Captain; Ensign Thomas Dominick Tulley, to be Lieutenant, vice Jones, promoted; William Howard Russell, Gent., to be Lieutenant; Lord Francis Nathaniel Conyngham, to be Lieutenant; Robert Ogilby Law Ogilby, Gent., to be Ensign.

West Middlesex Rifle Volunteer Corps—Eric Williams, Gent., to be Lieutenant; Charles Dear, Gent., to be Lieutenant; William Page Thomas Phillips, Gent., to be Ensign.

1st Sussex Rifle Volunteer Corps—Lieutenant Henry J. P. Woodhead, to be Captain; William Russell Glasier, to be Lieutenant, vice Woodhead, promoted.

The Queen has been pleased to approve of Captain Henry J. P. Woodhead bearing the title of Captain-Commandant in the above corps.

Kent Rifle Volunteers—26th Corps (Battalion)—Lieutenant John Pettman, to be Captain, vice Oram, promoted; Ensign Robert Smith, to be Lieutenant, vice Pettman, promoted. 9th Company—Rev. Samuel Arnott, M.A., to be Hon. Chaplain; John James Ely, to be Hon. Assistant-Surgeon. 31st Company—Ensign George Blackett, to be Lieutenant, vice Duppa, resigned. 38th Corps (Subdivision)—Leonard Barber Groves, Gent., to be Lieutenant; John Cole Gubbins, Gent., to be Ensign.

Staffordshire Rifle Volunteer Corps—4th Battalion—Christopher Atkinson Newnham, Esq., to be Surgeon; the Rev. John Hodgson Iles, Clerk, to be Hon. Chaplain. 1st Company—Ensign Robert Lovelace Homer Mole, to be Lieutenant, vice Sir F. E. Scott, Bart., resigned. 5th—Lieutenant Frederick Walton, to be Captain, vice Vernon, promoted. 31st—Ralph Docker, Gent., to be Lieutenant; George Stevens, Gent., to be Ensign.

1st Newcastle-upon-Tyne Artillery Volunteers—Henry Christian Allhusen, Esq., late Captain in the Northumberland Artillery Militia, to be Captain-Commandant; George Clements Hassell, Esq., late Ensign in the Royal Sussex Light Infantry Militia, to be Captain; William Bolam, Gent., to be First Lieutenant; Christian Wilton Allhusen, Gent., to be First Lieutenant; John Archer Dawson, Gent., to be Hon. Assistant-Surgeon; the Rev. Charles Alfred Raines, M.A., to be Hon. Chaplain.

1st Brigade Cornwall Artillery Volunteers—Lieut.-Colonel Gilbert, half-pay Royal Artillery, to be Lieut.-Colonel.

1st Cornwall Rifle Volunteer Corps—Lieutenant Harry Dobree, to be Captain, vice Tremenhere, promoted; Ensign Thomas Cornish, to be Lieutenant, vice Dobree, promoted; Francis Boase, Gent., to be Ensign, vice Cornish, promoted.

7th Monmouthshire Rifle Volunteers—Her Majesty has been pleased to approve of Captain Robert James Cathcart bearing the title of Captain-Commandant; Tom Llewelyn Brewer, Esq., to be Captain; John Henry Willmett, Gent., to be Lieutenant; Henry Burton, Gent., to be Ensign, vice Willmett, promoted; Wyndham Jones, Gent., to be Ensign.

3rd Kincardineshire Rifle Volunteers (Lawrencekirk). Alfred W. H. Farrell, to be Captain; William Burness, to be Lieutenant.

18th North Riding of Yorkshire Rifle Volunteer Company—John Thomas Wharton, Esq., to be Captain; Thomas Lawrence Yeoman, Esq., to be Lieutenant; Edward Bell Hamilton, Gent., to be Ensign; Charles Christopher Erasmus Hopkins, Gent., to be Hon. Assistant-Surgeon.

15th Essex Rifle Volunteers—Thomas William Nunn, Esq., to be Ensign.

1st Battalion Essex Rifle Volunteer Corps—Sir Claude William Champion de Crespigny, Bart., to be Lieut.-Colonel.

4th Elginshire Rifle Volunteers—John Grant, Gent., to be Captain; John Gardiner, Gent., to be Lieutenant; Peter Dean, Gent., to be Ensign.

Renfrewshire Rifle Volunteers—5th Company—Ensign James Dunbar to be Lieutenant, vice Berkmyre, resigned; David Gilkinson, Gent., to be Ensign, vice Dunbar, promoted.

9th (Bannockburn) Company of the Stirlingshire Volunteer Rifle Corps—Alexander Wilson, jun., Esq., Ensign 1st Company, to be Captain; John Fiskin Halket, Gent., to be Lieutenant; George Watson, Gent., to be Ensign.

8th (Strathblane) Company or Subdivision of the Stirlingshire Volunteer Rifle Corps—John Coubrough, Gent., to be Lieutenant; Archibald M'Indoe Graham, Gent., to be Ensign.

2nd (Stirling) Company or Subdivision of the Stirlingshire Volunteer Artillery—John Murrie, Gent., to be First Lieutenant; Thomas Freer Ash, Gent., to be Second Lieutenant.

2nd Edinburgh County Rifle Volunteer Corps—Lieut.-Colonel David Edward Brewster to be Captain-Commandant; William Mushet to be Captain; John Gray to be Lieutenant; Ralph Elliot to be Lieutenant; William Paterson Anderson to be Ensign; James Paterson to be Ensign; John Lucas, M.D., to be Assistant-Surgeon.

Memorandum—Royal Aberdeenshire Highlanders—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant Charles Leith Hay.

WAR OFFICE, PALL MALL, June 8.

4th Buckinghamshire Rifle Volunteers—The Venerable Archdeacon Bickersteth to be Honorary Chaplain; James Henry Cecly, Gent., to be Honorary Assistant-Surgeon; Herbert Astley Paston Cooper, Gent., to be Ensign.

1st Norfolk Artillery Volunteer Corps—Second Lieutenant John Lee Barber to be Captain.

Great Yarmouth Rifle Volunteer Corps—Captain James Henry Orde to be Major; Henry Holt Barber, Esq., to be Captain; William Holt, Esq., to be Captain; George Moore, Gent., to be Lieutenant; William Frederick Ferrier, Gent., to be Lieutenant; John Cobb, Gent., to be Ensign; Samuel Aldred, Gent., to be Ensign.

1st Battalion of the Lancashire Rifle Volunteer Corps—Nathaniel George Philip Bousfield, Esq., Captain Commandant of the 1st Lancashire Rifle Volunteers, to be Lieutenant-Colonel.

2nd Battalion of the Lancashire Rifle Volunteer Corps—Adam Steuart Gladstone, Esq., Captain Commandant of the 5th Lancashire Rifle Volunteers, to be Lieutenant-Colonel.

33rd Lancashire Rifle Volunteers—Captain James Henry Cunliffe to be Major, vice Preston, resigned.

60th Lancashire Rifle Volunteers—The Reverend Samuel Johnson, M.A., to be Honorary Chaplain; James Croston, Gent., to be Honorary Assistant-Surgeon.

62nd Lancashire Rifle Volunteers—Walter Scott, M.D., to be Honorary Assistant-Surgeon.

68th Lancashire Rifle Volunteers—William Gibson Bradley, Esq., to be Captain.

71st Lancashire Rifle Volunteers—John Scott, Esq., to be Captain.

1st Battalion in Sussex of Rifle Volunteers—F. Freeland, Esq., to be Surgeon.

3rd Battalion in Sussex of Rifle Volunteer Corps—John Laurence, Esq., late Grenadier Guards, to be Surgeon.

10th Sussex Rifle Volunteer Corps—Charles Sturges Jones, Esq., to be Honorary Assistant-Surgeon.

Eye or 10th Suffolk Rifle Volunteers—Captain Philip Henry Michell to be Captain Commandant; John Wood Wilson, Gent., to be Lieutenant; James Devereux Hustler to be Ensign; Walter William Miller, Gent., to be Assistant-Surgeon.

2nd Glamorgan Artillery Volunteers—Charles Pigg, Esq., to be Honorary Assistant-Surgeon.

Glamorganshire Rifle Volunteers—17th Company—Evan Evans, Esq., to be Captain; David Bevan, Gent., to be Lieutenant; James Kerr, Gent., to be Ensign; Alexander Williams, Esq., to be Honorary Assistant-Surgeon

1st Battalion West Riding of Yorkshire Rifle Volunteers—Major George Briggs, Captain Commanding York Rifle Volunteers, to be Major Commandant.

Memorandum—Hallamshire Rifle Volunteer Corps—Her Majesty has been pleased to accept the resignation by Lieutenant William Prest, of his Commission as Adjutant.

13th Shropshire Rifle Volunteers—Richard George Jebb, Esq., to be Captain; The Honourable Adelbert Cust to be Lieutenant; Salisbury Mainwaring, Esq., to be Ensign; John Withington Roe, Esq., to be Honorary Assistant-Surgeon; The Reverend John Peake to be Honorary Chaplain.

19th Surrey (or Lambeth) Rifle Volunteers—Richard Roupell, Esq., to be Captain; John William Truman, Gent., to be Captain; William Howard, Gent., to be Captain; Matthew Plews, Gent., to be Captain; John Smithers, Gent, to be Lieutenant; Henry Knight, Gent., to be Lieutenant; John Grady, Gent., to be Lieutenant; Thomas Hill, Gent., to be Lieutenant; James Seagrave, Gent., to be Ensign; William John Smith, Gent., to be Ensign; James Alfred Thornhill, Gent., to be Ensign; Frederick Hill, Gent., to be Ensign; Robert Matthews, Gent., to be Surgeon.

2nd Battalion of Warwickshire Rifle Volunteers—Edward Phillips, Gent., M.D, to be Surgeon.

4th Company (Rugby)—Andley Charles Thewles, Gent, to be Ensign, vice Wratislaw, promoted; Henry Walter Bucknill, Gent., to be Honorary Assistant-Surgeon.

5th Company (Warwick and Leamington)—Charles William Marriott, Gent., to be Honorary Assistant Surgeon.

7th Company (Stratford-on-Avon)—Henry Lane, Gent., to be Honorary Assistant-Surgeon.

Carnarvonshire Volunteer Rifle Corps—3rd Company—Richard Henry Fawcett, Esq, to be Captain, vice Henry Rumsey Williams, Esq., resigned; Ensign James Wilmot Rees to be Lieutenant, vice Poole, resigned; John Thomas Williams, Gent., to be Ensign.

Burnham or 4th Somerset Volunteer Rifle Corps—Henry Hayman, Gent., to be Honorary Assistant-Surgeon.

Williton or 9th Somerset Volunteer Rifle Corps—William Thomas Gaye, Gent., M.B., to be Honorary Assistant-Surgeon.

Wiveliscombe or 12th Somerset Company of Volunteer Rifle Corps—William Hancock, Esq., to be Captain, vice Moysey, resigned; The Reverend William Nicholetts, Clerk, to be Honorary Chaplain.

Avon Vale and Warleigh Manor or 14th Somerset Volunteer Rifle Corps—Joseph Hinton, Gent., to be Honorary Assistant-Surgeon.

1st Battalion Berks Rifle Volunteers—Lieutenant-Colonel Robert Loyd Lindsay to be Lieutenant-Colonel.

3rd Corps of Berks Rifle Volunteers—Lieutenant Henry Richard Eyre to be Captain; Ensign George Charles Cherry to be Lieutenant.

Worcestershire Rifle Volunteers—Company No. 6—Lieutenant Hunt to be Captain, vice Smith, promoted; Ensign Homfray to be Lieutenant, vice Hunt, promoted.

15th Corps of the Hampshire Rifle Volunteers—George Mason, Esq., to be Lieutenant.

2nd Hampshire Rifle Volunteer Corps—Henry Dayman, Esq., to be Surgeon.

The name was inserted in the Gazette of the 22nd May last, and spelt *Daymon* instead of *Dayman*.

7th Company of the Hampshire Rifle Volunteers—William Kelsall, Gent., to be Lieutenant; Charles Dunn, Gent., to be Honorary Assistant-Surgeon.

Wiltshire Volunteer Rifle Corps—4th Company—The Reverend Lowis Purbrick, Clerk, to be Honorary Chaplain.

10th Company—John Ravenhill, Gent., to be Lieutenant; Herbert Ingram, Gent., to be Ensign.

2d Cambridgeshire Mounted Rifle Volunteers—Dennis Adams, Esq., to be Honorary Surgeon.

Cambridge University Rifle Volunteers—Ensign James Penrose Ingham to be Lieutenant, vice Darroch, resigned.

Memorandum—Oxford University Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Edmond Warre.

Merionethshire Volunteer Rifle Corps—The appointment of Alfred Mortimer Stubbs, Gent., as Paymaster of the 1st or Penllyn Company of the above Corps, has been cancelled.

5th Brecknockshire Rifle Volunteer Corps (Builth Subdivision)—Thomas Price Bligh, Esq., to be Lieutenant; Trevor G. William James, Esq., to be Ensign; William Prydden James, Esq., to be Honorary-Assistant-Surgeon; the Reverend William Williams to be Honorary Chaplain.

5th Kirkcudbrightshire Rifle Volunteers—James Bairden Affleck McKinnel, Esq., to be Captain; Francis Stallan Allan, Gent., to be Lieutenant.

City of Edinburgh Rifle Volunteer Corps—Thomas Macfarlane to be Captain; Thomas Steven Lindsay to be Lieutenant; John Greig, junior, to be Ensign; Ensign Robert Roy Paterson to be Lieutenant, vice Fullarton, resigned; John Cargill to be Ensign, vice Paterson, promoted.

City of Edinburgh Artillery Volunteer Corps—George Meldrum to be Captain; John Gow Harrison to be First Lieutenant: William Matheson to be Second Lieutenant.

Leith Rifle Volunteer Corps—William Peddie Harper to be Captain; William Lindsay to be Lieutenant; Alexander Duncan to be Ensign.

1st Cromarty Artillery Volunteers—Lieutenant-Colonel Ross to be Captain Commandant; Donald Mackay, Esq., to be First Lieutenant; George Macdonald, Esq., to be Second Lieutenant.

2nd Renfrewshire Rifle Volunteer Corps (consisting of the 3rd, 6th, 14th, 20th, and 24th Companies, formed into a Battalion)—Captain Alexander Fullerton, of the 3rd Company, to be Major.

Memorandum—Captain William MacKean, of the 6th Company, has been appointed Musketry Instructor to this Battalion, retaining his present rank and seniority.

1st Lanarkshire Artillery Volunteers (Glasgow)—Second Lieutenant Robert Lyall to be First Lieutenant (in the 10th Company), vice Charles Grant, resigned; James Coats, Gent., to be Second Lieutenant (in the 10th Company), vice Lyall, promoted.

90th Lanarkshire Rifle Volunteers (Glasgow) Joseph Muirhead, Esq., to be Captain.

91st Lanarkshire Rifle Volunteers (Glasgow)—Patrick Edward Dove, Esq., to be Captain; Duncan Lennox, Gent., to be Lieutenant; William Mackay, Gent., to be Ensign.

Memorandum—In consequence of the amalgamation of the Galloway Rifles with the Royal Ayrshire Rifles and the Dumfries, Roxburgh, and Selkirk Corps, Lieutenant-Colonel Sir William Maxwell, Bart., is permitted to wear his uniform and retain his honorary rank of Lieutenant-Colonel.

The National Rifle Association.—At the meeting of the National Rifle Association which was held on Saturday at Willis's Rooms the chair was taken by the Secretary for War. The object of this association, which was formed last year, is to encourage rifle shooting; it will offer prizes to be competed for every year, by all comers, and constitutes an essential feature in the Volunteer movement. The report read at the meeting on Saturday last is, on the whole, satisfactory. Rooms have been taken in Trafalgar Square, and a secretary appointed. The gross amount of subscription received up to the present moment is 3308*l.*, and though Lord Elcho found fault with the comparative smallness of the sum, it is, at least, a good beginning. It is true that Switzerland furnishes 10,000*l.*, to be contested for, in prizes, at the biennial meetings; but, if the National Rifle Association establishes its claim to public support, the question of funds will speedily cease to be a difficulty. The first meeting is to be held at Wimbledon, in July, when there will be two descriptions of prizes—one set for Volunteers, and another open to comers of all nations. Competitors are to be there from Switzerland and Belgium, who will also be entitled to shoot for the prize of 100 guineas given by Prince Albert. On the 9th of July will take place the competition for the Queen's prize of 250 guineas, and on that day it is expected that Her Majesty will be present. No matter from what cause it may have arisen, the Volunteer movement has now taken its place among the institutions of the country. In a letter read at the meeting on Saturday, Lord Lyndhurst said that "a free people, if worthy of their character, must be ready at any moment to defend their freedom." This conviction has taken a firm and deep root in the minds of all classes of the community in this country, and there is little reason to fear that it will soon die away. But if anything could give stability to this Volunteer movement it is that open and healthy competition which it is the object of the National Rifle Association to promote.

VOLUNTEER DRILL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The assembling of Volunteers in brigades and divisions may, no doubt, be of use as a demonstration, and may be the means of increasing the popularity of the movement; but I cannot see how, as some writers suppose, the drill of the different corps can be in any way improved by it. The only persons who can learn anything by practising brigade movements are the brigadier, his staff, and the mounted officers of battalions. The rank and file can learn nothing more than they have been taught in squad and company drill; in battalion drill they learn nothing, as the officers and sergeants are alone responsible for the relative positions of the companies. All that the men have to do is to obey the word of command, right or wrong. So it is in brigade, the correct movements of the battalions depending upon their respective commanding officers, mounted officers, and battalion aides. The commanding officers, having to pay attention to the orders of the brigadier, cannot exercise the same supervision over their battalions as they would do if drilling them singly; so that, as is well known, the drill even of the best regiments is deteriorated by working in brigade. I would suggest that the mounted officers of Volunteers can learn their duties in brigades and division by assembling a few men of their corps and practising skeleton drill. With forty-eight men provided with section ropes every movement can be gone through that can be performed by a strong battalion of six companies, and in the same way brigades and divisions can be formed. (See "Field Exercise," Part vi., sec. 12.) Brigade drill can be learned in this way quite as well as if all the corps were assembled, while the valuable time of the Volunteers may be much more profitably occupied in company drill and musketry instruction.—I am, sir, &c.

VOLUNTEER DISCIPLINE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A month or so ago, being at the time in Exeter, I read in one of the local papers that, on a parade of some sort, a deputation from the corps of Volunteers of that city had coolly walked up to one of the officers and asked him to resign. Subsequently, being in North Wales, I read in the Caernarvon paper that at a recent parade of the Volunteer Rifle Company at Dolgelly, the men, being dissatisfied at the captain not remaining on parade as long as they thought he ought to do, and at his not addressing them, marched from the parade ground to the Town Hall, and then and there disbanded themselves.

Now, as long as such anomalies and such indistinct ideas of discipline prevail, it cannot be a matter of surprise that military men should more than doubt their efficiency for any practical purpose. If they are ever to be of any use in the field they must first learn to obey, and instead of marching about the principal streets of the metropolis and the country town, headed by monstrous bands, which on real service are always in the way, let them set to work at drill in real earnest, and let each man be provided with a great coat and a small serviceable knapsack, or, what is better, a valise, so as to be ready to move to any part of the country at a short notice. Prompt obedience and steady discipline might then turn them out such a force as a general officer could depend upon for efficiency.—I am, &c.,

A FIELD OFFICER OF THE LINE.

THE SWORD, AND HOW TO ABUSE IT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The Volunteer movement cannot, it would appear, exist except in a controversial atmosphere. 1st. There was the controversy about the military *status* of Volunteer officers; their right to be presented at Court, without reference to their social position; the hardship of their not being saluted by their own men, and their title to be saluted by the regulars. This question was (let us hope, finally) set at rest by the very judicious leading article in your paper of the 21st of April. 2nd. There was the great Drill-Book discussion, started and kept going by certain interested parties who, intent on puffing their own compilations, and presuming on the greenness of the newly-fledged Volunteers, fell foul of the authorised "Green Book." This question was at last settled by Colonel Lysons' letter, in which he temperately yet conclusively demonstrated to his amateur critics that they did not know what they were talking about. 3rd. There is a controversy now fiercely raging about the propriety of Volunteer "privates" wearing long swords (in other words, endeavouring to pass themselves off as "officers") when, tired of war's alarms, they promenade the streets, recreate themselves in the Crystal Palace, "trip it on the light fantastic toe" at the casino, or on any other of the numerous occasions when they consider it the *fromage* to sport their uniform.

It is in connection with this last momentous question that I ask your permission to say a few words. The sole authority I have been able to discover for the assumption by Volunteers of the privilege (?) in question is the *dictum* of Mr. Hans Busk, who, in six successive editions of one of his books, has stated that the members of his own corps (the Victoria Rifles) "being all by birth and position *armigeri*, are entitled to wear long swords when off parade." The transparent absurdity of such reasoning is such as to render any comment wholly unnecessary; and yet, incredible as it may appear, numerous members, not only of the Victoria but also of other metropolitan corps, have swallowed it without an effort, and long swords are becoming more and more ubiquitous.

Surely it is high time that a stop were put to a practice which is not only ridiculous but positively mischievous, inasmuch as it affords a handle to those enemies of the Volunteer movement who are only too ready to seize on its weak points. I cannot but think that a few of your well-chosen remarks would go far to abate what will shortly come to be known as "the long sword nuisance."

I am, &c.,

ESSE QUAM VIDERI.

THE VOLUNTEER SHAM FIGHT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You are aware that, on the 23rd inst., a sham fight is to take place, between some of the Metropolitan and other rifle corps, near London. No doubt the English side will eminently distinguish itself, and defeat the enemy; but allow me to warn my comrades, never, during the fight, to leave the rod in the barrel.—I am, &c., JOHN HALSE, Serjeant, Volunteer Guards.

MOUNTED RIFLEMEN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I read with much interest and pleasure the description of the First Devon Mounted Rifle Volunteers, and the letter of a Mounted Rifleman published in your valuable Journal of the 2nd instant.

The value of such a force cannot be too highly estimated. I remarked, however, when reading the account of their equipment, that what seems to me a very desirable and useful adjunct, or I should rather say portion of their equipment, had been overlooked, and that is a Colt's revolver.

Whilst in the United States a short time since, I was much struck with the immense utility of such a weapon, from having seen some of the horse-soldiers go through their drill with this admirable arm, which the United States Government has supplied to all the mounted troops. I found the men and officers unanimous in their praise of it; and they have a regular drill for it, which is very simple and easily learned.

It struck me that in action the power of being able to fire the whole six shots, without having to cock the arm, would be of great utility; but the officers told me, after having given the other system of self-cocking a patient and careful trial, it was unanimously condemned on account of its great liabilty to cause accident.—I am, &c.

A TRAVELLER.

INDIA.

(FROM A CORRESPONDENT.)

Delhi, 6th April.

India, you see, is not so very quiet after all. Those riots in Bengal afford the best evidence of the truth of what I have so often said, namely, that the Europeans in this country do tyrannise whenever they can over the wretched people of the country. Our countrymen, who have never left England, cannot take this in. They cannot understand a people, numbering 10,000 to 1, submitting long to systematic tyranny; and I was much struck to find how exactly "Eothen" has appreciated this peculiarity of native character in his account of Lady Hester Stanhope and her relations with the Arabs. He writes, "The secretary told me that his mistress was strongly disliked by the surrounding people, and that she oppressed them a great deal by her exactions. I know not whether this statement had any truth in it; but whether it was or was not well founded, it is certain that in Eastern countries hate and veneration (or rather dread) are very commonly felt for the same object, and the general belief in the superhuman power of the wonderful white lady (read unscrupulous red-faced indigo planter), her resolute and imperious character . . . . . inspired sincere respect amongst the surrounding inhabitants. Now, the being 'respected' amongst Orientals is *nil*—an empty or merely honorary distinction, but carries with it a clear right to your neighbour's corn, his cattle, his eggs, and his honey, and almost everything that is his except his wives."

Now, if this is the case with the turbulent, lawless Arab, need we be surprised that the mild, docile, long-suffering Hindoo allows himself to be ground down by our unscrupulous, energetic countrymen?

I look on every indigo planter, and almost every European settled in this country for the purpose of making money, as another Hester Stanhope, a man determined to sacrifice everything and everybody to the furtherance of his own interests, utterly regardless of the rights and of the sentiments of those around him. The disturbances in Bengal are the result of our permitting this sort of thing to go on, and were predicted years ago by the missionaries. They will of course be put down, because the Bengalee cannot fight, though he may offer a passive, and therefore a very troublesome resistance to our efforts towards their pacification. The amalgamation of the army is still in somebody's womb, but, I suppose, will be delivered soon. In the meantime staff appointments are rapidly filled up by the officers of Her Majesty's army, an arrangement which I like very well, as far as they are personally concerned; but it is certainly fraught with mischief, and will have its fruit some day to a certainty. No one thing contributed more to sap the discipline of the Company's army than that system of withdrawing officers for staff employ. The evils it produced are admitted, and cannot be exaggerated. The same system is now in full force with Her Majesty's regiments. Officer after officer is withdrawn for staff employ; the worst of it being that, the more conscientiously the Commander-in-Chief selects, the greater the evil done. In the old days, interest had at least as much to do with the selection as merit; so that some good ones were left behind. Now, the best are taken, and to the remainder the famous epithet ascribed to Sir Patrick Grant, when talking of the very abuse now complained of, will soon be applicable: he styled the officers left with their corps—the refuse, the sweepings of the army. It is fast coming to this with Her Majesty's regiments in India. The ill effects will not be observed at first. It will be some time before they are fully developed. The poison is a slow one, but not the less sure. One would suppose that discipline is more easily maintained in India than in England, to see what liberties are taken with it in the former country. No one knows better than you how much the contrary is the case—how the best regiments deteriorate in this country—how apt they are to lose that *esprit de corps* which does so much for them at home. It is difficult enough as it is to induce men of ability and energy to enter the Army. It is madness when you have got them to employ them on duties which entirely separate them from their regiments. The aim and object of every young officer, instead of having to command a company well, and eventually a regiment, will give way to a desire for separate staff employ. Regimental duty will soon be regarded as a bore, as low, as fit only for poor devils without brains or interest. I may, but do not think I do, exaggerate the danger.

17th April. I commenced this letter more than ten days ago. Since then the Governor-General and Commander-in-Chief contrived to reach Simla. There was a "tamasha" at Pingore, but the Governor-General did not go, as the rajah himself was not able to be present. The next day on his way to Simla his "lordship" was attacked by "tic," which delayed him a good deal, for he has suffered every day since till, I believe, yesterday. He arrived in Simla late on the night of the 11th, the Commander early on the morning of the 13th. The latter is showing marked symptoms of old age. Those who are best able to judge, tell me that his memory is failing him, and he complains of his liver.

The papers will give you the latest authentic details of the Trevelyan rebellion.

But one of the most singular things that has occurred is the row at Peshawur, of which it is just possible you may not receive intelligence, for the Punjab government mean to keep it, if possible, a secret. The facts are that a garbled translation of Wilson's speech was circulated by authority of the Punjab government. The merchants, traders, and artisans of Peshawur, as soon as they read it, proceeded in a body, numbering about 5000 men, to the office or residence (I don't quite know which) of the deputy-commissioner. They loudly complained of the proposed taxes. The deputy-commissioner went out to pacify them; told them that anything they had to say would be listened to, if from the mouths of two or three of their principal men; but that he could not attend to a crowd. The rioters proceeded to throw stones at the deputy-commissioner, who was compelled to retire into his house and send for some sowars, who rode down and dispersed the crowd. The next day the principal men of the city came forward and apologised for their conduct.

The curious feature in the affair is, the boldness displayed by what are contemptuously styled the "bunnias," by which Englishmen designate the tradesmen, bankers, &c., of India—a boldness hitherto unheard of; but verily the mode in which taxation has been introduced into the district was quite sufficient to create, not a riot, but a rebellion.

Before Wilson set his foot in India, Sir Robert Montgomery obtained the sanction of the supreme Government to impose a tax of 3 per cent. on profits, which was nothing more than an income-tax. Very good. But the moment he announced his intention of imposing this tax to the people of Lahore and Amritser, they remonstrated and made such a clamour that Sir Robert agreed to their proposal, which was the substitution of octroi or town duties. Yielding thus to mere clamour was bad enough, but the mode in which the town duties were laid on exhibited still greater weakness, indecision, and imbecility. Instead of one carefully prepared tariff for the whole country—so much discretion was given to local authorities, that practically every district officer in the Punjab had the power, and did not fail to exercise it to frame his own tariff. The result was the most ludicrous or rather the most painful difference in the tariffs of almost every district in the Punjab. Some officers thought that the luxuries of life should alone be taxed; others the necessaries as well. Some differed as to what were necessaries and what were not. Some thought that the income-tax was the best after all, and acted accordingly.

The tariffs of Amritser and Delhi may be taken as an illustration of what I have above said. In the former every collectable article is taxed—luxuries, necessaries, everything. For the latter, not above half-a-dozen, including tobacco and shawls. Up to this moment no attempt has been made to introduce uniformity. For instance, in Simla grain is not taxed. In Subathoo, under another officer, grain is taxed.

Do you mean to tell me this is not perfectly scandalous, and utterly unworthy of an enlightened Government? Is it to be wondered at that dissatisfaction and riots occur?

But the best of the whole is, that Wilson's speech condemns the town duties in the most sweeping and unmeasured terms, thereby placing the Lahore Government on the horns of a dilemma; for, if Wilson's income-tax is enforced, the Lahore Government must break faith with the merchants of Lahore and Amritser; and, if it is not (which can hardly be the case), then Wilson's undertaking had better never been thought of.

The truth is obvious: the Government made a great mistake in allowing any subordinate government to commence taxation till a general scheme had been thoroughly matured; and the Punjab Government committed the egregious error of deciding on one mode of taxation, and, at the last moment, substituting another, merely to satisfy a popular cry.

Conceive, if you can conceive, a chancellor of the Exchequer coming to the House with a proposal for an income-tax, and because the Opposition chose to oppose it, without any hesitation agreeing to substitute a system of town-duties, leaving to the magistrates of counties the troublesome work of fixing the tariffs. Such monstrous conduct is what I call studying anatomy on a live, instead of a dead, subject,—I have no doubt a very interesting and instructive method of making oneself acquainted with the structure of the human frame; but we should not be surprised if the live subject should occasionally exhibit signs of impatience, and give a vigorous blow with his "left," or kick out with an undissected leg.

It really would be very edifying if you could induce some Member of Parliament to call for all the papers connected with the introduction of taxation in the Punjab. Lord Canning himself is not free from blame; he is responsible for the Punjab experiment, because he accorded his sanction to it. Yet at the very same time—within one month—he entirely concurs with Wilson in utterly condemning town-duties as fit only for the middle ages.

I believe the excitement produced by Wilson's speech was not confined to Peshawur, but manifested itself in Delhi, where, it is said, some Sikhs were tampered with; though not at all improbable, I cannot vouch for the truth of this.

There is another important consideration which should not be lost sight of in the discussion of these matters.

For years past we have been busily engaged in educating the people of India, teaching them that all men are free; that the most glorious events in the history of our nation are those occasioned when our ancestors resisted, by rebellion, the efforts of despotic rulers to impose taxes without our consent. We teach them all this, and much more, and then act as if we had taught them nothing, or at any rate as if we expected our teaching would produce no fruit, would not return after many days. It appears to me to be a sad error to educate, and then to act as if we had not educated; and the problem which our Indian statesmen have now to solve, and which must be solved sooner or later, is, how are we to continue to govern a people into whom we have taken every opportunity of instilling the principles of true freedom, and a religious horror of despotism, but whom we have hitherto ruled on the strictest principles of despotism. If we fill the boiler with steam, we must provide a safety valve, otherwise the whole concern will inevitably come to grief. If we impart knowledge, if we instil principles of freedom into a people hitherto held down by the strong arm of despotism, we are bound to provide means by which those we have taught may exercise the rights we have taken such pains to tell them they possess. Nothing can be more singular than the view which we Englishmen present to the native eye. First they see a government, with its train of officials, administering a despotism very similar to that of France, with this important difference, that in France the government of officials is consonant to the feelings of both the governors and governed, whereas the Indian government and Indian officials are despotic from necessity, and, in being despotic, act in direct opposition to all they have ever been taught to admire and reverence. Thus we have the anomaly of the most free people in the world administering the most unequivocal despotism in the world. We have a set of officials calculated to believe "freedom" to be the greatest blessing; yet, carrying out the wishes of a government, which exists only so long as it can enforce the most thorough and unquestionable submission.

But besides officials, who at least act as if they considered despotism a desirable form of government, whatever they think and may occasionally say, a totally different class of

Digitized by Google

Englishmen is shown to the native eye. I allude to English adventurers. The wealth-seekers, whether Calcutta merchants, or indigo planters, or coffee planters, or tea growers, or brewers, or dealers, or tailors, or shoemakers—for they are all characterised by the same distinctive marks—they are all out-and-out radicals, which word radical I use in its lowest sense; that is, they all hate constitutional authority. They all resent the slightest encroachment on what they consider their rights, being as they say, British-born subjects, and therefore "freemen." They all without hesitation or scruple, trample on the rights of others, because, forsooth, they are not free-men.

In practice the way this feeling acts is this: an indigo planter purchases a large estate. From that moment neither the carts, nor the bullocks, nor the human beings on that estate, can be seized either for public or private purposes. If a government chuprassee ventures near the indigo planter's premises to "bone" a cart urgently required for a passing regiment, he is very soon sent to the rightabout—perhaps with something more than a flea in his ear.

Yet officials, English officials, teach the native that all are equal in the eye of the law. An excellent joke says the native, and verily all in my eye.

Take the hills. Every man in the hills is liable to be seized for begari-cornee, or forced labour. An Englishman purchases a village with its inhabitants. Are they not practically exempt from that day from forced labour? And yet, says the government official, the black man and the white man are the same in the eye of the law.

A town-duty was imposed the other day in the Punjab—three per cent. on all piece goods; the native has to pay, the European is exempted. In the Punjab, Mungul, the tailor, who sells trousers for 16 rupees the pair, charged by Snip and Co., at 28 rupees—material precisely the same—has paid the same sea-board duty in Calcutta. Mungul has to pay 3 per cent. on everything which enters the town; Snip and Co., Brown and Co., Jones and Co., pay nothing.

Yet there is but one law for the black man and for the white man. This is what old Olearius would call "a very pleasaunte tale;" very pleasant indeed for the European, but very much the contrary for the native.

But, you are surely sick of my politics.

Sir Robert Peel made a sad blunder on the occasion of his volunteer speech, the idea of which was evidently taken from Dryden's lines on Tymon and Iphigenia. Do you recollect them?

> Mouths without hands maintained at vast expense,
> In peace a charge, in war a weak defence;
> Stout once a month they march, a blustering band,
> And ever but in times of need at hand, &c., &c.

The speech was certainly a mistake, though it doubtless contained some atoms of truth.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.

On Monday, and during the Week, IT'S AN ILL WIND THAT BLOWS NOBODY GOOD; Messrs. A. Wigan and J. L. Toole; Mrs. Wigan and Miss H. Simms. After which OUR FEMALE AMERICAN COUSIN; Miss Julia Daley (the American Actress). To conclude with MODEL OF A WIFE. Commence at Seven.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly, Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.

The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0	8	6
D or E flat ditto	0	6	6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1	1	0
No. 2, Light Infantry Model	1	8	0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s.*, or strongly electro-plated, 63*s.*; green cord and tassels, 3*s.* 6*d.*; silk ditto, 8*s.*; enamelled leather case, with strap and buckle, 12*s.* Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

Much as we may sympathise with General Beatson, we are afraid we cannot fairly allow our columns to be made the means of an appeal from the decision of the legal tribunals of the country.

CENTURIO BRITANNICUS. See present number.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 9, 1860.

As at first glance the proposition in our last Number to form a permanent and effective Naval Force of 110,000 men may seem gigantic, and the expense entailed naturally proportionate, it is therefore requisite to state the number of men at present employed, and having compared the relative expense of the two systems, subsequently to consider their relative efficiency. The Navy Estimates for 1860-61 give as follows, under the head of wage, for—

66,100 officers and seamen in Fleet and Coast Guard	£2,905,323
18,000 marines	571,434
Total	£3,476,757

To which may be added a vote of 287,725*l.* for 1400 civilians in the Coast Guard, and the contingent and other expenses of the Coast Volunteers and Royal Naval Reserve—the whole affording an effective total of nominally 85,500 men, including 7176 officers of every denomination, and from 8000 to 10,000 boys; and excluding a few thousands of Coast Volunteers, which are not worth the money expended on them under their present organisation; and the Royal Naval reserve, which as yet only exists on paper to the number of a few hundreds.

The total available force then, against an expenditure of 3,764,483*l.*, is about 68,824 effective men.

The Standing Navy, into the organisation of which we entered in last week's ARMY AND NAVY GAZETTE, proposes to give an effective and available force of 110,000 men for a smaller sum, viz.:

Men.		*Wages.*
40,000	Standing Navy	£1,640,000
20,000	Irregulars attached to do.	820,000
10,000	Standing Reserve, or Coast-guard	410,000
20,000	Irregulars, attached to do.	240,000
20,000	Marines	620,000
Total strength	110,000	Total cost £3,730,000

But, to this must be added 110,000*l.* as the wages of 10,000 boys, who should never be confounded with the actual strength of the Navy, however necessary they may be as a nursery from which to recruit; as also 950,000*l.* as the wages of active officers of all denominations, which will give a probable increase of a little over a million per annum in the item of wages; but it must be also borne in mind that a portion of the whole will be economised in work performed in the transport service, which it is proposed the Government should take comparatively into its own hands—certainly, to such an aggregate amount of tonnage as would keep the superfluous numbers of the Standing Navy and its Irregulars in active employment—always retaining, however, 2500 men at the head-quarters of each division.

Now, for the sake of illustration, we will suppose the personnel of a Standing Navy, as above proposed, to be in complete working order at a total cost of 4,800,000*l.* per annum, or in round numbers at 1,000,000*l.* beyond present expenditure, which produces about 76,000 effective men and officers, and consider whether we get an equivalent, namely, an efficient nautical insurance to life and property in these islands, which we hold to be the first object to be attained by our Navy, thereby placing even the probability of the success of invasion beyond a doubt; and secondly, whether we can extend that insurance to our colonies and commerce.

Of the fallacious policy we have hitherto pursued, of being externally powerful and internally weak, almost offering a premium to invaders, it is not necessary to dilate; and therefore we shall proceed to review the defensive power this system proposes, as well as the elasticity it possesses for offensive warfare.

Whatever amount of force may be from time to time deemed requisite to constitute our distant squadrons, we hold that the defensive power at home should never be reduced beneath 30 sail of the line and their complete crews, the first ten of these to be in commission, and to constitute the Channel Fleet—never to leave our shores until replaced by vessels of the 1st reserve, which should consist in like manner of ten sail of the line, always to be kept stored and armed, in the charge of a company of officers and men belonging to the port, and in all respects ready for sea, saving the remainder of her crew, which in case of menace would be marched on board in the following proportions, which would be always told off in anticipation:—400 men of Standing Navy; 250 men of Standing Reserve; 250 Marines. The 2nd reserve, also of ten sail of the line, with only their topmasts on end and guns on board; but all stores told off in the yards, to be in charge of half a company of the division, and on emergency the remainder of the crew to be marched on board as follows:—200 men, Standing Navy; 500 men, Standing Reserve; 250 Marines. The vessels of the 1st reserve would thus be ready for sea in a few hours, those of the 2nd in two or three days.

Considering the 10,000 seamen always retained at the division head-quarters, together with 7000 Marines, the Channel Fleet could thus be in three days increased to 30 sail of the line, and yet there would be left available 2500 men of the Standing Navy, 2000 Marines, 2500 of the Standing Reserve, to say nothing of the 20,000 Irregulars attached to the latter, who would be immediately permanently enrolled to supply the vacancies in the division and Standing Reserve of 7500 respectively.

This would still leave 5000 irregulars of the Reserve available after completing the division to their minimum depôt strength of 2500 men each, as well as bringing the Standing Reserve of 10,000 men up to its original number; in all giving 25,000 seamen and 2000 Marines with which further to develop the national resources; and the safety of our shores being placed beyond a doubt, we might with confidence rely on Volunteers for all the further demands of offensive warfare.

To demonstrate that the present want of system could not produce like results, is hardly necessary; on the contrary, that it possesses neither discipline, elasticity, nor diffusive power, must now be apparent, however startling and humiliating to the meanest capacity.

That the extra million required to vivify these propositions, could not be saved in our lavish dockyard expenditure, few will be inclined to deny—whether our "faithful ally" will give us time to place our first and only natural line of defence in order, time can only show.

We regret that a gallant officer has taken somewhat too much *au sérieux* some remarks in our penultimate number on the "Present condition and prospects of Captains of the Navy." We lightly touched, and we thought good-naturedly enough, on some apparently weak points in the pamphlet referred to; and, although we had hoped that the speedy announcement of the Duke of Somerset's promised scheme of retirement for the executive officers of Her Majesty's Navy, would have rendered a recurrence to this subject unnecessary, we of course insert this officer's letter, criticising our previous article, and will now endeavour to satisfy our readers, and we trust our correspondent himself, on the various points he raises.

He appears to be aggrieved that we described those officers which the pamphlet states cannot afford to accept a command when offered to them, as "having mistaken their profession;" but he leaves out the explanatory sentence which follows, and which shows that by these words was only meant what the pamphlet itself says, and our correspondent clearly understands from the terms in which he subscribes his letter. He also explicitly admits that "the observation would have some force if the condition of these officers were an essential, unalterable, condition." We think it true for the present; and only of no force, if the condition of captains *now* could be shown to be worse than when they entered the Navy as cadets. At the same time we shall be very glad to see their condition improved.

We are perfectly certain that if time served in the junior grades were allowed to count for half-pay or retirement, the period of service for a given rate of half-pay must needs be greater, or, as we said before (but is imperfectly quoted by our critic), "less pay would be allowed for each year than if time only after promotion is counted." This view is founded upon the nature of such service, and the value of money; and instead of answering our correspondent's next question, a slightly invidious one, we leave this point to his further consideration. We may inform him, however, that the paymasters are not quite satisfied as to the time they are allowed to count; and we retain our view of this subject. He will not quarrel, surely,

Digitized by Google

with the manifest converse of our proposition, that if time in the lower grades is not counted, then the various gradations of rates of half-pay or retirement should be regulated by shorter periods of service; in other words, more pay should be allowed for each year that *is* counted as service.

We do think the "mere money estimate," a "low" ground on which to argue this question; and we think the foundation, also, not "good." The ground is low, because the mere money paid to the officers in the British Navy and Army, with few and rare exceptions, is far from being a due measure of their worth and of the honour with which they are regarded. The argument, based upon any difference between the pay of captains in the British Navy and the navies of France and America is bad, because *non cæteris paribus*. Let two English gentlemen, if they will, discuss the pecuniary advantages or disadvantages of their having chosen, one the Navy, the other the Army, as his profession, and the point will be at least a fair one for discussion. But both must be perfectly aware that they have "mistaken their professions" if they entered them to make money. The desk, the counter, and the counting-house, are the places for making money, where also may be pursued bubbles almost of every kind, save that "bubble reputation" which the soldier seeks "even in the cannon's mouth." But, who is honoured most? Has our correspondent ever walked in the aisles of Westminster Abbey, or beneath the dome of St. Paul's? Or, will he read the poet's words as he read our article, and deem reputation a mere "bubble," literally, compared with the money-profits of a successful bubble-company? We know the vice of the age; the mammon-worship that too much prevails. May it never permeate the two noblest of worldly callings! "Of earthly blessings the meanest is wealth, reputation the chiefest. For which cause we esteem the gain of honour an ample recompense for the loss of all other worldly benefits." So wrote a very grave author in the days of good Queen Bess. Shall we take a lower tone?

But to return to the prosy view of "Naval Pay." Is our correspondent not aware that salaries and wages are altogether higher in America than in England? If so, he should do more justice to our logic. There is just a little bit of spite, and also an error in quotation, in the last paragraph of our correspondent's letter. We did not state that the pamphlet compared "the *half*-pay of captains with clerks, paymasters," &c. Our words were, "It is *mal à propos* and somewhat *infra dig.* to compare the pay of captains," &c. "Pay with pay," be it observed, as of this our critic makes such a point. The captain being of a higher grade than either of the civilian officers whose pay is compared with his, it is simply, as we said, *infra dig.*, as a matter of fact, to make such a comparison. As he has also before him Flags, red, white, and blue, and their original engagements are different, and their professions even quite different, the comparison is also *mal àpropos*. We have heard many a lieutenant regret he had not taken advice when young, and entered the Service as a clerk instead of as a cadet. We have heard executives of higher grades talk as if they half felt the same. But when our correspondent next studies the American Navy List, let him turn to page 7 of that for 1860, and he will find that "captains on full pay" are paid 3500 dollars, and "captains promoted to fill vacancies," but "on sea-service," are only paid 2800 dollars a year; while "pursers of ships of the line" have also 3500 dollars, and "pursers of frigates and razees" no less than 3000 dollars; which is not at all unlike the relative rates of pay of captains and of paymasters in the Royal Navy of England. Then he will find no admirals in the American Navy List with full pay an table-money ranging from 2000*l.* to 3000*l.* a year. The word "admiral" is like that of "cinder-wench," as described in Webster's Dictionary: "not known in America!" How would he like that?

As a rule, prudent fathers who have not much money to give their sons would not try to enter them in the Navy as cadets. They can no more really afford to do so than to buy them commissions in the Army; but if they do, they ought to know, that most probably in future years their sons will find it hard to live either upon their full or half pay. Yet many a noble son in such circumstances has weathered the storm of hardship and temptation thus brought upon him, and risen to his flag with glory, more respected than mere butterfly officers whose chief reputation has been for the good tables they kept, or for their wines or equipages. And sons of the same father—and sometimes, as we have known, that father a British admiral—have entered the Navy, one as cadet, another as clerk, by birth and education equal, and though not afterwards always equal in rank, yet in all respects equal as gentlemen. As regards chaplains and surgeons, they of course are necessarily the officers always best educated upon first entering the Service. They could generally do very much better, upon mere money considerations, in civil life than in the Navy; and the high positions or honours to which surgeons may aspire are few and far between, compared with those already achieved by and in prospective for captains. We really do not see why there should be any class jealousy in the Service; and we earnestly advise our correspondent to take a higher and manlier view of his profession, and a more liberal vtew both of our editorial selves and the civilians of the Royal Navy.

His Royal Highness the General Commanding-in-Chief will hold a levee at the Horse Guards on Wednesday next, the 13th inst., at 1 o'clock.

We hear that an address to the Crown will probably be moved in the House of Commons shortly against the proposed plan of selection for regimental lieutenant-colonelcies, which the Secretary for War announces his intention to carry out as soon as a more efficient system of inspection shall have been brought into operation.

The Select Committee on Military Organisation have closed the evidence, and will probably agree to their report within the ensuing week. The present Secretary of State for War was the last witness examined, and we believe there is a considerable difference between his views and those of Lord Grey. The proposition of the latter statesman to give back the Chief Superintendence of the Military Departments to the Colonial Secretary, we are sure can hardly meet with Mr. Herbert's concurrence, because he is aware that the Colonial Secretary is selected, not for his knowledge of military, but of colonial affairs; and the public will insist upon an intimate and practical acquaintance with our military system as the first claim to an office which, in point of administrative importance, is hardly second to any under the Crown. Mr. Herbert, it is said, would propose to leave the Commander-in-Chief in his present position, which is that of subordination to the Secretary of State; but he would place at the War Office two general officers of experience, responsible for the departments of stores and of supplies. The leanings of the different members constituting the Committee are believed to be pretty evenly balanced between the Horse Guards and the War Office, and whatever may be the recommendations, they are not likely to be the unanimous expression of the Committee.

We learn that the Lords of the Admiralty have come to a decision, on the report of what was called the Record Committee, to pay largely increased monthly sums on account of wages to the seamen and marines of Her Majesty's ships. The question was recently discussed, it will be remembered, in our columns, with reference to the recent insubordination in the Edgar.

Inasmuch as Field-Marshals are considered extra to the regular fixed establishment of general officers, we believe the death of the Earl of Strafford will not cause an Army promotion. When Lord Seaton became a Field-Marshal, a few weeks since, a step of promotion was given in consequence of his removal from the Generals' List; but when Lord Combermere, Lord Hardinge, and Lord Strafford were raised to the highest rank in the Service, in 1855, no promotions in the junior ranks ensued. It is probable, however, that before long one or more additions will be made to the Field-Marshals, in which case the arrear will be made up to the Service. The death of Sir William Chalmers will cause the following promotions, which will be dated the 3rd of June, viz., Major-General Clark Kennedy, C.B., Colonel of the 6th Dragoon Guards, to be Lieut.-General; Colonel R. Blucher Wood, C.B., commanding the troops at Colchester, to be Major-General; Lieut.-Colonel F. A. Whimper, Unattached, Major of the Tower, to be Colonel; and Major C. P. Ibbetson, Half-pay, 89th Foot, to be Lieut.-Colonel.

We adverted last week to the omission in the official monthly Army List of the name of Sir Hugh Rose from the list of general officers on the establishment. A correspondent draws our attention to the Warrant of 1858, under which he appears to think Sir Hugh is rightly removed from that list to the supernumerary list, composed of those officers promoted out of their turn for distinguished service. We do not read the Warrant in this sense. It provides that the officers so promoted should be placed upon a separate list until the period when, from their seniority as colonels, they would be placed on the regular list; and this was done for the very plain and sufficient reason that under the previous system the promotion of every colonel for good service was a punishment to the senior colonel, who had to wait for the next vacancy. But neither the language of the Warrant nor the reason for the institution of a distinct supernumerary list applies to the case of Sir Hugh Rose, who was a major-general on the fixed establishment before his promotion for distinguished service to the grade of lieutenant-general. His being retained on the fixed establishment therefore stops no one's promotion, and the list of general officers remains at its proper strength. With his name on the supernumerary list, the fixed establishment is deficient by one. Lord Clyde became a General for good service in May, 1858, and his name does not appear on the supernumerary list, although the Warrant of the 6th of October of that year was retrospective. Sir Hugh Rose's name should appear on the fixed list of general officers between those of Generals Gascoigne and Lovell. While upon this point it is only right to say that while the work of the compiler of the Army List has very much increased of late years, the work has also greatly improved in point of accuracy and completeness.

The recent experiments at the Nore have settled, once and for ever, that our present form of iron-cased ships, with upright sides, are not proof against the power of the Whitworth and Armstrong guns. A ship-builder of Liverpool, Mr. Josiah Jones, junior, has recently patented an invention which he calls an Angulated Armour-cased Sided Ship, which consists in the sides of the ship being placed at a considerable angle to the plane of the water, a similar angle being made under the line of flotation. The inventor is confident that shot striking at these angles must glance and not penetrate. He has constructed a large butt of the same scantling as the ship is specified to be constructed, and having applied to the Lords of the Admiralty to have his invention tested, their lordships have promptly and most properly granted his request. We understand that the experiments will take place shortly at Portsmouth. Scientific men will watch the results with much interest.

From a recent return, prepared for the information of Sir C. Wood, it would appear that there are not less than 16,000 Europeans still on the strength of the local Army in India.

We read in a military contemporary, last week the following paragraph:

"26th—Ship Street Barracks, Dublin. Two companies joined head-quarters from the Curragh on the 28th ult., having completed rifle practice. This corps will proceed to the Curragh, early next week, to be hutted."

Surely, when the great amount of the Army Estimates calls for the abolition of needless expense, this removal of the two companies in question from the Curragh to Dublin to be sent back in a few days was a reprehensible promenading. It would have saved something to the public and obviated the inconvenience of removal to the men, if these two companies had been permitted to await the arrival of their regiment at the Curragh.

There are few regimental duties more important now-a-days than those of instructors of musketry, and in general it is only just to say that the class of officers who fill the office are among the most promising and efficient young men in the Army. It has become a permanent institution of the Service, and it is time that it should be placed on a more distinct footing. At present these officers are taken away from the strength of their rank, whether it be subalterns or captains, and their brother officers are proportionately saddled with additional work. In these times, with camps of instruction in full play, with preparations for examination going on, and with heavy regimental and brigade duty, this should not be When an officer is regularly appointed musketry instructor to his corps, his place should be filled up, and the number of subalterns effective for duty made complete. The adjutant's place is at once filled up, although his appointment is not permanent, and the equally important office of instructor of musketry, ought not to be made the means of lowering the strength of the officers of a regiment.

Colonel T. W. Hamilton, C.B., of the Grenadier Guards, is about to be attached provisionally to the legation at Berlin, as Military Commissioner at the head-quarters of the Prussian Army.

It is probable that one of the cavalry regiments now serving in the Bombay presidency will return to England at the close of this year, two regiments being sufficient for the military purposes of the presidency Those now on this station are the 3rd Dragoon Guards, the 6th Inniskilling Dragoons, and the 8th Hussars. The last-named regiment will remain out, and the selection of the corps to be sent home will lie between the two heavy regiments.

Captain T. J. Francis, of the 3rd Dragoon Guards, has been appointed Military Secretary to Sir Hugh Rose, the new Commander-in-Chief in India.

Major Clerk, of the Rifle Brigade, will be Military Secretary to Sir George Clerk, the new Governor of Bombay.

ERRATUM.—The Armstrong gun used against the Trusty was an 80-pounder, not a 100-pounder. Two of the Armstrong shots penetrated the iron plates; but one of these appeared to pass through a part of the plate previously weakened by former shot. Generally it would appear that with the Whitworth 80-pounder gun the rule is for the shot to penetrate both plates and scantling, while with the Armstrong 80-pounder it is the exception. In case any reference is made to experiments on shore against targets of iron plates at Shoeburyness, it should be borne in mind that the greatest thickness of these plates was 3 inches, not 4½ inches.

MANNING THE NAVY.

We have made great sacrifices of money for very many years in order to insure a regular supply of good seamen to the Royal Navy. Many laboriously-devised schemes have been propounded, which, aided by the resources the House of Commons have never refused when appealed to, were expected to have cleared away the difficulties which have beset every Board of Admiralty for the last five-and-twenty years.

Whether it is that we have not had the proper officers at hand to work out the plans, or whether we have not had sufficient patience to abide the results so confidently promised to us, we know not, but the broad fact is staring us in the face :—we lack not ships; we have a large fleet in commission; we have an abundant reserve; our building-sheds in the various Royal yards are all occupied; and we have even called into requisition the resources of the private builders of the Thames, the Mersey, the Tyne, and the Clyde; but where, in the event of any sudden emergency, are we to obtain men sufficiently trained, on whom to depend? Can we fall back on the Coast-Guard? Let the Comptroller-General answer the question, and he will tell us that he has not 3000 men fit for the Service; and to supply these, the whole of our coasts would have to be denuded. But then we have the Coast Volunteers and the Reserve. From the first of these little can be expected; and from the latter, owing to the short time in which the system has been worked, it would be unreasonable to calculate upon much assistance at present, or for some months to come.

"The Service" is undoubtedly unpopular with the existing race of merchant seamen, simply because they have not been habituated to it. They have not been accustomed to the order and regularity of a man-of-war. The rules respecting cleanliness, food, and especially leave, are repugnant to them. We must admit that these observations do not apply to the crews of our first-class Indiamen and of our large steam-companies, who are generally very orderly and sufficiently well-disciplined. We allude to the large mass of men to be found in coasting-vessels, fishing-smacks, and the smaller merchantmen, trading abroad and to our colonies. These men from early associations have ignorantly imbibed a dislike to "Andrew Miller" (a slang term for the Royal Navy), which all the advantages of certain pay, excellent provisions, future pensions, with Greenwich Hospital under the lee, cannot root out. They are satisfied to run the risk of serving a good or bad owner, of having to masticate beef as hard as mahogany; pork, mayhap, a little measly; biscusts endowed with no trifle of animal life; and to breathe an atmosphere at night to which the old barracks at Woolwich, would be like "Araby the Blest." Cases of scurvy are now, fortunately, rare in "the Service," but are of every-day occurrence in our mercantile marine; and, only a short time since, the commander of a ship from Bombay on arriving at the Nore was compelled to land some very bad cases, and to seek for fresh hands to take the vessel up to the docks. Yet, with all these glaring disadvantages staring him in the face, so prejudiced is the sailor, that he would rather encounter them than subject himself to the control exercised on board of a man-of-war—he prefers dirt, and what he calls liberty, to cleanliness and a wholesome restraint. We must therefore look to other means of manning our fleet than those presented by our merchant-navy. Our Coast-Guard is doubtless a valuable nucleus; but in these days of steam and long-range guns, we require something more than a nucleus. The Reserve would give us some little assistance, but looking to what has hitherto been effected, we can only depend upon a limited supply of useful men from this quarter. We require well-trained crews, known to their officers and to each other, ready at the shortest notice to undertake any service that might be required of them before an enemy; not men who would demand some two or three months to lick them into shape; and the all-important question is, how are we to get these men? They are not to be had in a day, and the sooner we set seriously to work so as to provide ourselves with them, the better will it be for ourselves, and for those who come after us.

It is not a new opinion on the subject we are about to give, but one that has been previously urged, and, in a measure acted upon, by the late as well as the present Board of Admiralty. It is one shared in by officers of experience, who have been serving with scarcely any intermission for the last thirty years, and therefore is entitled to careful consideration.

We must form a permanent school, from which we can always provide ourselves with a sufficient amount of *personnel*, so as to set at rest the vexed question of How is our Navy to be Manned. We would, therefore, suggest that at least 8000 additional boys should be entered. They are to be had for the mere asking, not only from along our sea-coasts, but from the inland counties. These boys, for the reception of whom we have no want of vessels—now quietly decaying at their moorings in "ordinary"—should undergo the course of instruction now pursued in the existing training ships, with this addition, that while in summer they are embarked in sailing vessels, they should in winter be exercised at sea in screw steamers. One year at work of this kind would, in the majority of cases, make a lad most acceptable to any commanding officer. We would recommend that the boys should serve an apprenticeship for at least five years, to be clothed, fed, and paid a trifling sum (for it is most unwise to keep a lad always without money), this last to be increased as time wears on, and according to the character borne by the individual. At the expiration of the five years, there must be a continuous service of another period of five years, and this must be one of the conditions submitted to at the time of original entry. After the first or second year the number of boys to be entered can be regulated by our requirements, but the original intention of rearing our men-of-war's men, should not be departed from. We have experimented on every other conceivable plan, but have hitherto, simply because it is so feasible, neglected this common sense one. It may be urged that this method would involve the outlay of a larger sum of money than the House of Commons would sanction. We have no fear of this. Only make out a good case, and the "needful" will not be wanting. Moreover, part, if not all of the 200,000*l.*, voted for the Reserve, might be very easily diverted into this channel; but, at all hazards, we must grapple firmly without further delay with the problem of "How is our Navy to be Manned?" especially when we find that nearly 5 per cent. of our men deserted from their ships in the course of last year, out of which only 86 were recaptured. Many of those who ran had received bounty money, thus showing that the temptation to enter the Service was only one of a passing character.

In order to preserve to the State the exclusive use of the services of those brought up at its expense, it should be rendered penal for any one else to take advantage of them until after the expiration of the ten years, and by that time the habits of the men would be so settled as to unfit them totally for any other employment than that for which they had at first been intended; but even admitting that they might try a change, they would soon return more deeply impressed than ever with the advantages from which they had temporarily separated themselves.

We will not say anything just now upon the "police" or internal arrangements of our men-of-war; our present task is to show how the "raw material" can be procured, and to leave to the many smart officers of whom we can so happily boast to work it up, as we were in the habit of saying in olden times, into a "ship-shape and Bristol fashion."

THE CARPENTERS R.N.

(DEDICATED TO THE ADMIRALTY.)

During the last year or two every department of our Navy has exhibited its weak side to the public gaze. Goodness knows how long the Board of Admiralty has been the universal theme of disapprobation. Then we had that little difficulty about manning our ships, and getting up a strong Naval Reserve. Well, after some delay, and a liberal use of the 10*l.* bounty, we have managed to get crews of some sort. For a long time we thought the evil lay in the manning of a fleet, and that our materiel was first-rate. Latterly, however, we have been made painfully aware that our gunboats are a failure, and that our stately lines-of-battle are built with unseasoned timber. Every day brings out some groaning complaint; and it only remained for one more class to grumble to make the circle of dissatisfaction complete. So, just in the nick of time, we have managed to displease our shipwrights and carpenters, whose exodus to the naval yards of our faithful ally is now, and has been for some time past, the subject of remark.

Not long since a great many shipwrights were discharged from our various Government yards; and the majority of those dismissed from Portsmouth had not sufficient money to carry them and their families to their respective homes. It so happened that, just at that time, some active agents of our great ally, Napoleon III., were at Portsmouth, and, finding out the discharged shipwrights, offered them, as we are informed, 8*s.* 4*d.* per day to transfer their services over to Cherbourg, which, as most people know, is only a few leagues off on the opposite side of the Channel. That these importunate emissaries succeeded but too well may be gathered from the fact that these "hired" shipwrights, on entering our yards, received 3*s.* a day, although ultimately they were advanced to 5*s.* a day, or something of that sort. So that we are not surprised to hear that most of these important artisans went over to Cherbourg, and are now assisting our "faithful ally" to construct a navy in every way equal to our own.

Now, without going into the question whether these men had met with broken faith, and scant courtesy at the hands of the Government, let us contrast the pay of the carpenters in our Navy, who are only shipwrights in uniform, with the pay of the carpenters of the United States of America. We have already noticed the difference in the pay of the artisans in the French dockyards and its consequences. The warrant officers of the United States Navy, of which the carpenter is one, get 900 dols. per annum at sea, 600 dols. on leave, and 700 dols. on shore duty. In addition to the above, he gets 2 per cent. on these rates for every year's service; 10 per cent. to their sea pay with 400 men; and 20 per cent. with 900 men.

To put these figures in an English form; a carpenter of the first class in the American Navy gets 254*l.* 2*s.* 6*d.* per annum; while in England, a first class carpenter gets only 120*l.* per annum, minus income-tax and other deductions. It should be mentioned, also, that his position and mess in the United States Navy is in every respect very superior to that he has in the English service.

When we hear, therefore, that men from this class of naval artisans are leaving England in batches of 500 at a time, to join the thousands that are now making the Imperial yards of France ring with naval effort, who can feel surprised? It would seem that we have such a luxury of skilled labour of this sort, that we have enough and to spare. But is it really so? Are our best hands retained at home, and are they paid sufficiently to induce them to stop? This is a question that deeply concerns us at the present moment. It may be that, being short of timber, we have not work enough. But although this may be an excuse, it is at the same time almost a calamity. For if we are short of material for ship-building, the wise forethought of the sagacious ruler of France has supplied him with plenty. We know from reliable sources that he has 182,000 loads of oak timber of French and Italian growth in his different yards; that he has coal, iron, hemp, and other stores sufficient for seven years consumption; and it is said that he has the almost incredible number of 14,000 men of all classes employed in Toulon Dockyard alone. For what purpose this astute ruler is straining every nerve to augment his already too powerful navy, or why he is outbidding us in the shipwrights' labour-market, as he is, competing with us for every stick of available timber in the markets of Italy and Spain; we leave the reader to answer according to his own notions upon the matter. We believe, however, that when England and France are building big ships, not only against time, but, it is fairly assumed, to be pitted against each other, to quarrel with and dismiss our carpenters and shipwrights into the service of our rival is one way to provide him with weapons as effective as our own.

THE FRENCH NAVY, &c.

A commission of the legislative body appointed in order to ascertain if the expenditure on the French navy has been met by a corresponding amount of service, has made its report. They complain of the enormous amount of clerks in the offices, and of the amount of civil *employés*, which they say is so great, that the military element is drowned, as it were, in the civil administration. They therefore recommend that the administration shall receive a larger accession of naval officers, and think that larger reforms, worthy of the attention of the Emperor's government, in conjunction with the munificent budget voted every year to the navy, will produce greater results than hitherto effected. The report states that 215 ships have been put into commission in 1859, of which 135 have been uninterruptedly employed, whilst 64 have been placed *en disponibilité*—28,289 sailors have been embarked. The number of officers in the active list of all grades including marine artillery amounted to 1,878, whilst the civil officers of the administration were 2,874 in number. The commission reprehends the tendency to increase useless stores as a luxury, and remarks that the true luxury which France and the Emperor desire to possess consists of ships, guns, and steam-engines. The report is full of interest, and deserves every attention.

The expenses of the year for labour, materiel, and provisions amount to 53,425,490frs.

Admiral Parseval-Deschenes is reported to be dying. The French Government have entered into an arrangement with Messrs. Elliot, Glass, and Co., of London, to lay down an electric cable between France and Algeria: to start from a point between Sicie and Cape Sapat, and to be landed at Cidiferrach, on the north side of the fortifications of the city of Algiers.

The forthcoming exploration of Central Africa by the French in Algeria excites much enthusiasm; one of the journals significantly remarks that the soldiers of the 1st regiment of native riflemen could be used with much advantage in exploring the country in which they were born. M. Mage has explored the Tagant and its oasis in the desert north of Senegal, where no European has yet penetrated. The natives spoke to M. Mage of a European who was at Timbuctoo, and it was believed at Senegal that it was M. McCarthy, but that gentleman was still at Algiers, where he had expressed an opinion that it would be impossible to establish commercial relations with the Sondan.

At Lima preparations are being made to resist the French squadron, which is ordered to support the demands of the consul-general.

THE WHITWORTH GUN.

The Whitworth gun has produced unexpected results. It has pierced the *Trusty's* sides with greater facility than the Armstrong bolts last September. It has smashed the iron plates and thrown showers of splinters more dangerous than those at Kinburn. But that is not all; it has also revealed an Admiralty secret, very carefully kept for years, that the *Trusty* too is rotten at the core, having been built of green wood like the gun-boats! This startling fact has made all parties think, and now men seriously ask one another, with bated breath, *Are all our vessels rotten?* Perhaps this revelation has caused unnecessary alarm, from its having been stated that the Trusty was built in a Royal dockyard. We are glad that this statement is not true. *The Trusty was built by Messrs. Green.*

But we have not finished our chronicle of the marvellous effects produced by Mr. Whitworth's gun. We are accustomed frequently to read in the *Times's* "Naval Intelligence" of the cutting down, lengthening, and conversion of a three-decker into a screw frigate, and how successfully this operation is always performed. It is true, Lord Clarence Paget—while still in connection with Messrs. Green—alleged that five millions sterling had been wasted by Sir Baldwin Walker in this conversion of vessels into something other than they had been or were originally intended to be. But let that pass. Lord Clarence has left the concern; and when the Report of the Dockyard Committee was under the consideration of the Board of Admiralty, the Duke of Somerset was allowed to do all the criticism single-handed, and not even Lord Clarence Paget helped him with any hints as to the mode of conducting business in the yards of certain "well-known ship-builders on the Thames," which the Committee omitted to call before them. Is there not an admiral in the House that would wish to be the future Secretary of the Admiralty? If there were, he would assuredly ask, what must be known by this time, Whether any other contractors besides Messrs. Green built gun-boats and batteries of green wood, and did so under the special sanction of the Admiralty? He might ask another question, also, with great propriety, Are the Glatton, Thunderbolt, and remaining batteries rotting at their moorings? He might add, What kind of inspection was there on the part of the surveyor's department while the Trusty was being constructed? Is there any better system even now, as regards the steam-rams Warrior and Mars? Fancy the effect of a Whitworth smash against iron plates, half-riveted on, with merely short-bolt fastenings!

But this brings us back to our subject, which, we confess, we approach with some timidity. We have all heard the showman's puff of the wonderful Ramee Samee, who, after Bambo Jambo, jumps down his throat, subsequent to successive similar feats by his seven sable brothers, jumps down his own throat, with the last light in his hand, leaving the spectators all in the dark. Well, the Whitworth gun, it has been seen, can go through anything. It has gone through and through the Trusty's sides, and they say it has penetrated the whole Board of Admiralty itself, not merely through a plank from Green's yard. But that of itself were nothing! They also say, that the Comptroller of the Navy has said, and his first assistant has said, since those experiments took place, that iron ships shall be no more! The Trusty, the more it is tried, the more it won't resist those nasty guns; and, therefore, "We shall build no more iron ships!" Considering how often the Trusty has been always battered, it had been no unwise decision not to order the building of steam rams wall-sided like the Trusty. But they were ordered in the face of previous experience. It is true the Whitworth gun made the cleanest holes through the Trusty's sides; but she was not without previous damage; and the proverb says, "a little chink may let in much light. The Surveyor of the Navy could see nothing through the breaches made by the Armstrong gun. Now, he sees far beyond everybody else; and iron must be discouraged,—possibly that we may fall back upon our admirable stock of seasoned timber, for the "re-construction of the Navy" that is again required.

We cannot believe this rumour to be true. Of all the "conversions" managed so expeditiously by Sir Baldwin Walker, nothing could equal this complete and sudden conversion of himself; if, from being the steadfast patron of the Trusty, and even the reputed foster-father of the steam-rams, he has now become the open opponent of all iron-plated war vessels. He has equalled the feat of Ramee Samee, and he has left us equally in the dark. On the other hand, it is said that Sir Baldwin Walker has never approved of the building of vessels plated in armour. That the rams are the specialty of Sir John Pakington; and now that it is pretty well known, they are not a whit more secure than the Trusty against modern projectiles, while they stand so high in the water and are so large, that they cannot fail to be hit at all distances, it is plainly given out at last, that the Comptroller is not responsible!

We say, the marvels wrought by the Whitworth gun are truly astounding. It has even struck through the patched-up covering that shields from vulgar gaze the vanishing quantity of responsibility so dearly prized at the Board of Admiralty; and it proves two contradictory propositions, first, as alleged by the "Saturday Review" on the 11th Feb. last, that "Sir Baldwin Walker is allowed the privilege of spending millions with less control than is thought necessary where a few hundreds have to be applied in any other department of Government," and second as stated by Sir J. Pakington in the House, and referred to by ourselves two weeks ago—that the voice of the Comptroller of the Navy at the Board of Admiralty is, as a rule, very small indeed,—his marvellous power of spending the public money being ultimately based only upon *submissions* to their lordships.

When Sir James Graham abolished the Navy and Victualling Boards in 1832, and would not hear of another permanent Board in lieu, he was told what would come to pass, in language that now reads more like history than prediction. Mr. Croker said, "With despotic command on the one hand and servile submission on the other, the Service would be ruined; checks would be at an end; responsibility would nowhere exist." In the stead of the Navy board "are to be placed subordinate officers, who, on account of their situation, will be unable, and, from prudence, will be unwilling, to differ from the Admiralty, which will thus possess a power that the monarch himself does not enjoy. . . . These sea officers, admirable persons for the duty they have now to perform, and whose presence is so necessary at the Admiralty, how will they be qualified by their previous habits to perform the duties to be imposed upon them as heads of the civil departments? It would be expecting a miracle, if we were to expect that in addition to being the best naval officers, they are to be the first accountants, the best storekeepers, the best shipwrights," &c.

We have now learnt from bitter experience what kind of ship-building we have through this arrangement. We have Lord Clarence Paget's 5,000,000*l.* of waste in conversions. We have the Duke of Somerset's testimony to the Admiralty's continual failures in their attempts at ship-building, "in the intervals of their other duties." The rotten gun-boats, built of green timber, remind us how the Admiralty has failed as storekeepers; and the recent migration of our shipwrights to France, because we have no seasoned timber on which to keep them employed, reveals the same fact in the most humiliating form. As for ascertaining such facts through the Admiralty accounts, like those of France or America, that were impossible—perhaps even undesirable, if the compiling of them were to be thrown upon officials who already have ten times more to do than they can even tolerably manage. Nor is that all; if rumour speaks true, another department of the Admiralty, which has hitherto kept proper accounts, under the control of the Treasury and as required by Act of Parliament, has had a narrow escape from the introduction of a "new system," devised by a "sea officer" at the head of a Committee, who, while he may be one of those "best naval officers," spoken of by Mr. Croker, is not necessarily "the first of accountants." But on this point we know not what is true. Some say the Board has sanctioned the measures recommended by the Committee, others say quite the contrary; and the only decision we can come to, upon the conflicting communications we have received, is, that there is some nice point of twedledum and twedledee mixed up in a technical question; and that their lordships have most certainly decided upon the one or the other! A rumour has also been current that the Accountant-General of the Navy is to be relegated to Greenwich Hospital as accountant there; and that a "sea officer" is literally to become "the first accountant," if not "the first of accountants," under the Admiralty! Of course, this is perfectly preposterous. The Duke of Somerset knows better.

THE REGENT'S ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR, — There is nothing like the "argumentum ad hominem" when it elicits truth, for it produces conviction. Hence the letter signed "A Father," in your number of the 26th ult. He very rationally looks upon the proposed application of the Regent's allowance to his son's messing, as an actual augmentation of his pay. What, indeed, can be more absurd, as he says, than to affect to give a poor man wine to drink at two-thirds its original price, who cannot afford to drink it at all. No one ever questions the original benevolent intention of the Royal donor, or of Parliament, but the grant has practically subsided into one of those anomalies with which society, as in the case of other trusts, is overcharged, and in which we have silently acquiesced from custom, and without inquiry and investigation. Her Majesty, Parliament, and the country at large, would no doubt rejoice like the generous Henry the Fourth of France (who wished to see the day when every peasant in his kingdom might have a pullet in his pot on Sunday) if her brave officers could solace themselves with the daily luxury of wine. But it must, notwithstanding, be admitted that the habits of modern society do not exact it as a necessary attribute of gentility, nor do the faculty consider it essential to bodily vigour. Dean Swift being once asked what wine he liked best, replied, "Another man's wine." Now if Parliament were disposed to adopt the Dean's cynical suggestion, and grant a daily ration of the best wine gratuitously, there might be some sense in drinking it, but experience has abundantly shown that this form is impracticable in England. It only remains, therefore, for the junior officers of the Army respectfully to submit the present application of the parliamentary grant to Her Majesty's Secretary of State through His Royal Highness the Commander-in-Chief. No one who has read Mr. Sydney Herbert's letter to the Lords of the Treasury can for a moment doubt that both he and the duke cordially and fervently devote themselves to the real state and welfare of the Army.—I am, &c, G. O.

THE STAFF COLLEGE.

The following General Order has been promulgated:

"Horse Guards, S. W., May 23, 1860.

"With reference to the Paragraph XIII. of the Regulations for the Staff College, published with the General Order, dated January 23, 1860, No. 743, His Royal Highness the General Commanding-in-Chief is pleased to direct that this General Order be issued for the information and guidance of those officers who may be desirous to compete at the next final examination at the Staff College, without having previously undergone the course of instruction at that institution.

"The examination will be held at the college in December next; and those officers who, having served the regulated period, can produce the necessary certificates (See Paragraph III. of the Regulations for the Staff College), should send in their names to the Adjutant-General, through their commanding officer, not later than the 1st of October.

"As it is important thoroughly to test the knowledge of candidates as regards the practical subjects taught at the Staff College, such as reconnoitring, field engineering, military equitation, &c., they will, for this purpose, be required to join the college at least one month before final examination, *i. e.*, on the 1st November next.

"The following are the subjects for examination in accordance with Paragraphs VIII. and XII. of the Staff College Regulations to which candidates are referred:—

"MATHEMATICS.

"The candidates will be examined to the extent stated in Paragraph VIII. of the Staff College Regulations. Candidates desirous to obtain a syllabus of the college course should apply to the secretary of the Council of Military Education, 1, Whitehall Yard, London, S.W.

"MODERN LANGUAGES.

"The candidate will be examined both orally and in writing, the latter including grammar and composition, as well as translation.

"FORTIFICATION AND ARTILLERY.

"The candidate will be examined as to his knowledge of these subjects; and will, in addition, be required to produce a plan, either of one of the bastioned systems, or of the modern German system, or of any existing fortress, and also a plan of attack of a fortress.

"The candidate must certify that these, and any other plans which he may produce, have been executed by himself. He will also be required, during the month he is at the college prior to the examination, to draw some profiles and a field trace from given conditions.

"TOPOGRAPHICAL DRAWING, MILITARY SURVEYING, AND SKETCHING.

"The candidate will be required to produce plans of not less than six square miles of country, which also he must certify to be his own work.

"RECONNAISSANCE.

"To be executed while at the college during the month previous to the examination, as already stated.

"MILITARY ART AND HISTORY.

"The course of lectures at the Staff College is shown in the accompanying paper. As, however, the campaigns therein stated may not in all instances have been studied by candidates who have not passed through the college, they will be given an opportunity to show their knowledge of those portions of military history which they may have actually studied; and for this purpose they should send a statement of the campaigns in which they desire to be examined when applying for permission to compete.

"MILITARY ADMINISTRATION AND LAW.

"A synopsis of the lectures on this subject is enclosed.

"CHEMISTRY AND GEOLOGY.

"Principally as applied to military science.—By order of His Royal Highness the General Commanding-in-Chief.

"JAMES YORKE SCARLETT, Adjutant-General."

(Enclosure.)

"SYNOPSIS OF THE LECTURES AT THE STAFF COLLEGE.

"ON MILITARY ORGANISATION AND ADMINISTRATION.

"Recruiting.—System.

"Organisation of the Three Arms.—Principles to be observed; combinations for field service.

"Organisation of Departments.—Commissariat, medical, and military train in time of peace and in the field.

"Equipments.—Arms and clothing; present regulations and warrants relating to; effect of equipment, upon organisation and tactical manœuvres; clothing, tents, tools, &c., for field service—weight of; means of conveyance; reserve stores.

"Ammunition.—Preparation for infantry, cavalry, and artillery—carried in the field and reserve.

"Departments.—Respective duties and principles of action of each; proportion of military staff for an army in the field.

"Finance.—Pay, allowances, and pensions.

"Subsistence.—Food, forage, and allowances, in kind, in field; best description and supply of.

"Medical arrangements.—Formation of, and supplies for, hospital ambulances.

"Transport.—Proportion in the field; best description; distribution."

The respective duties of the different departments illustrated in considering the following subjects, viz.:—

"Embarkation.—Arrangements for; estimate of time; tonnage required for infantry, cavalry, and artillery; duties on board ship.

"Disembarkation.—Arrangements for; estimate of time.

"March.—Order of; extent; time.

ings of trial; duties of prosecution; nature of evidence; defence; finding and sentence.

"MILITARY ART AND HISTORY.

"Waterloo campaign; Blenheim campaign; battle of Blenheim; campaign of 1757; Marengo campaign; battle of Marengo; battles of Prague, Kollin, Rosbach, and Leuthen; battles of Salamanca and Vittoria; Napoleon's passage of Danube, 1809; Radetzky's campaign, 1848; Radetzky's campaign, 1849; passage of the Douro; *résumé* of Peninsular campaigns up to 1812; campaign of 1812 in the Peninsula; 1813-1814 in south of France, and 1814 in France (Napoleon's)."

DEPÔT BATTALIONS.

We have received the following communication upon this subject:

"In the approaching amalgamation of the Royal and Indian Armies, an opportunity will be offered of removing the strong objection which is now felt by most regimental officers to depôt battalions. These institutions are doubtless good and an improvement; their chief faults, which have been long felt and acknowledged, are as follows:—

"1st. They are composed of men and officers of different regiments, and consequently in them can exist no *esprit de corps*, the very life and soul of the British Army.

"2nd. Young officers who join them are not looked after and taken in hand by the senior officers, as they would be if those officers belonged to their own regiment, and who would feel that the credit, honour, and good name of their corps was concerned by the behaviour of these young officers.

"3rd. The same may be said of the men: the sergeant-major, adjutant, and colonel do not take the same interest in the men that they would if they belonged to their own regiment.

"4th. Every regiment has its own little peculiarities in its internal arrangements, which are of such long standing, and so bound up with different regiments, that it is impossible to eradicate them. For instance, every regiment has its own peculiar 'calls' on the bugle for 'rations,' 'breakfast,' '1st Parade Horn,' &c. &c.; at least, they differ in some peculiarity in every regiment I have been in camp or quarters with (some 80 or 90),

"In depôt battalions, of course, each battalion has one system—generally that of the regiment from which the colonel or adjutant of the battalion came; consequently, when men and officers join their own regiments, they are all abroad in these and many other peculiarities of their regiment.

"The Royal Army will probably be increased by some 50 new battalions. If, instead of forming these into new regiments, they were joined to the present 100 regiments of the line in the shape of second battalions, we should be enabled, by giving each regiment its own depôt battalion, composed of three companies from each service battalion, to do away with all that is objectionable in the present system of depôt battalions, without (as far as I can see) interfering with the object for which they were created by the late Commander-in-Chief, and at the same time I feel certain that the efficiency of the Home Army will be much increased. These depôt battalions would have all the *esprit de corps*, and then there is no reason that they should not have nearly all the efficiency of a regular old regiment.

"One word more. I think these depôt battalions should be composed equally, or as nearly so as possible, of old soldiers and recruits—say that all ten-year men on re-enlisting should be sent at the first opportunity to depôt. In like manner I would avoid sending all the junior captains to depôt, as is now generally done. All ensigns on joining should of course be sent there, as the present objection to their going would then be removed.

"Let each regiment of two service and one depôt battalions have three lieut.-colonels; the smartest and strictest of these I would attach to the depôt; majors in like manner.

"The above propositions I know represent (with perhaps some slight differences) the opinions of many smart and zealous officers who will be only too glad to see attention called to the subject in your papor."

A military despatch from the Secretary of State for India, contains the following extract, fixing the period at which British regiments come upon the Indian establishment:—"A misconception appears to exist, as to the date at which British regiments are considered on the Indian establishment. I take this opportunity, therefore, of stating that a British regiment is on the Indian establishment, *i. e.*, becomes chargeable to India, from the date of its embarking for that country instead of its arrival there."

THE ENGLISH IN CASHMERE.—A General Order from the Commander-in-Chief in India directs that in future all applications made to the Government of the Punjab by officers of the Army for permission to travel in the territories of the Maharajah of Cashmere and Jummoo shall be supported by the counter-signature of their commanding officers, and that such counter-signature shall only be granted when the general character of the applicant is a sufficient guarantee for his correct deportment towards the people of a foreign state. His Excellency further notifies that, prior to these applications being acceded to, all applicants will be required to sign a printed form, binding themselves to observe strictly the rules drawn up for the guidance of t vellers in Cashmere, a copy of which will be forwarded to them with the form referred to on their applications reaching Lahore and meeting with the approval of the Punjab Government.

THE INDIAN ARMY, LOCAL AND NATIVE.

". . . Confiding too exclusively on European troops, and altogether neglecting and undervaluing our native army. From the day of this fatal error we may date the downfall of our eastern empire."—SIR JOHN MALCOLM.

A rumour has gone forth that the native army of India is to be all but destroyed by reducing it to forty thousand men for the whole of that mighty peninsula, and that the local European force, are to be dissolved, or, as the phraseology runs, amalgamated with the Royal Army. We raise a warning voice against this decision, if decision it be, and we will endeavour to give such information to those persons who have the means of opposing it, as will, we trust, help them to resist a measure, which we believe to be not only unjust and inexpedient, but full of danger.

The danger is twofold; danger to India; danger to England. It requires but little reflection, and but slight familiarity with the military affairs of this country, to discern with clearness that, if eighty or one hundred thousand men —for such is the amount proclaimed by general report —are to form the garrison of India, we are crippled at home; we sink in the scale of nations; we are not safe from invasion; we are daily exposed to humiliation and rebuff;—witness the "colonels"; the Portuguese aggression; witness Savoy and the neutralised districts; witness our condition at this moment; our expedients in search of safety; our anxiety and alarm, in spite of an expenditure of thirty millions sterling. If we add to this drain for India the garrisons required in the Mediterranean, the Cape, Australia, Ceylon, Pegu, China, America, and the West Indies, we may conceive the struggle necessary to maintain our ground. Even during peace it probably tries all the powers of our recruiting establishments, and all the eloquence of that useful adjunct to the War Office, Sergeant Kite, to preserve our regiments at the proper standard. What would our condition be if engaged in a serious war, when our foreign garrisons must be strengthened, and when our own coasts will require all our vigilance? If conscription were one of our institutions, and if through its mechanism we were relieved from the high rate of pay, and the luxurious treatment requisite to entice volunteers into the Service, we might, we admit, be able to face this drain with safety. That we are gradually approaching a conscription the signs of the times seem to declare, if we would not fall from our high estate; but until that necessary though undesirable change in our social and political condition shall happen, we must be content to accept the alternative of a native army as part of the garrison of India, or submit to a renewal of the many buffets which the consciousness of our want of power to resist has of late allured our neighbours to inflict, and forced us to endure. We would ask the advocates for maintaining this immense force of European troops in our Indian possessions to answer one question. If it be practicable with our present system of recruitment to preserve at all times in efficiency one hundred thousand Englishmen in India, why during our recent war were we driven to seek for troops in Germany, in Italy, in America—why was our soil defiled by the presence of foreign soldiers?

From the Himalaya to Cape Comorin the distance is some eighteen hundred miles, from the Indus to Arracan it is not much less. It is intended, report tells us, to occupy this space with forty thousand native soldiers, which is less than the present army of the smallest presidency, Bombay. The number of people under our rule exceeds one hundred and twenty millions, among whom are numerous tribes and races whose only profession is that of arms. It is, then, through the above number of forty thousand men that we propose to afford a vent to their military propensities, or enable them to find a subsistence. According to this scheme ten or twelve millions sterling of the revenues of India are to be devoted, not to the natives of India in a just and safe proportion, but to the natives of Great Britain in forming an army of undue size. We submit that in this project there is neither fairness nor wisdom, and this we will endeavour to show in the following remarks.

A native army to be acceptable must combine three indispensable qualities—safety, economy, efficiency. On the question of economy, there will be no dispute. A regiment of Europeans is commonly supposed to cost as much as three regiments and a half of natives. We ourselves believe that if all expenses are included, the proportion is much higher. If the bounty on recruitment, the time lost by the recruit in England, the expense and the time occupied during his passage to India, and retransport to England, should he chance to survive, the expense and time lost in his transmission to a distant station, the cost of his luxurious barracks, compared with a native soldier's hut, his libraries, his racket courts, his swimming tanks, his trips to the hills for the recovery of his valuable health, the monthly pay to his wife, and monthly pay to his children, with various other items which have faded from our recollection, were all fairly calculated, we doubt not it would be found that the proportion mentioned above does not indicate the true ratio.

We conceive that no one will contest the existence in India of abundant materials for making efficient soldiers. Though we should be loath to see too large a proportion of Sikhs in the new native army, it is impossible to refuse to them the tribute of admiration for their soldierlike qualities, which go far to place them on a level with European troops. There are, however, many other races besides the inhabitants of the Punjab in whom there is no lack of the stuff from which soldiers are moulded.

We freely grant that the third point—the question of safety with a considerable native army—is the one really at issue, the one which it may be less easy to satisfy the minds of men who have no personal knowledge of the subject; and who look on the late mutiny as a mere wanton outbreak, began without provocation or grievance. Infamous as was the mutiny, it would be wrong to assume that we were blameless. Few of the old officers of the Indian Army were ignorant of the danger of an enormous mercinary army, "aliens in race, in language, and religion," uncontrolled by the presence of a suitable national army. A calm inquirer will ascertain that he may judge of the future, if our military scheme in India was founded on wisdom, justice, and a prescient foresight. If we failed in these essential points, we have no right to shift the blame from ourselves and cast the whole burden on the wickedness of mutinous sepoys. If we collect an immense army of foreign mercenaries; if we supply them with officers on so low a scale as to make a strict attention to duty hopeless; if we destroy discipline by frittering away the troops in detached police duties, escorts, and small guards, where supervision was impossible; if we maintain the smallest possible number of national troops, for the preservation of order and authority among these mercenaries; if we are so careless or so indifferent to their religious feelings as to place them in the position of believing that we meditate an inconceivable outrage against their religion and cast; the result is inevitable. Disaffection, combination, and mutiny, sooner or later, are sure to follow in the train of such proceedings; yet this was the course we adopted. We raised in Bengal alone an army of seventy or eighty regiments of infantry of the Line, each 1200 strong, and ten regiments of regular cavalry; and we officered them nominally with some twenty-five officers—really with half-a-dozen—to each corps, and that too with the example before us of Ceylon corps, West India corps, and others, fully supplied with officers, similar to one of Her Majesty's regiments of the Line; although the face of an enemy was unknown to these foreign corps, unlike the Indian army, which was constantly engaged in one war or another. To proceed with our enumeration: there were artillery, horse and foot, engineers and sappers; then there were eighteen regiments of irregular native cavalry, eighteen regiments of "local infantry," each of which had three or four European officers; there were Punjab irregular corps of infantry and cavalry, and Sikh corps of infantry; "contingent" corps of artillery, cavalry, and infantry, in various places, such as Gwalior, Nagpore, Kotah, Joudpore, Malwa, Bhopal, officered in the manner last described. In short, there were so many corps of one kind or other, that they can hardly be reckoned, and this too in the single presidency of Bengal; so that we believe we shall be under the mark in estimating the total of that army at 160,000 or 170,000 men. The Hindostanee sepoy was the most tractable and orderly of soldiers, but he was also full of indolence and apathy, requiring more supervision than most men to ensure discipline and obedience. Yet to this immense force the number of officers allotted—for the native officers count for naught, unless it be for evil—was what we have described above. With a fatuity, which now seems incredible, instead of employing the irregular and local corps in police and other non-military duties, we devoted the regiments of the Line to these purposes. They were broken up and scattered in guards all over the country, thereby wholly removed from European supervision; and every one acquainted with Indian military matters must know that no surer method could have been taken for the destruction of discipline.* To watch over these mercenary troops—for what mercenary troops can be implicitly trusted—the national army, dispersed from Peshawur, in Affghanistan, to Arracan, and from the Himalaya to the Nerbudda, amounted to from 20,000 to 25,000 men, 15,000 of whom are said to have been stationed in the Punjab, leaving immense tracts of territory and large bodies of native soldiers free from the presence of European troops. The sepoys, too, were teased about their pay, and constantly led to believe that the Government dealt with them unfairly. When ordered to march to Scinde or the Punjab they were petted and encouraged by superior allowances or privileges; but in a short time came annexation, and they were told that being no longer in a foreign country privileges must cease. This may have been all legally right and just, but it is not the way to manage mercenaries, hirelings, men who serve for pay only. Again they were harassed in other money matters, money being the passion of a Hindoo soldier, all whose thoughts are centred in home, and the means of supplying that home with subsistence and comfort. From some crooked mode of calculation, after receiving his pay, he constantly suffered a reduction of the amount, on the plea that he had been overpaid. Then the whole of India began to feel a vague, uncertain alarm at various innovations, alarm in which the sepoy probably more or less participated. Suttee and compulsory widowhood were abolished, rightly abolished; but, in all likelihood, not without producing some bitter feeling. The land was flooded with education, and education by foreigners was more or less synonymous with, if not conversion to, Christianity—perversion from the Hindoo faith. With the most upright intentions, our changes were too rapid for the sluggish minds of Hindostan, and suspicion crept in where formerly implicit faith in our honesty or our indifference was the tie which bound so many millions to our rule. Then came the greased cartridge, the crowning evil, to rouse into fury and horror all the passions of the Hindoo. In this country its full effects cannot be comprehended; but those who know Indian habits are aware that loss of life is a misfortune light in comparison with loss of caste.† It is useless to dwell on this part of the subject; suffice it to say, that the greased cartridge alone was sufficient to rouse to madness the fiercest passions of which human beings are susceptible.

Our object in the foregoing remarks has been to prove that the late mutiny had its origin no less in our own want of management and prudence, than in the want of fidelity on the part of the sepoys. With similar or less temptation and opportunity we believe there is no race in the world but would have revolted. The inference to be drawn, therefore, is, that with ordinary discretion and precaution, a sepoy army is one in which reliance may still be placed. We know that up to the moment they were able to trust in our justice and in our indulgence for their religious opinions, their loyalty was unshaken. A century of unceasing warfare has proved the truth of this assertion. Under every variety of seduction the sepoy has been faithful to his standards; and

* Minute by Sir P. Grant, Commander-in-Chief at Madras, Feb. 7, 1860:—"General Budd had drawn his attention to the injurious effects upon discipline which had arisen from the numerous detachments furnished by the troops composing the southern division, under the command of the major-general. I have to observe that the practice of breaking up regiments of the Line into detachments is not confined to the southern division, it pervades every division and force of the Madras Army. . . . I brought the question specially to the notice of Government on the 18th of July, 1856, and stating the impossibility of preserving real discipline and efficiency in any army broken up into small detachments, and dispersed here and there over the vast extent of the presidency."

† "The loss of caste is faintly described, by saying that it is civil death. A man not only cannot inherit, nor contract, nor give evidence, but he is excluded from all the intercourse of private life, as well as from the privileges of a citizen. He must not be admitted into his father's house; his nearest relations must not communicate with him; and he is deprived of all the consolations of religion in this life, and all hope of happiness in that which is to follow."—Elphinstone's "History of India," chap. i., p. 65.

Digitized by Google

in particular did he give evidence of his good faith in our contests with the Sikhs, when no effort was spared to seduce him from his allegiance.

Various partial outbreaks no doubt took place from time to time; but in no instance that we remember had they any connection with disloyalty, excepting the mutiny at Vellore in 1806, which moreover had its origin in our neglect or contempt of religious prejudices, and was quelled in part with the aid of natives. The conspiracy of the volunteers in Java, in 1812, might perhaps be cited as another exception; but on that occasion we broke faith with those sepoys. If our recollection can be trusted, all the other mutinies and acts of insubordination had their foundation on questions of pay, money, privileges, and other such matters inseparable from an immense mercenary army unchecked by the presence of an adequate national force. The sad mutiny in Barrackpore, at the beginning of the first Burmese war, was caused by a native regiment being ordered to march naked and unaided into a howling wilderness with a pestilential climate, while before their eyes a European regiment was proceeding to the same spot provided with every comfort. It was more than human patience—even Hindoo patience—could stand.

Our own Navy presents us too often with scenes not dissimilar; that the Army happily does not, may be attributed to the increasing efforts to improve the condition and comforts of the soldier.

(To be continued.)

ORGANISATION OF THE WAR DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—To my consternation as an old soldier I hear that great efforts are now making to place the Army on commission as the Navy now is, and thereby to render the former like the latter, a political machine in the hands of the ministry of the day.

In a pamphlet written by me in 1855, during the war in the Crimea, and transmitted to several cabinet ministers, I therein stated as follows—"A war minister's directions and requisitions, particularly during war, should be instantaneously and implicitly carried into effect not only by the Horse Guards and the Ordnance, but likewise by the Admiralty and the Treasury; and I anxiously hope that our wars may be henceforth conducted under comprehensive and judicious plans of systematic operations drawn out by an experienced war minister, armed with the ample power and authority that are indispensable to enable him to direct the fleets as well as the armies of Great Britain with a vigour, an energy, and a success worthy of a great nation."

When I expressed myself in 1855 as above, it is evident I meant that the war minister should only exercise a supreme directing power over every department in any manner connected with war, and that all his orders should be promptly carried into effect by those departments; while the Horse Guards, the Admiralty, the old Ordnance Office, and the late office of Secretary-at-War, should continue to be distinctly separate departments, but under the absolute control of the war minister.

The attempt that was most injudiciously made by Lord Panmure to unite in his own person the discharge of the administrative duties, and the details of all connected with the ordnance, materiel, commissariat, clothing, health, and the land transport of the Army, as well as of the old office of Secretary-at-War (and such a sweeping change taking place during momentous hostilities), could only have been productive of the result that attended it, viz., the greatest confusion and injury to the public interests.

The heads of the several departments under the supreme control of the Secretary of State for War should be administrative officers, and the duties of the war minister should be those of direction.

A general commanding in the field looks with a watchful eye to see that his generals of division and the heads of departments discharge their duties in such a manner as to insure the personnel, materiel, transport, provisioning, and the medical branch of his army being always in a state of perfect efficiency for any service required; but he does not fritter away his valuable time in interfering with them in the performance of their administrative duties, so long as their discharge of them is all that could be desired. Thus a commander of forces in the field is enabled properly to devote his attention to the great operations of the campaign. A war minister should act in a similar manner in relation to the several departments under his supreme direction.

Nothing could be of more importance to the welfare of our country during hostilities, and more particularly in case of threatened invasion, than that the war minister should be a soldier of well-known experience and judgment in the field, and having the commanders-in-chief of the Army and Navy (both of whom should of course be professional men, and entirely unconnected with political parties) to act as his counsellors, but with the whole responsibility resting on the war minister.

It is reported that one of the witnesses examined before the commissioners now sitting on the organisation of the war department, strongly advocated the Army's being placed in commission, on the ground that the Navy was kept in a much more efficient state of equipment than the Army was during the late war with Russia; but that witness must have presumed to give his evidence under a total ignorance of facts.

I now tell him, for his information, that the efficient equipment of a ship, or of a fleet, is a most easy and simple operation in comparison to providing for the requirements of an army in the field — all the armament, ammunition, provisions, medical stores, water, bedding, clothing and comforts of every kind required for the men of the fleet, for many months' duration, are put on board at the several dock-yards, and when nearly expended the ship or fleet puts into some port for a fresh supply. An admiral, therefore, has no trouble or anxiety regarding all those important points; while an army during a campaign is dependent, for the supply of all that is above enumerated, on a well organised and thoroughly efficient transport department; and as that department in the Crimea was entirely under the Treasury, and not under the Horse Guards, it was the former and not the latter who were responsible for its having broken down; or rather for its never having been perfectly organised or in any manner efficient.

Indeed it even appeared in evidence before the Sebastopol Committee that the Treasury was disposed seriously to stint the commissariat in their operations.

The Duke of Newcastle in his evidence before the committee said that "As War Minister he was responsible for the whole conduct of the war to direct everything, and that he was at a loss to say what did not come within the scope of his duties."

His Grace likewise stated in evidence that, "The Commander-in-Chief's duties applied solely to the discipline of the Army, and that all his (the War Minister's) communications regarding the personnel and materiel of the artillery and engineers were made to the old Ordnance Department; regarding the provisions and transport of the Army to the Treasury; and regarding medical stores to the late office of Secretary at War.

Thus, the Commander-in-Chief had, absolutely, no kind of responsibility, and possessed no kind of authority in respect to the War in the Crimea, further than in merely embarking, in an efficient state, the cavalry and infantry that were ordered by the War Minister to be sent out. It is therefore impossible to show that any responsibility attached to the General Commanding-in-Chief in regard to the provisioning, transport, materiel, medical stores, or comfortable clothing of the troops, as all those were (or should have been) provided either by the Ordnance, or by civil departments, with whom the Horse Guards had no power to interfere.

How different would it have been if Lord Seaton (as was suggested by me) had been appointed War Minister, with supreme control and authority over all the departments, connected with war; as, from his lordship's experience, he was thoroughly acquainted with the requirements of an army in the field, and would have provided accordingly, with a wise foresight, before he dispatched our troops to the seat of war.

But would that experienced old soldier ever have thought of sending only 50,000 Anglo-French troops to attack a fortification that the ministry believed (as appears by evidence of Lord Aberdeen and Sir James Graham before the Sebastopol Committee) was protected by an army of 70,000 men, when all soldiers know that a besieging force requires to be three times the strength of the besieged for a short siege; while one of many months' duration would require five times the numerical strength of the garrison, for the purpose of furnishing covering and working parties and the necessary duties of the camp; besides a force to form a covering army in the field?

The whole of the misery that was inflicted on our Army in the Crimea resulted from the incapacity of the Government of that day to conduct a great war, and from their having selected a totally inexperienced nobleman to preside over the War Department; who, however, it must be acknowledged, was indefatigable in the discharge of his duties, and really did wonders; but had all the talents of a Cæsar, a Marlborough, and a Wellington been combined in the Duke of Newcastle, it would have been utterly impossible for his Grace, without previous experience, to have brought our fleets and armies to bear on the enemy with the telling effect they should have done.

I am the more alarmed in thinking of the possibility of the Army being placed in commission as the Navy is, in consequence of my having observed that a gallant admiral who distinguished himself as naval aide-de-camp in two general actions, and served during two sieges with the Army, has been passed over in the late promotions of the Bath, notwithstanding his having been mentioned nine times in the *Gazette*, recommended 11 times in dispatches, wounded, present at the capture of 32 batteries, 22 forts, 1 line-of-battle-ship, 5 frigates, 6 sloops-of-war, 21 gun-boats, and hundreds of merchantmen.

If the patronage of the Army were placed under a political civilian, as is the case in the Navy, many instances of gross injustice, such as the above, would, I fear, too frequently occur, and would render promotion in the Army greatly to depend on the same political considerations which too often influence the civilian head of the Admiralty in selecting officers for commands and honours.—I am, &c.,

112, Eaton Square. D. MAC DOUGALL.

CAVALRY OF THE BRITISH EMPIRE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Observing the statement in one of your late numbers that the regiments of "European cavalry" in the army of the late E. I. Company are about to be absorbed into the Royal army (regimentally), *i. e.* that the 1st Regiment is forthwith to become the 19th Light Dragoons; the 2nd Regiment, the 20th Light Dragoons, and so on, I beg permission to propose, through the medium of your journal, the following future organisation and classification of the Imperial cavalry. I find, by reference to the "Indian Army List," that there are in Bengal alone six regiments of European cavalry, each containing six squadrons, or 36 squadrons in all, so that the absorption of this large force will necessitate the addition of at least eight regiments (averaging from four to five squadrons each) to the Royal or Imperial Army List—to say nothing of certain regiments which may or may not be thought requisite for Madras and Bombay.

Now, this large increase will swell the Light Cavalry branch of the service from 15 regiments to 23 regiments; but as common sense would seem to demand a much more decided distinction between light and heavy cavalry than that developed in the British service, I venture to propose (the duties of India being totally unfit for Heavy Dragoons) that the light cavalry branch should be still further strengthened, by transferring three of the present merely nominal heavy regiments (*i. e.*, the "2nd, 6th, and 7th Dragoon Guards") into "Lancers" or "Chasseurs," by which arrangement the light cavalry would for the future number about 27 regiments, while the heavy cavalry of the Line would only number about 7 regiments instead of 10.

I would propose, however, that this latter branch should be, in every sense of the word, heavy (whether we regard the men or the horses), and that it should be divided into two classes, three regiments (the heaviest class) being cuirassiers, or carabineers, and four regiments being heavy dragoons.

Let the present 1st Regiment of Dragoons, with the 4th and 5th Dragoon Guards, form the 1st class; and the 1st and 3rd Dragoon Guards, with the 2nd and 6th Dragoons, form the 2nd class.

As it appears that the present Indian European cavalry force (not including the 36 squadrons before mentioned) amounts to 9 regiments of Royal cavalry, so it would appear that for the future (the 36 squadrons being absorbed in the Royal army), 18 regiments at least will be requisite for the Indian Service, and therefore it is proposed that the 27 regiments of light cavalry, which for the future shall compose the Imperial force, should be organised and equipped as follows:

9 corps as Lancers.
9 ,, Chasseurs and Light Dragoons.
9 ,, Hussars.

whereby it will occur, while six reigiments of each description of light cavalry shall always be quartered in India, that a complete brigade (or three regiments of each description) shall always remain in the United Kingdom; for it is proposed that the corps upon the Indian Service, should for the future be taken exclusively from the light cavalry branch.

It is further advocated that while one squadron from each regiment in India should always remain at home (to form a depôt), that a native squadron should be attached to each such corps in order to form a regiment of five squadrons in India, as well as to furnish men for the performance of those regimental and other duties which might be prejudicial to European constitutions.

The benefits to be derived from this arrangement, besides the one just stated, are two-fold. 1st, The maintenance in the United Kingdom of certain strong nuclei, whereon suddenly to effect an increase of British cavalry (should a European contest render such a step necessary); and 2nd, To facilitate (in the case supposed) an immediate transmission from India to Europe of three or four entire regiments of cavalry—by suddenly and temporarily forming a certain number of the supernumerary native squadrons into new regiments, so as to supply the place of those corps withdrawn. It is further proposed (in order to spare the European cavalry the necessity of occupying the most unhealthy stations) that a small number of regular native cavalry regiments should be maintained in each presidency, as thus:

Bombay ... ... 2 regiments.
Madras ... ... 3 regiments.
Bengal ... ... 3 or 4 regiments.

But these corps should be composed of every variety of race, caste, and religion.

The foregoing being the future peace establishment of the Imperial cavalry force (regimentally considered), it is proposed to raise men for the cavalry upon a new and more systematic principle, as thus:—Let the "yeomanry cavalry" force be placed upon a new and more efficient basis—in other words, let that species of "Volunteer" force be encouraged and extended, but more particularly throughout the rural and agricultural districts of Great Britain. Let various troops from adjoining districts be formed into regiments, and let each regiment have its permanent staff, to be exclusively composed of old soldiers from either the cavalry, the Horse Artillery, or the Military Train; such staff to be composed of the following:

1 adjutant, 1 surgeon, 1 sergeant-major (regimental), per regiment.

1 troop-sergeant-major, 1 sergeant, and 1 trumpeter, per troop.

Let the entire recruiting service for the Cavalry, the Horse Artillery, the corps of Artillery Drivers, and the Military Train, be placed in the hands of the Yeomanry Staff, while the recruiting in Ireland should be conducted as at present.

Let two grand Cavalry Depôts be formed, one at York, and the other at Bristol.

Let all recruits from the north of Ireland, Scotland, the northern, and north midland counties of England, be sent to York; and let all recruits from the south-east and west of Ireland, Wales, and the west, east, south, and middle of England, be sent to Bristol.

Let all recruits be enlisted for the cavalry service generally, and let each recruit remain at the depôt until he may have become thoroughly qualified to be drafted into the ranks, when he should be sent to that particular branch of the Service, and that class of corps to which he might be physically adapted. CINCINNATUS.

ARMY ORGANISATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—While a committee is sitting on the organisation of the Army, perhaps you could afford me space for the following suggestions, which I do not believe will be met by one dissentient voice. For the sake of brevity, I will divide them into three heads:—

1. That soldiers should be paid by the paymaster. This officer has about the best berth in the Army—progressive promotion, combatant rank, one sort of work, office work and plenty of clerks to assist him; a captain at present has nearly as much of the latter, besides his field-work, which, in these days, is far from a joke.

2. That the rationing should be organised and arranged by the paymaster and quartermaster respectively, instead of being, as at present, chargeable to the captain.

3. That the rate of pay should be, if not increased, at all events fixed, with some regard to the present value of money. The pay of the Army is almost the only thing that has not been affected by this—but the officers of the Army are very severely affected by it. 3*s.* 4*d.* was, at one time, considered very good pay for an ensign, then 4*s.* 8*d.*, then 5*s.* 3*d.*, but the last of these sums now is quite as disproportionate in the present day as the first was when increased. Of the first two suggestions I have only to say they would save endless and needless confusion and trouble, and last, not least, great pecuniary loss to the captains; that they have been adopted in one or two corps with the best possible results; and that the third is a self-evident requirement, acknowledged by all military and civil authorities who have spoken on the subject.—I am, sir, yours obediently,

FACT.

ARMIES OF THE CONTINENT.

THE PRUSSIAN LIGHT INFANTRY.

(*From the "Militär Zeitung."*)

All armies have recently increased their light infantry, as the introduction of new weapons has completely altered the conditions of combat, and the chief object now to be attained in warfare is to gain advantage upon the enemy by rapidity and skill; to strike manfully as the decisive moment comes, and to bring it, either by a superior fire or bold attack, to a bayonet conflict, so that the final blow may be carried out by the masses. To effect this light troops are requisite. Austria has, therefore, increased the number of her Jäger battalions from 32 to 40. France has already increased her light infantry, and has now increased her Zouaves and Turcos; Russia has formed rifle battalions, one for each *corps d'armée*, and rifle companies, one for each battalion. Prussia is now taking a similar step. The following is a historical sketch of the development of the Prussian light infantry since Frederick II.

That king had gradually increased the number of the 60 Foot-jägers, which he instituted in 1740, to 6 companies, and in 1786 he formed 3 regiments of light infantry. Frederick William II. increased the former to 10 companies per regiment, which, in 1794 was increased by 2 extra companies, and of these light troops he formed distinct Fusilier battalions, which gradually increased to 24 in number, forming three by three a Fusilier brigade. These Fusiliers were light infantry, and received instruction as skirmishers, but owing to the then prevailing spirit of army tactics, they did not make much progress in efficiency. Some battalions, for instance, Pelet's, did good service; but, generally speaking, the experience of the war with the French Republic bore little fruit, as the Prussians gained victories at Pirmasens and Kaiserslauten, and did not meet with any severe reverses. But the misfortunes of 1806, and the reorganisation of the army opened a path to light infantry and to its peculiar duties in the field. Of the few troops which Prussia could keep up after the peace of Tilsit, three battalions of Jägers, and twelve battalions Fusiliers remained intact; the latter were increased by two battalions of the line to a full regiment, and employed always as light infantry. Under York, to whom the inspection of all the light troops was entrusted, they performed good service. Scharnhorst's regulations in 1812 lay down the duties of the Fusiliers to consist in skirmishing, and in taking all the duties of outposts, patrols, &c. It was in this spirit that they were always employed in the great wars against Napoleon. After the peace, in consequence of the great augmentation of the army, the number of Jäger and rifle battalions was increased to six (including one battalion Jägers of the Guards, and one battalion Fusiliers Guards). The four Jäger and rifle battalions of the line were afterwards formed into eight divisions (half battalions), one attached to each *corps d'armée* under the common denomination of Jägers, and after 1848 increased to eight battalions, so that at the present moment there exist ten battalions of Jägers.

The Fusilier battalions remained in their regiment order, and there was a moment when the same system of arming and drill, as well as certain prevailing notions began to obliterate any distinction between light and heavy (line) infantry. The Fusiliers, however, were first provided with the Zünd-nadel rifle (after the infantry of the Guards), and for a short time an order of battle united them (4 battalions to each *corps d'armée*) in one brigade, placed at the sole disposal of the general in command, to employ them properly according to their new weapons. They became a sort of reserve corps, employed, however, in detachments to open a combat, to defend important points, or to make the attack by an overwhelming fire, which duties are not exactly those of their calling. The Fusiliers were, however, soon restored to their proper duties. They are no longer the only troops armed with the Zünd-nadel rifle; the whole Prussian infantry is now provided with that excellent arm, the faults of which (and what weapon has not its drawbacks) have been done away with by recent improvements of its inventor. The advantages of this weapon were not at first appreciated abroad; now, however, it has been introduced into the French army.

That the Fusiliers are as good marksmen as the Jägers cannot be questioned, but a doubt may be raised as to their efficiency as tirailleurs. The recruits for the Fusiliers are carefully selected, not only the quickstep of the French light infantry, but also the charge-step (almost too fast) has been introduced into the whole of the Prussian Infantry. When in the spring of 1858 Prince Napoleon Bonaparte was at Berlin, and was present at a review (when a dragoon regiment of the guards distinguished itself by the rapidity and precision of its movements), General Salles, who accompanied the Prince, expressed his curiosity to know on what extent of ground the *pas gymnastique* of the infantry could be maintained. Since then, especially since the sad experiences of the last war, the conviction has been acquired that in the organisation of troops the efficiency of the individual man physically and morally, must be developed and each rendered skilful to act individually as well as in bodies. Already great results have been obtained in detail-manœuvres. The Prussian light infantry of the present day need not fear a collision with any enemy; not even as regards numbers. For according to the new organisation it will consist as follows:

Ten battalions of Jägers, on the war-footing, each about 1100 strong; 9 battalions Fusiliers of guards and 72 of the line of 1002 men; altogether 91 battalions light infantry, giving a total strength of 92,000 men. We admit that the uniform is not without some influence upon the men, and the Jägers, proud of their green coats, are bent upon doing them honour. Already at the late manœuvres, considerable emulation was shown between the Jägers and Fusiliers, which promises to bear good fruit in case of war. Self-possession and independence, zeal, physical and moral development, for one object, without detriment to discipline and order, even in skirmishing, are the requisite qualities.

Whoever still entertains the opinion that for this development and education only a short time is required; whoever still imagines that the battles of modern times still resemble those in which superficially or scarcely drilled militia or rifle volunteers gained laurels, he has no idea of the present requirements of warfare in our days. But, it is not our intention to wander into another subject. Our object is to point out that Prussia is on the alert and has not neglected anything to bring her powers of defence up to the mark to meet the eventualities of a coming war, which probably will be a German war against foreign aggression.

A letter from Sebastopol says, that time has quite obliterated the sore feelings that the late war engendered. Most of the sunken ships have been either blown up under water, or raised and floated ashore and broken up; there remain now but 14 sunken hulls, and these have eight fathoms' water over them. An American, under contract with the Russian Government, has been engaged for the last three years in thus clearing the harbour. The town remains much as it was left by the allies, except that the rubbish has been cleared away, and a few houses, necessary for the military residents, rebuilt. A new slip is also in progress, to facilitate the repairs of the steam-vessels of the Russian Trading Company. The town has but few inhabitants, and the continuous roofless houses remind the traveller of the deserted streets of Pompeii. Though some of the English graveyards are in good repair, there are others with the walls much dilapidated, and the tombstones overturned.

Obituary.

DEATH OF FIELD-MARSHAL THE EARL OF STRAFFORD, G.C.B., G.C.H.—We regret to have to announce the death, after a very short illness, of Field Marshal the Earl of Strafford, Colonel of the Coldstream Guards. The venerable and gallant nobleman expired at his residence in Lower Grosvenor Street on Sunday evening, at a quarter-past eight o'clock. In stating above that his lordship's illness was short, it need only be said that up to a late hour on Saturday there was no indication of illness. The deceased Field-Marshal, who was the third son of Mr. George Byng, of Wrotham Park, Middlesex, and grandson of the Honourable Robert Byng, third son of the first Viscount Torrington, had reached the advanced age of 88 years. He had achieved distinguished reputation in the Army. He entered the 33rd Regiment in 1793, and served in that regiment in Flanders and in Holland in 1794 and 1795, and was wounded at Geldermalsen, and subsequently in Ireland. In the expedition to Hanover, in 1805, he served in the 3rd Guards, and took part in the expedition to Copenhagen in 1807, and was also in the Walcheren expedition in 1809, when he was with the reserve, under General Sir J. Hope, and commanded his advance, composed of the Grenadier battalion of the Guards, and a detachment of the 95th Rifles. In that command he charged a detachment of the Dutch troops, taking some officers and upwards of 100 men prisoners. In 1811 he proceeded to the Peninsula to join a brigade of Guards in Portugal, and in September that year he was appointed to the command of a brigade in the second division of the army under Lord Hill. He was present with it in all the movements and affairs with the enemy in the south of Spain; and during the period of the siege of Ciudad Rodrigo was detached in command to Idanha Nova with his own brigade and some cavalry to observe the movements of a corps of the enemy commanded by General Foy at Coria. Upon his gallant chief, Lord Hill, joining the main body of the army at the commencement of the campaign of 1813 he was engaged in the several actions of Vittoria, of the Pyrenees, of Pampeluna, in which action he was wounded; in the crossing the Nivelle and the attack of the fortified camp when he was wounded and had two horses shot under him; at Campo, in driving in the enemy's outposts and reconnoitring the *tête de pont;* in the passage of the Nive, and the affair before Bayonne, on the 13th December, 1813, when the second division was attacked by six divisions of the French army, commanded by Marshal Soult; in this action a horse was shot under him; on the 14th February, at the commencement of the campaign of 1814, he was engaged with the rear guard of the enemy at Espellette, and on the succeeding day was employed in the attack of the heights above Garris. He was in the subsequent actions of Orthes and Aire; and he repulsed the enemy at Garlin; and was also engaged with his brigade at the battle of Toulouse. In the campaign of 1815 he eminently distinguished himself, more particularly at Waterloo, having the command of the 2nd Brigade of the 1st Division, under General Cooke, of the 1st corps, under the command of the late King of the Netherlands. He was after that victory appointed to the command of the 1st corps of the British Army which marched from Waterloo to Paris, and on the march took the fortified city of Peronne, and subsequently the possession of Paris by occupying the heights of Belle Ville and Montmartre. In 1812 he was appointed Governor of Londonderry and Culmore, and was made a Privy Councillor in 1827. In 1831 he was nominated a Grand Cross of the Order of the Bath, and in 1828 was made a Knight Grand Cross of the Royal Hanoverian Order of Knighthood. From 1831 up to 1835 he represented the borough of Poole in the House of Commons. In 1837 he was elevated to the House of Lords by the title of Baron Strafford, and was ultimately created an earl in 1847. The gallant deceased was appointed colonel of the 2nd West India Regiment in July, 1822, and in January, 1828, was removed to the 29th Regiment; and in August, 1850, he was made Colonel of the Coldstream Guards, in the room of his late Royal Highness the Duke of Cambridge. His lordship, who had frequently received the thanks of Parliament for his military services, had received the gold cross and one clasp for Vittoria, Pyrenees, Nivelle, Nive, and Orthes; and the silver war medal with one clasp for Toulouse; was also Knight of the Order of Maria Theresa, of Austria, and of St. Wladimer of Russia. In addition to other staff appointments, had commanded the forces in Ireland. The commissions of the venerable deceased bore date as follows:—Ensign, Sept. 30, 1793; Lieutenant, Dec. 1, 1793; Captain, May 24, 1794; Lieut.-Colonel, March 14, 1800; Colonel, July 25, 1810; Major-General, June 4, 1813; Lieut.-General, May 27, 1825; General, Nov. 23, 1841; and Field-Marshal, Oct. 2, 1855.

We regret to have to record the death of a distinguished veteran of the Indian army. General Sir David Leighton, K.C.B., the senior officer on the Bombay establishment, expired at his residence, Bafford House, near Cheltenham, on the 1st inst., in his 88th year. Sir D. Leighton entered the service of the late Hon. East India Company in 1795, and served in the Mysore campaign of 1799, and was present at the siege and capture of Seringapatam. He accompanied the force under the late Duke of Wellington (then Colonel Arthur Welesley) in the operations against the Mahratta freebooter, Dondia Waugh, in 1800, and took part in the storming of the forts of Dummul, Rollebad, and Syrhingy. He served in Malabar during the rebellion in that province, in 1803, and in 1815 commanded a brigade in the Deccan field force. He took part in the expedition under Sir Lionel Smith to Arabia, in 1821, which resulted in the subjugation of the Arab tribe of Beni Boo Ali. He held for many years the office of Adjutant-General to the Bombay Army, and the firmness, regularity, and impartiality which characterised his administration gave general satisfaction, and gained for him the esteem and respect of all those with whom he was brought in contact.

The Colonelcy of the 78th Highlanders has become vacant by the demise of Lieutenant-General Sir William Chalmers, C.B., K.C.H., who died on Saturday last at his seat near Dundee. The deceased General was the eldest son of the late Mr. William Chalmers, of Glenericht, Perthshire, and was born in 1787. Soon after completing his 16th year he entered the Army. He served in Sicily in 1806 and 1807, and the following year accompanied his regiment to Portugal, and served during the campaigns of 1808 and 1809 in that country and in Spain. He was in the expedition to Walcheren, including the bombardment of Flushing. In 1810 he proceeded to Cadiz, and took part in all the succeeding campaigns in the Peninsula, including the battle of Barrosa, attack of the enemy on the heights near Moresco, affair at Senhoa de la Pena, battle of Salamanca, action of San Munos, battle of Vittoria, attack at Maya, battles of the Pyrenees on the 30th and 31st of July, repulse of the enemy in his attack of the heights of St. Antonio on the 31st of August, attack of the enemy's forts near Sarre on the 9th of October, 1813; battle of Nivelle, besides many other minor affairs and skirmishes on the advance to Madrid and capture of the Retiro. He was present in almost all the sieges and was engaged during the retreat from Burgos in the affairs of Oimos, Monasterio, bridge of Valladolid, and the passage of the Huebra. He was employed on the staff in the above campaigns in the Peninsula, and was severely wounded in the assault of the entrenchments at Sarre, and during his services in Portugal and Spain he had six horses killed or wounded under him in action. During the four years he was engaged in active service, from the 5th of March, 1811, to the 18th of June, 1815, he was present in 17 engagements six of them general actions, exclusive of sieges, &c. The gallant deceased also served in the campaign of 1814 in the Netherlands, and was present at Waterloo. At that battle he commanded a wing of the 52nd Regiment, of which he was major, and had three horses shot under him. He was at the capture of Paris, and did not return from France until 1817. In 1837 he was nominated a Knight Commander of the Royal Hanoverian Order of Knighthood; was in 1838 made a Companion of the Order of the Bath, and was, by letters patent, made a Knight Bachelor in 1847. The deceased veteran had received the silver war medal and eight clasps for Barrosa, Ciudad Rodrigo, Badajoz, Salamanca, Vittoria, Pyrenees, St. Sebastian, and Nivelle. His commissions bore date as follows:—Ensign, the 9th of July, 1803; Lieutenant, the 25th of October, 1803; Captain, the 27th of August, 1807; Major, the 26th of August, 1813; Lieut.-Colonel, the 18th of June, 1815; Colonel, the 10th of January, 1837; Major-General, the 9th of November, 1846; and Lieut.-General the 20th of June, 1854. He was appointed Colonel of the 78th Regiment the 30th of September, 1853.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BACOT—June 3, at Pembroke Dock, the wife of Staff-Sergeant Bacot, of twins, a boy and girl.

BROWNE—April 25, at Meerut, the wife of Captain C. F. Browne, 35th Foot, Deputy-Judge-Advocate-General, of a son.

BRUCE—May 26, on board the Holmsdale, at sea, 500 miles from the Lizard, the wife of Mr. R. C. Bruce, H.M.'s Bengal Marines, of a daughter.

CHADWICK—June 2, at Ryston Lodge, Newbridge, Ireland, the wife of Lieutenant Robert Chadwick, 14th Light Dragoons, of a daughter.

CHAPMAN—June 5, at Aldershot, the wife of Lieut.-Colonel Chapman, 2nd Battalion 18th Royal Irish, of a daughter.

CHARTER—June 1, at Templemore, the wife of Major Ellis James Charter, of a daughter.

CHIFFNEY—June 3, at 6, Royal Crescent, Notting Hill, the wife of W. M. Chiffney, Esq., late of the Queen's Own Light Infantry, of a daughter.

DAVENPORT—June 3, at 11, Charterhouse Square, the wife of Captain Davenport, of a daughter.

FLETT—June 4, at 3, Brockham Villas, Richmond Road, Dalston, the wife of Captain Flett, of a daughter.

LOWRY—June 6, at Sandgate, the wife of Lieut.-Colonel Lowry, 47th Regiment, of a daughter.

STOPFORD—June 4, at 8, Gloucester Gardens, Hyde Park, the wife of Major Stopford, Royal Engineers, of a son.

WINTHROP—June 3, at Botley, Hants, the wife of Commander George Winthrop, R.N., of twin daughters.

MARRIAGES.

ADAIR—HAMILTON—June 5, at Mauchline, Ayrshire, by the Rev. James Fairlie, Captain Wallace Adair, 5th Fusiliers, to Helenora Agnes, youngest daughter of Dugald Stewart Hamilton, Esq., Beechgrove.

ADAIR—TURNBULL—June 5, at the parish church, Pinner, by the Rev. T. Burrow, M.A., assisted by the Rev. H Hugh J. Adair, B.A., brother of the bridegroom, Alexander William Adair, Esq., Captain 52nd Light Infantry, eldest son of Alexander Adair, Esq., of Heatherton Park, Somerset, and Colehouse, Devon, to Caroline Maria, eldest daughter of J. G. Turnbull, Esq., and grand-daughter of the late General Sir Peregrine Maitland, G.C.B.

BAKER—WILLOCK—June 5, at Walcot Church, Bath, by the Rev. Thomas Coombe, M.A., the Rev. Frederick Walter Baker, M.A., incumbent of Beaulieu, New Forest, Hants, to Charlotte Frances, eldest daughter of Major George Willock, K.L.S., of Lansdown Crescent, Bath.

BARTLETT—ALLEN—June 2, at the parish church, Odiham, Hants, by the Rev. G. Clarke, the Rev. John B. Bartlett, of Blandford, Dorset, to Harriette Adelaide, daughter of the late Captain David Allen, of the Madras Light Cavalry, and niece of the late Lieut.-Colonel Allen, of the "Chantry," Bradford-on-Avon.

BRAY—MAIR—June 6, at South Bersted, Sussex, by the Rev. J. N. Palmer, assisted by the Rev. E. Eedle, Captain Edward William Bray, 83rd Regiment, eldest son of the late Colonel E. W. Bray, C.B., to Ann Elizabeth, second daughter of Lieut.-Colonel Mair, of Northampton Place, Bognor.

Digitized by Google

FAWCETT—PEARSON—June 6, at Dawlish, Devon, by the Rev. Edward Fursden, vicar, Charles Fawcett, of the Admiralty, Somerset House, only son of Henry Angustus Fawcett, of Porchester Terrace, Hyde Park, to Frances Susannah Owen, only daughter of Sydney Pearson, Esq., of Dawlish.

GARRATT—HARGREAVES—June 6, at the parish church, Sunninghill, Berks, by the Rev. Jonathan Jackson, M.A., incumbent of Trinity Church, Southport, Thomas Garratt, Esq., late Captain 14th Light Dragoons, fourth son of the late John Garratt, Esq., of Bishop's Court, Devon, to Elizabeth, eldest daughter of John Hargreaves, Esq., of Silwood Park, Berks.

LYLE—DUNTZE—June 5, at St. Mary's Church, Woolwich, by the Rev. H. C. Brown, Hugh Chetham Lyle, Captain Royal Artillery, of Carnagarde, county Donegal, Ireland, to Juana Henriguetta, younger daughter of Rear-Admiral Duntze.

MILLER—TRENDELL—June 5, at St. Nicholas Church, Abingdon, by the Rev. Rd. Mant, assisted by the Rev. T. Short, Captain Henry Miller, H.M.'s Military Train, son of Edward Mant Miller, Esq., Lansdown Place, Clifton, to Harriett Watson, eldest daughter of Edwin James Trendell, Esq., of the Abbey House.

OGILVIE—DUNTZE—June 5, at St. Mary's Church, Woolwich, by the Rev. H. Brown, the rector, Alexander W. A. Ogilvie, Esq., Captain Royal Artillery, only son of Alexander Ogilvie, Esq., M.D., Deputy-Inspector-General, late Royal Artillery, to Gertrudio J. A., elder daughter of Rear-Admiral Duntze.

OGILVIE—HANCOCK—June 5, at Trinity Church, Westbourne Terrace, by the Rev. H. Taylor, B.C.L., Major Robert L. J. Ogilvie, H.M.'s I. Army, to Clara, widow of Major Fitzharding Hancock, H.M.'s 74th Highlanders.

PARLOT—BANBURY—Feb. 8, at Barrackpore, by the Rev. — Cave Brown, Brook Samuel Bridges Parlby, of H.M.'s 6th Regiment Bengal European Infantry, only son of General Brook Bridges Parlby, C.B., H.M.'s Indian Forces (Madras Army), to Margaret Mary, fifth daughter of the late Major Banbury, of the Bengal Army.

ROWLEY—STROYAN—April 25, at Goruckpore, Captain Rowley, J.A., H.M.'s 13th L.I., to Georgiana A., widow of the late S. Stroyan.

STANIER-BRONDE—JUSTICE—June 6, at Trinity Church, Bath, by the Rev. J. M. Dixon, rector, assisted by the Rev. G. Armitage, incumbent of Silverdale, Francis Stanier-Bronde, Esq., of Silverdale and Fenton Vivian, Staffordshire, to Caroline J., daughter of Major-General Wm. Justice, Madras Army, Bath.

STOKES—SAMPSON—June 5, at St. Pancras Church, by the Rev. Charles H. Andrews, Commander Richard Stokes, R.N., to Eliza Anne, eldest daughter of Thomas Sampson, Esq., Hilmarton Villas, Holloway.

TELFER—MOURAVIEFF—May 17, at Leghorn, according to the rites of the Russo-Greek Church, and at the British Consulate, by the Rev. H. J. Huntingdon, Lieutenant J. Buchan Telfer, R.N., son of Buchan F. Telfer, Esq., of Edinburgh, Deputy-Commissary-General, to Catharine, eldest daughter of the late Alex. Mouravieff, Esq., of Moscow, and niece of the General of Kars.

TIGHE—BLAKE—June 5, at Temple Combe, in the county of Somerset, John A. L. Tighe, Esq., of H.M.'s 68th Regiment, to Cornelia Beckmann, eldest daughter of the late A. Blake, Esq.

TODD—SZEZEPANSKI—April 21, at Agra, Lieut.-Colonel Todd, H.M.'s 14th Dragoons, to Clara S., daughter of Lieut.-Colonel Szezepanski.

WHITTER—DETTMAR—June 5, at Brighton, by the Rev. John Allen, William Wood Whitter, Esq., of Worthing, late H.M.'s 76th Regiment of Foot, to Emily Eliza, youngest daughter of the late George J. Dettmar, Esq., of Mecklenburgh Square, and Wanstead, Essex.

DEATHS.

ACKLAND—May 31, at Haverfordwest, Henry Ackland, Lieutenant in the Royal Pembroke Artillery Militia, second surviving son of the late Robert Innes Ackland, Esq., of Boulston, in the county of Pembroke, aged 29.

CALMERS—June 2, at Dundee, Lieut.-General Sir William Chalmers, of Glenericht, C.B., K.C.H.

CHAMBERS—June 4, at the Manor House, Great Durnford, aged 50, Captain William Wylly Chambers, R.N., only son of the late Captain Samuel Chambers, R.N.

CLARK—June 3, at 40, Onslow Square, Warr Linrendedsay Alaister, second and beloved son of Major-General Clark, K.H., aged 17.

COLBY—June 3, at Greenwich. Mary, the beloved wife of Commander Colby, of Greenwich Hospital, aged 65.

COLLINSON—March 30, at sea, on board H.M.'s ship Hermes, Lieutenant Tathwell B. Collinson, R.N., eldest son of the Rev. H. K. Collinson.

DUFFELL—June 6, at 3, Denzil Place, Southampton, aged 66, Susan Lydia, wife of John T. Duffell, Esq., Paymaster R.N., and of the Royal Mail Steam-packet Company.

ELLIOT—April 20, at Madras, Cornet Riversdale Elliot, King's Dragoon Guards, third son of John Lettsom Elliot, Esq., of Pimlico.

HAWKINS—June 3, at 32, Sussex Gardens, Hyde Park, Major-General F. S. Hawkins, of the Bengal Army, aged 61.

LEIGHTON—June 1, at Bafford House, near Cheltenham, General Sir David Leighton, K.C.B., of the Bombay Army, aged 86.

LONEY—June 3, at his residence, near Southampton, John Jenkins Loney, Esq., Lieutenant R.N., aged 76.

MCDERMOTT—June 5, at his residence, 2, Albion Terrace, Commercial Road East, Captain B. McDermott, late of the P. and O. Company's ship Fort William, aged 42.

MITCHELL—April 29, at Bombay, Captain John George Forbes, Acting Military Auditor-General, Bombay Army, second son of the late John Forbes Mitchell, Esq., of Thainston, Aberdeenshire, aged 45.

ORLICH—June 2, at 48, Wimpole Street, of angina pectoris, Major Leopold von Orlich, aged 55.

ROCHFORT—June 3, at her residence at Windsor, Maria, relict of the late Lieut.-Colonel Rochfort, formerly of H.M.'s 10th Hussars.

SCHOMBERG—April 24, of cholera, at Secunderabad, Bathurst Fortescue Schomberg, aged 22, Lieutenant 40th Madras N.I., second son of J. T. Schomberg, Esq., of 91, Eccleston Square, London, and Seend, Wilts.

SCOTT—April 10, at Kurrachee, Scinde, Henry Emmanuel Scott, Esq., Civil Engineer, second son of the late Lieut.-Colonel Scott, of Bevelaw, Mid-Lothian.

SEACOME—May 30, George Ravenscroft Seacome, Esq., Lieutenant 2nd Grenadier Regiment, H.M.'s. Bombay Army, aged 26.

STRAFFORD—June 3, at his residence in Lower Grosvenor Street, Field-Marshal the Earl of Strafford, G.C.B., K.M.T., &c., Colonel of the Coldstream Guards, and Governor of Londonderry and Culmore, aged 83.

STUART—June 1, at Painswick, Glocestershire, Colonel George Stuart, aged 75.

VANDELEUR—June 6, at Woolwich, Arthur Vandeleur of Ralahine, Esq., Captain and Brevet-Major in the Royal Artillery, aged 31.

WEAVER—June 16, at Kurrachee, India, Edward Baker Weaver, Esq., late of H.M.'s 86th Regiment (Royal County Down).

CONTRACT FOR SABICU TIMBER AND SPANISH MAHOGANY TIMBER.

Department of the Storekeeper General of the Navy, Somerset Place, 5th June, 1860.

THE COMMISSIONERS for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give notice, that on FRIDAY, the 15th instant, at Two o'clock, they will be ready to treat with such Persons as may be willing to Contract for supplying Her Majesty's Dockyards with 4500 loads of SABICU TIMBER, and 4000 loads of SPANISH MAHOGANY TIMBER, according to Distributions, which, with forms of the tenders and the conditions of the contracts, together with a specimen of the Spanish Mahogany Timber, may be seen at the said Office. No Tender will be received after two o'clock on the day of treaty, nor will any be noticed unless the party attends, or an Agent for him duly authorised in writing.

Every Tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for ," and must also be delivered at Somerset Place, accompanied by a Letter signed by two responsible persons, engaging to become bound with the person tendering, in the sum of 5000*l.*, for the due performance of each of the Contracts.

NOTICE IS HEREBY GIVEN, that CANDIDATES for Her Majesty's Indian Medical Service will, in future, be required, after passing the competitive examination in London, to ATTEND THE COURSES OF INSTRUCTION ON HYGIENE, MILITARY MEDICINE, SURGERY, AND PATHOLOGY, which are to be given at Chatham, as detailed in the Regulations now issued. During his stay at Chatham each candidate will receive 5*s.* per diem, and 2*s.* per diem additional if quarters are not found him, and will, in all respects, be on the same footing as the gentlemen about to enter the medical service of the army.

Copies of the Regulations can be obtained at the India Office.

The Medical Class at Chatham will commence in October next.

India Office, June 1, 1860.

EIGHTY-THIRD CLUB.—THE ANNUAL DINNER will take place at the London Tavern, Bishopsgate Street, E.C., on WEDNESDAY, the 20th of JUNE, at half-past 7 o'clock. All gentlemen now serving, or who have served in the 83rd Regiment, who have not yet joined the Club, are invited to do so, and to pay the annual subscription of 1*l.* to Messrs. Cox & Co., Craig's Court, S.W. GEORGE J. RUSH.
Craig's Court, S.W.

FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O.M. 230 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9½ knots on a remarkably light consumption of fuel, being 2½ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to
CURRY, KELLOCK, & Co., Brokers, Liverpool.

FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—760 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to
CURRY, KELLOCK, & Co., Brokers, Liverpool.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.

GALLERY, 179, REGENT STREET, W.

THE VOLUNTEERS' PICTURE FRAMES.—The Cheapest House for every description of Picture Frames. Country dealers supplied with every description of Gold and Fancy Wood Moulding. Three-quarter Gilt Beads at 7*s.* per doz. 6 feet, at
GEORGE REES, 129, Drury Lane, W.C.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.

WILLIAM M. JAMES, Secretary.
13, Waterloo Place, London, S.W.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.; and at Messrs. Paris & Co., 10, St. James' Street, S.W.
EDINBURGH, 5, George Street.
DUBLIN, 65, Upper Sackville Street.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King Street, Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application. CHARLES INGALL, Actuary.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

MONEY TO LEND AT 5 PER CENT.—TO OFFICERS, NOBLEMEN, AND GENTLEMEN.—If you require money upon real estate for any term of years, or upon reversionary interests—life estates or marriage settlements; or if you want ADVANCES, LOANS, or DISCOUNTS for short periods on Bonds, joint notes, or bills of exchange, you can apply personally between 1 and 5 o'clock daily, or by letter addressed, MR. COLLINS, 13, Duke Street, St. James's Square, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel, without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 29A, Regent Street, Piccadilly, W.

Loans from £3 to £1000 granted, without delay, in town or country, upon personal security.—No office fees.

LOANS.—CAUTION.—As the ALLIANCE LOAN COMPANY has no connection with any other office, the Public is requested to observe the address, 28 and 29, Southampton Street, Strand, W.C., immediately facing Tavistock Street. Offices, first floor. Hours, Ten to Four; Monday and Thursday evenings, Six to Eight. Forms by post for Eight Stamps.—A. GRAHAM, Manager.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. & MRS. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

WANTED TO PURCHASE, Ladies and Gentlemen's left-off Wearing Apparel, Regimentals, old Jewellery, Linen, and every description of miscellaneous Property, for which the full value will be paid in cash. Ladies and Gentlemen waited on at any time or distance on addressing to Mr. or Mrs. HUTCHINSON, 25, Red Lion Square, Holborn, W.C. Parcels from the country, the utmost value immediately remitted by post office order.

Rachel Russell, 53rd Regiment, ditto	3263
Eliza Tate, 60th R. Rifles, motherless	3202
Mary James, 1st Life Guards, fatherless... ...	2704

Though the objects of the Soldiers' Daughters' Home are essentially national, yet the Committee grieve to state that from the National Exchequer no assistance whatever is received, either through the War Department or the Committee of Council on Education.

An application to the Commissioners of the Patriotic Fund for a grant was refused, on what grounds the Committee of the Soldiers' Daughters' Home are at a loss to understand, inasmuch as the Royal warrant, by which the Commissioners of the Patriotic Fund were authorised to receive voluntary subscriptions, distinctly declares that one of the objects of that fund should be "to increase, extend, or make additions to any of our royal or other charitable institutions already founded for similar purposes within our United Kingdom." It is, therefore, the more needful for the friends of the soldier, and for the advocates of a sound, scriptural, and industrial education, to rally round the managers of the Home, and so to increase its income, that no soldier's motherless daughter shall be refused admittance.

The Committee beg to add that there are now upwards of 100 candidates for admission to the Home, principally the daughters of soldiers in India, and whom they are unable to admit for want of funds. Under these circumstances they urgently and confidently appeal to the friends of the soldier for immediate assistance.

The Soldiers' Daughters' Home is open to visitors from 10 o'clock, a.m., to 5, p.m., on every day of the week (except Saturday and Sunday).

A donation of five guineas constitutes a Life Governor, with two votes at all elections to the Home.

A donation of two guineas and a-half entitles the donor to one vote for life at all elections.

An annual subscription of one guinea entitles the subscriber to one vote at all elections.

Subscriptions and donations thankfully received by the Treasurer, Sir John Kirkland, 17, Whitehall Place, S.W.; by the bankers, London and Westminster Bank, St. James's Square, S.W., and Messrs. Masterman and Co., Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the office, 7, Whitehall, opposite the Horse Guards, S.W. Post-office orders should be made payable to the Secretary, Mr. John Marsh, upon the Charing Cross post-office.

H. L. POWYS, Major, Chairman of the Committee.

SHIPWRECKED FISHERMEN AND MARINERS' ROYAL BENEVOLENT SOCIETY.

The recent terrific gales compel the Committee earnestly to APPEAL to the public for HELP to relieve the poor castaways, or their widows and orphans. The Shipwrecked Mariners' Society is entirely dependent on voluntary contributions. For the last three years its expenditure has been beyond its income 2500*l.*, and the incessant demands made on its funds from sufferers by disasters of the sea continue to increase, 10,354 persons having been relieved last year, which tells its own tale, and the demands for the first quarter of this year have exceeded that of the last by 1000*l.*

HENRY HOPE, Admiral, Chairman.
FRANCIS MAUDE, Capt. R.N., Deputy-Chairman.

Bankers—Messrs. Williams, Deacon, & Co., Birchin Lane, City, E.C.

FRANCIS LEAN, R.N., Secretary.

Office, Hibernia Chambers, London Bridge, S.E., May, 1860.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—The Committee of this Institution earnestly APPEAL to the public for pecuniary assistance, to aid them to meet the present heavy demands on the limited funds of the Society. It has now 103 lifeboats, some of which saved last year 227 persons from shipwrecks. THOMAS BARING, Chairman.
THOMAS CHAPMAN, Deputy Chairman.

No. 14, John Street, Adelphi, W.C., June, 1860.

Bankers—Messrs. Willis & Co.; Coutts & Co.; Herries & Co.

TO EMPLOYERS.—THE ARMY AND NAVY PENSIONERS EMPLLOYMENT SOCIETY, No. 22, Parliament Street, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of H.M.'s Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

MILITARY BAND INSTRUMENTS.

J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.

J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.

Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35, Henrietta Street, Covent Garden, London, W.C.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

DOG CARTS.

THOMSON'S REGISTERED excels other inventions of the kind in commodiousness, elegance, lightness, and economy. Manufacturer and inventor, WILLIAM THOMSON, Coachbuilder, Perth.

In addition to the testimonials already published in *The Field* and elsewhere, the following have been recently received:—

"Dalhousie Castle.

"SIR,—I have tried the Dog Cart several times, and am much pleased with it. I consider it a most perfect carriage of its kind. W. MAULE RAMSAY, Colonel.

"Jan. 20, 1860."

"Edmondstown, Feb. 29, 1860.

"MR. THOMSON,—I have just received the Dog Cart safely. In justice to you, I must say that a neater, lighter, or roomier cart I have not seen. I shall have pleasure in recommending it. I remain, &c., &c.,

"ARTHUR COSTELLO, late 7th Dragoon Guards."

Drawings sent on application.

The Price of the Registered Dog-Cart, complete, with Hand-Drag, best Lamps, Aprons for both Seats, all finished in the highest style, with Shafts for one Horse, and delivered at any Station on the Great Northern or London and North-Western, FIFTY GUINEAS. If for a pair, with Pole, Bar, and polished-steel Chains, FIFTY-FIVE GUINEAS.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

YOUTH, BEAUTY, AND ARTICULATION.—Mr. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10*s.* per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10*s.* 6*d.* per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11*s.*, 22*s.*, and four quantities in one for 33*s.* Attendance daily, from 10 till 6.

TEETH.—MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.

Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.

Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post free for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

ANOTHER CURE OF ASTHMATIC COUGH BY DR. LOCOCK'S PULMONIC WAFERS.—From Mr. J. Richardson, Bookseller, Seaham, May 1, 1860.—"Gentlemen,—Having for some time been troubled with asthma and cough, and not being able to get any medicine that would relieve me, I was recommended to try Dr. Locock's Pulmonic Wafers, and before I had finished one box I was nearly well. Whenever I get a cold and return of cough I take some of the wafers, which give me immediate relief. I am, Gentlemen, yours, &c., T. B. BROWN."

TO SINGERS AND PUBLIC SPEAKERS, Dr. Locock's Wafers are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* per box. Sold by all druggists.

NEW WORK by the AUTHOR of "CURIOSITIES OF WAR."

Preparing for early Publication in Monthly Parts, price One Shilling, with fac-simile Illustrations printed in Colours,

MEDALS OF THE BRITISH ARMY,

AND

HOW THEY WERE WON.

BY THOMAS CARTER,

AUTHOR OF "CURIOSITIES OF WAR, AND MILITARY STUDIES."

"What is a ribbon worth to a soldier?
Everything! Glory is priceless!"—SIR E. B. LYTTON.

NO general history of these Distinctions having been yet attempted, it is considered that a Work which shall afford a clear insight into the circumstances under which such Honours were gained is likely to be received with favour by the public, when accompanied by fac-similes printed in colours of the Medals and Ribbons, and interspersed with notices of Regimental and Individual Acts of Heroism, and Military Statistics of an interesting character.

In order to render this National Work generally accessible, it will be published in Three Sections, of about Five Parts each, commencing with the Crimean Campaign:—the First Section, containing "THE CRIMEAN CAMPAIGN," Dedicated, by Permission, to MAJOR-GENERAL THE HON. SIR JAMES YORKE SCARLETT, K.C.B., Adjutant-General of Her Majesty's Forces, &c., &c.—to be followed by the remaining two portions, the one comprising the Services enumerated in the General Order of the 1st of June, 1847, from the Battle of Maida, and terminating with Waterloo—Dedicated, by Permission, to HIS GRACE THE DUKE OF RICHMOND, K.G.;—the concluding Section being devoted to the Campaigns in India, Egypt, China, &c., from 1799 to the suppression of the Indian Mutiny, and including the Medals accorded with annuity, gratuity, or otherwise, for distinguished conduct and long service.

When completed, the series will form a handsome volume, elegantly illustrated, which will contain a record of unsurpassed Military Prowess; and it is anticipated that such an attempt to perpetuate the memory of the deeply indebted to, and interested in, the proud achievements of the British Army.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, 12th March, 1860, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Warren, Trollope, Payne, Loveridge, Passy, Haggarth, Horne, Orton, Harrison, Higgins. 41 Naval Cadets passed from North Grove House in 1859.

W. BELL, Chaplain;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives 25 PUPILS to educate for the Royal and Indian Navies, the Army, Woolwich, and Addiscombe. Terms, 70, 80, and 100 guineas, according to age. Upwards of 70 pupils have passed sine 1854.—St. Mary's Hall, Southsea, Hants.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotherun, York.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMERTON, Principal.

MESSRS. SEAGROVE will be happy to forward, on application, a LIST and ESTIMATE of the UNIFORMS, INSTRUMENTS, BOOKS, &c., required for a Gentleman joining her Majesty's ship Britannia, according to the Admiralty regulations.

Messrs. S. beg to call attention to their NEW IMPROVED SEA CHESTS, made to the strict Admiralty regulation size, fitted with every convenience, and on entirely different principles from any other in use in her Majesty's Service.

E. & W. SEAGROVE, Royal Naval and Military Outfitters, 22 & 23, The Hard, Portsea, near her Majesty's Dockyard, and opposite H.M.S. Britannia.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

TO VOLUNTEER RIFLE CORPS.—HURST'S NEW RIFLE MUZZLE PROTECTOR, Registered March 28, 1860.—Approved by many of high authority, and used by several officers of different corps, and supplied to the 7th Sussex Rifle Corps. It preserves the muzzle from friction, keeps the ball in the centre of the bore, does away with the rattle of the rod, and protects the breech in the platoon exercise; can be attached to the rod without any trouble or inconvenience whatever.—May be had of C. E. HURST, Armoury Sergeant, 7th Sussex, Horsham; price 1*s.* 6*d.* each by post.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

RIFLE AMMUNITION.—DR. SCOFFERN'S BALL CARTRIDGE for the Enfield Rifle is waterproof, and free from tallow or grease. A sample (quarter of a hundred) may be had for 2*s.* 6*d.* of HENRY GRAFTON, 80, Chancery Lane, W.C.

TO VOLUNTEER CORPS.

WOOD'S GOVERNMENT PATTERN TARGETS, price 63*s.* complete, with wrought-iron staves, fastenings, &c. Delivered free at any Station in England. Weight about 5 cwt. each.

To be had only of the appointed Agents, RICHARDS & Co., Nos. 117 & 118, Bishopsgate Street Within, E.C. Drawings, &c., per post.

LIEUTENANT CHEVALIER'S SELF-RECORDING TARGET will be EXHIBITED and TESTED this afternoon, at Three o'clock, at the Practising Grounds of the South Middlesex Volunteer Rifle Corps, Fulham.

WE cannot express any disappointment that Admiral Duncombe's motion, for a Commission to inquire into the constitution of the Board of Admiralty, was withdrawn. The gallant admiral introduced the subject in the most inoffensive, and we might almost say, complimentary manner, as regards the Board itself. It was the system only and the constitution of the Board, that were at fault; not those who have tried to work it. And following on the same side came Mr. Bentinck—fulfilling almost his quondam character of "George the Second" once more, but now not in offensive warfare—bearing testimony especially to the merits of the present First Lord; as much as to say, "If it were possible to get efficient administration out of a Board of Admiralty, through the instrumentality of well-qualified members, you would have it now, through the Board presided over by the Duke of Somerset." But, after that, Mr. Bentinck bethought hint of the rotten gun-boats; then suddenly became poetical, and went off about "the brightest gem the Government had in the way of patronage," after letting out that even he distrusted the "Constitution of the Board of Admiralty."

Of course, had there been any doubt on the subject into which Admiral Duncombe proposed to inquire, we should have regretted that an inquiry is not to take place. But if ever there was any doubt, the debate on this motion must have set it at rest. All the speakers knew what is the constitution of the Board of Admiralty perfectly well. The whole House,—ay, and the whole country—know its failures to do what the country had reason to expect. Not long ago the Duke of Somerset, in his Remarks upon the Report of the Dockyard Committee, published to the world his testimony in detail, as to the continual blundering by the Board of Admiralty, and indeed anticipated in a measure Lord Clarence Paget's damaging speech, acknowledging that the Board (to use Mr. Osborne's *précis*) "was jack-of-all-trades and master of none!" But, if anything were wanting to prove that the Board of Admiralty is defective in its organisation, and does not itself know what it is about, the speeches of the various speakers who have been Admiralty officials abundantly supply the evidence.

Admiral Duncombe, who had been at the Admiralty and therefore knows its constitution, was chiefly anxious that the Comptroller of Shipbuilding should have a seat at the Board, instead of being a mere cipher in its deliberations, as at present. This, he said, should be a *sine quâ non*, though he would also be glad to see the First Lord made a Minister of Marine, or Naval Secretary of State, like the Secretary for War. The gist of Lord Clarence Paget's reply to this (omitting what Sir Charles Napier called "the rubbish the Noble Lord put forward about the Admiralty being architects, shipbuilders, and other trades") was, that there were four Committees or Commissions already appointed to inquire into the various branches of Admiralty mismanagement; and, with a Board so very compliant, and ready to admit its shortcomings and have them thoroughly probed, what could the House want more? Then his lordship seemed to imply that the Comptroller of the Navy was already as good as a member of the Board, and in constant communication with it; but he was obliged to qualify this, when flatly contradicted by Mr. Osborne, and admit that the important questions as to shipbuilding were "not discussed at the Board," but only that "the First Sea Lord was in daily communication with the Comptroller on the subject." "Quite so," said Mr. Osborne, who was for many years Secretary of the Admiralty; "these questions were never brought before the Board, and the communications between the First Sea Lord and the Comptroller were all private and confidential."

As an episode in this strife of officials past and present, up starts Colonel Dickson to prick Lord Clarence Paget with the stinging observation, that "it seemed as though the sweets of office had sealed those lips which had formerly given expression to such loud denunciations upon the expenses of the Navy;" and, to show that this was no political rub, he ends by observing upon the dignity and efficiency with which the Duke of Somerset performs his duties at the Admiralty.

Then followed Sir John Pakington, the late First Lord himself, so far agreeing with Mr. Bernal Osborne and disagreeing with Lord Clarence Paget, as to the Admiralty being the perfect machine that Noble Lord now finds it, while enjoying "the sweets of office." "And yet," says Sir John, "we had the Surveyor present at the Board, during my time, regularly once a-week." That may never have happened in Mr. Osborne's time, yet he was secretary to several First Lords, including Sir James Graham himself, and also Sir Charles Wood; but, when Sir John was First Lord, every question of shipbuilding, and even the small matter when a launch was to take place, was regularly before the Board. And yet, notwithstanding this, Sir John Pakington is of opinion, that the Comptroller of the Navy and the Accountant-General ought both to be members of the Board of Admiralty, with a voice in its deliberations, in order to render that Board efficient. Sir John Pakington's Board is not answerable for the rotten gun-boats, any more than is the present Board—the gun-boats belong to Sir Charles Wood's time; and the late Board of Admiralty had most certainly the honour and credit of commencing and well-nigh completing the great re-construction of the Navy that was recently found to be necessary from the neglect of their predecessors.

One would have imagined that in these circumstances, with every fact present in people's minds, Sir Charles Wood might have maintained a modest silence on the subject of Admiralty management. But no; he must needs set the House right, and dilate upon the incompetency of fifteen Members of the House of Commons to re-organise the department effectively. He considered himself and other former First Lords the most competent to deal with it. Of course they ought to be; but what does his own speech prove as to the competency of men who have been at the Admiralty? Lord Clarence Paget declared that the building of gun-boats with green timber was sanctioned by the Board. Sir Charles Wood denies it, and lets out that this general statement, made by the present Secretary of the Admiralty to the House, had been resolved, in private to himself, into very small dimensions, as applicable only to "one contractor," and "to a small extent"—that favoured contractor being Lord Clarence Paget's late partner, Mr. Green! Sir Charles then contradicted his own secretary, Mr. Osborne, as to what was the practice of the Board of Admiralty, and left his hearers vaguely to imagine that he had conducted matters in the same business-like way that his successor had done. But he did not venture to state that the Surveyor or Comptroller of the Navy, or the Accountant-General, had had any weekly opportunities of bringing business personally before their lordships. On the contrary, he tried to prove that these officers could not find time to attend Board meetings. He has evidently a liking for those *Submissions* in writing which Sir Baldwin Walker so frequently put forward,—representing the necessity for building more line-of-battle ships, and which Sir Charles Wood's Board so systematically negatived; the result being the deplorable want of screw-liners which Sir John Pakington discovered, necessitating the re-construction of the Navy, but which, before being half accomplished, has nearly exhausted the inadequate stock of seasoned timber in the dockyards, brought about by the same system of mismanagement. Sir Charles Wood thinks nothing of the time and waste of paper that would be saved, if he had seen Sir Baldwin Walker more, and received from him fewer Submissions. He disregards the inefficiency and blundering of his Admiralty administration, consequent upon this foolish system of writing and writing, without personal consultation with the Heads of Departments. He thinks only of the ease and rapidity with which he settled matters off-hand — that kind of fussiness that makes no real and effective progress, and which only accomplishes what had better been left undone. He has been at the Treasury, the Board of Control, and now he is at the India Board; and his first love is his last—the Admiralty beats them all, and he has even the boldness to say, is the "most efficient!" Here is certainly official bliss,—we fear, on the old foundation of official ignorance! Rotten gun-boats and batteries, and exhausted stores of timber, notwithstanding, Sir Charles Wood is of opinion that the Admiralty department is the most efficient under Government!

We think the House of Commons has now had evidence enough of the nature of the constitution of the Board of Admiralty. It is a fleeting Board of naval officers and civilians, who draw their respective salaries with invariable uniformity of practice, but conduct their other duties without the least regularity or order—apparently, too, giving so little attention to them, that even members of the same Board cannot give the same account of how the business is done. These discrepancies, however, between Sir Charles Wood's account and Mr. B. Osborne's, as to how often the Surveyor of the Navy was present at the Board, and the extent of the diversity of practice between Sir Charles's Board and that of Sir John Pakington, would be easily cleared up by a return of the number of Board meetings attended by the heads of departments, which have taken place for the last five or ten years. This return would probably show Mr. Bernal Osborne to be right, and that lamentably few opportunities were afforded Sir Baldwin Walker of bringing questions before their lordships during the time the Navy was so neglected and became so reduced. We already know how much Sir John Pakington was able to accomplish by the opposite practice, of having his principal officers face to face with the members of the Board. What was then done, from a common sense, and business-like view of how to conduct such important affairs, is really all that is required to be made a new rule of the Admiralty constitution. Let the Comptroller of shipbuilding and other principal officers have seats at the Board and a voice in its decisions, and the whole thing is accomplished. If, as Sir Charles Wood says, the Comptroller of the Navy and Accountant-General could not spare time to attend the Board meetings daily, the remedy is very simple. A Deputy should perform their less important and routine duties, which, however, would surely be reduced in amount by the greater dispatch of business that would be accomplished by the personal presence of these officers at the Board. Under such an arrangement one or two of the present Lords of the Admiralty could also be dispensed with; and so, such a beneficial arrangement need not even cost the country a penny in salaries. What it might save otherwise is more important. But we would not even advocate such an improvement in the constitution of the Board of Admiralty—as if that could remedy all the evils we have lately suffered from naval mismanagement and waste of public money—without at the same time saying that a Board of Construction for the building of our ships is also a manifest necessity,—even more important, perhaps, than the *Re-construction of the Board of Admiralty.*

An army so heterogeneous in its composition as that now assembled in and about Hong Kong, consisting of English, French, Bengalees, Sikhs, Madrassees, Lascars, and Chinese coolies, with "followers" (dire Indian word) of every caste, tribe, and hue, from Cape Comorin to the Himmaleh, and from the Red Sea to the Pacific, affords as pretty a variety of subjects of consideration as ever fell to the lot of the practiced army administrator, and which, no doubt, have been fully and fairly

Digitized by Google

weighed in all their probable bearings and contingencies.

Leaving on one side the troops and mere military material, as we did last week, we will resume the subject of stores—low in comparison, but not altogether unimportant. We will first consider what will most obviously be required for the various and rather incongruous nationalities we have collected under our standard, and we will then consider what prospect there may be of getting what is wanted where it is wanted.

There will be the scrupulous Brahmin, the salt of the earth, holding the rest of the world to be unclean; cooking chupatties within his tabooed circle, under extreme difficulties, requiring not merely flour, that most easily damaged of comestibles, but flower of a particular kind—crushed wheat. There will be the rice and curry consuming Madrassee, requiring some twenty or more articles of daily consumption, including tamarinds, cummin, and coriander seed, garlic, chillies, betel nut, ghee, and numerous other infinitesimal modicums of everything which grows under an Indian sun, but which will be rich and rare exotics in the north of China. There must be beef and pork, porter and rum, bread and biscuit, for the Britishers; pork and salted cabbage for the Chinese; flour or wheat, ghee and he-goats, for Bengalees; curry and salt-fish for the Madrassees; mutton and she-goats for the Sikhs.

Hindoo and Sikh will regard with amazement and disgust the beef-devouring Briton; the Mussulman will regard with abhorrence both Britons and Chinese for their pork-eating propensity, and, with pharasaical longing, their forbidden but seductive dram of liquid gehennum, tempting and wrong. The English will not be behindhand in turning up the nose of scorn at their neighbours' gastronomic peculiarities; and not without reason, when their olfactories are assailed with the flavour of that "stinking ghee," which makes the very atmosphere greasy, as, closely allied with garlic, it tenaciously clings to garments and to everything within reach of its noxious influence. The party only requires to complete its incompatibility, that our allies should add to the olla podrida their ancient diet of frogs and snails.

Frederick the Great, Marshal Saxe, Napoleon, Wellington, and the slow-going generals of the olden time were wont to study very carefully the composition of their armies with reference to the means of supply. They even looked upon military administration as a matter worthy of close application and study, and they scarcely considered it very much inferior to other questions of military efficiency. They even applied that stale old axiom, "that the strength of the whole is equal only to the strength of the weakest part," to the construction of military plans, and very slow coaches they were in consequence, and took longer in thinking about a campaign than Garibaldi would in winning it.

We have a propensity to be prudent as the old school, and impetuous as the modern one—but in the wrong places. We tried it on in the Crimea, with a splendid buccaneering raid, as unincumbered with baggage and supplies as Walker or Garibaldi could have been on a similar errand. Our impetuosity was rewarded with the most splendid success, till in an unhappy moment of inspiration we undertook to convert our filibustering exploit into regular war. The two things were incompatible, and we suffered the revenges that time always brings to those who linger on half-accomplished projects, when they change the conditions on which they had successfully been commenced.

Now, in the North of China, a filibustering raid might have been highly successful against a *fainéant* enemy who has never failed to run when time and opportunity favoured the manœuvre; and, if successful, war would not only have been brought rapidly to a conclusion, but it would also have saved an enormous expenditure in equipping the force at such a vast distance from the scene of operation, with everything which the British imagination, made morbid by Crimean experiences, fancies might by remote possibilities be wanted under every possible or impossible contingency. For such a raid the general should have been provided only with Europeans, Ghoorkas, and Chinese, who would have fed alike and fed on everything, who would not stand on ceremonious trifles, and who would, under difficulties, defer washing and praying for a week or two.

Brahmins, who make long prayers, who must wash themselves and their clothes daily, and who must cook in private, or starve, are not exactly adapted for a buccaneering exploit. Mussulmans are a little more pliable, with a prospect of loot and licence, and, with the help of sand, get over a good many ceremonial difficulties, though at best they would, except in the looting line, hardly be the men for Walker. We therefore assume that, in spite of its tempting facilities, a raid will not be attempted; that the war will be conducted in the old-fashioned, regular way, without any indecent haste or confusion,—the quartermaster-general's department in front, the cavalry on the flanks, the main body in open order, for coolness and air—the climate being warm and the country dusty—and the field-hospitals and commissariat in the rear, with well-loaded transport and ample depôts; every man with a full stomach and three days' rations in his haversack (the French in Algeria carry fifteen days' rations. (See *Vauchelle*).

But—(those horrid buts)—we must here remind an impatient British public—who will barely allow Garibaldi a week to beat 30,000 Neapolitans, take a province, and form a provisional government without any commissariat, with very few men or arms, and no artillery—we repeat, we must remind an impatient British public, that Hong Kong, where our forces are assembling, is 1200 miles from the Peiho; that Chusan, when it is taken, is 500 miles from the Peiho; that when the Gulf of Petcheli is reached, the squadron, owing to the shallowness of the gulf—nearly filled by the deposits of the Yellow River—must lie some six to nine miles from the shore, and that the shore, when arrived at, is a very muddy one. Leaving the expedition on the verge of the mud, we will accompany it no further for the present, but will request our readers to turn to "our special correspondent's" account of the descent, without cavalry, transport, or stores, on the fine hard beach with deep water at Kalamita Bay, and then fancy what, without much calmness and deliberation, will be the landing on the muddy shallow shores of the Gulf of Petcheli, with cavalry transport and all the munitions *de guerre et de bouche*, where there is nothing to be got nearer than Chusan, and where such a variety of comestibles will be required.

We must then remind our readers that the plains of Tartary are hot as Bengal in summer, and cold as Kamtschatka in winter; that after the middle of September, when the north-east monsoon has set strongly in, the Gulf of Petcheli is inaccessible from the south, and nearly all the water is blown out of it, and that a little later it is locked up in ice, and the expedition is cut off till the following spring from all communication with its depôts.

Not long since public attention was prominently engaged by a consideration of the question we have come to describe as the Social Evil. But the ventilation which the subject received was confined to the metropolis; and it was from the heart of London that Magdalens trooped forth at midnight to hear the unwonted voice of prayer, and find hands stretched out for their rescue. They came, we were told, in silks and velvets, in hats and feathers, bedizened with finery, and seeming rather to court notice than to shrink from the gaze. If the leaders of the movement would see the darkest side of the picture, they should go to the purlieus of our great camps—Aldershot, Shorncliffe, and the Curragh, where, in the highways and byways, in the lanes and ditches, they will meet the miserable outcasts who in their ruin are avenged, introducing into the camp all that demoralises an army—drunkenness, theft, desertion, and disease. From time immemorial, military discipline has been as powerless to meet the evil as the police in the Haymarket. Even that pink of martinets, the Duke of Alva, was obliged to wink at it; and history records that his troops were followed across Mount Cenis by Italian courtesans, who marched in regular battalions. Some are beginning to doubt the wisdom of that policy which discourages marriage in the Army. It is urged that married men are the best soldiers, the most regular in their habits, seldom in hospital, and, consequently, the least expense to the country. Although this may be true, the old tradition maintains its ground, and there can be no doubt it is correct in principle, however cruel and, in some respects, baneful in practice. One thing we know, that, whatever the discouragement, and in spite of pains and penalties, soldiers do and will marry. A generous impulse or genuine affection blinds them to all consequences, and young women, often of a superior station to their own, listen to their overtures, never reflecting that the position of a soldier is incompatible with the married state, and that he is unable to contribute to the maintenance of a wife. Marrying without permission, they are excluded from the little helps accorded to the fixed number wedded by authority—a degree of assistance which is itself so insignificant as to be valuable only to the extremest poverty. Those who are not so fortunate as to obtain this accommodation are obliged to take refuge in the lowest rookeries, which is all their means will admit of, the allowance to the married soldier for lodging, fire, and light, being only twopence per day. His wife has no certain employment but the twelfth share of the Company's washing, for which she receives about 2*s*. 5*d*. weekly, finding her own soap and fuel; and, as a soldier is liable to removal at a moment's notice, she has little opportunity of forming a connection independent of the regiment, even where resident labour has not monopolised the field. If the privileged number of married women are exposed to such distress, what must be the lot of those who marry without leave, who receive no assistance from authority, and are, as it were under an interdict, cut off from the regiment, and no way countenanced or recognised! A master hand has given us, in the story of "Bleak House," a fine delineation of the rough virtues of a soldier's wife; but who can the tale unfold of all the touching incidents of her career, of privations bravely endured, trials surmounted, and temptations overcome? The washing-tub is not to be made heroic, although the bride of a grenadier became Empress of Russia, and, in our own country, Nan Clarges gave her name to a fashionable street, and died a duchess. But the lowliest garb may cover sterling worth; and in no sphere of humble life will this be more frequently met than amongst the wives of our soldiers.

For this class public sympathy is now bespoken in a manner that claims our advocacy. The destitution to which they were exposed during the Crimean War, led to the formation at the time of an association for their relief, which, after accomplishing the object in view, was allowed to expire; but the distress entailed on the wives and families of soldiers by the dispatch of troops to India on the outbreak of the mutiny, again called it into being, and it has since become established in a permanent form, as an "Association for Improving the Condition of the Wives and Families of Soldiers and Sailors." The design is to extend relief by means of industrial employment, gifts of clothing, medical attendance, payment of lodgings, and the placing of children in asylums and industrial homes. The Association, which is under the patronage of Her Majesty, and is supported by His Royal Highness the General Commanding-in-Chief, and a number of distinguished officers, has its centre in Whitehall; but a number of branches extend its modest beneficence to our principal garrisons and military stations in every part of the kingdom. We are sorry to hear that its operations are restricted from want of funds; but an institution so truly national will not appeal in vain for support; and in making known its need, we feel that we have done what the case requires. If, indeed, sympathy can be awakened for the fallen, much more may it be claimed for the virtuous and deserving, who are bravely struggling with adversity and may perish through our neglect. In another place will be found an article in reference to the claims of an institution with a more special object, but there is no antagonism in the two associations, and to both we wish every success—and promise every assistance it is in our power to afford.

Photography Applied to Military Purposes.—A lecture was delivered at the United Service Institution, on Friday week afternoon, by Captain Donnelly, R.E., on photography and its application to military purposes. After tracing the chemical and scientific principles involved in the art, the gallant officer remarked that the first necessity in its application to military purposes was portability in the apparatus. This Captain Foot had effected by inventing a camera which could be folded up and put into a knapsack. All the necessary chemicals could be stowed away in a box and carried on a pack-saddle. Men belonging to the Sappers had executed some excellent photograhs in Asia Minor, on the boundary line between Turkey and Russia, and, during the verification of the railway surveys, on the Isthmus of Panama. Photography could be applied under difficult circumstances, such as a long and rapid journey, and during the movements of an army in the field. Photographs of a country gave truthful and accurate representations, and did more to give a correct idea of any particular position than the most elaborate description in words. It had been employed by Colonel Staunton, with admirable effect, in illustrating the report on a country, and might be of the greatest service to a general commanding an army in the field. At Chatham photography had been much used to show the different modes of forming bridges and other military works. Although not strictly a military work, he would call their attention to the application of photography to the reduction of maps in the Ordnance Survey Office. The largest scale employed was 10½ feet to the mile. This was reduced to scales of 25 inches and 6 inches to the mile, by photography, with admirable accuracy and despatch. There was a less scale than this, that of one inch to the mile. Here, however, photography was found to be too accurate, the reduced map being too much covered with details. They had, therefore, still to employ the old plan of the pentagraph for the last operation. By a method lately invented, they were able to transfer photographs at once to copper or zinc plates, and there was no doubt its application to military purposes would be much increased.

Sandown Fort.—What does the Government propose to do with Sandown Fort? Is it to be repaired, or are we to have new fortifications on the Isle of Wight? Its present condition is a disgrace to the country. The fort is sinking into a marais, and not safe to fire from. The guns are old and useless. Their carriages are more rotten than the rotten gunboats. The stores are in mouldy and rotten lofts. Not a gun-sponge that is not rotted, not a rammer-head that is not infected with the dry rot. The flannel bags for cartridges are full.

THE ARMY.

Royal Horse Guards. Ordered to move from Windsor to Aldershot.

4th. Dragoon Guards. Ordered to move from Brighton to Aldershot. On Tuesday night a telegraphic message was received from the Quartermaster-General's office by the commanding officer of the squadron at Shorncliffe to hold themselves in readiness to march on Friday (yesterday) morning to Aldershot. General Mansel inspected the squadron on Thursday morning at 10 a.m. The following was the strength of the squadron :—Captain Robertson in command, Captain M'Donnell, Lieutenant Royds, Cornet Merriott, 7 non-commissioned officers, 101 rank and file, 105 horses, 12 women, and 16 children.

5th Dragoon Guards. The officers of this distinguished regiment dined on Monday at the Trafalgar, Greenwich. The following were present :—C. M. Balders, Esq., H. E. Bevillo, Esq., Colonel Blackburne, J. Brymer, Esq., Captain Burnand, the Hon. Major Calthorpe, W. B. Coloni, Esq., N. Cowley, Esq., T. Duffield, Esq., Captain Ferguson, J. H. P. Fitz Patrick, Esq., C. Ford, Esq., Captain Garrard, Captain Goodman, C. A. D. Halford, Esq., Captain Hampton, Captain Hay, N. P. Hovenden, Esq., Major Inglis, C. Lee Mainwaring, Esq., Colonel Sir Thomas M'Mahon, Captain Montgomery, Lieut. J. C. Paulet, Esq., H. L. Payne, Esq., Captain Proctor, L. A. Richardson, Esq., General Sir James Scarlett, S. Colonel Scarlett, W. J. Scarlett, Esq., Captain Fitzmaurice Scott, Captain Swinfen, Captain Travers, General Sir Maxwell Wallace, A. Prime, Esq.

Royal Artillery.—The undermentioned officers of the Royal Artillery are to be posted as under :—Lieutenant-Colonel Ingletield to the 2nd Brigade, on major's pay; Second Captain Llnellyn to Major Crauford's battery, 13th Brigade, vice Law, who has been transferred to Captain Desborough's battery of that brigade ; Surgeon Blake, M.D., and Surgeon Guy, M.D., to the Depôt Brigade, for duty at Shoeburyness ; Surgeon Ward and Surgeon Fogo, M.D., to the Depôt Brigade, for duty at Woolwich ; Assistant-Surgeon Pollard to the 2nd Brigade, for duty at Woolwich ; Assistant-Surgeon Whitla and Assistant-Surgeon Storey to the 15th Brigade, for duty at Gosport ; Assistant-Surgeon Mackay, M.D., to the Depôt Brigade, for duty at Shoeburyness ; Assistant-Surgeon Rogers to the 9th Brigade, for duty at Corfu ; Assistant-Surgeon Bartlet, to the 3rd Brigade, for duty at Guernsey ; Assistant-Surgeon Adsetts, to the 2nd Brigade, for duty at Jersey ; Assistant-Surgeon Smythe, and Assistant-Surgeon Cowan, M.D., to the Depôt Brigade, for duty at Woolwich ; Assistant-Surgeon Veale, M.D., is posted to the 8th Brigade, and ordered to do duty at Devonport until further orders. His Royal Highness the General Commanding-in-Chief has appointed to the School of Gunnery at Shoeburyness Second Captain A. W. A. Ogilvie to be instructor in gunnery, vice Hay, appointed to the staff of the expeditionary force to China ; and Second Captain W. M. Wolfe, to be carbine instructor, vice Brown, who resigns the appointment. The undermentioned veterinary surgeons are to hold themselves in readiness to proceed to India :—Veterinary Surgeons Dorofield, Tatham, Baldock, and Cheesman, to Bengal ; Veterinary Surgeon Lambert, to Bombay ; and Veterinary Surgeon Callow, to Madras. Lieutenant Dadson is transferred from the 14th to the Depôt Brigade, vice Thomas.

The 10th and 15th Brigades of the Royal Artillery, stationed at Portsmouth and Gosport, have been officially inspected by Major-General Bloomfield. These brigades give a grand total of 1402 officers, non-commissioned officers, and men ; but, according to their present "morning state reports," they only give of the same ranks, as "effective for guard and garrison duties," 505. The remaining strength of the brigades is shown in the returns as being employed as officers' servants, recruits at drill, acting bombardiers, &c.

1st Royals. Captain Watts (1st battalion) has received orders to join the draft from his regiment about to proceed to India.

Royal Engineers.—In reference to Section XVII., Paragraphs 1, 4, 5, of the Royal Engineer Code of Regulations, Mr. Secretary Herbert has approved of the following revised rules for admission to the civil branch of the Royal Engineer department on the establishment, sanctioned by Her Majesty's Warrant of 28th April, 1858, and also for temporary clerks of works and foremen of works :—For clerks of works : 1. A candidate must be not less than 21, nor more then 30 years of age ; 2. He must be in sound health ; 3. He must have served as a temporary clerk of works or foreman in the engineer department for at least six months ; 4. He must be certified a fit candidate by a district-commanding Royal Engineer and by the inspector-general of fortifications ; 5. He must express his readiness to serve at any station at home or abroad ; 6. He must pass an examination before the Civil Service Commissioners in the following subjects :—I. Writing from dictation ; II. English composition ; III. Arithmetic, including vulgar and decimal fractions ; IV. Mensuration of plane surfaces and simple solids ; V. Practical geometry ; VI. Designs of simple structures of masonry, brick, or wood, illustrated by plans, sections, and elevations ; VII. Working drawings of particular parts of buildings ; VIII. Measurement of builders' work ; IX. Estimating builders' work ; X. Artificers' work—the nature of tools required, the proportion of labour and materials required for any particular kind of work ; XI. Analysis of prices ; XII. Modes of Judging of the quality of building materials, calculation of the sections of timber and metals to resist transverse and longitudinal strains ; 7. Applications for permanent employment will only be received from those persons already in the temporary employment of the department, and must be addressed, through the officers under whom they are serving, to the Secretary of State for War. For temporary clerks of works and foremen ; 8. A candidate must be between 20 and 50 years of age ; 9. He must produce two certificates of character and two certificates of professional ability ; 10. He must be in sound health ; 11. He must be reported by a district commanding engineer to be a fit person and to possess the following qualifications—a good knowledge of builders' work, and capacity to execute working drawings, and some knowledge of the measurement of artificers' work ; 12. If appointed temporary foreman of woks, his pay will be 6*s.* a-day ; 13. If appointed temporary clerk of works, his pay will be 7*s.* 6*d.* a-day ; 14. He will not be entitled to lodging or any other allowance ; 15. He will be entitled before discontinuance (if engaged for an indefinite period) to notice on the following scale—For service under one year, a fortnight ; of one year and under two, one month ; two years and under three, two months ; three years and upwards, three months—if engaged for the superintendence of a particular work, the engagement will cease on the completion of the work ; 16. He will have no claim to superannuation ; 17. He will be entitled to travelling expenses to and from the place where employed ; 18. Applications for employment to be addressed to the Secretary of State for War under cover to the Under-Secretary of State for War, War-Office, London, S.W. Clerks in the Royal Engineer department ; 19. The appointment of clerks will be governed by the existing rules for clerks at out-stations. All applications for appointments must be made as provided in paragraph 18.

Captain J. E. Cornes, R.E., has been ordered to proceed from Brompton Barracks to Aldershot Camp, to join the 34th Company, of which he is to take the command. Lieutenant J. H. Wilson, R.E., has been selected to proceed to Plymouth for service with the Royal Engineers at that station.

Captain J. E. Cornes proceeds from head-quarters to Aldershot Camp, to take the command of the 35th Company of Royal Engineers ; and Lieutenant J. H. Wilson to Plymouth.

Coldstream Guards. The 1st battalion, under Colonel Newton, left the Wellington Barracks for Aldershot, where they will remain for a month.

6th Regiment. Lieutenant W. Smith has arrived from India in the King Philip troop-ship.

9th Regiment. Lieutenant C. T. Coote, of the 1st battalion, died on the 3rd of June, on his passage from Corfu to Malta, much regretted by his brother officers. Ensign Fenton succeeds to the lieutenancy without purchase.

11th Regiment. The 2nd battalion of the 11th (North Devon) Regiment left Aldershot camp yesterday for Portsmouth, where they arrived about mid-day, and proceeded at once to the quarters assigned to them.

12th Regiment. 120 men of the 1st battalion have been sent from Sydney to New Zealand to aid in quelling the insurrection of the natives.

19th Regiment. Captain F. Davis, Lieutenant C. J. Backas, Ensign C. C. B. Tribe, and Ensign H. Stokes, are on leave from the depôt at Chatham until required for embarkation for India.

20th Regiment. 2nd battalion, Curragh Camp. On the 16th ult., the sergeants of this battalion assembled in their mess-room for the purpose of presenting to Colour-Sergeant Robert Watts a handsome silver watch as a token of their esteem on his discharge from the Service. Sergeant-Major Rule was deputed to present the watch, and in a very suitable address pointed out to the sergeants of the battalion that, during a period of twenty-one years Colour-Sergeant Watts had never been entered for any offence, that he had been 17 years a sergeant (seven of which a colour-sergeant) and is in possession of the medal for long service and good conduct, with the gratuity (15*l.*). The watch was then handed to him, and Colour-Sergeant Watts replied in fitting terms.

21st Fusiliers. A sergeant of the 2nd battalion committed suicide last Saturday at Aldershot by shooting himself.

40th Regiment. Two companies from Melbourne, and two from Tasmania are ordered to New Zealand to quell the émeute. They are under the command of Major Nelson, an experienced officer who served with distinction in India.

42nd Highlanders. Ensign Dakin has arrived from India in the King Philip troop-ship.

45th Regiment. This corps is arrived at Aldershot.

47th Regiment. A detachment marched from Dover to Shorncliffe on Tuesday last for the purpose of completing a course of rifle-practice. The detachment was under the command of Captain Bloomfield ; Lieutenants Newman and King also marched with the detachment. The strength was as follows :—13 non-commissioned officers, and 92 rank and file.

Royal Marine Light Infantry.—The annual inspection of the Portsmouth Division of Royal Marine Light Infantry and Artillery took place this week by Major-General S. R. Wesley, the Deputy-Adjutant-General of the corps inspecting the Royal Marine Artillery at their head-quarters, Cumberland Fort, near Portsmouth. At the conclusion of the proceedings on Wednesday, Major-General Wesley addressing Colonel Andersen, the Commandant of the division, said, "From the very minute inspection I have made of the division under your command, both in its interior arrangements in all the departments and in its discipline in the field, I have much pleasure in complimenting you on its high state of efficiency, which is alike creditable to yourself, your officers, and non-commissioned officers, and of which I shall make a most favourable report to the Lords Commissioners of the Admiralty. The drill this afternoon has been as perfect as I ever witnessed, and it has given me great pleasure to observe the steadiness and precision of both officers and men, and I hope they will always make as good an appearance at inspection as they have done this day."

The Royal Marine Artillery, stationed at Fort Cumberland, near Portsmouth, mustering 600 men, was inspected by General Wesley on Thursday and Friday last. On the first-named day, the general inspected the men and their kits, and put them through battalion drill. Yesterday the corps made excellent practice with every description of ordnance and rocket, the Armstrong gun excepted ; no ammunition for the last-named gun having been served out.

A detachment of Royal Marine Light Infantry, consisting of two sergeants, two corporals, one bugler, and 43 privates, under the command of First Lieutenant Macey, have embarked at Portsmouth on board Her Majesty's ship Blenheim.

A board of three field officers, comprising Colonel Fraser, R.M.L.I., President, and Lieut.-Colonels Maxwell and Spalding, R.M.L.I., are sitting at the Cambridge Baracks, Portsmouth, for the examination and passing of military officers for superior rank.

60th Rifles. The officers of the 60th Rifles held their Annual Banquet at the London Tavern on Tuesday last. The following officers were present on the occasion :—Major-General Viscount Melville, K.C.B. ; the Hon. George Upton, C.B. ; Colonels Sir John Jones, K.C.B., Tempest, Maughan, and Mark Wood ; Lieutenant-Colonels Muter, Trevelyan, and Mure ; Majors Greville, Sotheby, and Churchill ; Captains Deedes, Douglas Phelips, Mitchell, Love, Everard, Rose, Phillips, and King Harman, Esq. ; Drs. Boyes and Innes.

71st Regiment. Lieutenant C. J. Howard has arrived from India in the King Philip troop-ship.

75th Regiment. Lieutenant F. F. Daniell and Ensign A. F. Leatham, are on leave from the depôt at Chatham until required for embarkation for India.

81st Regiment. Ensign H. Maturin and Ensign R. J. M'Donnell are on leave from the depôt at Chatham until required for embarkation for India.

91st Regiment. Ensigns R. Wesley, T. G. Elrington, and H. H. Roberts are on leave from the depôt at Chatham until required for embarkation for India.

8th Depôt Battalion. On Wednesday, the 30th ultimo, Lieut.-Gen. Sir J. F. Love, accompanied by his aide-de-camp, Major Mayne, arrived in this garrison. On the day following he made his inspection of the battalion, under the command of Colonel Raymond. Owing to the very unfavourable state of the weather, few manœuvres were gone through—the rain pouring down in torrents ; what the men did do, however, gave the General an opportunity of judging what they could do had the weather been fine. He then proceeded to examine the books, &c., and minutely inspected the huts, school, hospital, &c., with all of which he expressed himself highly pleased. This was gratifying to Colonel Raymond, who all must allow to be most zealous and indefatigable in working up the battalion to its present state of high discipline and efficiency.

The following General Order has been promulgated :—"Horse Guards, June 12. "The following additional Regulations, consequent on the reduction of the prices of Commissions in the cavalry having been approved by Her Majesty, are promulgated to the Army :—In cases where an officer of the cavalry, who was in the service previous to the 31st of January, 1860, would, on exchanging from cavalry to full or half pay of infantry, have been entitled, under the Regulations then existing, to receive the difference between the cavalry commission which he then held, and infantry according to the rates fixed for the several ranks, he will, if the exchange should be permitted, be allowed to receive the difference from the reserve fund. Captains of cavalry who have not had the benefit of the new Regulations in the purchase of any previous step, will only be required, on purchasing a majority, to pay 1350*l.*, and the additional 50*l.* will, in those cases, be paid to the retiring officer from the reserve fund. Those captains, however, who have purchased any of their previous steps under the new Regulations, will be required to pay the regulated price of 1400*l.* for the majority.—By order of His Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General."

His Royal Highness the Duke of Cambridge, General Commanding-in-Chief, held a levee on Thursday afternoon at the Horse Guards. Above 100 officers attended on the occasion.

The White Star has been chartered by the Government for the conveyance of troops and stores to China.

The annual dinner of the officers who served before Delhi in 1857, took place at the Albion on Saturday last. The following were present : — Major-General Sir Archdale Wilson, Bart., K.C.B. ; Sir J. Metcalfe, Bart. Colonels—W. Jones, C.B. ; E. H. Greathed, C.B. ; Sir John Jones, K.C.B. ; H. Tombs, C.B. ; K. Young, C.B. ; H. Daly, C.B. ; H. W. Norman, C.B. ; Deputy Inspector-General of Hospitals—J. H. Ker Innes, C.B. Majors—J. C. Day ; D. Kemp ; A. Light ; J. R. Turnbull ; W. Wilson ; J. G. Medley. Captains—F. G. S. Curtis ; A. J. Jones ; H. G. Deedes ; G. Baillie ; F. W. Macleod ; J. Goldie ; J. C. Innes. Lieutenants—B. Cuppage ; P. J. Curtis ; J. Evans, and R. F. Thonger.

Major-General Bloomfield, accompanied by his Aide-de-Camp, Major Teesdale, C.B., has arrived at Portsmouth, to inspect the artillery and the armaments of the south-western district.

Edward Ireson, an incorrigible fellow, serving as a private in Captain Lewis's company Royal Marine Light Infantry, at Woolwich, having been convicted by a garrison court-martial of absenting himself from duty, underwent the punishment of the lash, at the rear of the barrack-yard, in the presence of the Colonel-Commandant and the whole of the disposable officers and duty men. During the last two years the prisoner has passed his time in a continual defiance of orders, and has spent the whole of that period in absence, imprisonment, and hospital. In August last he underwent a similar punishment to the present — namely 50 lashes, since which no case of corporal punishment has occurred in the division, and on the day of his discharge from the infirmary he absconded from duty, and did not make his appearance in barracks for upwards of a month, when he was brought back by the police. He has been tried by courts-martial on three separate occasions for the crime of being absent and not being able to account for his kit, and on the day of his liberation he has invariably repeated the crime. On the last occasion, having been gazetted in the *Hue and Cry*, he was picked up by the police in one of the disreputable lodging-houses which abound in the lower part of Woolwich, and on being brought back to barracks he vowed "he would do no more soldiering." He bore the punishment without evincing the slightest sensation of pain, and after the last stroke of the cat had been inflicted, he carelessly cast his shirt across his shoulders, and marched erect to the infirmary, accompanied by an escort. On leaving the infirmary, he will be imprisoned 112 days in one of Her Majesty's gaols, and most probably dismissed the Service with a blank certificate.

A general court-martial is ordered to assemble at Chatham for the trial of Captain H. G. Savage on several charges. Colonel Jervis of the 1st depôt battalion is president.

Digitized by Google

A circular has been issued, by order of the Duke of Cambridge, to the officers in command of infantry at this garrison, in which His Royal Highness reminds commanding officers that when the dress and appointments of the flank companies of infantry were assimilated to those of the remainder of the corps, it was intended to abolish all distinction between companies, and that all of them should be as nearly alike as possible in their composition. With this view it is the desire of His Royal Highness the General Commanding-in-Chief that no selection of men should be made for particular companies. Commanding officers are to exercise their discretion in placing such companies on the flanks as they may from time to time deem most expedient for the service.

The arrangements for the Great French Musical Festival of the Orphéonistes at the Crystal Palace rapidly approach completion. Mons. Delaporte, and his little army of inspectors, have returned from their tour through the provinces of France, and the numbers from each society who will take part in the Festival are now exactly reported. The band of the Guides will accompany them.

THE COMMISSARIAT AT CHATHAM.—Numerous complaints have recently been made respecting the inferior quality of the meat lately supplied to the troops at Chatham garrison by the contractors employed for that purpose, and this, notwithstanding the vigilance of the officers employed to inspect the meat served out for the men. From information on which we can rely we learn that scarcely a day passes but what either large or small quantities of meat are rejected by the board of officers, whose duty it is to see that nothing but meat of prime quality is sent into the garrison for the troops; and only one day last week a large quantity of beef aud mutton, amounting, we are informed, to several hundredweight, which the contractors had attempted to send in, was rejected as being altogether unfitted for human food. In spite of the care taken by the quartermasters, whose especial duty it is to attend and inspect the quality and condition of the meat supplied each morning, meat of an inferior kind will find its way into the barracks, the quartermasters, who cannot be expected to be well versed on the subject, being as frequently as not deceived. To remedy this it has been suggested that one or two men, who have been butchers, should be selected from among the troops and placed at the disposal of the quartermasters, in order that their experience might detect any meat of an inferor quality. This plan has been tried for some time past in the Royal Engineers, as well as some other corps, with the most satisfactory results. It is also proposed to place greater powers in the hands of the quartermasters, who under the present system are often prevented rejecting unwholesome meat from the fear of having their decision appealed against by the contractors, in which case the quartermasters may expect a reprimand. Considering the high price paid by Government for the meat there is no reason why any but the very best description should be supplied to the troops.

VICTORIA CROSS GALLERY.—A very interesting subject has recently been painted by Mr. Desanges, and added to the Victoria Cross Gallery at the Egyptian Hall, representing a desperate affray on the roof of a house at Khur Kowda, near Delhi, during Major Hodson's expedition to Rhotuk. Major Hodson and some followers, among whom are the two gallant nephews of Lord Gough, have dislodged a party of rebels from an upper chamber by setting it on fire. In the encounter Lieutenant Hugh Gough, 1st Bengal European Light Cavalry, has received a wound and has fallen. A sowar is standing over him with raised tulwar, and Major Charles Gough, of the Guide Corps, is seen rushing to his brother's rescue. The fact of both brothers having gained the Victoria Cross increases the interest of the picture, which has been painted from the description given to the artist by his gallant sitter, Major Gough, V.C., himself.

SHORNCLIFFE CAMP.

On Tuesday morning, the 12th inst., nine detachments of the Royal Antrim Militia Artillery, under the command of Captain Adair, and three detachments of the Coast Defence Brigade Royal Artillery, under the command of Captain Sweeney, R.A., took up their positions at Sandgate Castle and Nos. 4, 5, and 6 Martello Towers, for the purpose of going through a course of ball and shell practice. The detachments arrived about 9 a.m., and commenced practice at 10 a.m. Lieut.-General Mansel, Colonel Cuppage, R.A., commanding the Royal Artillery, Dover, Colonel, the Hon. Devereux, commanding the Royal Artillery, Shorncliffe, Colonel Burbury, Assistant Adjutant-General, Majors Gamble and Forster, and a number of officers from Shorncliffe, in spite of the inclemency of the weather, were in attendance, and were much interested in the firing. Ten rounds of solid shot were fired from each gun, and also a number of shells. The range from Sandgate Castle was about 1390 yards, whilst from No. 4, 5, and 6 Martello Towers the range was about 1750 yards. The firing was very accurate, the targets, consisting of sugar hogsheads, being struck several times, in one case the small flag-staff being shot away, the gun being laid by a corporal in the coast defence brigade. After conclusion of the practice Lieutenant-General Mansel expressed the great satisfaction he felt at the accurate firing, adding it was magnificent, and could not be exceeded. On Thursday the 14th, detachments of the Royal Antrim and the Coast Brigade practised from Nos. 1, 2 and 3 Martello Towers, and made excellent practice the range being 2,150 yards; this is the first time that guns have been fired from these towers for a very considerable period, very nearly forty years.

COLCHESTER CAMP.

A correspondent writes:—"The abolition of corporal punishment for desertion has had the most beneficial effect upon the troops in this camp, the number of offenders being now very small indeed. At the last exhibition of this kind several of the young recruits fainted away; and it is well known that under the old system so disgusted were large bodies of troops at the frequency of those demoralising scenes, that plans were deliberately framed for the desertion of almost entire sections of regiments at a time. The removal of such an objectionable mode of punishment, and the inducements held out to the men, have resulted in a better state of things; and at no previous period were the Indian depôts in finer condition than at present. Subjoined is the effective strength of each depôt in this camp:—9th battalion—1st Royals, 205 rank and file; 6th, 205; 54th, 196; 56th, 220; 66th, 122; 88th, 277. 10th battalion—5th, 453; 34th, 233; 37th, 225; 38th, 233; 44th, 224; 97th, 252. Total, 2845 rank and file, 86 officers, 202 women, 257 children. Grand total, 3390. The Rev. E. L. Walsh, who for three years has most efficiently discharged the duties of chaplain to the forces in Colchester camp, is shortly to be removed to Parkhurst.

The under-mentioned officers, who are about to proceed to India with drafts to join their service companies, have leave of absence from their regiments until the end of the month, unless earlier recalled for embarkation:—Ensign Ormond and Lieutenant Shegog of the 1st battalion 5th Fusiliers; Ensign Collis, 1st battalion 6th Foot; Ensign Watts, 34th; Brevet Lieut.-Colonel Heaton, Lieutenant Mason, Ensign King, and Ensign Holton, 37th; Ensign Bramhead, 38th Regiment; Captain Robin, 54th; Captain Eccles, 56th; Brevet-Major Gore, and Ensign Cuthbertson, 88th; and Lieutenant Thompson, 97th.

On Wednesday the whole of the troops forming the two depôt battalions were for the first time marched into the country upon what is termed a "time march." The men were formed into four distinct columns, and left by different routes, the rendezvous being an extensive common called Bergholt Heath, which was reached by all parties simultaneously, and a general review then took place.

The Army Gazette.

WAR OFFICE, PALL MALL, JUNE 12.

6th Regiment of Dragoon Guards—Lieut. William Gair to be Adjutant, vice Lieut. Weatherley, who resigns the Adjutancy only.

2nd Dragoons—Ensign William Seaman Thomson, from the 79th Foot, to be Cornet, vice Philp, promoted.

3rd Light Dragoons—Brevet-Col. Stephen John Hill, from half-pay 2nd West India Regiment, to be Lieut.-Col., vice Brevet-Col. Walter Unett, who exchanges, receiving the difference between Infantry and Cavalry; Major the Hon. Horace Manners Monckton to be Lieut.-Col. by purchase, vice Hill, who retires; Captain Richard Michael Williams to be Major, by purchase, vice the Hon. H. M. Monckton; Lieut.-John Unett to be Captain, by purchase, vice Williams; Cornet Edward Arthur Gore to be Lieut., by purchase, vice John Unett.

Scots Fusilier Guards—Lieut. and Capt. Archibald Campbell Campbell to be Capt. and Lieut.-Col., by purchase, vice Mure, who retires; Ensign and Lieut. Windsor Charles Carey Elwes to be Lieut. and Capt., by purchase, vice Archibald Campbell Campbell; Ensign the Hon. George Grimston Craven, from the 26th Foot, to be Ensign and Lieut., by purchase, vice Elwes.

1st Regiment of Foot—Arthur Clark, Gent., to be Ensign, by purchase, vice Farrell, promoted.

2nd Foot—Captain George Michael Keane, from half-pay, Unattached to be Captain, vice Brevet-Colonel E. S. Smyth, promoted, without purchase, to an Unattached Majority; Lieutenant George Pomeroy Colley, to be Captain, by purchase, vice Keane, who retires; Ensign Robert Alexander Crawford, to be Lieutenant, by purchase, vice Colley; Standish Barry, Gent., to be Ensign, by purchase, vice Laurent, promoted; Quartermaster George Blurton, from the 39th Foot, to be Paymaster, vice Nicolls, appointed to a depôt battalion.

4th Foot.—Edgar Montagu Kemp, Gent., to be Ensign, by purchase, vice Hepburn, appointed to the 9th Light Dragoons; Lieutenant Oswald Robert Middleton, to be Adjutant, vice Brockman, who resigns the Adjutancy only.

5th Foot—Albert Cecil Robert Drewe, Gent., to be Ensign, by purchase, vice Wadling, promoted.

7th Foot—Ensign and Adjutant Joseph Smith, to have the rank of Lieutenant; Ensign John Graydon Smith, to be Lieutenant, by purchase, vice Elwes, who retires; Lieutenant Henry Alexander Little, to be Adjutant, vice Lewis, who resigns the Adjutancy only.

12th Foot—George Henry Bacchus, Gent., to be Ensign by purchase, vice Dawson, promoted.

14th Foot—Aubrey Lisle Patton, Gent., to be Ensign, by purchase, vice Johnson, promoted.

15th Foot—Albert Edward Hamilton Smyth, Gent., to be Ensign, by purchase, vice Hayne, promoted.

17th Foot—Ensign Edward Jackson Harris to be Lieutenant by purchase, vice Elgin, whose promotion by purchase, as stated in the *Gazette* of the 25th of May 1860, has been cancelled.

20th Foot—Ensign George R. Gibbs to be Lieutenant without purchase, vice Horn, deceased.

22nd Foot—Captain Henry Edward Watson, from the Ceylon Rifle Regiment, to be Captain, vice Trydell, who exchanges.

25th Foot—Lieutenant Henry Theodore Duchesnay, from the 100th Foot, to be Lieutenant, vice Johnston, who exchanges.

26th Foot—Lieutenant George Edmund Phipps Trent to be Captain, by purchase, vice Elderton, who retires; Ensign Charles Henry Wills to be Lieutenant by purchase, vice Trent; Simeon Harrison Hardy, Gent., to be Ensign, by purchase, vice Wills.

27th Foot—Cecil John Foot, Gent., to be Ensign, by purchase, in succession to Lieutenant Cooper, promoted, without purchase, in the the 25th Foot.

29th Foot—Major Edward Henry Westropp to be Lieut.-Colonel, by purchase, vice Wheeler, who retires; Captain John Mackenzie Lyle to be Major, by purchase, vice Westropp; Lieutenant Thomas Pattison Wood to be Captain, by purchase, vice Lyle; Ensign Howell Davis to be Lieutenant, by purchase, vice Wood: Martin Charles Selwyn Tupper, Gent., to be Ensign, by purchase, vice Davis.

30th Foot—Ensign Richard Nagle to be Lieutenant, by purchase, vice the Hon. Leopold William Henry Powys, who retires; James Thom, Gent., to be Ensign, by purchase, vice Pelham, promoted.

33rd Foot—Edwin Sandys Wason, Gent., to be Ensign, by purchase, vice Grant, promoted.

44th Foot—Ensign William Henry Overton, from the 5th Foot, to be Ensign.

48th Foot—Lieutenant William Lamb Barr, from the 53rd Foot, to be Lieutenant, vice Hall, who exchanges.

53rd Foot—Lieutenant Thomas Hall, from the 48th Foot, to be Lieutenant, vice Barr, who exchanges.

71st Foot—Arthur Willoughby Spens, Gent., to be Ensign, by purchase, vice Allan, promoted.

80th Foot—Edmond Richard Purcell, Gent., to be Ensign, by purchase, vice Harrison, promoted.

81st Foot—Halkett Francis Jackson, Gent., to be Ensign, by purchase, in succession to Lieutenant Wilkinson, promoted without purchase, in the 25th Foot.

88th Foot—Brevet-Major Benjamin Bunbury Mauleverer to be Major, by purchase, vice Brevet-Lieut.-Colonel the Hon. J. J. Bourke, promoted, by purchase, to an Unattached Lieut.-Colonelcy; Lieutenant Robert Vernor to be Captain, by purchase, vice Mauleverer; Ensign William Hatfield to be Lieutenant, by purchase, vice Vernor.

97th Foot—Ensign Robert Lefroy to be Lieutenant, by purchase, vice Cooper, who retires; Ensign Thomas Evans Stuart to be Lieutenant by purchase, vice Parker, who retires; Ensign William Patric Oliphant Boulderson, from the 41st Foot, to be Ensign, vice Lefroy.

100th Foot—Lieutenant Fowell Buxton Johnston, from the 25th Foot, to be Lieutenant, vice Duchesnay, who exchanges.

3rd West India Regiment—The appointment of John Robert Mather, Gent., to an Ensigncy, by purchase, as stated in the *Gazette* of the 25th of May, has been cancelled.

Ceylon Rifle Regiment—Captain John Frederick Trydell, from the 22nd Foot, to be Captain, vice Watson, who exchanges.

Royal Canadian Rifle Regiment—Lieutenant Alexander Moore Armstrong to be Captain, by purchase, vice Taylor, who retires; Ensign Frederick John Atkinson Dunn to be Lieutenant, by purchase, vice Armstrong.

DEPOT BATTALION.

Brevet-Major Oliver Nicolls from Paymaster of the 2nd Foot, to be Paymaster, vice Taylor, deceased.

UNATTACHED.

Major and Brevet-Lieut.-Col. the Hon. John Jocelyn Bourke, from the 88th Foot, to be Lieut.-Col., by purchase.

PURVEYOR'S DEPARTMENT.

The commission of Purveyor John Macfarlane to be antedated to the 16th of January, 1860.

BREVET.

The commission as Brevet-Lieut.-Col. of Brevet-Lieut.-Col. David Scott Dodgson, 30th Bengal Native Infantry, to be antedated to the 20th of July, 1858.

Capt. George Michael Keane, 2nd Foot, to be Major in the Army.

Brevet-Major George Michael Keane, 2nd Foot, to be Lieut.-Col. in the Army.

Capt. William Thomas Johnson, 6th Bombay Native Infantry, to be Major in the Army.

Paymaster John Henry King, 2nd Dragoons, to have the honorary rank of Capt., under the Royal Warrant of the 27th of January, 1860.

Memorandum—Lieut.-Col. Frederick William Haultain, upon half-pay of the Royal Artillery, has been permitted to retire from the service by the sale of his commission, he being about to become a settler in Canada.

WAR OFFICE, PALL MALL, JUNE 15.

8th Regiment of Foot—Major-General Eaton Monins to be Colonel, vice Lieutenant-General Roderick Macneil, removed to 78th Regiment.

78th Regiment of Foot—Lieutenant-General Roderick Macneil, from the 8th Foot, to be Colonel, vice Lieutenant-General Sir William Chalmers, C.B., deceased.

7th Regiment of Dragoon Guards—Lieutenant William Digby Wentworth to be Captain, by purchase, vice Welstead, who retires; Cornet Clavering Redman to be Lieutenant, by purchase, vice Wentworth.

7th Light Dragoons—Cornet Herbert Owen Johnes to be Lieutenant, by purchase, vice the Honourable Caryl Craven Molyneux, promoted.

18th Light Dragoons—Cornet Townley Patten Hume Macartney Filgate to be Lieutenant, by purchase, vice Harris, who retires.

Royal Regiment of Artillery—Lieutenant Leonard Griffiths, on the Supernumerary List, to be Second Captain.

Coast Brigade of Artillery—Lieutenant William Crawford to be Quartermaster, vice Anderson, who resigns the Quartermastership only.

Royal Engineers—Second Captain Charles Elwin Harvey to be Adjutant, vice Gordon, who resigns the Adjutancy only.

Coldstream Guards—Lieutenant and Captain the Honourable William Henry A. Fielding to be Captain and Lieutenant-Colonel, by purchase, vice George, Lord Bingham, who retires; Ensign and Lieutenant William Wynne to be Lieutenant and Captain, by purchase, vice the Honourable W. H. A. Fielding; Arthur Wilbraham; Gent., to be Ensign and Lieutenant, by purchase, vice Wynne.

Scots Fusilier Guards—Lieutenant and Captain Charles George Tottenham to be Captain and Lieutenant-Colonel by purchase, vice Haygarth, who retires: Ensign and Lieutenant Henry Hardinge Denne Stracey to be Lieutenant and Captain, by purchase, vice Tottenham; Charles Arthur Wynne, Gent., to be Ensign and Lieutenant, by purchase, vice Stracey.

8th Regiment of Foot—Captain Robert Gordon Sanders Mason, from the 51st Foot, to be Captain, vice Souter, who exchanges.

16th Foot—Ensign Currer Fothergill Busfeild to be Lieutenant, by purchase, vice Whitlam, who retires.

17th Foot—Lieutenant William Robinson to be Captain, by purchase, vice Langford, who retires; Ensign Henry Grey MacGregor to be Lieutenant, by purchase, vice Robinson.

18th Foot—John Bradley, Gent., to be Ensign, by purchase, vice Talbot, who retires.

19th Foot—Edward Turner, Gent., to be Ensign, by purchase, vice Williams, promoted.

25th Foot—Captain Stanley John Lowe, from the 81st Foot, to be Captain, vice Magrath, who exchanges; John Ireland Dobson, Gent., to be Ensign, by purchase; Elliott Christie Charles Farnall, Gent., to be Ensign, by purchase, vice Vivian, promoted.

27th Foot—Surgeon George Peacocke, M.D., from the Staff, to be Surgeon, vice Todd, deceased.

34th Foot—Charles Albert Leslie Attila French, Gent., to be Ensign, by purchase, vice Walker, promoted.

51st Foot—Captain Thomas George Souter, from the 8th Foot, to be Captain, vice Mason, who exchanges.

59th Foot—Lieutenant George Joy to be Captain, by purchase, vice King, who retires; Ensign Gerald FitzGibbon to be Lieutenant, by purchase, vice Joy; Ensign Arthur William Ball, from the 11th Foot, to be Ensign, vice FitzGibbon.

60th Foot—Lieutenant Llewellyn Edmund Traherne has been permitted to retire from the Service by the sale of his Commission; the Honourable Ralph Abercromby to be Ensign, by purchase, vice Steward, who retires.

70th Foot—Assistant-Surgeon Thomas Hession, from the Staff, to be Assistant-Surgeon, vice Rogers, appointed to the Staff.

79th Foot—Walter Douglas Somerset Campbell, Gent., to be Ensign, by purchase, vice Thomson, appointed to the 2nd Dragoons.

81st Foot—Captain Frederick Augustus Magrath, from the 25th Foot, to be Captain, vice Lowe, who exchanges.

83rd Foot—Lieutenant William Minbear to be Captain, by purchase, vice Gandy, who retires.

84th Foot—Ensign Norcliffe Gilpin, from the 87th Foot to be Ensign, vice Simpson, promoted.

94th Foot—Lieutenant Arthur Charles Elliot, to be Captain, by purchase, vice Tod, who retires; Ensign Joseph Brabazon Pilkington to be Lieutenant, by purchase, vice Elliot.

100th Foot—Lieutenant Richard Lane Bayliff to be Captain, by purchase, vice Swift, who retires; Ensign John Gibbs Ridout to be Lieutenant, by purchase, vice Bayliff.

3rd West India Regiment—John Lever, Gent., to be Ensign, by purchase, vice Clifton, promoted.

Gold Coast Artillery Corps—George Kerr Ross, Gent., to be Ensign, without purchase, vice Horner, promoted.

STAFF.

Major-General Sir James Hope Grant, K.C.B., having the local rank of Lieutenant-General in China, to be Commander of the Forces serving in China.

COMMISSARIAT DEPARTMENT.

Commissariat Clerk Herbert Chamberlayne Smith to be Deputy Assistant-Commissary-General; Commissariat Clerk James Hall to be Deputy Assistant-Commissary-General.

HOSPITAL STAFF.

Surgeon-Major John Atkins Davis, retired upon half-pay Royal Artillery, to have the honorary rank of Deputy-Inspector-General of Hospitals, in accordance with the Royal Warrant of 1st October, 1858.

Assistant-Surgeon Thomas John Murphy, from the 60th Foot, to be Assistant-Surgeon, vice Hession, appointed to the 70th Foot.

Assistant-Surgeon Henry James Rogers, from the 70th Foot, to be Assistant-Surgeon, vice Dickson, resigned.

BREVET.

The Commission of Brevet-Lieutenant-Colonel Joseph Henry Laye, Depôt Battalion, as Major in the Army, to be antedated to the 12th November, 1847, such antedate to give no claim to back pay.

Brevet-Lieutenant-Colonel Joseph Henry Laye to be Colonel in the Army.

Captain William Joseph Fitzmaurice Stafford, 36th Bengal Native Infantry, to be Major in the Army.

Second Captain James Bevan Edwards, Royal Engineers, to be Major in the Army.

The undermentioned promotions to take place consequent on the death of Lieutenant-General Sir William Chalmers, C.B., Colonel of the 78th Foot, on the 2nd June, 1860:—

Major-General Alexander Kennedy Clark Kennedy, C.B., Colonel of the 6th Dragoon Guards, to be Lieutenant-General.

Brevet-Colonel Robert Blucher Wood, C.B., from Lieutenant-Colonel, half-pay, 97th Foot, serving as Colonel on the Staff of the Army, to be Major-General.

Brevet-Major Charles Parke Ibbetson, Captain half-pay 89th Foot, to be Lieutenant-Colonel.

Captain Edward Thornbrough Parker Shewen, Royal Marines, to be Major.

In answer to Mr. Sheridan the First Lord of the Treasury stated, on Tuesday night, that the Secretary for Foreign Affairs had requested the Admiralty to station one ship at Marsala, one at Messina, one at Palermo, and four ships of war in the Bay of Naples, for the purpose of affording shelter to such persons as may claim protection from the British flag.

THE NAVY.

ADMIRALTY, JUNE

PROMOTIONS.—Lieutenant D'Arcy S. Preston (1848), late flag-lieutenant to Sir Barrington Reynolds at Plymouth, to the rank of commander; Engineers G. Wynhall, promoted to the rank of first-class assistant-engineer in the Bustard; J. Langrish, promoted to first-class assistant-engineer in the Cornwallis, for service in the Ruby; T. Witt, promoted to first-class assistant-engineer in the Fisgard, for service in the Bann; J. Lowrie, promoted to first-class assistant-engineer in the Nile; and T. Huard, promoted to first-class assistant-engineer in the Wasp.

APPOINTMENTS.—Commander George M. Jackson to Geyser; Commander F. H. Smith to Torch.

Lieutenants, C. J. M'Grigor, J. B. Grove, and F. H. Blair, to the Colossus; E. H. L. Ray, C. R. F. Boxer, W. H. Goold, T. M. Magnay, C. G. Fane, and A. H. Alston, to the St. George; F. H. S. Webber, and A. G. Wootton, to the Donegal; G. B. Goolden, to the Mars; G. A. Brine, to the Monarch; W. J. Walker, to the Barracouta; Sir F. Blackwood, to the Aboukir; E. C. Betty, to the Blenheim, for service in the Violet; G. Stratton, to the Blenheim.

Master W. H. Crane to the Colossus, and W. G. Aldrich to the St. George.

Surgeon J. A. Miller to the Colossus.

Chaplain R. J. Jenkins to the Colsssus.

Paymasters—John Mallard, Beresford Scott, James Kay, and John Pooley, to the Colossus; George Ramsden to the St. George.

Assistant-Surgeons—Charles J. Fennell, to the Colossus; William Lockart confirmed in the Imaum; Alexander Minnoch, confirmed in the Exmouth.

Assistant-Paymasters—John Hay, to the Victory, additional; E. W. Goldson and N. B. Deering to the St. George; J. Chambers and F. A. Keogh, to the Colossus.

COAST-GUARD OFFICE, JUNE 14.

REMOVAL. Chief-Officer Mr. Robert McMaster from Killough to Youghal.

Arrogant, 47, screw, bearing the broad pennant of Commodore Edmonstone, had, by the latest accounts from the West Coast of Africa, left Lagos for Fernando Po and the south coast.

Archer, 13, screw-corvette, was, by the last mail from Sierra Leone, stationed on the south coast.

Alecto, 5, steam-sloop, Commander Raby, V.C., by the last accounts from the coast of Africa, had gone to the southward.

Assurance, 4, arrived at Naples on the 4th inst. from Palermo, but sailed almost immediately again for Messina and Malta.

Bacchante, 51, screw, Captain McKenzie, fitting at Portsmouth as the flag-ship of Rear-Admiral Sir T. Maitland, K.C.B., the future Commander-in-Chief on the Pacific station, will be ready for sea in a few days from this time.

Blenheim, block-ship. The officers and crew of this vessel are to be turned over to the Colossus, 80, screw.

Boscawen, 70, Captain Powell, C.B., flag-ship of Rear-Admiral the Honble. Sir Frederick H. Grey, having been relieved by the Forte, may be expected at Spithead about the latter end of July.

Colossus, 80, screw-liner, Portsmouth, has been commissioned, and the captain and officers of the Blenheim will be turned over to her, and when completed she will proceed to Portland as coast-guard ship. This is another step in the right direction, and it is to be hoped that before long we shall see all the coast-guard stations occupied by ships of power, at least equal to the Colossus.

Coquette, 4, screw, gun-vessel. This vessel is being gradually opened up, forward and aft. Her mid-ship section is very defective, and as far as can at present be discovered, she will require very extensive repairs all over. We believe, however, previous to expending much time or money upon her, she will be opened up and thoroughly inspected. The Coquette is the production of the Messrs. Green, the eminent shipbuilders, of Blackwall.

Cormorant, 4, screw gun-vessel, is to be fitted at Chatham for the second division of the steam reserve.

Dee, Master-Commanding Pullen, is loading machinery at Woolwich, for the western ports.

Duncan, 101, screw. On testing this ship's engines at moorings, and, of course, with diminished steam-power in the basin at Portsmouth, a few days since, it was soon discovered that the vibration was so great as to cause her thrust-chocks to move upwards of an inch, and the oakum to spew out two inches in the wake of her rudder-post. This is to be regretted, for the Duncan is one of the most splendid *looking* ships in the Navy. To remedy the weakness exhibited in her stern it has been found necessary to strengthen her abaft with metal knees and crutches, and also to secure her inside with an iron transom. It is said that these alarming symptoms of weakness in this splendid looking new ship is attributable to green timber, which, having shrunk since it was used in her construction, has rendered the vessel very tender about the region of her screw, the shake of which has, when driven with gentle velocity, threatened the ship with destruction. What must have been the consequences if the Duncan had been at sea previous to the discovery of her weakness, and shows us what a responsible officer the carpenter of a ship-of-war is, and what onerous duties he has at times to perform. The injury done to the stern of a ship by the shake of the screw is a result much to be dreaded, and we are too often compelled to hear our ships-of-war complain of weakness in this part of their frame, but this is the only instance that we know of where it has been found imperative to repair the rudder-post of a bran new ship of the line, previous to trying her measured mile in the placid waters of Stokes Bay.

Eagle, 50, sailing Coastguard frigate, Captain Edward Tatham, arrived at Spithead during the night of Saturday last from Milford, attended by the Firebrand, 6, paddle, Commander James M. Bruce. At 8 a.m. yesterday the Eagle saluted the flag of Commander-in-Chief H. W. Bruce, the Victory flagship returning the compliment. The officers and crew of the Eagle will be transferred to the Blenheim, 60, screw.

Euryalus, 51, screw frigate, Captain Tarleton, C.B., with His Royal Highness Prince Alfred on board, arrived at Teneriffe on the 27th ult., and left again on the 30th for Bahia. During his stay, Prince Alfred, accompanied by Captain Tarleton and Professor Piazzi Smyth, ascended to the Peak notwithstanding the great accumulation of snow on the mountain. The frigate had on her way out called in at Madeira, where the prince had been received with distinguished honour.

Forward, gun-boat, Lieut.-Commander C. R. Robson, sailed on the 27th April from Valparaiso, under convoy of the Termagant, for Vancouver's Island.

Geyser, 6, paddle-wheel steam-sloop, 280 horse-power, has been commissioned at Devonport by Commander George Melville Jackson (1855).

Grappler, gun-boat, Lieut.-Commander A. P. H. Helby, sailed on the 27th of April from Valparaiso, under convoy of the Termagant, for Vancouver's Island.

Hecate, 6, was inspected on Monday by Commodore superintendent the Hon. J. R. Drummond, and left Woolwich for Greenhithe in the afternoon for the purpose of having her compasses adjusted prior to leaving for the Pacific.

Fairy, tender, has hauled into No. 6 dock at Portsmouth, to repair defects and prepare for summer service.

Firebrand, 6, paddle, Commander James Bruce, sailed from Spithead on Monday, from Portsmouth, on particular service. She is now at Portland.

Fire Queen, Master Commander F. W. Paul, having had a thoroughly new body in iron plates, was hauled out of No. 6 dock at Portsmouth into the steam-basin, to receive boilers and machinery.

Growler, gunboat, arrived at Malta on the 6th inst. from Constantinople.

Hermes, 6, paddle steam-sloop, Commander W. E. A. Gordon, from the Cape of Good Hope station, was paid off on the 8th inst. at Sheerness. The Hermes has been a happy ship during the whole of her commission. We cannot say the same of all the vessels stationed at the Cape.

Immortalité, 51, screw, receiving her machinery in the steam-basin at Portsmouth, will be ready to get up steam by Monday next.

Lee, gun-vessel, lately launched from Messrs. Wigram's yard at Blackwall, is to be fitted for service at Woolwich with all dispatch.

Linnet, screw steam gun-vessel, built by contract at Sunderland, was launched last week, and has been ordered to Chatham, where she will at once be fitted and placed in the steam reserve.

Lizard, iron paddle-vessel, Lieutenant-Commander E. Maunsel, arrived at Portsmouth, on the 10th inst., from the eastward, and proceeded the same day down Channel.

London, 90, screw liner, left Malta for Naples on the 6th inst.

Magicienne was at Hong Kong on the 25th of April. She arrived from Singapore the day previous with a transport in tow. On her way up she put into a bay on the coast of Cochin China, when one of her boats was fired upon by a fort on the shore. A flag of truce was sent in to demand an explanation, this was not respected, but also fired upon. This was too much for Captain Commerell's patience, he therefore ran his ship as close in as was desirable, and very coolly demolished the fort with a few broadsides.

Medina, 4, steam surveying vessel, left Malta on the 7th inst for the coast of Syria.

Megæra, troop-ship. Arrived at Malta from Corfu on the 4th inst., and left again on the 7th for Gibraltar and England.

Mohawk, 4, screw steam sloop, arrived at Malta on the 8th inst. from Gibraltar, and proceeded the same day on to Beyrout.

Niger, 13, Captain Cracroft. The crew of the Niger, under their captain, have been engaged with some natives of New Zealand, and have greatly distinguished themselves. It is stated that on this occasion 17 chiefs were killed, and the total amount of casualties on the part of the natives was at least 160. We take the following from the correspondence of the *Times*, dated Sydney, April 21:—We have received by sailing vessels a week's later news from New Zealand. There had been no more fighting. Some fuller particulars are given of Captain Cracroft's gallant attack on the pah. It appears that the Niger arrived from Manakau after the expedition had started from Taranaki, and that the captain, finding what was going on, landed at once with fifty of his men, and hastened to the scene of action, and, though it was dark on his arrival there, he resolved at once on storming the pah. Having harangued his men, and promised 3*l.* to the man that pulled down the rebel flag, and finding the practice of a rocket tube he had brought with him altogether too unsatisfactory for his ardour, it was left behind in charge of a small party, and the pah was "rushed." No single man could claim the honour of seizing the flag, the rush was so instantaneous. Four of the men were severely wounded, but great execution was done among the natives, who were shot and bayonetted as they tried to hide themselves in the chambers of their pah. The rebel flag has been publicly presented by Captain Cracroft to the Governor of New Zealand, who has ordered the staff of it to be properly inscribed with an account of its capture. The steamer Airdale has sailed from Manakau for Taranaki, taking 85 men of the 65th regiment and a supply of warlike stores.

Niger, screw-steamer, 14, Captain Peter Cracroft, having been four years in commission, has been ordered home, but the time of her departure from New Zealand will necessarily be regulated by the state of matters in that distant colony. The gallantry of Captain Cracroft and his crew has probably saved the colonists from a tedious struggle with the Aborigines.

Pelican, 17, will very soon be ready for launching; probably next high tides.

Pelorus, 21, Commodore, of the 2nd class, F. B. P. Seymour, by the latest accounts had sailed from Sydney for New Zealand, for the purpose of aiding in suppressing the insurrection which had broken out in that island.

Pigeon, gun-vessel, built by contract at Sunderland, was launched last week. She is to be sent to Chatham, where she will be coppered and fitted for the steam reserve.

Prince Regent, 91. The conversion of this old ship is progressing very fast, a great many caulkers and shipwrights are employed upon her.

Prometheus, 5, steam-sloop, Commander S. S. Skipwith, was at Sierra Leone when the last mail left.

Princess Royal, 91, screw, has completed masting at Portsmouth, and is now in the hands of the master rigger, to be brought forward for the first-class steam reserve or for commission, as may be ordered.

Queen, 86, screw liner, was, when our last advices left Malta, hourly expected from Gibraltar.

Ranger, 5, screw steam gun-vessel, arrived at Portsmouth on Sunday morning last from the eastward.

Racehorse, 4, new screw gun-vessel, is ordered to be fitted for the second division of the steam reserve at Chatham.

Racoon, 22. Arrived at Malta on the 1st inst., and sailed again on the 3rd on a cruise.

Renown, 91, screw liner, sailed from Malta for Naples on the 6th inst.

Satellite, screw-steamer, 21, Captain J. C. Prevost, which has been in commission since December, 1856, and stationed at Vancouver's Island, was by our latest advices preparing to leave for England.

Spitfire, 5, steam-sloop, Lieutenant-Commander Allingham, was, when the last mail left the coast of Africa, stationed off Cape Coast Castle.

St. George, screw-liner, 90, Captain the Hon. Francis Egerton, at Devonport, will be reported ready for sea on the 24th inst.

Stork, gunboat, tender to the Excellent gunnery-ship at Portsmouth, steamed up Portsmouth harbour on Saturday, and made practice at the Briton target-ship, moored on the mud-lands in Porchester Lake. At the end of the firing the old frigate was sunk at her moorings.

Supply, 2, iron steam store-ship, Master Commander W. H. Balliston, from Woolwich, arrived at Plymouth on Saturday evening last.

Termagant, 25, screw-frigate, Captain Robert Hall, sailed from Valparaiso on the 27th of April for Vancouver's Island viâ Callao.

Torch, 5, screw steam gun-vessel, has been commissioned at Chatham by Commander F. H. Smith, (1858).

Trincomalee, 24, fitting at Chatham for a training ship for the Naval Coast Volunteers, has been taken alongside the sheer hulk to have her armanent put on board, which will consist of 10 32-pounders, each of 50 cwt., and six 8-inch guns, each of 52 cwt., to be distributed on her main deck.

Tribune, 31, Captain G. T. P. Hornby. By accounts from the Pacific we find that this vessel sailed on the 24th of April for England., The Tribune has been four years in commission, having hoisted the pennant in June, 1856. Captain Hornby, however, was only appointed in August, 1858.

Vesuvius, 6, paddle-wheel steamer, has been sent from Woolwich to Deptford to be prepared for service.

Virago, 6, paddle steam-sloop, Commander Montagu R. Dunn, was paid off at Sheerness on Saturday last.

Vixen, Commander Richards (1860), has been ordered home from the Pacific Station.

Wasp, 13, screw-sloop, Commander Charles Stirling, sailed on the 9th inst. from Portsmouth for the Cape of Good Hope.

The Channel squadron consisting of the following ships, the Royal Albert, 121 guns, the flagship of Sir C. H. Fremantle, K.C. B.; the Donegal, 101; the Conqueror, 101; the Edgar, 91; the Aboukir, 90; the Algiers, 91; the Trafalgar, 90; the Mars, 80; the Centurion, 80; the Mersey, 40; the Diadem, 32; the Ariadne, 26; the Greyhound, 17; and the Flying Fish, 6, passed Leith and steamed up the Frith of Forth and anchored nearly ten miles above Leith Roads in a roadstead known as St. Margaret's Hope. This part of the Frith is about two miles wide, well sheltered, with plenty of water, and is as safe as any harbour in the kingdom. It is expected that the squadron will remain at its present anchorage till further orders.

The admiral's pension which fell to the disposal of the Duke of Somerset, by the death of Admiral Hawker, has been bestowed on Admiral of the Blue Sir Henry Prescott, K.C.B., who will at once be struck off the active list. The vacancy will give flag-rank to Captain Robert Spencer Robinson, one of Her Majesty's Commissioners for inquiring into the state of the Royal Dock Yards. Captain Thomas M. C. Symonds, C.B., becomes senior captain for promotion to the active list of rear-admirals. A captain's good service pension falls to the gift of the First Lord of the Admiralty. Captain Sir George Nathaniel Broke, Bart., C.B., succeeds to the half pay of 14*s.* 6*d.* per diem, and Captain Thomas George Forbes to that of 12*s.* 6*d.*

Rear-Admiral the Hon. F. T. Pelham, C.B., one of the Lords of the Admiralty, visited Chatham dockyard a few days since for the purpose of inspecting the screw corvette Orpheus, 21, which is to be launched on the 23rd inst., and the screw gun-vessel Racehorse, 4, in dock, to be fitted for the steam reserve. After transacting some official business at the dockyard, Admiral Pelham returned to the Admiralty the same afternoon, thus adding to the number of professions said by Lord Clarence Paget to be followed by their lordships—that of "Traveller."

The Lords of the Admiralty have appointed Mr. W Hutchens, foreman of shipwrights at Woolwich Dockyard, to be assistant master-shipwright at Chatham Dockyard, vice Mr. Fincham, promoted to be master-shipwright at Deptford. Mr. W. King, of the smith department at Chatham Dockyard, has been selected to superintend the forging of the iron armour plates for the floating batteries at the establishment of Messrs. Napier & Co., Glasgow.

Vice-Admiral Sir Arthur Fanshawe, K.C.B., arrived at Plymouth on Monday, and has assumed the duties of Commander-in-Chief at that Port.

Sir John Liddell, M.D., C.B., F.R.S., Director-General of the Medical Department of the Navy, is now making his annual inspections of the various naval hospitals. He arrived at Haslar last Saturday.

By the removal of Admiral Sir Henry Prescott, K.C.B., from the Active List of Admirals, to the Reserved Half-pay List, Vice-Admiral Harvey, now commander-in-Chief at Sheerness, becomes Admiral of the Blue; Vice-Admiral Erskine Loch is advanced to be Vice-Admiral of the Red; Vice-Admiral James Hope Johnstone moves from the Blue to the White Squadron; Rear-Admiral of the Red, Sir Charles Fremantle, K.C.B., now in command of the Channel

Digitized by Google

Squadron, will change his flag from Red at the mizen to Blue at the fore. Rear-Admiral Sir Thomas Sabine Pasley, Bart., Admiral Superintendant at Devonport, will change from White to Red at the mizen; and Rear-Admiral John Kingcome is promoted to be Rear-Admiral of the White.

Mr. J. Large, Assistant-Surveyor of the Navy, has been nan official visit to Chatham dockyard, for the purpose of .nspecting the ships now building and in dock undergoing alterations and repairs.

Commodore Loring's time on the Australian station having expired, he has been recalled, and the Iris, with his broad pennant, may be shortly looked for.

A number of lads have been entered during the past week, at Woolwich, on board the Fisgard flag-ship, for sea service.

Two 24-pounder guns have been sent to Tenby for the use of the Volunteer Artillery at that place.

We regret to hear that Lieutenant Daniel, R.N., a passenger by the steam-sloop Wasp, to join the steam-frigate Forte, flag-ship on the Cape of Good Hope station, is under arrest, on board the former ship in Plymouth Sound, on a charge of drunkenness. The only lieutenant of the name of Daniel in the Service is the wearer of a Victoria Cross. We hope, for the sake of the gallantry which earned this distinction, that the charge will not be substantiated. The lesson should not, however, be forgotten.

Pembroke Dock. — A party of 150 men and officers marched on Tuesday the 5th instant, for Penally, 12 miles distant, there to be encamped, for the purpose of rifle shooting. A range, said to be one of the best in the kingdom, having been secured near that village. Permanent barracks are being constructed there, so that the troops will occupy the palace both winter and summer.

The Channel Fleet.—Entertainment to the Medical Officers.—We understand that a deputation from the Royal College of Surgeons of Edinburgh, consisting of Dr. Douglas Maclagan, the president, Dr. Andrew Wood, and Dr. Newbigging, proceeded on board the Channel Fleet on Saturday last, for the purpose of inviting the medical officers of the fleet to an entertainment to be given them by the college. The invitation having been accepted, the dinner took place in the Hopetoun-rooms on Tuesday, the 12th inst. We understand that the members of the Army medical staff, at present quartered in Edinburgh, were invited to meet their brethren of the sister service.

Naval Knights of Windsor.—The following notice appeared in the *London Gazette* of Tuesday last:—"Admiralty, May 15.—The Lords Commissioners of the Admiralty do hereby give notice to such lieutenants in Her Majesty's Navy as are desirous of being recommended for the appointment of Naval Knight of Windsor, under the will of the late Samuel Travers, Esq., that they must apply at this office on or before the 26th day of June next, when they will be informed of the nature of the certificates and testimonials which are required to show that they come within the meaning of the said will, which expresses that they 'are to be superannuated or disabled lieutenants of English men-of-war,' and shall be single men, without children, inclined to lead a virtuous, studious, and devout life,—to be removed if they give occasion for scandal.—C. Paget."

Distribution of Naval Prize Money. — Notice was given in Tuesday's *Gazette* that preparations are now being made for the intended distribution of the proceeds received, and tonnage bounty awarded, for the schooner Kingston, late Cortes, captured on the 16th April, 1858, by her Majesty's gunboat, Forward.

Royal Naval College.—The following gentlemen passed their examinations on the 6th, 7th, 8th, and 9th, and received certificates on Tuesday last:—For Naval Cadets—J. H. Corfe, G. L. Poe, J. C. Caswell, T. A. Watkins, J. T. Hallifax, H. G. Gough*, C. E. Stewart*, W. H. Gabbett, A. B. Sheridan*, V. B. Orlebar†, G. S. Deacon—between 14 and 15 years of age. T. T. A. Smith†, J. H. Orlebar, G. G. Crompton, R. H. H. Henderson*, F. C. Master,† A. C. O. Boddington, A. W. Massey, Count F. C. Metaxa, G. A. E. Crattwell, A. O. Hill†, C. J. Fellowes, A. A. Joyce—between 13 and 14 years of age. C. C. Wood, J. E. Symons†, F. Papillon, J. S. L. H. M'Kinnon, S. G. Smith*, A. G. Leith, W. Henn, T. M. E. Wilmot, G. T. Smith, W. B. Kirwan,† A. J. Hamilton, F. A. Blackett*, A. St. Mawe, J. P. E. Jervoise, F. E. Hudson, A. R. Woodriff†, A. S. White,* C. H. Millett†, C. B. Neate*, F. R. Knollys—between 12 and 14, under the new regulations. For Masters-Assistants—A. E. T. Andrews, A. R. Wonham, A. J. W. Neville, E. Kearns, E. T. T. Behenna, F. J. Palmer, R. O. Jones, G. Hole, S. Wood, A. R. Ring, C. G. T. Cater, E. Nankivell, B. St. G. Deane, A. W. A. T. Coward, A. C. Dennys, H. A. G. Meeson, A. Martin. Marine Cadets—F. H. Mountsteven*, H. J. Bowman†.

Erratum.—By a misprint we were made to say last week that the gunboats which left England in November last, had arrived at Nigapore instead of Singapore.

On Tuesday night Admiral Duncombe moved for a select committee to inquire into the constitution of the Board of Admiralty, and the various duties devolving thereon. He thought that the First Lord of the Admiralty should be Minister of Marine, and hold the same position as the Secretary for War; while the Board should consist entirely of naval officers, the Comptroller of the Navy having a seat. The Comptroller, who was now overworked, ought to be assisted by a Board of Construction.

We quite agree with Admiral Duncombe when he says, That most zealous public servant, Sir Baldwin Walker, is overworked, but we doubt if the proposed Board would lessen his labours. The question if civilian against naval officer has been argued so often, and the opinions of men qualified to judge differ so much, that we must be satisfied to go on under the old system until a better one is devised, which will not, looking at the tone of the debate, be propounded just now by a select committee of the House.

Lord C. Paget said that the present Board of Admiralty had shown every willingness to agree to inquiry into its administration. There were committees sitting to inquire into the question of piers and harbours, on the transport of troops, on the gunboats, and on the dockyards. Besides these four inquiries, it was sought to inquire into the constitution of the Board of Admiralty. There was an inquiry into the subject of military organization, and rumour went that there was a tendency of opinion towards assimilating the War Department to the Admiralty; but however that might be, he thought it desirable to wait for the decision on that subject before granting any further inquiry. He went into a minute statement of the onerous duties which the Lords of the Admiralty had to perform. He said they were shipbuilders, blacksmiths, merchants, manufacturers and discount brokers, he concluded a good-natured speech by declaring that he must oppose the motion.

Mr. B. Osborne said that the object of the motion had been misunderstood by the noble lord; and the fact was that so many inquiries as to departments of the Admiralty going on rendered it necessary that an inquiry should be made into their constitution as a body, which, under existing circumstances had lost the confidence of the public—a want of confidence which no one had done more than the noble lord himself to create; and his answer now was the best argument in favour of inquiry.

If this sharp lesson had come from any other member of the House than Mr. Osborne, it would have had some weight; but emanating from him, we suspect it will be altogether lost, for we cannot but recollect that during the four or five years that Mr. Osborne held office as Secretary of the Admiralty, a more docile "official" never existed. Out of office he is watchful, and ready to catch any tripping member who may unfortunately provoke his ire. but during the whole four or five years that he held office, his voice was rarely heard. He all at once when a ministry with which he was connected resigned, and only held office until Lord Derby tried to form a Government, found his tongue, and recollected that he had a constituency; but when he was granted a further tenure of his place, he again was mute and forgot all about the electors of Middlesex. Mr. Osborne is very clever, but he must not press too hard upon the present occupant of his old chair at the Admiralty.

Sir J. Pakington said that, judging from his own experience, he was of opinion that the constitution of the Board of Admiralty might be improved so as to make it a good working machine, and he advocated the recommendation that the Surveyor of the Navy should have a seat at the Board. This opinion, delivered by so good a man of business as Sir John undoubtedly is, should not be passed over without due deliberation.

The amusing speech of the evening was that of Sir Charles Napier, who went over his old grievances while in command of the Baltic Fleet, and added that until his plans were adopted there never would be a good Board of Admiralty. We fear that this generation will pass away before this *rara avis* is fledged. Sir Michael Seymour extolled the system prevailing in France, and which he said under the sole responsibility of a Minister of Marine worked well. After a debate in which Mr. Lindsay, Mr. Bentinck, and Sir. J. Elphinstone, as a matter of course, took part. Sir C. Wood pressed his doubt whether the discussion of that night had done much for the improvement of the constitution of the Admiralty, and he thought that a commission would be a better means of inquiry than a committee of that house. In reference to a statement of Mr. Bentinck in regard to the gun-boats, he never heard that an authority was given to the contractors to build these vessels with green timber; but so great was the necessity of the case that he should not have hesitated to have them built of that material. He did consult the other members of the Board, and obtained their concurrence for hauling up the gun-boats on shore. He distinctly averred that every subject connected with the administration of the Navy was brought before the Board.

Admiral Duncombe agreed to withdraw his motion on the sole condition that if in the meantime a reorganisation of the Board did not take place, he would be at liberty to bring the subject forward again next session.

In the House of Commons on Thursday night, Mr. Lindsay moved that, with a view to greater efficiency in war and less expenditure in peace, it is the opinion of the House that more prompt and effective measures should be adopted to complete the reserves of marines and seamen for Her Majesty's Navy. The royal commission for manning the Navy recommended certain numbers of marines, reserve seamen, coast-guard, and coast volunteers; but the numbers were very far short of those recommended. The want of naval reserves caused a great expenditure, inasmuch as large fleets were kept up, the appearance of which caused a necessary rivalry in naval preparations in France. He doubted whether proper, or at least effectual, means had been adopted for getting the reserves up to the required standard. We are obliged to Mr. Lindsay for bringing his motion before the House, as it gave Lord Clarence Paget and Sir Charles Napier an opportunity of enforcing the necessity of adopting the recommendation which we have advocated, and which we consider of vital importance to the Service. Lord Clarence said, we have at the present moment nearly 9000 boys in the Navy. Only conceive of what value these boys—who will, no doubt, mostly turn out first-rate seamen—must in a short time prove in the Navy. You will have so many young men brought up in the Service and attached to it; and, if the public will only wait patiently, they will see the Navy in a short time on the most satisfactory footing in that respect. And Sir Charles Napier stated, that as ready-made seamen could not be had, we must enter lads and educate them for the Service irrespective of the expense. So say we.

Lord Clarence praised the reserve of seamen scheme and begged that the country would be patient; he added that at present the total number of men in reserve was 23,831, viz., 6642 coast-guard, 1105 naval reserve, 7007 coast volunteers, and 6084 marines on shore. This may be so far satisfactory, as far as the marines are concerned, but there is a very poor show of "blue jackets."

Lord Clarence informed the House that the Duke of Somerset was about to bring before the House of Lords a Bill to alter the very absurd Articles of War under which our seamen now entered the Navy.

Admiral Duncombe gave as the result of his experience that a large number of boys was the best nucleus for an efficient force of seamen, and in common with other members expressed his delight at hearing that the obnoxious Articles of War were to be abolished. These Articles of War are calculated only to excite derision whenever they are read. Some nautical Draco must have presided over the lawyers who framed them.

Sir Charles Napier and Mr. Bentinck gave very decided opinions against the scheme of land fortifications recommended by the Commissioners, and urged the necessty of diverting the money from these plans to the increase and greater efficiency of the Navy.

Mr. Lindsay, having elicited opinions which will prove valuable, withdrew his motion.

Lord C. Paget then proceeded with the Navy Estimates, the first vote proposed being the 11th—444,049*l.* for new works, improvements, and repairs in naval establishments at home and abroad. And we are glad to find in giving explanations respecting this vote that steps have been taken to arrest the progress of the Medway in making further encroachments on Chatham Dockyard. It was also stated that a bill was about to be brought in to enable the Admiralty to enlarge this convenient and important dockyard. In the course of the debate Sir Charles Napier called attention to the existing state of the Mole at Gibraltar, and wanted to know the number of ships that could be there sheltered, he also was desirous of knowing if there was any intention to deepen the entrance of Portsmouth harbour, so that a three-decker with guns and stores could be got out at any time of tide. Lord Clarence could not tell exactly how many ships might take refuge under the lee of Gibraltar Mole, he said that it was about being lengthened 200 feet beyond what was original intended. He could hold out no hope of deepening the channel leading into Portsmouth, so that the largest ship with guns, &c. on board could leave at all times of tide as the shingle collected as fast as it was removed. After some unimportant observations Lord Clarence moved a vote of 691,262*l.*, for half-pay, reserved half-pay, and retirement to officers of the Navy and Marines, and took the opportunity of bringing forward a scheme of naval retirement which, however, from its having only been printed and distributed a few hours previously, was ultimately, at the suggestion of several members, withdrawn. The debate was one of a most interesting character to the naval world, and we only regret that our limited space will not enable us to give it *in extenso*. The substance of what fell from Lord Clarence was that during the time he had been in office only seven commanders had been promoted to captains, and nineteen lieutenants to commanders. In order to remedy this it was proposed to establish a compulsory retired list, by which captains who have arrived at the age of sixty, and who have never served in that rank, should retire and receive retired pay of 18*s.* and 20*s.* a-day, assuming the rank and title of rear-admiral as they rise in seniority. With regard to commanders at sixty they would retire with the rank of captain. It was proposed that half-pay should increase in proportion to length of service. All commanders who have not been afloat for eighteen years, although not sixty years old, would also retire. The retired pay would be calculated on the scale of the length of service. The lieutenants would also retire at the age of sixty, with the rank of commander, and receive pay on the scale of their sea service. The lieutenants on the active list would receive half-pay on a scale proportionate to the length of their sea service. The effect would be to remove 8 captains, 64 commanders, and 179 lieutenants, from the active list, with a consequent immediate promotion to 3 commanders and 18 lieutenants, and in future allow of promotion on every death vacancy, instead of, as at present, promotion coming only after three death vacancies.

We fear that the Service will be much disappointed; but, as we have dealt with the "scheme" in another column, we will only add that the suggestion made by Sir John Pakington to submit to a commission the task of forming a plan of retirement on broad and liberal principles, is worthy of attention, and cannot fail to be agreeable to any First Lord and his colleagues.

The Navy Gazette.

ADMIRALTY, June 15.

Admiral of the Blue Sir Henry Prescott, K.C.B., has been appointed to receive a pension of 150*l.* a year, as provided by Her Majesty's Order in Council of 25th June, 1851, vacant by the death, on the 8th instant, of Admiral Edward Hawker, and the name of Admiral Sir Henry Prescott has been removed to the Reserved Half pay List accordingly; and in consequence of this removal, the following promotions, to date from the 9th instant, have this day taken place:—

Vice-Admiral Edward Wallis Hoare, on the Reserved List, to be Admiral on the same List.

Vice-Admiral of the Red Edward Harvey to be Admiral of the Blue.

Vice-Admiral of the White Francis Erskine Loch to be Vice-Admiral of the Red.

Vice-Admiral of the Blue William James Hope Johnstone to be Vice-Admiral of the White.

Rear-Admirals Thomas Martin and Henry Edwards, on the Reserved List, to be Vice-Admirals on the same list.

Rear-Admiral of the Red Sir Charles Howe Fremantle, K.C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White Sir Thomas Sabine Pasley, Bart., to be Rear-Admiral of the Red.

Rear-Admiral of the Blue John Kingcome to be Rear-Admiral of the White.

Captain Robert Spencer Robinson to be Rear-Admiral of the Blue.

Retired Vice-Admirals John Thompson and John Hollinworth are entitled to the rank and title of Retired Admiral, in pursuance of Her Majesty's Order in Council of the 7th May, 1858.

THE ENGLISH NAVY AND ITS POSSIBLE ANTAGONISTS.

All who know France and its Emperor of the present day, must be well aware that political writings, whether they grace the columns of a newspaper or appear under the more pretending form of a pamphlet, have, when they bear upon the affairs of another power, and are permitted to circulate unchecked, greater significance than are awarded to such productions in England, or in any other country where the press is free.

In a pamphlet lately published anonymously in Paris, entitled *La Coalition*, and which has every appearance of a "feeler" experimentally put forth, there is the following passage.

"L'Angleterre ne domine que par sa Marine. Il y a en Europe trois ou quatre puissances maritimes, qui si elles savent s'unir, peuvent tenir en échec toutes les flottes anglaises. Que la France s'allie à la Russie, au Danemark, la Mer du Nord est fermée aux Anglais; its sont exclus de la Mer Noire. Qu'elle appelle dans cette alliance l'Espagne,

le Portugal, il n'y a plus d'ocean, plus de Méditerranée pour les Anglais. Leur île de Malte, leur Gibraltar, ne seront bientôt plus que des rêves d'ambition deçue, des souvenirs détruits d'une superbe domination."

We are much obliged to our friend on the opposite side of the Channel for reminding us that our strength lies in our Navy, and with the help of Providence and our own good will, we will do our best to prove that we shall be able to hold our own against all comers. This is however no time to despise the capabilities of those who, now apparently our fast friends and allies, may unexpectedly and very suddenly become daring foes. The Emperor of the French has told us plainly that we have to thank him, and him alone, for the peace we now enjoy, but that circumstances might arise which even he might not be able to control, and which would render a war with England one of the most popular ever undertaken by his glory-loving people.

We know when all is prepared for a sacrifice how easy it is to pick up sticks wherewith to kindle the fire. We must therefore, even when the weather looks bright and clear, be prepared for squalls. The "programme" in the paragraph which we have quoted, is very similar to that chalked out by the first Napoleon, but which the energetic conduct of the English minister of the day, by the expedition to Copenhagen, completely foiled. We have no desire "to argue the point" with the author of the pamphlet about our expulsion from the Baltic, the Black and Mediterranean Seas, and the disappearance of our cherished flag from the waves of the broad ocean. We will content ourselves with saying, that as our fathers have bequeathed to us, not only Malta and Gibraltar, but a very fair sprinkling of other possessions, we intend manfully to leave the inheritance intact to our children. But, with all this in view, we must be up and doing. We must not only further increase the number of our ships (whether large or small, as may be decided upon); we must have a list of efficient officers. We must pension off and handsomely provide for, according to their deserts, all old, worn-out, and otherwise inefficient admirals, captains, &c., until we have within our grasp a set of men into whose hands we can fearlessly commit the destinies of Old England. We must give more encouragement to our warrant officers. We must open more freely the door of promotion to the higher ranks of the Service to those excellent and reliable men—the masters; and finally we must settle the question of "How is our Navy to be manned?" This last is the "momentous question" of the day, and which we must leave to the immediate decision of the responsible servants of the Crown—the Duke of Somerset and his colleagues.

Let us now see what the "coalition" referred to could accomplish, supposing one were formed in accordance with the idea of the French writer. We are not an arrogant people, whatever else may be said against us; and we are certain that our Spanish and Portuguese allies will not think the worse of us if we say that we have no fear of their navies making common cause against us. The Danes are hardy first-rate seamen, whom we are always glad to welcome into our Mercantile Marine, but as their navy is chiefly formidable in row gun-boats, we will even pass them over without taking them into account, except as to their being able to annoy our trade connected with the Baltic; but as in case of this "coalition" we should have no one to trade with in that direction, we may be justified in saying that we do not look with any degree of anxiety upon the actual state of the Danish Navy. We have now only to deal with the French and Russian sea forces; and a quiet examination into these will prove that, although we should have our work cut out for us, we should be quite competent to deal with the combined fleets in the event of our being opposed to them. The following is a general recapitulation of the French Navy, compiled from undoubted sources, up to June, 1858:—

Classes.	Afloat.			Building.			Totals.
	Steam	Sail.	Total.	Steam	Sail.	Total.	
Ships of Line	30	13	43	7	..	7	50
Frigates	37	28	65	2	11	13	78

	221	135		28	16		
Total Afloat			356				
Total Building						44	
General Total							400

Since then there have been constructed, or in the course of construction, some 50 or more vessels, of which a large number are heavy line of-battle ships; so that the French Navy may now be said to consist of 555 sail of all kinds carrying 8700 guns, with an aggregate steam power of 80,000 horses. To man their ships our neighbours have the pick of their maritime conscription, and can always know where to find 150,000 men habituated to the sea.

The Russian Navy, according to the best information we can rely upon, was constituted, up to the close of 1859, as follows:—

SAILING VESSELS.		STEAMERS.	
Ships of the Line	12	Screw Ships of the Line	7
Frigates	7	Screw Frigates	11
Corvettes	7	Screw Corvettes	12
Brigs	7	Screw Lugger	1
Schooners	11	Vessels of various kinds	41
Zebecs	7	Tender	1
Luggers	5		
Clippers	3

Grand Total	158.		

In addition to the above, the Russians have a considerable number of row gun-boats and screw gun-vessels.

We do not pretend to say that the men who may be put on board those ships are all "seamen," but this we do know, the fellows know how to fight, and will fight.

In round numbers the two imperial countries can muster between them some 720 ships, and although the larger half of the Russian vessels are propelled by sails alone, it should be borne in mind that there is not much idleness in the building yards of the Baltic and Black Seas. The works of construction and conversion are going on.

We have our Official Navy List before us, and we find that we can muster of all sizes some 220 sailing, and 530 steam, vessels, making a grand total of 751. Out of these we had in commission at the end of May, 241 steam-vessels, mounted with 4880 guns, with an aggregate steam power of between 64,000 and 65,000 horses; 62 sailing-ships, mounting 900 guns, making a total of 303 ships, manned by nearly 64,000 men.

We will, so as to be on the right side of the hedge, knock off from the number of our ships 100, as, on dissecting the list we find very many that should be removed from the "effective," to the "ineffective" class; but with equal justice we should make a deduction of a like number from the combined fleets, and in doing so we feel that we are not behaving illiberally. The result would show that we could oppose to 620 French and Russian ships, manned by conscript sailors and soldiers without their sea-legs, at least 650 sail, manned by English sailors. The struggle, should it ever come to one, would be fierce, but as to the results we have no fear.

THE PAY OF MASTERS, ROYAL NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There are few things I detest more than pen and ink, but to let such an absurd idea remain before the public as that expressed by "Complete View," in your GAZETTE of the 19th of May, even I cannot resist replying, to show the short sighted, rather than the complete view, taken by your correspondent, who before making remarks would do better to inform himself on the subject on which he intends to write.

Masters in 1st, 2nd, and 3rd rates, get nothing but their pay, no *store allowance* whatever. That notation in the *Navy List*, from which I presume "Complete View" gleaned his information is a take-in; it is only when in command of store ships or in small vessels, where no warrant officers are allowed, that he gets it, and this the lowest scale, 2*s.* 1*d.*; most of the small ships however have second masters in charge, who are allowed 1*s.* 6*d.* per diem for having charge of the stores.

The pay of masters, although it reads very pretty, is a complete sham, few benefiting by the late Circular, which was expected to do such wonders, and quite to satisfy this neglected and grumbling class. What has been done for them? Positively nothing, except giving a step to the masters-attendants, making them commanders, but permitting them to hold their appointments till 65, by which the masters at present entitled and hitherto expecting a vacancy, can never get one, as nearly all the men holding master-attendant-ships, have from 6 to 10 years more to serve, and therefore will continue to hold them unless obliged to retire from ill health.

Again, four years' qualified second-master's time has been given for half-pay, mark you, qualified time; but fourteen years ago the regulations of qualification were totally different, so the present circular is framed only for the present day, and not for those who were kept years and years on foreign stations without the possibility of being able to get home to pass; if the Admiralty truly wished to benefit masters, they should have given all time served as second-master or acting second-master, provided they had served the required number of years to qualify them for passing; but since they have only given four years, it should have been the same, as it was only occasionally in those days they could get ships together, or leave in England to go and pass their examinations. But as no man in his senses ever expected to be promoted till he had served seven or eight years as a second master, it was not of much consequence his passing the Trinity House for a year or two, or until he could do so with the least possible expense, as a trip to London was no joke, and no small pull on a man's small purse in those days. Things are different now; but still it is hard to deprive these men of time served as second masters, and make them sufferers from regulations which were not then in existence. I give you an example. A man is three or four years acting second-master, in charge, in fact, master of the ship on the coast of Africa, having been appointed by the senior officer or commodore without having passed, sufficient ships not being together to examine him. He returns to England, and on the ship being paid off, passes. Will you believe it, his time is only allowed to reckon from this passing, and the four years he may have been navigating this ship not considered qualified time. After this he is appointed to a ship as second-master (under a master), and now this time, though he has only been doing junior officer's duty, is allowed; the other, while navigating the ship, kept out of England against his wishes, and all the responsibility of a master resting on his shoulders, is still not allowed to count for increase of pay; this must be a mistake, and it only requires to be properly placed before their lordships, for them to see the injustice of it. Those masters who had any zeal for the service, and I believe they all had at one time, have seen cause enough to allow it to evaporate. They don't go heart and soul into the service, which they would if properly rewarded, but jog along without a particle of hope of ever arriving at anything (until worn out and ruined in constitution and temper) than the anomalous position of a master. The country imagines that the magnificent ships at present the safeguard of England's shores, are mastered by first-class men—and so they are first-class men, except on board their ships, where their position is most anomalous and their pay, nearly in all cases in sea-going ships only 13*s.* a-day "minus income-tax;" and this, mark you, under the new warrant; while their position, though in first-class ships (the largest in the world), only that of fourth-class masters. Can this be true? people will say. Where, then, are the first-class masters? Echo answers, where? No, if the service requires masters, why don't the country see them rewarded; and if not wanted, let them be done away with altogether; until either one or the other occurs, there cannot be other than grumblings; if the Admiralty still persist in keeping them, make them navigating captains, commanders, and lieutenants, according to their standing, and remunerate them fairly, with permission to retire after a certain number of years' service, and before they get in their dotage. They need never clash with commanding officers, who by the same order in council making this alteration, could grant rank (*pro tem.*) to any lieutenant on becoming commanding-officer, who in the absence of the captain would take command of the ships. I fear I have trespassed too long on your columns, for which I must apologise.

Masters attendants should have 600*l.* a-year (as formerly), the same as other officers in the dockyard; not to hold the appointment of assistant and master-attendant combined, more than 10 years, to have 1*s.* per diem for every year served as the latter, and 6*d.* for the former time, to count for half-pay, and to retire at the age of 57—quite old enough for any man to serve holding a public and fagging appointment.—I am, &c., ANOTHER VIEW.

TREATMENT OF NAVAL OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR.—The following paragraph appeared in a newspaper last week: "Increase of salaries in Liverpool.—The Liverpool Town Council, at their monthly meeting yesterday, consented to the increase of the salary of the head constable from 650*l.* to 750*l.* per annum" . . I merely quote the first officer's pay—his subordinates are proportionately rewarded. What I wish to draw attention to, is the fact, that the Admiralty is the only Board that refuses to keep pace with the times we live in. Here is a chief constable getting better pay than the captain of a line-of-battle ship. One man in the receipt of this income can live at home in comfort; the other to earn it has to leave everything he holds dear to encounter far greater care and responsibility and the risks of sundry kinds of death from climate and war.

A week ago a letter from a military officer at Singapore appeared in print. He stated, among other information regarding the force proceeding to China, that army assistant-surgeons are there in the receipt of equal pay with naval capt., and that colonels, the naval man's equal in rank, receives four times the pay. Now, Lord Clarence Paget—"false, fleeting Clarence"—stated in the House a few weeks ago that the best spirit and contentment prevailed throughout the Navy. This is a gross mis-statement of Lord Clarence. Officers and men are alike discontended. Fruitless memorials witness the temper of the first—mutinies and desertions that of the last. In the very paper from which I make the above extract, (the *Times* of to-day), it states that in 1859 the desertions from the Navy were as many 2338, of whom only 86 were apprehended—712 of those had received bounty to the amount of 4571*l.*

The money thus wasted would have been much better spent in increasing officers' pay. The Navy never will be popular with the men, nor can good discipline obtain, so long as the officers are discontented. On board ship people are so huddled together that the grievances of the ward-room are soon echoed on the lower deck. And this, I believe, has a great deal to do with several recent acts of insubordination. I repeat that the whole body of Naval officers is discontented. The Executives chiefly. Each grade deserves more pay. Gunnery lieutenants have lately been insulted by an addition of one shilling a day; they are thus placed on an equality with a sergeant instructor of the army. An officer instructor of musketry receives 3*s.* 6*d.* in addition, although the rifle course forms but a small part of what the Naval gunnery lieutenant has to learn and teach. But the non-executives are also disgusted, because even that class to which the greatest concessions have been granted—I mean the Medical branch—have not received these concessions as their right, but have wrung them from the Admiralty after a hard and obstinate fight. But this letter is already too long. I beg to sign myself, NAUTICUS.

CHOICE IN THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

"I wish him to bear this in mind, that whereas in the Army promotion goes by purchase, and in certain branches of it by seniority, in the Navy the *whole* of it is by choice; and the First Lord, with the exception of promotion for distinguished services which the Board may confer, has the whole power in his own hands.—LORD A. PAGET, June 12.

SIR,—That is my text—and these words the country will listen to without protesting against such patronage in the hands of one whose tenure of office changes continually, and who, to support his party is obliged to use such patronage.

Hundreds of cases could be quoted. And is this to continue? Is there to be no promotion in the Navy for long and continued services? Look at the list of lieutenants of '46, '47, '48; some of these men have served as gunnery lieutenants, first lieutenants of frigates and line-of-battle ships, having served two, three, and four years as mate, and whose sea-service reckon up few under 20 years, and most 21 to 23 years—services in Africa and West Indies, and truly the First Lord will tell one of them as he does through his private secretary (for, poor fellows, they have little or no chance of seeing him), that the First Lord cannot go into any claim prior to the formation of the present Board; and then, like many a good officer of the lieutenants' list of '41 to '46, he, finding his past services forgotten and his future depending upon a similar answer from a new First Lord, whose names are "legion," he rushes to the last resort for the destitute—the Coast-Guard. In the Army all is fair enough; if you are the first for purchase, and your money is lodged, you get it; if a death occurs, and you are senior, you get it; if you serve on the coast of Africa one year, you get one year's leave on full pay. You get colonial allowances, batta money in China, and field allowance if in the field; but in the Navy there is no colonial allowance, no extra pay, no field allowance, and no seniority promotions by death. Admiral View* takes Admiral Blowhard's son as flag-lieutenant, and makes him a commander on the first death vacancy; Admiral Blowhard takes Admiral View's son as flag-captain; or Admiral Clear View takes his nephew, and though he has not served his time (two years) when his flag is hauled down, an accommodating Lord of the Admiralty appoints him to a line-of-

* Admiral Chads took Admiral Moresby's son as flag-lieutenant; Admiral Moresby took Captain Chads' as his flag-captain.

Digitized by Google

battle ship, and then rewards him with a commander's commission over the heads of all the old lieutenants he left on the station, or the hard-working and old meritorious first-lieutenant of his flag-ship. And this is what the country is to understand is choice! But is it justice? Then those like myself, who have by luck, for distinguished services—certainly not by choice of Admiralty—gained the rank of captain, are told, "You must serve seven years ere you are entitled to serve as a flag-officer in peace, or five in peace and war." I take the Navy List and find that, if my life is spared, in 18 years I may be an admiral; that there are 354 captains all like myself, and that it will take at the least two commissions to serve it in; but as I gained the rank for distinguished services, that splendid administration which has no less than four commissions of inquiry may never choose to appoint me to a ship; and if it does, my outfit will cost me 400*l.*, and my pay is not enough to support me; but as I serve for honour, why am I not to have my turn by seniority, and even then I shall not accomplish that if it went by seniority. No, sir, till you do inquire into the patronage of the Admiralty, and find why a Martin always relieves a Fanshawe, and a chosen few always get commands, you will never strike a death-blow to choice, which means nothing more than that a few chosen families are to receive all promotion and patronage, and that the hard-working and most deserving officers are to slave for them without promotion, as that is in the gift of the First Lord, with whom you are not connected; and hence you and the country are to remain till death takes you, for choice never will.

CHOICE.

NAVAL PAY AND CONFLICTING GRIEVANCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The correspondence in your columns—to say nothing of what you hint you have upon your editorial table—makes it plain enough that you know somewhat of the great diversity of opinions that exists on board ship on all subjects connected with the Service. It will be gratifying to you to find that any of these utterly diverse views can be at all reconciled by discussion in your valuable columns. It is because we have a rare and amiable instance of this in the letter of "Steam" in last week's GAZETTE, that I revert to a subject that may now be regarded as so satisfactorily settled.

I subscribe thoroughly to the acknowledgment of "the evils of six-monthly payments unaccompanied by long leave of absence." Nor is this a new conviction on my part. These evils are unquestionably experienced "facts," and "worth a thousand arguments," *i.e.* a thousand illogical arguments, or mere theories, not based upon facts or sound premises. Had the assumed morality which "Steam" expected from monthly settlements of seamen's wages, when leave could not be granted monthly, been based upon any facts, there would have been no difference between him and me. I am aware that the longing to go ashore and the stealing of the superfluous money on board the Edgar was not after the usual monthly payment—for only a small portion of the men's wages is offered, and not always accepted, monthly—but after a six-monthly pay down. It is certainly a fact I am prepared to prove that "men do actually leave frequently-paid ships," to avoid these six-monthly payments, and have a good pay-day on paying off; and this is quite reconcileable with another fact alleged by "Steam," which I do not dispute, that men may have "generally" left their ships in his experience to improve themselves in seamanship. I can only say they need not have left the ships of the Channel squadron (of which I spoke) to improve in seamanship, whether under sail or steam. This rough weather and the gales of the last six-months, with clouds of witnesses, give facts enough in this respect. Why, "Steam" says, "we must revert to the old system of monthly pocket-money," I do not know, as that is the existing system he wished to disturb, but for which, after a month's further study, I am glad he now finds good arguments deduced from facts.

Many of our naval differences arise from a disregard of the value of words and the whole bearings of a subject. But what would you not give, sir, could you hope that a month's reflection on other questions of naval pay would clear your table or your columns of our internecine contrarieties? If "Keel," the carpenter, would in that time but look more benignly on "Screw," the engineer; if the "Captains, R.N.," who have hasted to be "posted," and now decline going to their posts, would see what a difficult grievance is theirs for "the Board" to deal with—"bored" as they are about it; if they also would take more comfort—though in such evil case—in reflecting that, according to old "Belisarius," commanders are "most hardly dealt with by the Board of Admiralty;" if Commanders, "of ripe intellect," would make some allowance for "want of discretion" in young lieutenants—remembering their own sky-larking days, and how they, too, burned for "promotions" then—nor rashly and illogically conclude that all young and smart lieutenants are represented by "Balfour, Berkeley," and other B.s; if paymasters would not envy surgeons, forgetting the difference between their educational training before being eligible for an appointment at all; if "executives" generally would not forget that "civilians," simply as being such, have to put up with much "chaff," if they have much pay in the service, and that their pay is all they have to look forward to;—in other words, if we would reserve our fire for the enemy, live and let live one another, and concentrate our efforts to improve the *morale* of the Service generally, and gain the affections of our men; then, sir, your valuable columns might be occupied with other correspondence than letters on merely conflicting class-grievances; and subjects most interesting might be ably discussed, greatly to the advantage of our glorious Service. I would only further ask, in what walk of life is there to be found the Utopian equality of promotion, emolument, reward, and punishment that all classes of naval officers are agitating for? Is it in the merchant navy? In art, science, or literature? Is it at the desk? at the bar? in the pulpit? the warehouse? on 'Change? anywhere in the world? Let any naval officer take any two schoolfellows out of the Service in any walk of life, and only consider their relative positions now, and this grievance-mongering must cease.—I am, &c.

PAYMASTER, R.N.

ENGLISH SHIPWRIGHTS IN FRANCE.

Notwithstanding the explanations and denials of the Secretary of the Admiralty that any shipwrights from the Government yards have left this country and taken service under the Government of the Emperor of the French, it appears that Viscount Dungannon intends to call the attention of the House of Commons to an application made at a Metropolitan police-office for a passport by an artizan, said to have been recently discharged from Woolwich yard. Considering how very emphatically Lord Clarence Paget asserted that the reports relating to the exodus of our shipwrights were entirely without foundation, we should be at a loss to comprehend the intention of the Noble Viscount in again bringing this subject before the House, did we not know that the statements of the Secretary of the Admiralty do not satisfy those persons who know anything about this matter. The explanations of the Secretary of the Admiralty upon another subject, viz., that of the stock of available sound timber in our national yards for ship-building purposes, also require to be received with many grains of salt. We fear that the two years' stock in hand is a delusion, and that his Lordship has drawn upon the imagination of his informant for his facts in both instances. But first as to the shipwrights. Now, we will tell his Lordship what we know about them. We know nothing about the London police-office affair; our experience relates to the men in Portsmouth dockyard. For some time past it has been known that agents of the Emperor of the French have been found waiting outside the dockyard gates at dinner-time, when the men leave their work; and when an opportunity occurs, the agent makes his advances, which may be summed up in the following shape—and as we received the terms offered from the lips of one of the shipwrights sought to be hired by the French agent, we make no hesitation in giving it publicity. First then, this man, as well as many others, was offered 6*s.* 6*d.* per day to go to Cherbourg and work in that dockyard; and which sum of 6*s.* 6*d.* per day was described as equal to 8*s.* 4*d.* per day in England. The engagement was to be for twelve months certain, and the passage of the men to and from France guaranteed by the agent. And further, if any of the men were hurt or disabled while in the yard of Cherbourg, they would be sent home to England free of all cost and expenses. And lastly, *no passports were required.* How is this? We also know that many of the men working in Portsmouth yard, belong to the North of England and Scotland, and those belong to the North Country Union. It is these men who have been sought after; and although at present they have resisted the offers made to them, yet they firmly believe, indeed some of them know, that a great many of the artisans, discharged from the different yards in England, have accepted employment in the government yards of France. This statement is further corroborated by the fact that letters have been received from their fellow-workmen, from Cherbourg, Brest, and other ports on the other side of the Channel. Further, it is well known that sawyers are in demand in France, and our informant states that five pairs of those labourers are known to have left Woolwich. This statement we cannot substantiate, but surely the Secretary of the Admiralty might soon inform himself of its truth if he thought proper. We have no doubt about its veracity ourselves, for we know that the North Country Union men hold together with masonic tenacity, and are perfectly well aware where their labour is most wanted and best paid.

And now as to the two years' stock of sound timber, which the Secretary of the Admiralty says we have in hand. We should like to know where it is. If any good and sound timber is stored away in any of our yards, then great blame must attach to somebody, for permitting some of the finest models of ships in the world to be built with green wood—so green, indeed, that it is put into the hands of the shipwright quite moist, as though it had not been a week out of the forest. If we have sound and seasoned wood anywhere, what excuse can be offered for building the Duncan of 101 guns, now in Portsmouth basin, with wood that has shrunk so much, that on trying her screw at moorings with diminished steam-power, her stern-post vibrated so as to require strengthening with crutches and transoms? Again, for want of planking, as we are informed, the bows of the Glasgow, 51-gun frigate, cannot be proceeded with. It is true that just now, after sending half over Europe and America, there is a vessel discharging white American oak, and another landing some African oak on the quay of our chief arsenal; and although the former cargo contains some fine straight pieces, the latter, as far as we can judge at present, is not of a very good quality, yet neither the one nor the other vessel has any compass timber on board suitable for ship frames. Now when we contrast this poverty of building material, belonging to the richest maritime power on earth, with the abundance belonging to France, we are astonished at what our great rival has done, and alarmed at what we have yet to do. While England is sending her agents all over the world for ship timber, and building her war-vessels with green wood, the Emperor of the French has his sheds at Cherbourg, which are eighty feet deep and three-quarters of a mile long, full of superior Italian oak, and doubtless his other yards are as abundantly supplied with the same necessary element of maritime superiority, as ours are bare and empty. And yet the Navy Estimates—ungrudgingly granted by the people of this country—amount to such a huge total as almost to bewilder us with astonishment, which feeling, however, is too often mingled with indignation at its misapplication.

MORTALITY IN THE POLICE FORCE.—Of the 12 or 13 days of average illness in the year, less than one day and a half is from injuries received from violence or accident. Some readers may be surprised to hear how few deaths result from what they are apt to consider the special dangers of the police—from assaults and accidents. These assaults and accidents, together with all diseases whatever, except three kinds, caused only 62 deaths in five years against 155 arising from those three kinds of disease. In the five years from 1852 to 1856, both inclusive, there were 25 deaths from cholera, 41 from fever, and 89 from consumption and other chest diseases. During those years there was not a single death from diarrhœa or dysentery—an evidence of both good diet and temperance on the part of the men.—Miss Martineau in *Once a Week.*

THE MILITIA.

The Northumberland Artillery arrived in Cork on Monday morning from England, with the staff and band, and proceeded to Kinsale, where it is to be stationed for the present.

Two more of the 18-pounder guns on travelling carriages have been sent to Swansea, making a whole battery, or 4 guns, with a proportion of ammunition wagons, at that place. Eight of these guns, or 2 batteries, were sent down last winter to Pembroke docks, and, as there were no sheds to cover them, the carriages, being exposed all that time, and having been constructed of unseasoned timber, have become very much deteriorated, and, unless they are immediately put under cover, will in a short time become useless. A board of survey sat upon them some time since and reported to this effect. A shed large enough for the whole eight guns is in course of erection, but it will be some time before it will be completed.

The 8th depôt battalion was inspected lately by Major-General Sir Frederick Love, K.C.B.; but the weather was so very unfavourable that he could not see them to advantage. Two companies have been sent to Penaly, near Tenby, for rifle practice. This battalion in the hut encampment is very sickly, as, out of about 800 men, there are near 60 in hospital; while the Hampshire Artillery, quartered in the fort, has only about eight or ten out of 400. This may be ascribed to the very bad weather, as hardly a day has passed without continuous rain. The crops are being much injured by it.

West Norfolk. Lieutenant H. J. Warnes, of the West Norfolk Militia, has been attached to the 9th depôt battalion, Colchester Camp, for the purpose of acquiring complete knowledge of drill, in compliance with the War Office Circular.

Antrim Artillery. Lieutenant A. O'Ryan of the Royal Antrim Artillery has resigned the commission he held in this regiment.

The Militia Gazette.

WAR OFFICE, PALL MALL, JUNE 12.

Royal Cornwall and Devon Miners Regiment of Militia—Second Lieutenant Joseph Pomery to be First Lieutenant, vice Edyvean, promoted.

Royal Cumberland Regiment of Militia—Captain Samuel Lacy William Sanderson to be Major, vice Monins, deceased.

Norfolk Artillery Regiment of Militia—Captain James Hay Wodehouse to be Major.

Prince of Wales's Royal Regiment of Renfrew Militia—Henriquez Melheda, Gent., to be Lieutenant, vice Abraham Thompson, struck off the strength of the regiment; Robert Thomas Napier Speir, Gent., to be Ensign.

WAR OFFICE, PALL MALL, JUNE 15.

Royal North Lincoln Militia—Henry Lawson, Esq., to be Captain, vice Golden, promoted.

Royal Cornwall and Devon Miners Regiment of Militia—Lieutenant Robert Edyvean to be Captain, vice Kendall, resigned.

Lancashire Hussar Yeomanry Cavalry—Charles William Bell, Gent., late Lieutenant 15th King's Hussars, to be Cornet.

The Queen has been graciously pleased to accept the resignation of the Commission held by Captain Francis Lepper in the 7th Lancashire Militia.

Worcestershire Militia—John Edwin Winnall, Gent., to be Lieutenant.

Eastern Regiment of Militia Suffolk Artillery Corps—Gerard Thomas Worthington Ferrand, Esq., to be Captain; Edward Samuel Hamersley, Gent., to be First Lieutenant.

Kent Militia Regiment of Artillery—First Lieutenant Crowe (Commission dated 30th May, 1860) should have been gazetted "Stephen Matthew *Crowe*," instead of "Stephen Matthew *Crowet*."

West Essex Militia—Lieutentant Edmund Buckley to be Captain, vice Formby resigned.

West Essex Yeomanry Cavalry—John Dobede Fairman, Gent., to be Cornet, vice Davis promoted; George Edward Pritchett, Gent., to be Cornet.

Norfolk Artillery Regiment of Militia—Matthew Mackintosh, Gent., to be Assistant-Surgeon.

Dumfries, Roxburgh and Selkirkshire Regiment of Militia—James Hatherell, Esq., to be Captain, vice George Gustavus Walker, promoted.

MILITARY UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As you are now "ventilating" the subject of uniform, by which I hope some satisfactory decision will soon be made, some advantage might be gained by collecting the various suggestions, and stating them briefly under separate heads. The suggestions, then, lately made seem to be as follows:—

1. That the nominal crimson sash, but the actual red rope, across the breast should be abolished, and the white leather pouch substituted. Anybody who has seen the two after a wet day's march would decide at once in favour of the pouch.

2. That wings or cords should be restored to tunics; I merely suggest epaulets for dress, cords for undress; the former can be taken off and put on in a moment, and are decidedly the most soldierlike-looking things ever worn; and are quite as much an ornament to the tunic as to the old coatee.

3. That gold-lace stripes should be worn on the trousers for dress, red-cloth for undress.

4. That the peak should be taken off the forage cap. It has been taken off the forage cap of everybody but the infantry officer. It may be dismissed with one remark—that it is a nuisance. The forage cap is continually wanted; it should be capable of going into a courier bag, a pocket, or a shako-case; at present it will go into neither.

5. That mounted field officers should have the cords or braid, as worn by the cavalry or military train, attached to their shakos.

6. That the military cloak with sleeves, instead of the present scanty, ugly, old-womanish cloak, should be worn.

This, I think, is an enumeration of all the improvements lately suggested or desired by officers of the Army. One question only arises: Is there any wish on the part of the authorities, or is there any abstract necessity that infantry officers should be dressed in a more unbecoming, more uncomfortable, or less ornamental manner, than cavalry? Is there any intention of this kind? If there is not, we may hope these suggestions will be favourably considered. They would be conceded to the great delight of the officers concerned; but then the subject should be set at rest. A useful, soldierlike, and becoming uniform for all officers is all that could be desired.—I am, &c.,

PRODESSE ET CONSPICI.

VOLUNTEERS.

METROPOLITAN.

REVIEW OF THE VOLUNTEERS BY THE QUEEN.—We have authority to state that her Majesty has been pleased to intimate her intention to review the Volunteer Corps in and about London in Hyde Park, on Saturday, the 23rd inst., at 4 p.m. As some applications have been received at the War Office from Volunteer Corps formed beyond the metropolitan district to be permitted to attend the review at their own expense, it has been decided that such applications shall be taken into consideration, with a view to the admission, as far as space and numbers will allow, of such corps as may be at an easy distance from London, provided their applications are received at the War Office on or before Monday, the 18th inst., immediately after which each corps will be informed whether it will be possible to accept the offer.

INNS OF COURT VOLUNTEERS.—On Thursday the Inns of Court Volunter Corps, numbering upwards of 300 rank and file, under the command of Lieutenant Colonel Brewster, assembled in the open space of King's Bench-walk, and having been minutely inspected by companies, formed "fours right," and marched, preceded by their band, to the terminus of the South Western Railway, and thence proceeded by train to Barnes, from whence the corps marched past the butt on Sheen Common to Richmond Park. It was intended to have had target practice at Sheen Common, many of the members being very expert marksmen; but owing to the alterations in the butt not being completed, the order was countermanded.

THE LONDON SCOTTISH VOLUNTEERS.—This corps numbers 500 effective members, but not more than 300 are at parade together. Lord Elcho is the Lieut.-Colonel, and Sir David Baird, Bart., has just been appointed Major. The uniform is a light grey, with blue checked band round the cap, and a feather on one side. The cost of the whole is 3*l.* 3*s.* On Wednesday the corps marched through Regent Street, in company with the Volunteer Guards, in full dress, with their helmets and black plumes. The Scottish corps is generally preceded by the pipers of the Scots' Fusilier Guards, as well as by a Volunteer brass band formed from the training masters in the Euston Road Institution. Six of the officers have passed through the rifle-practice course at Hythe, and the rest of the corps began ball practice on Wimbledon Common last Monday. There are six companies. One was raised by the proprietors of the Oriental bank. Another, about 80 strong, is the Highland company, wearing the kilt and Glengarry bonnet. A third, the Central company, numbers 108 men, and is remarkable for its good attendance, there being sometimes between 80 and 90 present. The usual attendance of Volunteers is 40 per cent. The Scotch corps is more advanced as yet in steady marching, wheeling, and firing, than in evolutions requiring rapid activity. But racing, leaping, wrestling, and manly sports of all kinds are much cultivated by the members. The head-quarters are in the Adelphi.

THE NORTH LONDON RIFLES.—Lord Truro has been elected Major-Commandant of this corps, which seems destined to become the chief Volunteer corps in the northern section of the metropolis. A good drill ground has been obtained near Tyndale Place, Islington, where the Volunteers frequently assemble. Lord Truro, in the address which he has issued to the inhabitants of Islington, says:—"Having been elected to the command of the North London Volunteers, I take the earliest moment in my power to invite the attention of the inhabitants of the important and extensive district of Islington to the urgent necessity of promptly and heartily co-operating to raise the corps representing North London to an honourable and commanding position. The parish of Islington numbers 140,000 inhabitants, and a corps of 1000 to 1500 men will alone emulate that wise and rational precaution, not to say becoming spirit, which is manifesting itself from one end of the kingdom to the other. No energy nor industry shall be wanting on my part to raise the corps to that degree of efficiency necessary to render it available for the service of the country. In addressing that sentiment of true English loyalty which reigns in all our hearts, I am confident you will gallantly and generously respond to the call that is made by the Government and the nation—to the youthful part of the population to enrol; to those whose engagements render personal service impracticable, to encourage and assist by contributions and personal influence those who proudly and cheerfullly volunteer to devote time and energy, and, if need be, life, in defence of all that Englishmen and Englishwomen hold dear."—Truro, Major Commandant, Elect.

ESSEX.

COLCHESTER RIFLES.—Sir Claude de Crespigny, the officer in command of this corps, having been chosen Lieut.-Colonel of the brigade formed of several corps in the county, Lieutenant Bishop has been promoted to the rank of captain, Ensign Green to that of lieutenant, and J. F. Osborne, Esq., has been chosen Ensign. The corps is in a most efficient state, and will very shortly commence rifle practice upon an excellent ground, kindly granted for the purpose by J. G. Rehard, Esq., of Wivenhoe Park, and upon which a butt has been constructed at a cost of upwards of 70*l.*

GLOUESTERSHIRE.

BRISTOL.—Sergeant-major P. Campion, late of the 1st battalion, 19th Regiment (now sergeant-major of the city of Bristol Volunteers), previous to leaving his regiment in India for discharge after completing 21 years' service, received a gratifying mark of the respect of his comrades. During the whole of that long period he was never absent from his regiment; he was through the whole of the Crimean campaign; was three times wounded; is in possession of a medal and three clasps for the Alma, Inkerman, and fall of Sebastopol; the Turkish medal, and an annuity of 20*l.* per annum, for distinguished conduct in the field. The sergeants of the 19th regiment determined on presenting him with a small token of their sincere regard previous to his leaving them, for which purpose they assembled in their mess-room, when Quarter-master Sergeant John Coady presented him, in the name of the sergeants, with a massive silver snuff-box, at the same time observing that while they regretted losing him, they had pleasure in knowing that he was materially bettering his position. Sergeant-Major P. Campion briefly but feelingly returned thanks. He now leaves the service with the good wishes of the officers, non-commissioned officers, and privates of his regiment, on discharge and pension of 2*s.* 6*d.* per diem., and has joined the City of Bristol Volunteer Corps as Sergeant-major.

LANARKSHIRE.

2ND AND 3RD BATTALION OF VOLUNTEERS RIFLES.—On Saturday afternoon, General Cameron, C.B., Commander of the Forces in Scotland, inspected the 2nd and 3rd Northern Battalions of Lanarkshire Volunteer Rifles, on a field adjoining Campsie Junction Railway Station. The two battalions, consisting of twelve companies, numbered about 800, officers and men, and including the others who were present, the whole number of Volunteers on the ground would be nearly 1000. Major Reid, 2nd battalion, was commanding, Captain Thomson, adjutant, and Lieutenant M'Call, acting adjutant, 3rd battalion. At the conclusion of the review, General Cameron addressed the battalions, expressing high satisfaction with their progress.

LANCASHIRE.

THE ROSSALL VOLUNTEERS.—On Saturday the members of the 65th Lancashire Rifle Volunteers were sworn in at Rossall before F. Kemp and T. Langton Birley, Esqs. This ceremony deserves more than a passing notice, as this is the first instance of a public school enrolling under the provisions of the Volunteer Act. The successful formation of the corps is principally due to the hearty co-operation of masters and boys. The movement was originated about four months ago by C. H. Croad, Esq., Master of the Modern School, and C. G. Harvey, Esq.; and was organised at a meeting, presided over by the head-master, the Rev. W. A. Osborne. Through the ready courtesy of Lord Sefton the services of a Rossall company were accepted by the Queen in the month of April, and the commissions of the officers bear date from the 27th of that month. The final act, which gives the company a legal existence, took place on Saturday last. After the swearing in, the corps, in full uniform, executed some manœuvres under the command of the captain, and in the evening there was a supper in the great hall. The ceremonies of the day were honoured by the presence of several officers of the regular Army, and by a large muster of Volunteers, officers, and men. On Sunday the corps attended in the chapel, where a sermon was preached by the Rev. T. Phillips, honorary chaplain. The company, comprising the majority of masters and the older boys, numbers upwards of seventy; and there is a second company formed from the younger members of the schools for drill alone. Very few Volunteer corps are better situated for rifle practice than the Rossall Volunteers, since they have a perfectly safe range running down to the sea-shore, parallel to, and a short distance from, the Government range at Heedwood.

MIDDLESEX.

On Saturday afternoon about 200 effectives of the 20th and 29th Middlesex Volunteer Rifle Corps, both belonging to the north-west district of the metropolis, went down, in accordance with previous arrangements, by the North-Western Railway to Watford, for the purpose of having battalion drill in company with the Watford and the Hemel Hempstead corps. The weather up to the period fixed for starting by special train, namely, ten minutes past 4, was almost as bad as it possibly could be, and owing to this cause 60 or 70 of the metropolitan Volunteers did not leave Euston Station till about an hour after; but by the time when the four corps united in Cassiobury Park—a beautiful portion of the domain of the Earl of Essex, and situate about a mile from the Watford Station—the rain had almost entirely ceased, and happily it kept off during the whole of the subsequent drill. The entire force on the ground, including the officers, was, notwithstanding the deterring influence of the weather, upwards of 300, and a large number of the inhabitants of the district were present as spectators. The battalion was under the command of Major Bigge, of the 20th Middlesex, who was ably supported by Captain Ross, of the 29th Middlesex, and the commanding officers of the two other corps; and the evolutions, though not of long duration, in consequence probably of the state of the ground, were highly interesting, and well adapted to prepare those who took part in them for the grand review of the 30th inst. On their departure for London, soon after eight o'clock, the two Metropolitan corps had quite a farewell ovation from their provincial comrades and the assembled crowd. The band of the 29th Middlesex was present to give *éclat* to the occasion. It should be added, in justice to the North-Western directors, that the highest fare charged for the journey to and from London, a distance of between thirty and forty miles, was one shilling.

29TH OR NORTH MIDDLESEX VOLUNTEER RIFLE CORPS.—On Wednesday evening about 120 effective members of the first and second companies of the corps, hitherto known as "The St. Pancras and North Middlesex," but now designated as above, were entertained at dinner by their officers at the Freemasons' Tavern, together with a considerable number of honorary members and other guests chiefly connected with the north-west district of the metropolis. The chair was taken by Colonel Dickson, and among those present were Lord Fermoy, M.P., Mr. E. James, M.P., Mr. Wyld, M.P., Captain Ross, Captain Cameron, Captain Houghton, Lieutenant Lemmon, Ensign Stoneham, Mr. T. Ross, Dr. Hayne, Mr. Goode, and Mr. Austin.

THE 20TH MIDDLESEX (RAILWAY) AND 37TH (BLOOMSBURY OR G.G.B).—On Thursday evening the members of these corps proceeded to the Regent's Park, for preparatory drill for the review, under the direction of Major Brgge, of the 20th, and went through a variety of evolutions in a very creditable manner, marching past in slow, quick, and double time, marching in *échélon*, forming square, &c. The latter of the above corps, despite the rainy weather, met Captain Wilbraham Taylor's corps, the 12th Middlesex, at Barnet, last Saturday, where, with the Hornsey (the 13th), such manœuvres as the weather allowed were carried on. These meetings are of great service, as they accustom the members to act together in large numbers, and induce a spirit of friendship and emulation among the different corps.

MIDDLESEX ARTILLERY.—This corps, which now musters two companies, is progressing very favourable, and new members are joining daily. Her Majesty has been pleased to accept the services of the corps, which is numbered 1 in Middlesex, and 51 in Great Britain. The uniform has been universally approved of, and the whole outfit can be obtained of very superior make and materials for eight guineas. Drill has commenced at the Wellington Barracks.

STAFFORDSHIRE.

21ST COMPANY STAFFORDSHIRE VOLUNTEER'S (RUGELY STRANGERS).—On Sunday morning last, the officers and men of this corps assembled on parade with side arms, in the Horse Fair, for the purpose of attending divine service. After having been "told off" and formed into sections of "fours," they marched to church headed by their brass band, where the Rev. E. R. Pitman, Honorary Chaplain to the corps, delivered a very eloquent discourse. Although the weather was very unpropitious, a vast concourse of spectators thronged the streets leading to the church, both going and returning. Since the arrival of the rifles the non-commissioned officers have been drilled daily in the manual exercise by their drill sergeant in order to qualify themselves to take their respective squads on the re-assembling of the corps which will be on Monday next, at half-past six.

SUSSEX.

The 1st 2nd 4th and 14th Sussex Rifles met at Hayward's Heath last Friday, and marched to Lindfield Common. This being the first time in Sussex that any number of Volunteers had been assembled together there were many spectators from Brighton, Lewis, and other parts of the country.

In the absence of Lieut.-Colonal Moorsom, Captain Meek (the Captain-Commandant of the 2nd Sussex) took the command. The various corps were told off into 8 divisions, and after "marching past" went through all the ordinary battillion movements with great steadiness. The advance in line was particularly good, which with all the other movements elicited the applause of some 3000 spectators.

After nearly three hours drill the whole were marched back to Hayward's Heath and took the railway for respective towns and villages.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JUNE 12.

20th Middlesex Rifle Volunteer Corps—Captain Thomas Edward Bigge to be Major; Lieutenant William Houghton to be Captain; Lieutenant Frederick John Barrow to be Captain; Lieutenant Thomas Dixon to be Captain; Ensign Thomas Henry Tims to be Lieutenant; Ensign James Pearson to be Lieutenant; Charles Sole, Gent., to be Ensign; Martin Ward, Gent., to be Ensign; Thomas Houghton, Gent., to be Lieutenant; Kenyon Clinton Bouchier, Gent., to be Ensign.

31st Middlesex Rifle Volunteer Corps—Lieutenant Richard Mills to be Captain; George James Banke, Gent., to be Lieutenant; William Schwenck Gilbert, Gent., to be Lieutenant; Edward Raban Cave Browne, Gent., to be Ensign.

38th Middlesex Rifle Volunteer Corps—The Viscount Bury to be Captain; Henry Wyndham Phillips, Gent., to be Captain; Arthur James Lewis, Gent., to be Lieutenant; Frederick Leighton, Gent., to be Ensign; Alfred Nicholson, Gent., to be Ensign; John Everett Millais, A.R.A., to be Lieutenant.

Memorandum.—West Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Captain Lawrence Oliphant.

7th Company of the Hampshire Rifle Volunteers—George Steven Butler, Gent., to be Ensign.

8th Hampshire Rifle Volunteer Corps—William Warner, Esq., to be Captain.

11th Hampshire Rifle Volunteer Corps—Andrew Fernie, Gent., to be Hon. Assistant-Surgeon; Alexander Stead, Esq., to be Lieutenant; George Allsop, Esq., to be Ensign.

Kent Rifle Volunteers (22nd Company)—John Staples Keddell, Gent., to be Lieutenant, vice Chapman, resigned.

37th Corps (Battalion)—John Bell, Esq., to be Major. To be Captains—Ralph Oakden, Esq.; Thomas Walton Roberts, Esq.; Thomas Starling Usborne, Esq. To be Lieutenants—Hugh Forbes Smith Marriott, Gent.; John Rolfe, Gent.; Henry Hoare, the younger, Gent.; Thomas Ayerst, Esq., M.D.; John Marshall Hooker, Gent. To be Ensigns—Samuel Tompsett Newington, Gent.; Jesse Piper, Gent.; Henry Jeffreys Farrer, Gent.; Rev. Thomas Henry Cole, clerk; Peter Pinyon, Gent.; George Thomas Tomkin, Gent. To be Hon. Chaplain—Rev. Henry Harrison.

Kent Artillery Volunteers—10th Corps (Battalion)—James Folkes, Gent., to be First Lieutenant, vice Purcell, resigned; James Clark, Gent., to be Second Lieutenant, vice Smith, resigned.

2nd Gloucestershire Artillery Volunteers Corps (Newnham Subdivision)—John Stratford Collins, Gent., to be Honorary Assistant-Surgeon.

1st Battalion of Lincolnshire Rifle Volunteers—The Rev. Edmund Roberts Larken to be Honorary Chaplain; Francis Delaval Walsh, Gent., to be Surgeon.

2nd Battalion Lincolnshire Rifle Volunteers—Robert Shipman, Gent., to be Surgeon.

Northumberland Rifle Volunteers—1st Corps—Lieutenant Alexander Shannon Stevenson to be Captain; Ensign Charles Alexander Adamson, Gent., to be Lieutenant; Ensign Jacob Burnett to be Lieutenant; Hubert Laws, Gent., to be Ensign; Benjamin Bentley Lawton to be Ensign. 2nd Corps—Ralph Errington Ridley, Gent., to be Lieutenant. 3rd Corps—The Hon. and Rev. Francis Richard Grey to be Honorary Chaplain. 4th Corps—The Rev. John Dixon Clark, to be Captain; the Right Hon. the Earl of Durham to be Lieutenant; George Culley, Gent., to be Lieutenant; John Gray, Gent., to be Ensign; Henry Gregson to be Ensign.

18th Lancashire Artillery Volunteers—Charles Ainsworth, Gent., to be First Lieutenant; Robert Winder, Gent., to be Second Lieutenant.

5th Lancashire Rifle Volunteers—Lieutenant Charles Edward Crosbie to be Captain, vice Gladstone, promoted; Ensign Richard George Bushby to be Lieutenant, vice Crosbie, promoted; James Banner Newton, Gent., to be Ensign, vice Bushby, promoted.

69th Lancashire Rifle Volunteers—Henry Tristram, Esq., to be Captain; Charles Valentine Macarthy, Gent., to be Lieutenant; John Archer, Gent., to be Ensign.

2nd Cambridgeshire Mounted Rifle Volunteers—The Rev. John William Taylor, M.A., to be Hon. Chaplain.

5th Cinque Ports Artillery Volunteers—William Betts, Esq., to be First Lieutenant, vice W. P. Jones, resigned.

9th Cumberland Rifle Volunteers—John Fox, Gent., to be Lieutenant; Charles Peile, Gent., to be Ensign; Robert Lumb, Gent., to be hon. Assistant-Surgeon.

8th Cornwall Rifle Volunteers—William Henry Lanyon, Gent., to be Ensign, vice Phillpotts, resigned.

18th Cornwall Rifle Volunteers—John Tyacke, Esq., to be Captain; James Pellow Tyacke, Gent., to be Lieutenant; John Buckingham Kempthorne, Gent., to be Ensign.

Resignation.—8th Cornwall Rifle Volunteers—Ensign William Francis Phillpotts has received permission to resign his commission.

12th Suffolk Rifle Volunteers—John Hayward, Gent., to be Lieutenant; John Keene Sidgwick, Gent., to be Ensign.

15th Rifle Volunteers—Lieut.-Col. Barnard William Cocker, late 38th Foot, to be Lieutenant.

Memorandum—The name of Lieutenant Watson, gazetted on the 5th current, is "Robert John Watson," not "Robert Watson."

8th Argyleshire Rifle Volunteers—Archibald Campbell, Esq., to be Captain; John Campbell, Esq., to be Captain; John M'Arthur, Gent., to be Lieutenant; Duncan Buchanan, Gent., to be Ensign.

10th Argyleshire Rifle Volunteers—James Archibald Campbell, Esq, to be Captain; Duncan Campbell, Gent., to be Lieutenant; James Archibald Campbell, Gent., to be Ensign.

[The following appointment is substituted for that which appeared in the *Gazette* of Tuesday, June 5]:—

1st Staffordshire Rifle Volunteer Corps—Ensign Richard Lovelace Homer Mole to be Lieutenant, vice Sir F. E. Scott, Bart., resigned.

[The following Appointment is substituted for that which appeared in the *Gazette* of the 8th June inst.]

90th Lanarkshire Rifle Volunteers (Glasgow)—James Muirhead, Esq., to be Captain.

[The following Appointment is substituted for that which appeared in the *Gazette* of Tuesday, June 12.]

31st Middlesex Rifle Volunteer Corps—George James Bauke, Gent., to be Lieutenant.

THE VICTORIA RIFLES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Some of your correspondents have favoured the Victoria Rifles with criticism, seldom friendly, and occasionally ill-founded. It has been said that we wear long swords in "steel scabbards," "dress like officers," &c. The corps has existed it is said ever since the disbanding of the old volunteers) in the form of a rifle club; and the cost of maintaining an expensive establishment was cast upon a small number of men; thereby confining its membership to persons of good income, by whose liberality and public spirit it was able to keep alive the germ of the volunteer rifle movement until the advent of better times. To men of this class the consideration of a few pounds in their outfit was immaterial; therefore discarding green baize and slop-tailory, they naturally preferred good clothing, and had their uniforms fitted with the same care that was bestowed upon their ordinary dress. A sword has certainly been worn in the corps for many years; but it is in a black leather scabbard and not in a steel one; while the ornaments on our appointments are of bronze, thus maintaining a marked distinction between the uniform of our private members and the officer of rifles. As almost the only institution of of the kind then in existence, having, moreover, an ample rifle range, a large drill-ground, good staff, armoury, and all needful appliances, ready for immediate use, men came to us so fast that there was no occasion to popularise the conditions of entrance, which, with our already existing connection, tended to promote our recruiting among the same class as had originally supported the corps through the hard times which clouded its youth. At the same time it by no means confined it there, all good men being freely welcomed. The much abused sword is no longer insisted upon as an article of regulation, although many still wear it, especially on first joining the corps. A little time generally shows that it is a mere troublesome appendage, and it is soon consigned to an honourable retirement, from which it is only withdrawn on special occasions. To order the discontinuance of a distinction which custom has so long sanctioned, would be to cast a stigma upon a body of gentlemen who have never done aught that could justify a public censure. Doubtless out of any 600 men there must always be a few simpletons; but I can assure "Esse quam Videri," that, so far from the vagaries he describes being "the fromage" with us, they would be universally reprehended, and could only lead to expulsion from the body. Our uniform has certainly been very closely copied by many of the new corps; so closely indeed that only a practised eye can detect the difference; consequently, as a recognition of our comparative antiquity, the public is apt to set down all very sombre uniforms to the credit of the Victorias. So far from our men courting publicity, they are, as a rule, solicitous to avoid any approach to it, and seem to have an instinctive horror of being stared at. I believe that we have incurred at the hands of our brother Volunteers the charge of being proud and exclusive, because we have hitherto avoided the ordeal of the Saturday's drill in the Parks. Nothing, however, could be further from our intention; and these gentlemen should do us the justice to remember that we have ourselves a ground large enough for a couple of strong battalions to go through movements of an extended nature. Within these we can pursue our military studies free from the annoyance of a crowd, or the intrusion of disorderly spectators. In preferring to work in this quiet way we mean no disrespect to others; and I hope that as soon as the weather assumes a more favourable aspect, we shall be able to invite the neighbouring corps to visit us, and occasionally share in a friendly way those advantages which the difficulty of obtaining similar grounds in the neighbourhood of London has prevented most of the Volunteers from enjoying hitherto. Of course, we are not without a modicum of pride, derived, however, from the consciousness that we have held our own for years, under every disadvantage and discouragement, without the slightest assistance from Government, or from any other source than the voluntary contributions of our own members.—I am, &c. A VICTORIA RIFLEMAN.

VOLUNTEER FACINGS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In my first letter to you, I merely endeavoured to show that scarlet is not a colour specially set apart for the facings of Royal regiments. Your correspondent, "R. C. R.," in last week's number, states that "with all rifle regiments scarlet is the royal facing," meaning of course the 60th and Canadian Rifles, and the Royal Rifle Regiments of Militia, all of whose uniforms are dark green. He then hints that "as Rifles are Rifles, whether in green or grey"—the same rule should apply to regiments of Volunteer Rifles. Now "R. C. R." must admit that cavalry are cavalry, whether in scarlet or blue; and if his argument be correct, the facings of all Royal regiments of that arm should be the same. So far from this being the case, the facings of the Royal Horse Guards are scarlet, those of the Life Guards, 1st, 2nd, 4th Dragoon Guards; 1st and 2nd Dragoons are blue; those of the 3rd, 4th, 5th, 9th, 12th, and 14th Dragoons are scarlet, and the 16th or Queen's Lancers have blue facings.

It, therefore, appears that where the colour of the uniform is dark (as blue or green) the facings of Royal regiments are scarlet, and where it is light (or scarlet) the facings of Royal regiments are blue. These general rules apply to cavalry, infantry, artillery, and engineers.

Having thus shown that the colour of the facings depends upon that of the uniform, and admitting that Volunteer rifle corps, whose uniforms are green, should not adopt scarlet facings, I contend that where the uniform is grey, blue is the proper colour for the facings of any corps of Volunteer rifles which may be made "Royal," and that under the same condition non-Royal corps are entitled to assume the red facings which are worn by the 33rd and 53rd non-Royal regiments of the line.—I am, &c.

RED FACINGS.

[This letter must close the little controversy. If facings are adopted, *permissu superiosum*, the question of the right to wear them must be considered as finally settled.]

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12*s.* each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

THE NATIONAL RIFLE ASSOCIATION.

The arrangements for the approaching rifle competition of the Volunteer corps, and of the best shots of all nations, are progressing very satisfactorily. The ground at Wimbledon has been for some time past in the hands of the contractors, and the whole of the palings enclosing the ground has been erected—the area actually enclosed being about 1200 yards. Beyond this distance the ground will be kept by police. The targets are on the ground, and the butts are completed. The National Rifle Association have received from Enfield 1000 rifles, which have been sent to those of the Volunteer corps that propose sending deputations to the meeting. With scarcely an exception every corps which has been provided with arms, has expressed a wish to be represented, while some others which have not yet been furnished with arms, have desired rifles to be sent down, in order that the best shots among the men might practise with a view of sending their proper proportion of representatives. With each of the rifles lent by the Government there are 90 rounds of ammunition supplied from the Government stores, The prizes already announced are 20 Whitworth rifles, a gold and a silver medal, 250*l.* offered by the Queen, 100*l.* by the Prince Consort, 50*l.* by the Duke of Cambridge, and 200*l.* in money prizes by the Association. In addition to these, the ladies of Northamptonshire have contributed a sum for a further prize; Mr. Crockford, of the Volunteer Service Club, offers another; and the Honourable Artillery Company also propose to give a prize to be competed for. The meeting will commence on Monday, July 2nd, and it is expected that Her Majesty will honour the proceedings with her presence. The whole of the shooting will probably occupy eight days. There are six ranges, and it is proposed, as far as possible, to devote one day to each range. The successful competitors in the first three ranges, viz., 300, 500, and 600 yards, and the twenty next best, will alone compete for the Queen's prize and gold medal, which is to be shot for with the Whitworth rifles, to be given as prizes for the best firing at the short ranges. The winner of the Queen's prize must prove himself the best shot at 800, 900, and 1000 yards. The prize of the Prince Consort, at the long ranges, will be open to all comers, whether Volunteers or not, provided they are the 24 best shots at four ranges of 200, 300, 500, and 600 yards; and may be shot for with any description of rifle not exceeding 10 pounds in weight, and not fitted with hair triggers or magnifying sights. Several deputations are expected from Switzerland; but as the range, adopted at the meetings in that country is little more than 150 yards, the performances of the Swiss at 1000 yards will probably not be so formidable as many persons might be led to suppose who have heard a great deal of the skill of the riflemen of that country, without knowing the range over which it is exercised. The prize of the Duke of Cambridge will be shot for with breech loaders exclusively. The ground will be tastefully decorated with flags. In addition to which Mr. Strange of the Crystal Palace, has engaged to provide eighteen refreshment tents of different classes.

A DISCUSSION ON RIFLED CANNON AND SMALL ARMS.

At the Royal United Service Institution, on Monday evening, June 4th, Colonel Yorke in the Chair, Captain Blakely read a paper on Rifled Cannon. After describing the various methods used in small-arms to prevent windage—the advantage and disadvantage of very long narrow bullets—the amount of twist necessary in the rifling to steady elongated projectiles—and the various shapes of grooves used to give this twist, Captain Blakely proceeded to point out the very slight modifications necessary in the various systems to adapt them to cannon. He instanced the firing of an 80-pounder Minié bullet from a 6½ inch rifled cannon by Mr. John Lawrence, and its attaining a range of 2,595 yards with 5° of elevation, beating Mr. Whitworth's 80-pounder by 95 yards, and Sir W. Armstrong by 300 yards. Nothing was wanting in this gun but strength: it burst after 40 rounds. Mr. Bashly Britten tried a system very similar, but with the advantage of a shell instead of solid shot. The guns rifled by him were excellent in every respect except one—they, too, wanted strength. The bursting of the Cavalli and of the Lancaster guns was alluded to, and that of Mr. Whitworth's 4-inch gun with sides 9-inches thick in 1857, and of another with sides eleven and a half inches thick in 1858. From the success of many of these systems since tried with cannon made strong enough, Captain Blakely argued that it must have been owing solely to the difficulty of obtaining strength that cannon were not rifled earlier than they were. He next reminded the audience of the endeavours made in 1855 and 1856 to forge cannon—of the hundreds of thousands spent at Woolwich to try to cast stronger iron—of the trial of steel at enormous cost—and finally of the universal adoption of the present method of building guns of concentric tubes, each compressing that within it, so that all must share in the resistance. Diagrams were exhibited of the exact way in which this is carried out in France, in Sardinia, by Sir William Armstrong and Mr. Whitworth. Captain Blakely then argued that the Whitworth gun owed its success to its being thus strongly built; to its having the degree of twist adapted to the length of projectile, and to wonderful accuracy of manufacture; but in no way to the hexagonal form of the rifling. In guns of this shape, he said, when iron shot was used, the degree of friction could never be foretold. Captain Blakely mentioned that he had lately obtained at 5° of elevation a range of 2,670 yards from a 48 cwt. rifled gun. This form of rifling acts only tangentially, and when pressure is absolutely necessary to turn the shot. It was adopted simultaneously by several persons, —by Mr. Ingram, of Glasgow, the first manufacturer of steel barrels in this country; by Mr. Sillen, one of the partners of the firm who made Captain Blakely's cannon; by Captain Hayes, R.N., and probably by others. Captain Blakely invited discussion on the question of the proper length of bullet for military small-arms, expressing his own opinion that efficiency at moderate range should not be sacrificed to the attainment of very long ones. He concluded by calling attention to the expediency of making the best of our stock of cast-iron 32-pounders, which could be rifled immediately, and strengthened at leisure. A lengthened discussion ensued.—*Mechanics' Magazine.*

BREECH-LOADING RIFLES.

It will probably be a long time ere breech-loading rifles are used in the Service. The State has spent enormous sums of money in establishing works for the manufacture of arms upon the old system. Our system of drill is adapted to the old system, so are our feelings and prejudices. The experience of sportsmen shows that breech-loaders do not shoot so strongly as pieces loading at the muzzle; and it has been therefore inferred that breech-loading rifles will present similar inferiority. It is evident, however, that with proper mechanical skill all escape of gas could be prevented, and combustion be made as rapid and effectual in a breech-loading gun as in a muzzle-loader, so that the same result would be produced, unless there was some radical defect in the principle of breech-loading. If so, the advantages of breech-loaders, in facility of loading in various positions, and even in safety, not to speak of the more doubtful gain of rapidity of firing, are so great that nothing but vested interests or prejudices can stand in the way of their adoption.

There are two breech-loaders which possess great claims to attention—the American breech-loading rifle, and Thomas Wilson's breech-loader. We do not presume to say that there are not other rifles, such as Leetch's, which do not overcome, more or less successfully, all objections to breech-loaders: but we merely state our own opinion after an examination of several descriptions of these arms. In Wilson's, as in Storm's gun, the principle can be applied to the present stock of muzzle-loaders; but it strikes us that Wilson's has the advantage in simplicity and convenience of handling. A rifleman, lying close to the ground, can load and fire the gun some five or six times in a minute; and, standing up, he can discharge a ball every six or seven seconds. Messrs. Rabone Brothers, and Company, of Birmingham, are manufacturing rifles which are in all respects fit for service, and which can be had at a price very little greater than that of the ordinary Enfield. It would require a somewhat close inspection to detect any difference in its appearance from that of the ordinary arm. All unsightly knots and bosses, or projecting bulbs of levers are dispensed with. A simple bolt behind the cock liberates the breech, which is drawn out in a line parallel with the bore of the barrel, so as to receive the cartridge, and is then pushed forward into its place and bolted securely. The rifle can be used with the ramrod as a muzzle loader if required. The whole breech can be removed immediately for the purpose of cleaning or inspecting the barrel with the greatest ease by the fingers alone, and it can be returned to its place with equal facility.

The shooting is said to be as strong as that of the ordinary Enfield; and it is not in the power of the clumsiest or most careless hand to derange the mechanism.

If ten riflemen armed with muzzle loaders were placed in opposition to ten riflemen armed with Wilson's breech-loaders, we do not hesitate to declare that an enormous advantage would, *cæteris paribus*, be possessed by the latter in loading and firing, and that they could secure themselves against exposure whilst in the act of loading, with so much greater ease than their opponents, as to give them eventually a certain, almost a mathematical ratio of superiority.

If, as we have said, the range be the same as in the muzzle loader, we recommend all Volunteers who are about to purchase their arms, to satisfy themselves on that point—and if, as we have reason to believe, there is no difference, the question is decided absolutely in favour of the breech-loader. The military authorities have approved of it; but we can scarcely hope that breech-loading arms will be introduced into the Army, until their superiority has been plainly manifested in the field.

Any Enfield rifle can be converted by the patentee's assistance, and the work can be made entirely by machinery.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD.

On Monday next, at three o'clock, the annual public meeting of the Soldiers' Daughters' Home will be held at the United Service Institution, Whitehall Yard. We wish, without instituting any comparison between this excellent body and any other association which has for its object the care and education of children of our soldiers and sailors, to say a few words in favour of so excellent an institution. The proprietors may well term it a national work, although it is not done by the nation, which, indeed, seems less inclined at the present period to maintain the legitimate offspring of its soldiers and pensioners than it was 45 years ago. In 1815, there were upwards of 600 soldiers' daughters maintained at Chelsea and at Dublin out of the Public Funds. In the present year there is not one, although the the Crimean War, the Indian Mutinies, and the ordinary casualties of service, must have deprived many poor children of their fathers.

The Committee point to the 120 applications, in proof of the need of such a work. They again and again repeat, that there is no other asylum in the kingdom for the daughters of the whole army. The Royal Victoria Patriotic Asylum (not yet built) is limited at present to the orphan daughters of soldiers who died in the Crimean war; it will eventually be open to girls made fatherless in other wars, but they must be orphans. The Caledonian Asylum admits the daughters of Scotch soldiers, but they too must be orphans, or the daughters of disabled Scotch soldiers. The Royal British Female Orphan Asylum, at Devonport, is the only institution that is open to all soldiers' daughters, without any other restriction than that they must be orphans. In short, for the fatherless daughter of a soldier there is some hope; but for the motherless girl, or for the girl whose father is on active service, there is no hope whatever except at Hampstead.

"God is our Refuge and Strength, a very present Help in Trouble."—Such is the motto of the Home, inscribed over the entrance-porch. The soldier's motherless daughter has indeed found the Lord to be her refuge and very present help in her time of trouble. The father at the seat of war, the mother in the grave; where was then the daughter's home? The Committee can answer that 45 motherless daughters, many of whose fathers are now in India, have found a home at Hampstead. "I entreat you to save my daughter," was the manly appeal of a widowed soldier from the Crimea; "she has lost her mother, who died in barracks at Dublin; and I dread to think of what may become of her at her age," (13) "left without a mother or father in a crowded barracks." The Committee can thank God for the safety of this girl at Hampstead. "What shall I do with these three poor things?" asked the widowed father of three little girls, on his being ordered to the seat of war. He brought them to the office, and stated that when he embarked, his daughters, not being considered orphans, would not be admitted into an orphan asylum, nor had they a friend in the world. These girls are safe at Hampstead. There are many touching instances of the genuine charity of the poor towards the poor, which have been brought to light by inquiry amongst the soldiers' families:—

Two motherless daughters of a soldier of the 90th Regiment, now in India, are maintained by their grandfather, aged 74, and grandmother, aged 68, both very poor. A motherless boy of a soldier of the 97th Regiment, now in India, is maintained by his grandfather, a pensioner, aged 75. Four motherless children of a soldier of the 92nd Regiment, now in India, maintained by their uncle. A motherless child of a soldier in the 20th Regiment, now in India, entirely supported by the wife of a soldier in the Royal Artillery, who has a family of her own. This poor child is blind of one eye, and of a very delicate constitution. A motherless child of a soldier of the 23rd Royal Welsh Fusiliers, now in India, maintained by the wife of a pensioner of the 23rd, no relation whatever. Two motherless children of a soldier of the 3rd Battalion Rifle Brigade, maintained by their grandmother, a very poor person indeed. Three motherless children of a soldier of the Royal Engineers, now at the Cape, maintained by their grandfather and grandmother, very poor persons. Two motherless children of a soldier of the 82nd Regiment, now in India, maintained by their grandmother, a very poor person. Many more instances might be mentioned; but these, the Committee trust, are sufficient to urge the real friends of the soldier to "go and do likewise," by increasing the annual income of the Soldiers' Daughters' Home.

The following Copy of the Report made by H. M.'s Inspector upon the occasion of his late visit to the School is ample proof of the excellent way in which the Institution is conducted.

"Hampstead Soldiers' Daughters' Home, Inspected 6th April, 1858.—The Soldiers' Daughters' Home is an institution of great value and usefulness. The girls are entirely boarded and maintained. They are not all orphans, but have lost one parent. They receive a good plain education, and are intelligent and not ill-informed, considering the previous circumstances of the greater number. Great care is taken to train them for all kinds of domestic service, the household work, the laundry included. The Institution is supported partly by endowment, partly by voluntary subscriptions. The schoolmistress is certificated, and the schools have invited inspection, but, unfortunately, no annual grants can be made under the minutes of the Committee of Council."

When it is considered that in less than four years this national asylum has been founded, endowed, and permanently established on its own freehold property, and is out of debt; that since the first year of its institution there never have been less than 100 inmates (now 165); and that all this has been done without the help of a Royal Commission to raise funds, and without any assistance whatever from Government—the Committee can appeal with confidence to the public, and say that they at least have done their duty.

The Soldiers' Daughters' Home is still the only asylum in the kingdom for the daughters of the whole British Army; the Commissioners of the Patriotic Fund have indeed very wisely followed in every respect the good example set them by the Committee of the late Central Association, and have set apart a portion of that noble fund for the erection of an asylum at Wandsworth for 300 girls, the daughters of soldiers and sailors. But this asylum is not yet completed, nor will it be open, in the first instance, to any but the daughters of Crimean soldiers and sailors, nor will the number of soldiers' daughters admitted be as large as that already admitted into the Soldiers' Daughters' Home, because at least one-half of the 300 girls will probably be the daughters of sailors. We trust that the soldiers who have means, and who feel for the children of their men, will, if unable to be present, at least contribute to the funds of this institution. The strictest martinet cannot object to the institution on the ground that it encourages matrimony, for it only recognises the legitimate offspring of soldiers who have married with permission, and are on the strength of the regiment.

THE FRENCH NAVY.

M. de Kervèguen at one the last sittings of the Corps Legislatif called attention to the necessity of augmenting the cadre of the French fleet. The establishment consists at present of 2 admirals in time of peace, and 3 in time of war, 12 vice-admirals, 24 rear-admirals, 110 captains, 230 commanders, 650 lieutenants, 550 junior officers. Can war be made, it is asked, with such an establishment?

It was found in the Crimean and Italian wars necessary to reduce the staff of officers of men-of-war by one half, and to diminish the staff in frigates and smaller vessels. It is necessary, therefore, says *Le Moniteur de la Flotte*, to take as a point of departure, not the situation of peace, but the state of war. Does France wish for a war navy? If so (and the efforts to increase her redoubtable fleet prove that she does), the *personnel* of the fleet must be augmented.

In effect the *Moniteur de la Flotte* demands an increase of the navy. It demands 130 captains, 270 commanders, 900 lieutenants, and 600 or 700 junior officers. The journal also demands the abolition of leave on half-pay, which it considers a remnant of bereaucratic barbarity. We can scarcely determine whether the desires and propositions we have thus briefly stated are those of M. de Kervèguen, or of the *Moniteur de la Flotte*; but assuredly the quarter in which they appear gives them a peculiar interest and significance.

We read at the same time that at Cherbourg the greatest activity is displayed upon the Normandié, which will be masted this week. She will be armed at the stem and stern with a sharp trenchant mass of steel, with which, says the *Moniteur*, she can cut a ship in two. The Seine, steam-transport, has left Toulon with an immense quantity of provisions for Rèunion, where the Chinese wounded and invalids are to be sent. She carries also a large staff of commissariat and medical officers. Admiral Parseval-Deechênes will be buried this day at the Invalides.

HOUSE OF LORDS.—Friday.

CAST-IRON RIFLED GUNS.

The Earl of Camperdown asked the Secretary for War what number of cast-iron guns have been rifled and delivered to the Navy; by whose advice cast-iron guns have been hooped and rifled, what have been the result of the experiments upon the cast-iron guns so treated, and whether the Ordnance Select Committee were consulted on the subject and approved the rifling of the guns? The noble Earl stated that he understood the professional advisers of the Government had warned them against these guns, and prophesied that they would all burst at the breech; but, notwithstanding, they had been cast, and when they were tried, sure enough they all burst at that point. Doubtless, after such a result, any contracts into which the Government had entered would be cancelled; but considerable expense must have been unnecessarily incurred. It was difficult to make out who at present was Director-General of Artillery. No one knew whether it was the Commander-in-Chief, the Secretary for War, or Sir William Armstrong. The position of the last named gentleman was an anomalous one; for it was understood that he was a Government contractor, and yet he was called upon to report on inventions which came into competition with his own. That was hardly fair.

The Earl of Ripon said that for obvious reasons he must decline to state what number of guns had been delivered to the Navy. As regarded cast-iron rifled cannon, none had been given out. In this answer Armstrong guns were not included. It was true that some cast-iron rifled cannon had been submitted to trial, and that they had all burst. No contract had been entered into with respect to them. The noble earl seemed to labour under some misconception of the duties of the Ordnance Select Committee. It was their duty to examine and report on inventions to the Secretary for War; but it was no part of their functions to determine what inventions should be subjected to trial. Sir William Armstrong was not a contractor of the Government. He had no profitable interest in the iron-works which supplied the Government with the Armstrong guns. He had, it was true, lent some money to the proprietors of some other iron works, for which he held security and received interest, but the Government received nothing from these works.

HOUSE OF COMMONS.—Friday.

DEFENCES OF THE COUNTRY.

Mr. Osborne wished to know when the noble lord (Palmerston) intended to call the attention of the House to the report of the Commissioners of National Defences, and whether he meant to propose that the whole sum of eleven millions should at once be provided.

Lord Palmerston thought it better to reserve all explanation on the subject until he was prepared to state the course which the Government would recommend the House to pursue with reference to it.

Mr. Osborne asked the noble lord to name a day.

Lord Palmerston said he would name a day when Members' minds were prepared for the discussion.

TELEGRAPH TO GIBRALTAR.

Colonel Herbert called upon the Government to lay before the House the report of the commissioners appointed to inquire into the merits of various schemes for the submarine telegraphic cable to Gibraltar.

Mr. M. Gibson said that no commissioners had been appointed to investigate the subject, but some scientific gentlemen had been employed for that purpose, and when their report was ready it should be laid upon the table.

DISTURBANCES IN NEW ZEALAND.

Lord Alfred Churchill requested the Under Secretary for the Colonies to state what information had been received respecting the recent disturbances in New Zealand, whereby Her Majesty's forces had been brought into collision with the native tribes; and also what course Government intended to pursue. The noble Lord expressed an opinion that Colonel Murray should be called upon to offer some explanation of his conduct on the occasion.

Colonel Dickson hoped that no premature opinion would be formed of the conduct of Colonel Murray. It was difficult to form a correct opinion, in the present state of information, as to the proceedings of an officer placed in a very difficult position.

Mr. Fortescue said, that he could add nothing to the statement of facts which appeared in the newspapers. He concurred in the propriety of abstaining from passing any opinion on the conduct of Colonel Murray, until the Government should be in possession of more information.

Mr. Adderley said that if the colonists were left to their own resources they would easily defend themselves. In the recent disturbances Her Majesty's forces did nothing.

Captain Jervis defended the conduct of Colonel Murray. He was ordered to retire from the jungle before dark, in order to prevent his men from being surrounded and overpowered.

Mr. Childers was assured that when further accounts

Digitized by Google

arrived from the colony it would appear that the troops were deserving of all praise.

Mr. Sidney Herbert said that the account which Colonel Murray gave of his proceedings, showed that he had acted in strict accordance with his orders.

ARMY MEDICAL OFFICERS.

Colonel Lindsay moved, that an humble address be presented to her Majesty, praying that she will be graciously pleased to reconsider the 11th clause of the Army Medical Warrant of October, 1858, as far as relates to its retrospective application to the medical officers at that time serving in the ranks affected, having due regard to the efficiency of the public service. The gallant officer contended that the warrant operated with great hardship upon surgeons who were just on the point of reaching a period of service which would have procured them promotion and a higher rate of retiring pension.

Mr. Sidney Herbert said it was impossible to go back in a case of this kind. In all changes cases of individual hardship must occur, which must be endured for the sake of the general advantage. Compulsory retirement was less prejudicial to medical officers than to any other class of persons, for they usually set up in private practice; and it was remarkable that on entering the service, medical officers generally stipulated that they should be at liberty to retire at a period earlier than that at which compulsory retirement commenced.

The motion was withdrawn.

FORCES IN INDIA.

On the motion of Colonel Sykes, returns were ordered showing the number of commissioned officers of each grade and regiment of Her Majesty's British Forces serving in India, between the 1st day of January, 1857, and the date of the latest returns, who have, between those dates, preferred applications for exchanges into regiments serving at home or in the colonies, the number who have obtained such exchanges, the number whose applications have been negatived, and the number who remained applicants for such exchanges at the date of the latest returns; and showing the number of commissioned officers of each grade (staff and regimental) serving in India between the 1st day of January, 1857, and the date of the latest returns, and belonging to Her Majesty's British Forces, who have been, between those dates, ordered home or to the colonies for service there at the public expense, the number ordered to India to replace them at the public expense, and the total sum charged against the Indian revenue upon those accounts.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.

EDITED BY W. H. RUSSELL, ESQ., LL.D.,

(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.

On Monday and Wednesday Evenings THE SERIOUS FAMILY. After which OUR FEMALE AMERICAN COUSIN; Miss Julia Daley (the American Actress). To conclude with DINORAH.

On Tuesday, TO PARENTS AND GUARDIANS. After which OUR AMERICAN COUSIN. To conclude with BIRTHPLACE OF PODGES.

On Thursday, a new Drama. Commence at Seven.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly, Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, ruck, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Militarp Outfitters, 353 and 378, Strand, London, W.C.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums. The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4 4 0
Tenor Drums, 20 inches, transparent heads	2 7 0
Brass Side Drums, 14 inches	1 8 0
Regulation Drums, brazed shell, as supplied to the Army	2 2 0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2 5 0
Oak (polished) Side Drum, 14 inches	1 5 0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0 8 6
D or E flat ditto	0 6 6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1 1 0
No. 2, Light Infantry Model	1 8 0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42s., or strongly electro-plated, 63s.; green cord and tassels, 3s. 6d.; silk ditto, 8s.; enamelled leather case, with strap and buckle, 12s. Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

PAUL PILGRIM is diffuse, but he is also sensible, and we hope to put his remarks in type next week.

L. O. P.—They are ready, but we cannot say if they have been issued.

Whatever be the result, no one connected with Volunteers, or the Army, or the Navy, can deny that plenty of time and space in Parliament and in the Press has been devoted to them this week. We have the report on National Defences—a most important document; we have had two debates on the Navy at considerable length. We have abundant work cut out for the Volunteers, and several debates on topics connected with the Services. The pressure on our columns is so great that we have in vain endeavoured to meet it, and now it only remains for us to indicate to our extremely obliging and numerous Correspondents the necessity imposed upon us of limiting materially the space we have hitherto set apart for their communications. On all occasions we are anxious to hear from them as heretofore when they have anything to say, but they must not be disappointed if they find that their communications are not inserted when they relate to questions already much discussed, or when they exceed a column and a-half.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 16, 1860.

Whoever believes that an official body will reform itself, except under considerable pressure from without, must have had his delusion dispelled by the result of Admiral Duncombe's motion on Tuesday last, in which he endeavoured to obtain a select committee to inquire into the mechanism and machinery of the Board of Admiralty.

In spite of an ex-First Lord's questionable eulogium, that the transaction of business at the Board was more rapid and satisfactory than at any other of the numerous public offices into which political exigencies have thrust him, doubt, distrust, and dissatisfaction are daily increasing in the public mind regarding that mystical establishment. But a more perfect one for carrying out political corruption, and amphibious nepotism, could hardly be devised. It is time-honoured—whoever dares to assault it is excommunicated for his irreverence toward the venerable pile, associated as it is with our greatest glory. Scandalous abuses, and rottenness of system, are adroitly parried as being ungenerous attacks on distinguished and deserving public servants. And an accomplished seaman Secretary comes forward, handkerchief in hand, claiming for his self-sacrificing Lords the privilege of interposing between an ungrateful Commons and the outraged feelings, and we might almost say broken hearts, of old and valuable officers: one might have almost imagined that Mr. T. P. Cooke had appeared as Secretary for one night only, or that the scene was transformed to the boards on the Surrey side.

Were this exhibition of feeling downright it would be laudable; but as its only downrightness is its dishonesty, it is painful in the extreme; and the oily speech and adroitness with which it is made is simply nauseous, especially when it comes from one who was known to hold advanced opinions on these matters—at any rate until he donned the official gabardine.

The debates of Tuesday and Thursday on Naval matters were chiefly distinguished by ignorance of the subjects under discussion, and excessive timidity in handling them. Members have not yet mustered up courage to divest themselves of that gentlemanly delicacy which, in dealing with the Admiralty, they will be ultimately, however reluctantly, compelled to abandon. The pith of Thursday's debate may be thus briefly noticed:—On the grounds that "at present promotion in the Navy is almost at a standstill," and that "our system of half-pay for the Navy is in a complicated and most unsatisfactory condition," the Board, feeling they must do something through their Secretary, introduced a frivolous and temporary measure of relief, and apologised for the same by saying that it was unfortunately impossible to produce a comprehensive and permanent one—he might have added, without the establishment of a Standing Navy, as a national, instead of a political, institution.

Be it remembered, however, as the ex-First Lord truly remarked, that the only cause of this present complication and inefficiency is, that successive Boards "have never had the courage to deal with the subject upon broad and permanent principles." But the feature of the evening was the adhesion of Sir M. Seymour to the ex-First Lord's scheme of promotion and retirement, which, he said, "met his general approval, and he should be glad to see it carried out." For, faulty as that scheme may be, inasmuch as it does not go far enough, and is not assimilated with a Standing Navy, and an effective and working list of officers, it is a substantial step in the right direction; and we only regret that this subject has not added another to the four inquiries at present existing on naval matters.

It may be here noted that the ex-First Lord dwelt on the necessity of another inquiry, relative to the position of naval captains. We mention this to show that, in addition to the four existing inquiries, the necessity of three more has been demonstrated within a few days, and that whilst the Commons are not yet in earnest on naval matters. This in a measure shows the universal distrust of Admiralty affairs, and the sturdy sense of Admiral Duncombe's motion, to inquire into the constitution and working of the Board, in which all the existing evils have their being.

It is not necessary to recapitulate the shortcomings of the Board, which as the Secretary remarked, in a patronising tone, were not thrust forward by the mover of the motion in an unfriendly manner;—thereby endeavouring, as he did throughout his defence, to make all these attacks personal on the individuals who represent the system, or want of system rather, than on the system itself.

The public are now pretty generally aware of what they do not get for the trifling sum of 13,000,000*l.*—what they do get perhaps they could not so clearly define—unless it is the blessed privilege of watering those patrimonial pastures with periodic deluges of public money.

But we will consider the case substantiated of the plaintiff, and hear what the defendants have to urge, that their ministration shall not become the subject of public inquiry.

In the first place we are told that there is an inquiry going on relative to the constitution of the War Office, and that it is therefore advisable to wait the report of that Committee—thereby in a measure assenting to the necessity of inquiry; but insinuating the expediency of delaying it. This is something gained, at any rate.

Secondly, it was assumed that the object of the motion was to allow a naval instead of a civil chief to wield the military-maritime power of the largest marine in the world. This we have always *held* to be absolutely necessary, and the arguments of the Secretary confirm that opinion—after a preamble about coffee and chemistry, which would have been insulting to the sense of the House, save that a certain amount of latitude is allowed when a member of the Government is put up to trail a red herring across a breast-high scent of corruption. The Secretary, in speaking of the military duties of the Board, said that they had the means of acting with suddenness and secresy—"It is perfectly within the constitution of the Admiralty that the First Lord should order the movements of the fleet."

It is on these grounds we protest against the absurdity of placing like power in the hands of every stray political whom party exigency may waft into the military command of our fleets and destiny. Either it is necessary for the head of a profession to be brought up in it, and make it his study—that is, if he is to wield the power entrusted to him with efficiency—or else there is no reason why the woolsack should not be in possession of a court favourite, or the see of Canterbury awarded to a successful general.

The Secretary then remarked that "all promotions and appointments to ships of every description are in the hands of the First Lord of the Admiralty." How far the stray politicos may be qualified to dispense their patronage, the reader must judge for himself. He then produced the hackneyed but truthful argument, that a naval chief would have numerons friends and followers, and consequently would be apt to perpetrate great injustice to large bodies of officers in dispensing the nautical patronage of the country. We quite agree with him that under the present system it would be a great evil, but this is easily overcome by abolishing all patronage whatever,—all promotions being made by seniority, save Board promotions for brilliant service before the enemy, and the death vacancies on foreign stations being awarded to the seniors serving on those stations.

But the real difficulty lies in this, that neither the Government nor Opposition will ever abandon the vast preserve of Admiralty patronage, unless powerful and eloquent pressure be brought to bear on them by the Commons.

Dockyard boroughs, lucrative contracts, social influence, the disruption of the amphibious families who batten on the Admiralty, the paralization of one of the main levers of Parliamentary power—who could

contemplate the agonising severance of these Roes and Does of the sea without emotion?

Not the least remarkable characteristic of these debates has been—that though all were cognisant of the rottenness of the Admiralty—no one offered a substitute for the present system.

For ourselves—holding the reconstitution of the Admiralty, the separation of the quick and the dead in the so-termed active lists, and the embodiment of a Standing Navy, as integral parts of a whole—we conceive that to develop and wield the maritime power of the country with anything like the efficiency of which it is capable, the Navy should be governed by a Naval chief with a seat in the cabinet, assisted by a Board of Admiralty, of which he is the acknowledged and responsible head; that he should be chosen by the Cabinet from the active list of flag officers, and hold office for five years during peace, irrespective of parties; during war longer, if the State deem it advisable; but amenable, as all other grades of the Service should be, to compulsory retirement at 60.

The Board would be composed of five sea Lords, of which the Comptroller would be one, chosen under the same conditions as their chief—one going out by rotation every year.

Two parliamentary secretaries would introduce the estimates and attend to parliamentary duties.

We might then hope that something like order would prevail, instead of the chaos produced by continued change which successive First Lords bear witness to as an eternal source of evil, as they seldom remain in office sufficiently long to become *au fait* at the ordinary routine business,—much less to master the multifarious branches of the Service which they must administer. And on these premises we urge more than ever the attention of the Commons to naval matters, and the expediency of, before all things, establishing a Select Committee to inquire into the constitution of the Board of Admiralty. Sooner—and if so better—or later—and then well if not too late—it must come.

The great Volunteer Inspection by Her Majesty in Hyde Park next Saturday, will not only be the most brilliant sight of the season, but the most impressive witnessed during the present generation. The arrangements are in the hands of Colonel M'Murdo, to whose judgment and energy Her Majesty and the public may look forward with the utmost confidence for a successful spectacle, and about 25,000 Volunteers will be under arms on the occasion. The formations and movements to be gone through will be of necessity very simple, as the most experienced troops to the number we have mentioned could not hope to go through any complicated or elaborate manœuvres within the available space in Hyde Park. There will be no firing or marching past in slow time. The general arrangements as regards the position of the spectators will be exactly similar to those made at the first presentation of the Victoria Cross by Her Majesty. The Volunteers will be drawn up facing Park Lane in a line of contiguous battalion columns, at quarter distance, that is, within an interval of six paces between each. Her Majesty will arrive on the ground at four o'clock, and will proceed along the line, inspecting each corps in succession, and will then take her place at a point about the centre of the line of spectators facing the Volunteers, who will then march past at quick pace in quarter distance column. Having returned to their original position, the whole force will advance in line to salute. This will complete the ceremony.

All branches of the Volunteer service will be represented. The Duke of Manchester and Colonel Loyd Lindsay will each command a body of mounted Riflemen, and the Artillery will be formed into a brigade under the command of Lord Colville, the Colonel of the Honourable Artillery Company. The general arrangements of the brigades must, to a certain extent, depend upon the regiments likely to arrive from the provinces, but as regards the corps belonging to the metropolis and its vicinity, the following will be the order adopted:

The whole metropolitan force will be formed into 20 battalions, each numbering from 500 to 1200 men. They will be divided into five Brigades, commanded respectively by the Duke of Wellington (Victoria Rifles), Colonel Hicks (London Rifle Brigade), Lord Ranelagh (South Middlesex), Lord Elcho (London Scottish), Colonel Tulloh (Woolwich). These Brigades will be thus composed, viz., 1st Brigade, the Duke of Wellington, Brigade Major, Major G. Hume. 1st battalion, commanded by Major Whitehead, consisting of the Victoria, 8 companies, 18th Middlesex (Harrow), 12th Middlesex (Barnet), and 16th Middlesex (Hounslow). The 2nd battalion, commanded by Lieut.-Colonel Lindsay, comprising the 11th (St. George's), 36th (Paddington), and 28th (Irish). 3rd battalion, commanded by Lord Radstock, 9th (Marylebone), 3rd (Hampstead), and 14th (Highgate). 4th battalion, commanded by Captain Alexander, made up of the 20th (Euston Square), 29th (St. Pancras), and the 4th, 5th, 6th, 7th, and 8th, (Islington). This Brigade is expected to number about 2,400 men.

The 2nd Brigade, Lieut.-Colonel Hicks. 1st battalion, Major Close: 1st and 2nd City of London brigade. 2nd battalion, Major W. Gray, 26th (Custom-House), 37th (Holborn), 39th (Clerkenwell), and 40th (Gray's Inn); 3rd battalion, Lieut.-Colonel J. S. Walker: 1st, 2nd, 3rd, and 4th (Tower Hamlets). The numbers expected to be comprised in this Brigade are 2,250 men.

3rd Brigade, Lord Ranelagh. 1st battalion, Major MacPherson: 2nd (South) Middlesex; 2nd battalion, Lord Grosvenor: 22nd (Queen's Westminster); 3rd battalion, Lord Bury: 21st (Civil Service), 38th (Artists), and 23rd (Inns of Court). This Brigade will probably muster 2100 Volunteers.

4th Brigade, Lord Elcho. 1st battalion, Captain Mackenzie: 15th (Scottish), 19th, and 32nd; 2nd battalion, Lieut.-Colonel Macdonald: 1st Surrey (Camberwell); 3rd battalion, Major Beresford: 19th and 22nd Surrey (Lambeth), 21st Surrey (Battersea), 7th Surrey (Southwark), and 10th (Bermondsey); 4th battalion, Lieut.-Colonel Campbell: 2nd Surrey (Croydon), 4th (Brixton), 6th (Esher), 8th (Epsom), 9th (Richmond), 11th (Wimbledon), and 12th (Kingston). Upwards of 2500 Volunteers are expected to form this Brigade.

5th Brigade, Colonel Tulloh. 1st battalion, Lieut.-Colonel Anderson: 26th Kent (Royal Arsenal); 2nd battalion, Lieut.-Colonel Parkyn: 26th Kent (Royal Arsenal); 3rd battalion, Lieut.-Colonel Thorold: 3rd Kent (Lee), 4th (Woolwich), 7th (Kidbrooke), 13th (Greenwich), 18th (Bromley), 21st (Lewisham), 25th (Blackheath), 27th and 34th (Deptford), 28th (Charlton), and 32nd (Eltham); 4th battalion, Major Capper: 5th Essex (Plaistow), 9th (Silvertown), and 8th (Stratford). This Brigade is expected to muster about 1900 altogether.

Should the weather be fine, the spectacle presented in Hyde Park will be one of which Her Majesty, and her Volunteers, and her people may be mutually proud.

We hear a good deal of dissatisfaction expressed at the steps taken by the authorities in placing regiments at Aldershot under canvas in such wet weather as that which has prevailed up to the present, and we regret still more to hear that one of these regiments, the 55th, exhibits a far greater amount of sickness than usual in consequence of its subjection to this very unnecessary trial. It is very well to let regiments rough it a little in the summer, but though this is the 16th of June, we do not presume that any one would be disposed to call it summer weather. The 55th is in every respect one of the most efficient regiments in the Service, and if it be knocked up by exposure of this kind it will be very unfortunate. The 1st battalion of the Coldstream Guards went down in the torrent of rain of yesterday morning, a telegram from General Knollys recommending the postponement of their journey having been received just too late to prevent their departure.

Thursday was the public day at the Royal Military College, Sandhurst; and it is gratifying to find from the report of the Examination that the education bestowed upon the Cadets is in a state of progressive advancement. Fifty-seven Cadets were reported as sufficiently advanced in their military training to be allowed to compete for the twenty commissions without purchase, which had been announced to the cadets as the prizes to be won, as rewards for their ability, zeal, and good conduct. To the first twenty on the list these prizes have been awarded; and of them, the lowest obtained upwards of 4100 marks. Twenty-six obtained more than the minimum qualification for a commission by purchase, namely, 1800 marks; but so hard had been the exertions of the cadets to come within the successful number, that twenty out of the twenty-six gained more than 3000 marks, the qualifying minimum for a commission without purchase, and several were but very little below some of the first twenty in the number of their marks. It is, therefore, much to be regretted that more commissions without purchase were not available. Eleven only failed. One cadet of the first twenty had only been two terms of study at the institution, so that ability and zeal are sufficient to carry a cadet through the college in one year; and when this is considered, it is surprising that many more of these gentlemen, who desire to enter the Army early in life, do not go to Sandhurst at the age of sixteen, as by so doing they would be able to obtain their commissions at seventeen, and that very probably without purchase, whilst a year passed at a military college would send them to the Army richly stored in useful professional knowledge, and in part prepared to compete at a future day for the Staff College.

In the papers presented to the House by Mr. Baring, Lord Canning's elaborate plan for the organisation of the Indian Army in amalgamation with the Army of the Queen did not appear; but we have now laid upon the table of the House a recent dispatch from his lordship, in which he maintains a view that a local European Army is desirable, if not absolutely necessary. Of course these conflicting opinions must greatly embarrass the actions of the Government, and it is scarcely possible for them to offer a stronger argument for a local army than that of Lord Canning, who is the head of the army of India as well as Governor-General and Viceroy. It is strange enough, that whilst Lord Canning was at Simla, inditing his last dispatch, the Commander-in-Chief was engaged in showing that the views of the Viceroy were untenable. Lord Canning foresaw that an amalgamation of the local army might be found too difficult for adjustment, and he adheres to his opinion that there should be an army devoted to India. He differs from the Queen's officer in thinking that the recent misconduct of the European Army in Bengal is not a sufficient reason for abolishing it, and he adduces many arguments for the maintenance of a force, which, after all, he believes impossible to raise speedily, or officer efficiently with our present means. This new element in the Indian Army question increases the difficulties which, no doubt, will be found numerous enough by the Government when the debate shall be resumed next week.

Major-General Eaton Monins, who was with the 52nd at Waterloo, and has seen a good deal of colonial service, has been gazetted to the Colonelcy of the 8th Regiment, vice General Macneil, removed to the 78th Highlanders. Major-General Maunsell, who will succeed to the 93rd, served in the Peninsula, and was at San Sebastian, the passage of the Bidassoa, and the battles of Nivelle and Nive. In the American war he was slightly wounded at Bladensburg, and severely at New Orleans. In both appointments, the principle of selection has been on the whole very fairly exercised by the Commander-in-Chief.

We have much pleasure in stating that Colonel Sir Alfred Horsford, K.C.B., will be the new Deputy Adjutant-General in succession to Major-General Forster. The appointment is an excellent one. Sir Alfred has well earned it by substantial service; no one is more fitted to discharge the duty, and the officers of the Army will not feel less pleasure in transacting business with one of the most accomplished and deservedly popular members of their profession.

His Royal Highness the Duke of Cambridge, it appears is not desirous of leaving his present regiment, the Scots Fusilier Guards; and Lord Clyde will accordingly be gazetted to the Coldstream Guards, in succession to the late Earl of Strafford.

We hear that a draft report upon the organisation of the Military departments has been prepared by Sir James Graham, and will be submitted to the Committee at its first meeting next week.

The amalgamation of the Queen's and the Indian Army which we announced some months since in these columns, was submitted to the House of Commons on Tuesday evening by Sir Charles Wood, who moved for leave to bring in a bill to repeal so much of the Act of Parliament as enabled the Secretary of State for India to raise men in this country for her Majesty's local European Forces in India. The right hon. baronet stated that the measure which he proposed to lay upon the table consisted of a simple repealing clause. This course he had adopted from a desire to obtain the opinion of the House upon the question of principle involved. He thought it right to state that the Council for India had not given its approval to the scheme, for it was but natural that they would be indisposed to part with the power they now possessed; but they had stated frankly and fairly that if the views of the Government were confirmed by the decision of Parliament they would faithfully endeavour to carry them out. The question, therefore, upon which he now desired to take the opinion of the House was, whether a separate European force should be maintained for local service in India, or whether the whole of the troops in that country should form part of the Queen's army for general service? The recent disaffection amongst the Company's European forces in India, and the consequent peril which it occasioned to our empire in the East, were no doubt mainly attributable to the fact that the troops were irremovable. To prevent such dangerous combinations in future, therefore, and for military efficiency and political safety, he had arrived at the conclusion that the European army of India ought to be one with the Queen's. Sir Charles Wood explained at great length the changes which his measure would entail in the organisation of the Indian army, and concluded by expressing a hope that the House would allow him to bring in the Bill and take the discussion upon the second reading. Lord Stanley, Mr. Horsman, and several hon. members, however, objected, on the ground that the Bill was of far too much importance to be disposed of in a summary manner. On the motion of Mr. D. Seymour, the debate was eventually adjourned until Thursday week.

Outfit for China.—The authorities have decided on supplying the troops proceeding to China, with what are commonly called cholera belts. Throughout the East it is the custom of the native to cover the base of the spine and the abdomen with thick folds of cotton or woollen cloth and shawls, and our officers and men soon learn to follow their example. Turk, Greek, Persian, Afgan, Hindoo, all who can afford it, wear the cummerbund. We doubt whether what are called cholera belts might meet the requirements of our soldiers, and we would prefer to see them provided with belts of a more substantial kind, such for instance, as those made by Elstob for volunteers and huntsmen, and which we presume could be provided at a very moderate cost. We learn from experience that good water is rarely to be met with in the interior of China away from the great rivers, and we cannot but think that a large supply of charcoal filters, which are very small and portable, might be sent out, at least for the use of men in hospital.

The Commander-in-Chief of the Mediterranean fleet has dispatched reinforcements to the ships on the coast of Syria, in order that British interests may be duly protected.

THE ADMINISTRATION OF THE BRITISH ARMY.

In the *Spectateur Militaire* there has appeared a series of articles on the constitution of the armies of France and England, which present some matters worthy of consideration for us all, even though they be placed before us from a French point of view. It is to be observed, that recently all the professional papers in France have addressed themselves to the consideration of our military and naval systems with great earnestness, and with more or less success. Those which treat of our Army, start from the premises that we are in a bad way, and that India completed the work of disorganisation which the Crimea began, as they say, "under our eyes." Earl Grey could not be more energetic and distinct in his denunciations of the evils of our system and its rottenness than Chef d'Escadron Martin of "His Imperial Majesty's Dragoons." Nothing, he says, is more unworthy of a great nation than those periodical panics and those cries of alarm which agitate Great Britain when the smallest cloud passes over the political atmosphere. We will not submit to the true democratic institution of the Conscription, which subjects all citizens alike to the same obligation, though it certainly is a heavy blow to individual liberty; and we despise the condition of a soldier so much, that few but beggars or outcasts will enter our ranks; whilst our officers must have money to pay for their steps, or see themselves condemned to remain for years in the same position, or advancing with exceeding slowness. Will we, he asks, consent to "dis-aristocratise" our ruling class in the Army, and popularise the Service in its lower ranks? If not, we are invited to consider what will become of our free institutions, of which we are so proud, in case that England, owing to her obstinacy, shall share the fate of Carthage and of the Italian Republics, of which she represents at this day the riches and the mercantile spirit? In France the Army represents the greatest glory of the nation: in England it is only one of the heaviest charges on the Treasury. The Budget is considered by us a sort of premium paid to the Services to insure the trade and commerce of the country against all injury. Of course the system of voluntary recruiting seems full of inconvenience and fatal weakness to a French officer of dragoons. But, in pointing out the evils of the complicated and unwieldy machinery which we constructed out of the pieces of our shattered organisation in past days, the squadron-chief is in his element, and in some measure in his right. He finds admirable matter for astonishment in the conflicting departments of our war administration as it existed at the time of the Crimean war; and he does not cease to find defects and perplexing contradictions in the working of the machinery which was subsequently introduced.

Having gone in detail through all the various offices of the Horse Guards and of the War Office, explained their scope and set forth their functions and expenditure, the author comes to a matter which possesses special value and interest.

Taking the expense of the department of the Secretary of State at 4,000,000 francs, that of the Commander-in-Chief at 380,000 francs, and that of the civil employés and the expenses of the Horse Guards at 434,000 francs, he remarks that the French Army is about twice the size of the English; and that it is with legitimate satisfaction France sees the expenditure of her military establishment is only half the sum required in England. The Minister for War unites the command of the Army to his ministerial functions; 530 employés suffice for the whole work, and in case they are military men they only receive the regular pay. The expense of the French administration of the army for 1860 is 2,268,000 francs.

Recognising the difficulties of a reform in the direction of our military system, Major Martin points out as the most prominent defects in our administration, its want of unity and want of simplicity.

Napoleon said that one middling general was better than three good ones in command of an army. In the case of our army, the writer thinks there is no chief at all; for instance, the command of a corps is one of the most important questions that can present itself, the appreciation of the fitness and ability of a commanding officer would seem to be exclusively one for the decision of the military authorities; but it is the administrator of the Army who makes the choice in England, and his sole obligation to the Commander-in-Chief is to tell him on whom his choice has fallen. In fact, the Commander-in-Chief is only nominally the chief of the Army; but has the Minister the supreme and uncontested authority? Not at all. He can stop or control the initiative of the Commander-in-Chief where he cannot substitute his own; but by the elevated rank of the Commander-in-Chief, by the nature of the power he holds from the Crown, the Commander-in-Chief can often evade the action of the Minister; the power of forbidding cannot imply the idea of command in a military sense, unless when it is united with the right of ordering. To avoid the evils of this vicious system, the Minister, the Commander-in-Chief, the Adjutant-General, the Quartermaster-General, and the Under Secretaries meet in a sort of committee; but one authority responsible only to Parliament, and another authority which is only responsible to the Crown, stand face to face, and action is only rendered possible by mutual concessions. In fact, a conflict between these authorities must produce incalculable evils.

The Commander-in-Chief may be an excellent soldier: the Minister is, probably, a civilian, who has never seen a shot fired. Our author remarks, that it would be very curious to see a soldier chosen to succeed a bishop or a judge.

But, a soldier aided by an enlightened clergy, or an honest magistracy, might discharge the functions of a bishop or a judge, whilst, according to the system of Great Britain, a Napoleon or a Marlborough might see his plans opposed and frustrated by a Minister, whose sole merit was being a good Whig or Tory.

We might ask M. Martin, however, whether the Minister of Religion and Public Instruction in France must be a priest or a schoolmaster? He maintains that, as the military profession does not receive due honour in England, our best men do not enter it, and whilst admitting the excellence of some of our military chiefs, he maintains that, if the aristocracy of birth and of fortune have their place at the head of the British Army, the aristocracy of talent seeks out other walks.

From all this it follows that England does not choose her ministers, her diplomatists, or her ambassadors, among her generals, and that the military men who sit in Parliament, much more expert in defending an entrenchment than in meeting a Parliamentary assault, enjoy but little consideration.

In France the system is clear, precise, and simple; in England there is continual change, confusion, and perplexity. In France, commissions are appointed only to study new questions; in England their object is to inquire into facts which all the world knows. Imagine for a moment, he exclaims, the War Office receiving 350,000 letters in the year, of which a good number came from its neighbour, the Horse Guards! All this explains the indescribable panics which continually agitate England to the profound astonishment of all the rest of Europe. The evils which oppress the English army are so great, that nothing but a complete change can relieve it; but M. Martin doubts whether the English people would permit the change. These opinions are expressed with great clearness in the papers referred to. On the whole it is well worth while to take a glance at our Army through our neighbour's spectacles.

THE UNITED STATES NAVY.

The Navy Register of the United States for the year 1860, containing all official information with respect to the United States' Navy, has just reached us. We have endeavoured to epitomise its contents, and now place the abstract before our readers.

The Secretary of the Navy is the head of the executive, and enjoys a salary of 8000 dollars.

There are 12 clerks and two messengers, the highest salary of the clerks being 2200 dollars, and that of the assistant-messenger, 700 dollars.

The next office is the Bureau of Yards and Docks, whose chief gets 3500 dollars; and the lowest salary in the department is that of the messenger, who receives 840 dollars. There are five clerks, a civil engineer, and draughtsman.

The Bureau of Construction, Equipment, and Repair, has a chief (salary, 3500 dollars), eight clerks, and a draughtsman, one messenger.

To this office is attached an engineer-in-chief (at a salary of 3000 dollars), and two engineers at 600 dollars.

The Bureau of Provision and Clothing has a chief (at a salary of 3500 dollars), five clerks, and a messenger.

The Bureau of Ordnance and Hydrography, a chief (who gets 3500 dollars), four clerks, a draughtsman, and a messenger.

The Bureau of Medicine and Surgery, a head (who gets 3500 dollars), a passed assistant-surgeon, two clerks, and a messenger.

The following is the organisation of the Navy Department:—

There are 79 captains on the active list, and 19 on the reserve; 114 commanders on the active, and 16 on the reserve. Of lieutenants there are 325 active, and 35 reserve; surgeons, 69 (who rank with lieutenants), and 37 passed assistant-surgeons, who rank next after lieutenants. There are 42 assistant-surgeons, who rank next after masters; pursers, 64 ranking with commanders, 37 ranking with lieutenants; of chaplains there are 23; professors of mathematics, 11; masters (active list) 34, and those not in the line of promotion, 10. The midshipmen, graduates of the Naval Academy, arranged according to merit in their respective classes (49). At the Naval Academy, Annapolis, Maryland, there are acting midshipmen on probation, divided into 4 classes. Of the first class there are 25 members; the second, 39; the third, 57; and the fourth, 117. The list goes on to enumerate the petty officers, of which there are boatswains, 41; gunners, 46; carpenters, 46; sailmakers, 42.

The marine corps is then enumerated, which consists of a colonel-commandant, a general staff, a lieutenant-colonel, 4 majors, 13 captains, 20 first lieutenants, and 20 second lieutenants.

The engineer branch of the navy consists of 174 engineers in all; 24 chief engineers, 36 first assistants, 23 second assistants, 92 third assistants.

There are 11 permanent navy agents, 1 temporary; 12 naval storekeepers, and three officers in charge of naval stores for foreign squadrons.

There are 9 naval contractors, an agent for the inspection, test, and purchase of hemp, at a salary of 1000 dollars, and 8 agents for the preservation of live oak and other timber, 1 at a salary of 2000 dollars, 4 at 1000 dollars, 1 at 500 dollars, and 2 receive no salary.

The Naval Academy at Annapolis has a very full staff. There is an Academic Board, and a long list of professors.

The list gives the officers employed on special services, namely, the treasury department, the lighthouse inspectors those on duty with the late exploring expedition to Behring's Straits, the North Pacific and China seas, as well as those connected with the Nautical Almanack, under the Bureau of Ordnance and Hydropathy. The officers of the navy attached to the Coast Survey are also enumerated.

The vessels of war of the United States' Navy consist of 10 ships of the line, of which the Pennsylvania, 120 guns, 3241 tons, is the largest.

The frigates number 50, of which the Congress, 50 guns, 1867 tons, is the largest.

The sloops, 21 in number, of which the Cumberland and the Savannah are the largest; they carry 24 guns, and are 1726 tons each. There are 3 brigs, 3 store-vessels. There are 4 permanent store and receiving ships, of which the Independence is the largest; she is 2257 tons.

There are 7 screw frigates, of which the Niagara is the largest; she carries 12 guns and is 4580 tons.

Six first-class steam-sloops, of which the Lancaster, 22 guns, 2360 tons, is the largest.

Four side-wheels, the Susquehanna being the first in point of size, 2450 tons, 15 guns.

Then come eight second-class steam sloops, of which the Pawnee is the largest, 4 guns, 1289 tons. There is one side-wheel of this class, viz., the Fulton.

Of third-class steamers there are 5; of side-wheel, 4; 2 screw tenders, and Stevens's war steamer, described as having 6 guns, and of no less tonnage than 4683. She was commenced in 1842, at Hoboken, New Jersey.

The navy yard and shore stations are Portsmouth, Boston, New York, Philadelphia, Baltimore, Washington, Norfolk, Charleston, Pensacola (Florida), Sacketts Harbour (New York), San Francisco (California), Valparaiso, Panama.

The squadrons consist of the home squadron, 13 vessels; the Mediterranean, 2; the Pacific, 8; the Brazil, 6; the African squadron, 9; the East Indian, 6.

The pay of the United States Navy is regulated by Acts of Congress. It is as follows:—

The senior captain, on service, gets 4500 dollars; on leave of absence or waiting orders, 3500 dollars. All other captains, when in command of squadrons on foreign stations, 4000 dollars; or other duty, 3500 dollars; off duty, 2500 dollars.

Commanders or masters-commandant, for sea-service, get 2500 dollars; navy yards or other duty, 2100 dollars; on leave of absence, 1800 dollars.

Lieutenants-commanding have 1800 dollars; on other duty, 1500 dollars; waiting orders, 1200 dollars.

Assistant-surgeons, waiting orders, 650 dollars; at sea, 950 dollars; after passing for surgeon, 850 dollars; at sea, 1200 dollars; at navy yards, hospitals, &c., 950 dollars; after being passed and stationed as above, 1150 dollars.

Surgeons, for the first five years after commission, 1000 dollars; for the second five years, 1200 dollars; for the third five years, 1400 dollars; for the fourth five years, 1600 dollars; and after twenty years and upwards, 1800 dollars. All surgeons under orders for duty at navy yards, receiving-vessels, rendezvous or naval hospitals, get an increase of one-fourth. On active service in ships the pay is increased one-third.

Fleet surgeons have the annual pay increased one-half.

Chaplains, 1500 dollars on duty, and 1000 on leave.

Professors of mathematics' pay is 1500 dollars on duty, 800 on leave.

Secretaries to commanders of squadrons, when commanding in chief, 1000 dollars; when not commanding, 900 dollars.

Masters of a ship of line, on duty, 1000 dollars; on other duty, 1000 dollars; on leave of absence, or waiting orders, 750. The second masters get, in order of the above three heads, respectively 750, 500, and 400 dollars. The pay of passed midshipmen is, on duty, 750, and when waiting for orders, 600 dollars.

The warranted masters' mates, sea-service, 450 dollars; on leave of absence, or waiting orders, 300 dollars.

Midshipmen on sea-service have 400 dollars; on other duty 350 dollars; and on leave of absence or waiting orders, 300 dollars.

Clerks of a yard, 900 dollars. First clerk to a commandant of a navy yard, 900 dollars; second clerk to a commandant, 750. To commanders of squadrons, captains of fleets, and commanders of vessels, 500 dollars.

The pay of pursers is, for ships of the line, 3500 dollars; frigates, 3000; sloops or steamers of the first class, 2000; brigs, schooners, and steamers less than first class, 1500; at navy yards, 2500; naval stations within the United States, and other places, 1500. And for the first five years after date of commission, 1000 dollars; for the second, 1200; and for the third five, 1400 dollars.

Chief engineers, for the first five years, for sea-service, 1500 dollars; navy yards, 1500; on leave of absence or waiting for orders, 1200 dollars. In these divisions the first assistant engineer has 1000, 1000, and 850; the second assistant, 800, 800, and 600; and the third, 600, 600, and 400 dollars.

The engineer-in-chief on a foreign station gets 3000 dollars.

The firemen of the first class have 30 dollars per month; and the second class, 25 dollars.

Coal heavers, 18 dollars.

Boatswains, gunners, and carpenters, who have not served one year at sea, 900; for sea-service, 700; for navy yard, and other duty, 600 dollars on leave, or waiting for orders.

These rates of pay are increased 2 per cent. for such full year of sea-service, and a further addition of 10 per cent. upon 900 dollars is allowed in ships having 400 men, and 20 per cent. with 900 men.

Yeomen in ships-of-the line, frigates, sloops, and smaller vessels, get 45 to 24 dollars a month. Armourers, 30 to 20 dollars a month.

The mates attached to the (not warranted) masters, boatswains, gunners, carpenters, sailmakers, and armourers, have from 25 to 20 dollars per month. Masters-at arms get monthly 25 dollars; the ships-corporals, 24; the coxswain, 24; the quartermaster, 24; the quarter-gunners, 24; the captains of forecastle, tops, after-guard, hold, from 24 to 20; coopers, 20; painters, 20; stewards, from 30 to 24; cooks, 24 to 20; masters of the band, 20; musicians, 15 to 12 dollars; seamen, 18; ordinary seamen, 14; landsmen, 12; boys, 8, 9, 10 dollars monthly.

NATIONAL DEFENCES.

A Royal Commission was issued last August to inquire into "the present state, condition, and sufficiency of the fortifications existing for the defence of the United Kingdom, and to examine into all works at present in progress for the improvement thereof, and to consider the most effectual means of rendering the same complete, especially all such works of defence as are intended for the protection of the royal arsenals and dockyards, in case of any hostile attack being made by foreign enemies both by sea and land."

The report of the Commissioners, dated February 7, 1860, is published this week.

In the outset of the report the Commissioners state their opinion that a fleet alone is insufficient for the defence of the United Kingdom. The introduction of steam and other causes have operated to our disadvantage. (The importance of an efficient Channel Fleet is, however, fully recognised.) The consequent necessity for protecting dockyards is, therefore, laid down. The difficulty of preventing the landing of an enemy is admitted, and the Commissioners proceed to consider the means of defence against an enemy when landed. Our regular Army is, and must always be, small, and the Volunteers could not at first be able to meet the regularly disciplined soldiers of continental armies on anything like equal terms.

"Having carefully weighed the foregoing considerations, we are led to the opinion that neither our fleet, our standing Army, nor our Volunteer forces, nor even the three combined, can be relied on as sufficient in themselves for the security of the kingdom against foreign invasion. We therefore proceed to consider that part of our instructions which directs our attention especially to fortifications. The objects proposed to be obtained by fortifying any place are, to enable a small body of troops to resist a superior force which may attack it, or to enable partially-trained bodies of men to contend successfully with those more perfectly disciplined than themselves. There seems no reason to doubt that such troops as may be got together from the disembodied or less perfectly trained portion of the militia, with local or other Volunteers, would, with an admixture of regular soldiers, be able to defend our dockyards against very superior numbers, when fortified with due regard to these principles."

The Commissioners indicate that either an increase of the Army or fortifications is absolutely necessary, and they compare the cost of the two :—

"A large permanent increase to the regular Army, taking into account pay, clothing, provisions, barracks, pensions, and all other expenses, would involve an annual charge to the country which may be calculated at from 60,000*l.* to 70,000*l.* per one thousand men. This sum would be irrespective of the expenses of raising the men, which we take at 11*l.* a man, and of the necessary increase to barrack accommodation, which on the present scale would amount to at least 100*l.* a man; making a first charge of 111,000*l.* per one thousand men, and an annual charge of 60,000*l.* to 70,000*l.*

"We do not express an opinion as to the permanent increase to the Army which would be necessary under the circumstances supposed. It would, however, cost upon this calculation about eight millions at the outset, and nearly four millions annually afterwards, to double the number of regular troops now at home, viz., about 66,000 men, exclusive of the Indian depôts; and this would not be an extraordinary increase if the aid of fortifications were to be rejected.

"The same eight millions expended in fortifications would be far more effectual for the defence of the dockyards than any such increase of the regular Army, would incidentally provide barrack accommodation for some thousands of men, and would entail no future annual charge, beyond a small sum for maintenance, and the expense of embodying the substitutes for regular troops, whether Volunteers, Fencibles, or Militia, for three weeks' training; which could not much exceed one-twentieth of the cost of an equal regular force."

It is laid down that we cannot fortify the whole assailable portion of the coast, and that fortifications should be restricted to vital points. The Royal Dockyards are vital points.

"Woolwich, which is at present our only great depôt for munitions of war, whether for land or sea service, and the place in which these stores are produced, must also be considered a vital point. It is difficult to over-estimate the consequences of the loss, or even of a temporary suspension of the operations of that great arsenal, as at present constituted, during a state of war. It would be felt throughout the empire. Lastly, we consider the Harbour of Portland, from its situation and capabilities; that of Dover, from the position which it occupies; and that of Cork, the naval station of Ireland; to be points requiring more or less special consideration with respect to fortifications for their protection."

As to the defence of London the Commissioners say :—

"The defence of London has not been brought under our consideration, and it is therefore only necessary to point out that it does not materially affect the conclusions we have arrived at with regard to the fortification of the dockyards. If London were placed in such a state of defence as to render an attack on it improbable by an enemy established on shore, even in such force as to be able to hold in check any army that could be brought against him, an invader's attention would then be turned to the dockyards and arsenals, as by the destruction of these he might hope to annihilate the naval power of the country, and deprive it of further means of resistance. If, on the other hand, London cannot be rendered capable of resistance after the defeat of the army in the field, the dockyards and arsenals, if fortified, become places of refuge from which the defence of the country can be protracted or means of resistance organised; and unless these are capable of resistance, our naval means fall with the capital, and the whole power of the nation is practically in abeyance. Indeed, the fortification of the dockyards and arsenals by land would aid materially in the defence of London itself; for whilst by means of the system proposed the vital points of the empire would be protected against either capture or bombardment, the fortifications by land would set the manœuvring army free to operate against the enemy."

There are some works of defence now in progress.

"During the last two years, more especially, plans of fortification, involving an ultimate expenditure of about a million and a half sterling, have been sanctioned by Parliament for works of considerable extent at Portsmouth, Plymouth, Pembroke, and Portland; and contracts have accordingly been entered into for the construction of those defences, which are now in active progress, and to which we will more particularly refer when considering the defence of each of these places."

The Commissioners do not recommend stationary floating batteries, but moveable floating batteries are approved of.

The following is laid down as the principle on which the proposed defensive works should be constructed.

"The nature of the works which we propose for defence against a naval attack, will of necessity vary according to the locality. We have proposed open batteries, secured against a *coup-de-main* by a tower or defensible barrack in their rear, wherever they could be made to answer the object desired; but where the sites were so circumscribed as not to afford sufficient space for the requisite amount of fire, and in cases where great expense must be incurred in constructing foundations on shoals, it is absolutely necessary that sea batteries should be casemated, so as to obtain by tiers of guns, as nearly as possible the same effect that is produced by open batteries extended over a considerable length of shore."

"The works should be so designed as to be defended by a small body of men against a *coup de main*; but that they should at the same time have capabilities of resistance that will enable them to withstand any attack likely to be brought against them. With this view they should be provided with redoubts at their gorge, by means of which an enemy would be prevented from holding the work if he should succeed in obtaining partial possession of it. The main ramparts should be capable of affording a heavy fire of artillery and musketry in those directions over which an enemy must make his approach; and bomb-proof cover should be provided for the garrison. In situations where the ditches can be filled with water, no revetment need be constructed; but, wherever this is not the case, they should either have escarps and counterscarps or detached walls of Masonry; and in either case they should be flanked both by artillery and musketry."

The next question is the cost.

"The amount of our special estimate is 10,390,000*l.*; of which sum 1,885,000*l.* is for the purchase of land, 7,005,000*l.* for the fortifications we recommend for erection, 500,000*l.* for the armament of works, is shown below, and 1,000,000*l.* for floating defences. To this must be added 1,460,000*l.* for works already sanctioned and in course of execution; the whole amounting to 11,850,000*l.*, as detailed below."

Place.	Recommendations of the Royal Commission.		Already authorised, but not voted.	Total.
	Purchase of Land.	Erection of Works.		
Portsmouth	£330,000	£2,070,000	£400,000	£2,800,000
Plymouth	755,000	1,915,000	350,000	3,020,000
Pembroke	450,000	450,000	165,000	765,000
Portland	100,000	150,000	380,000	630,000
Thames	50,000	180,000	Nil.	180,000
Medway & Sheerness		400,000	Nil.	450,000
Chatham	180,000	1,170,000	Nil.	1,350,000
Woolwich	300,000	400,000	Nil.	700,000
Dover	20,000	150,000	165,000	335,000
Cork	—	120,000	Nil.	120,000
Armament of Works	—	—	—	500,000
Floating Defences ...	—	—	—	1,000,000
Total	1,885,000	7,005,000	1,460,000	11,850,000

"It is to be observed that the above sum includes the provision of barrack accommodation, for the most part bomb proof, for about 30,000 men, with all the space and conveniences provided for troops under ordinary arrangements; and for nearly double that number when the works are fully garrisoned for defence. This accommodation must have been equally provided under any other system of defence, and is already urgently required in many of the places it is proposed to fortify.

"Judging from works for which contracts are already undertaken, those which your Commissioners recommend may very well be executed in three years; but it would be desirable to allow three years and a quarter for the completion of the whole, in order that contractors may have the benefit of the months from April to June, inclusive, in the fourth year. The payments would therefore extend over four years; and the reserves, which may be taken at 5 per cent. on the entire estimate, would not be paid until after the completion of the contracts.

"It is probable that the land would be paid for, two-thirds in the first year, and one-third in the second. As regards the works themselves, the expenditure on their account will no doubt be less in the first year than in either of the other two, both because of unforeseen delays which might take place in particular instances, and on account of the nature of the work that would be performed at the outset, which, consisting chiefly of excavations, is less expensive than the building part of the fortifications.

"The entire expenditure may be apportioned as follows—

		£	£
1st year :—			
For works proposed	Land	1,250,000	
	Works	1,300,000	
For works already sanctioned		500,000	
For floating defences ...		500,000	
For armaments		125,000	
			3,675,000
2nd year :—			
For works proposed	Land	635,000	
	Works	2,361,000	
For works already sanctioned		760,000	
For floating defences ...		500,000	
For armaments		125,000	
			4,381,000
3rd year :—			
For works proposed ...		2,361,000	
For works already sanctioned		200,000	
For armaments		125,000	
			2,686,000
4th year :—			
For works proposed ...		983,000	
For armaments		125,000	
			1,108,000
Total			£11,850,000

"With respect to works of land defence which mutually support one another, such as those with which it is proposed to surround Portsmouth, Plymouth, and Chatham, we conceive that the following principles should be adhered to :—

"1. That each work should have its principal salients and flanks partially armed, even during peace, a very few guns will suffice for this purpose.

"2. That there should be in reserve in each work, but not mounted, unless the perishable carriages and platforms will be under cover, as many more guns and carriages as will extend the protection of the flanks and faces to what we would term a war armament, as distinguished from a siege armament.

"3. Lastly, that there be a general reserve, in some convenient central depot in each position, of a further number of guns and carriages sufficient to complete the armament of any one of the fronts of attack to its maximum or siege establishment, together with the proper proportion of every description of store to effect repairs and replace casualties.

"The magazine accommodation, the provision of store-room, and the conveniences for filling shells and fixing fuzes, should be calculated generally for the siege armament.

"Your Commissioners now proceed to submit a concise statement, in tabular form, of the number of guns, amount of barrack accommodation, and probable expense of all the works they have recommended, together with similar information respecting those in progress :—

Station.	Guns.		Barrack Accomodation, chiefly Bomb-proof.		Expense of Works, including Purchase of Land.

"We have now completed the task assigned to us by your Majesty's Royal Commission, to the extent of our present instructions; reserving only, for a subsequent Report, the question of an internal arsenal. We submit our unanimous recommendations to your Majesty's gracious consideration, with a firm conviction that their adoption will place the power of this country, for self-defence, on a par with its other elements of greatness and strength; will give security to its industry and commerce; afford a guarantee for the maintenance of peace; and add a new glory to your Majesty's reign.

"Witness our hands and seals, this 7th day of February, 1860.

(Signed) "HARRY D. JONES, Major-General.
"D. A. CAMERON, Major-General.
"GEO. ELLIOT, Rear-Admiral.
"F. ABBOTT, Major-General.
"A. COOPER KEY, Captain R.N.
"J. H. LEFROY, Colonel R.A.
"JAS. FERGUSSON."

"WM. F. DRUMMOND JERVOIS, Major R.E., and Assist. I.G.F., Secretary."

In the remaining part of the report the Commissioners point out in detail what fortifications they consider it advisable to erect.

They take Portsmouth into consideration first. For defending the entrance to the harbour little is required, they consider, beyond the existing batteries at Blockhouse Fort, the Point Battery, and the batteries connected with the right of the old Portsmouth Lines, together with Southsea Castle. As a further defence for Portsea Island, the shores of Stokes Bay, and the coast, the commissioners recommend that Cumberland Fort should be fully armed, but they are satisfied with the rampart already in process of construction connecting the left flank of the land defences in front of Gosport with Fort Monckton near Gilkicher Point. The existing defences, however, do not suffice for the security of the anchorage at Spithead. After discussing the various schemes that have been suggested for defending Spithead, and after discarding a proposal for a permanent barrier across the Horse Sand, they recommend that the casemated forts, which it has been already proposed to construct on the Horse Sand and No-Man's-Land Shoals, be proceeded with; also that a work should be constructed between that on the Horse Sand and Portsea Island; anothe on the Spit Sand; and a fifth casemated fort on the Stur bridge Shoal; the form of the latter to be regulated by th site, which is less favourable than the others; lastly, tha

Digitized by Google

batteries should be placed upon the shore of the Isle of Wight, near Nettlestone Point and Appley House, to support the works on *No-Man's*-Land and the Sturbridge Shoal respectively on their southern sides. These batteries are to be built of masonry faced with hard granite, the embrasures to be of wrought iron. With regard to the Needles passage, the Commissioners think that as the tide rises past Hurst Castle with great rapidity, no amount of fire could stop the advance of a hostile fleet, but that if the fire which might be brought to bear on such a fleet were powerful enough to cripple it, they do not think that any attempt on this channel is likely to be made. They propose, therefore, that some additional batteries shall be constructed at this point.

The defence of the Isle of Wight is regarded as an important part of the general scheme. From the natural formation of the southern shore it is easily defensible, and the batteries which the Commissioners propose to construct for the purpose of defending the Chines, by which troops might advance into the island from the beach, are not very numerous.

With the view of defending Portsmouth from an attack by land it is proposed to fortify Portsdown Hill and the high land in the neighbourhood by a number of isolated detached works, viz., at Crookhorn, at the Windmill, the Fir Clumps, and Nelson's Column; and that there should be three minor works at intervening points, favourable for sweeping ground in front of the position, which would otherwise be unseen. The distance between these works would average about 1300 yards. The flanks of the position would be secured by lines of ditch and rampart, connecting it with Portsmouth Harbour and Langston Harbour. Attack from the westward would be guarded against by three works, about 3500 yards in front of the line between Forts Gomer and Elson; one on the right near Newgate, co-operating with that above Wallington, in sweeping the ground in front of Fareham; the centre between Roome and Stubbington; and the left on the shore, about midway between Brown Down and the Titchfield River.

The total cost of fortifying Portsmouth in the manner proposed would be 2,400,000*l.*, the number of guns which would be mounted would be 987, and there would be barrack accommodation for 7320 men.

The sea defences of Plymouth embrace three objects:—1st. The defence of the entrance to the Hamoaze. 2nd. The security of the sound as an anchorage for our own ships, and against its occupation by an enemy. 3rd. The adoption of means to prevent the bombardment of the dockyard, by the ships of the enemy at a long range.

The entrance to the Hamoaze is already tolerably guarded by existing batteries. The commissioners recommend, however, that the defences on Drake's Island should be strengthened, and that additional guns should be placed on Eastern King and Western King, and others on Devil's Point beyond the latter, to bear in a direction up the harbour. A battery should be constructed on or near the site of the present private saluting battery on Mount Edgecumbe, the guns of which would bear on the channels on either side of Drake's Island. For the security of the Sound it is desirable that more powerful batteries should be constructed at Staddon Point, the guns bearing on the anchorage and across the eastern entrance to the Sound. On the opposite shore of the Sound a work should be constructed under the present battery at Picklecombe. An open battery should be constructed on the Hooe Lake Point, to co-operate with the work at Cawsand, not yet completed, as well as with the Picklecombe Fort; and a defensible guardhouse should be built on the hill immediately above it, to protect the rear of the battery. In addition to these fortifications, the commissioners are of opinion that a powerful casemated work, of such a form as to bring fire to bear in every direction, more especially to seaward, should be constructed immediately behind the breakwater, near its centre, co-operating with the forts on each side of the Sound, and commanding the approach to the entrances from seaward.

The land defences of Plymouth may be divided into the "Western defences," the "Saltash defences," the "North-Eastern defences," and the "Staddon Heights defences." We need not describe each of these in detail. The North-Eastern defences are the most considerable, as there are fewer works already in existence in this direction than in the others. The line the Commissioners propose has its left resting on the Tamar, near St. Budeaux, and its right at Catdown upon the Catwater. They recommend that a work should be established on the high ground between St. Budeaux and King's Tamerton, and that the line should run from thence near Burrington House, by Quarry Pound, Tor House, Mount View, the hill near the Wellington Villas, in front of the Borough Jail, and thence to Catdown; further that an advanced work should be placed on Honiknowl, that being a point upon which an enemy might establish batteries for the destruction of ships in the harbour, and of the establishment at Keyham. They also consider that advanced works should be constructed on a hill near Burrington Farm, and on a round knoll near the village of St. Budeaux, to support that on Honiknowl, and to form in connection with it a defensive position, completely commanding the whole valley in front of the left of the line. In all these north-eastern defences would cost 1,200,000*l.* and would mount 230 guns. The total cost of the whole defences of Plymouth would be 2,670,000*l.*, of which 375,000*l.* only would be devoted to the works guarding against an attaack by sea. The garrison which Plymouth would require if an attack were anticipated is estimated at 15,000 men.

The Commissioners entirely approve of the plans recommended by a committee appointed about a year ago to consider the fortifications of Pembroke. This plan embraced the following recommendation, which the Commissioners indorse:—That a powerful casemated battery of two tiers, besides guns on the roof, should be constructed round the three-gun tower on Stack rock. That batteries should be placed on either side of the haven—that to the northward, at Southhook Point, being about 800 yards, and that to the southward, at Chapel Bay, about 1400 yards from the rock—to support this work, and cross their fire on the haven. At 3500 yards higher up the harbour, or at 7000 yards from the dockyard, there should be placed heavy batteries on either side of the haven at Signal Staff Point, and Popton Point, where the channel is about 800 yards broad, the distance between the works being about 1600 yards, to bear down and across the haven. Between the two latter it was proposed to construct a floating barrier, to prevent steamers running past the batteries, and to keep them under the concentrated fire of all the five works, should they attempt to force the passage.

With the view of protecting the dockyard from a land attack, the Commissioners propose that a line of works, the sites for which were purchased by Government some years ago, should be constructed across the peninsula from Pennaar Pill to East Llanion Pill, with its right at Pennaar Farm, its left on Ferry Hill, with the centre on the main ridge at Bush Corner, and supported by the existing defensible barrack. For the purpose of defending St. Bride's Bay, a proposal is made to construct six small works about 1400 yards distant from each other; that on the left near Newton; that on the right near Burton; with intervening works near the village of Walterston; on the hill near Lower Scoveston; in the vicinity of Honeyborough; and near Barnlake. These forts, which would be of the nature of sunken towers, would suffice to oblige an enemy to land heavy guns to attack them, and so render it exceedingly improbable that the attempt would be made.

The total cost of the Pembroke fortifications is estimated at 600,000*l.*, the necessary garrison at 7000 or 8000 men.

As there are no naval establishments at Portland it is only necessary to provide for the defence of the harbour. The Commissioners consider that the fine works already in course of construction are sufficient for this purpose, and recommend that they should be completed as soon as possible. Viewing, however, the possibility that naval establishments may at some future time be erected at Portland, also the admirable position which is afforded by the high ground from the Nothe Point by Wyke Regis, with its left resting on the East Fleet, the Commissioners recommend the purchase of a belt of land along that line as a measure of precaution; but do not recommend that any immediate steps should be taken for the construction of works thereon.

The defence of the Thames next claims the attention of the Commissioners. The existing works are thought to be well placed, but to be insufficient for their purpose. They think that the part of the river between Coalhouse Point and the opposite bank, where it is about 1000 yards broad, is that best adapted for preventing, by means of permanent works, the further advance of a hostile fleet; and it has the advantage of being in immediate connection with the lines which we propose for the land defence of Chatham on its western side, the right flank of which rests on the Thames at that spot. We recommend that the Shornemead Battery, which is admirably situated, should be enlarged, and as its importance is considerably increased by its connection with the proposed defences of Chatham, it should be converted into a strong work on the land side. At Coalhouse Point, on the left bank, a powerful battery should be placed in addition to or in extension of the existing one, bringing the principal part of its fire to bear down the river and across the channel, but having some guns also bearing up the river in the direction of Gravesend. In addition to these, a work should be constructed on the right bank, opposite Coalhouse Point, at the southern point of the entrance to Cliffe Creek; and a floating barrier should be moored in time of war across the river, under the protection of these batteries.

For the defence of Sheerness a force of floating batteries is considered most efficacious. In addition to this, however, it is deemed advisable to construct several permanent works to defend the mouth of the Medway. As a defence on the land side, it is recommended that a position be taken up on the hills, about 3500 yards in advance of the present lines, somewhat as was proposed in 1825, by a committee who then reported upon the defences of Sheerness. The ground would be occupied by three works; the main one, on Furze Hill, should be secure in itself, and the other two advanced works on either side of it supported by the former, and commanding the ground at the extremities of the ridge.

For the defence of Chatham from an attack from the eastward, the Commissioners recommend two important self-defensible works, secure against escalade—one about Star-hill, the other at or near the village of Gillingham. To protect the place against bombardment from the ground to southward of Fort Pitt, they consider that three advanced works should be constructed at intervals of nearly a mile from each other, and about three-quarters of a mile in advance of the existing works. That on the right would be at Cookham-hill; that on the left on the hill above the village of Luton, co-operating with the work on Star-hill; the intervening work would be to the west of the Chatham and Maidstone-road, about midway between the other two, but rather more advanced.

The total expense of all these works for the defence of the Thames is estimated at 1,980,000*l.*, the necessary force for their occupation at 13,000 men.

As a defence for Woolwich, the Commissioners recommend a large work on Shooter's Hill, the cost of which would be about 700,000*l.* This work would afford bomb-proof accommodation for 1500 men.

For the security of Dover, which it is considered advisable for military reasons to fortify, additional works should, the Commissioners think, be constructed on the western heights. They are also of opinion that some bomb-proof cover should be provided behind the ramparts of the Castle; and they consider that the work is so weak at its northern salient, that, in order to prevent an enemy establishing his batteries on the high ground, which overlooks the Castle in that direction, a work secure in itself should be constructed upon that ground near Castle Farm. As regards the expense of the improvements, 165,000*l.* has already been sanctioned by Parliament for the purpose, and they consider that a further sum of about 170,000*l.* will be requisite to carry into effect all that is required. The garrison necessary for Dover is estimated at 6000 men as a minimum.

Cork harbour is the remaining place the Commissioners propose to fortify. They recommend that the land defences of Camden Fort and Carlisle Fort should be remodelled, in order to secure these important works from being taken in reverse by a force landed for that purpose; that at the former, sufficient space should be enclosed to admit of an extension of the sea batteries on the harbour face, so as to afford a reverse fire on ships passing up the Channel; and that more guns should be brought to bear to the southward on the approach to the harbour; a similar extension of the existing fire from Carlisle Fort is also necessary. As regards Spike Island, they are of opinion that the line of casemates now in course of construction on the north curtain should be completed, that the remains of Westmoreland Fort should be removed, and that additional guns should be mounted on the southern face, bearing on the harbour and the entrance. Some smaller works are also proposed, and the total expense of fortifying Cork is estimated at 120,000*l.*

Besides the questions relating strictly to the defences of the kingdom, the Commissioners were directed to inquire what site would be the best for the establishment of a great internal arsenal. They have investigated this question, and decide that Cannock Chase, in Staffordshire, is the spot best adapted for such a purpose. They report:—

"The particular spot to which we would direct attention, as the best suited in our opinion for the purposes of the proposed arsenal, is the highest plateau of that open moorland district about three miles eastward of Cannock, containing about 3000 acres, principally common land, having few inclosures, and possessing every capability for defence. It is divided from a district rich in coal only by a "fault," on the upper side of which no minerals are found; and the land being gravel and sand, without any loam on the surface, is wholly unsuited for agricultural, and almost equally so for even grazing purposes; and may therefore, it is assumed, be obtained at a moderate cost.

"The district is healthy, well supplied with water, and possesses excellent stone for building purposes; limestone is also abundant in the locality, and excellent clay for making bricks; it is, moreover, near to Wolverhampton, Walsall, Birmingham, and other great centres of our iron manufacture, and thus able to command an almost unlimited supply of skilled labour in an emergency.

"Being in the middle of Staffordshire, it is very central with reference to seaports, whilst it is at the same time well retired from the coasts. It is in the centre of an extensive system of railways and canals, requiring only to be connected by short branches to afford easy communication with every part of the kingdom. A locomotive railway might, if desired, be carried round the enclosure.

"On the west side the site would thus be connected with the Cannock Mineral Railway of the London and North Western system, and by means of it with the Trent Valley Railway, near Rugeley, which runs to the ports of London, Liverpool, and Holyhead.

"On the east side the line will connect the proposed works with the South Staffordshire Railway, and by means of it will have another independent communication with the Trent Valley at Lichfield, and also with the Midland Railway, running to the ports of Bristol and Morecambe on the west coast, and Hull and Great Grimsby on the east coast of England, and by means of it and the Great Northern, with London and Edinburgh.

"On the south side it will join the Norton Branch of the South Staffordshire Railway, and by means of it will form a junction with the London and North-Western Grand Junction lines, and thus form another route to Liverpool and London.

"By means of the South Staffordshire it will also form a junction with the mixed gauge lines of the Great Western Railway at Wednesbury, and thus secure another independent route to the north, south, and west of England.

"At Dudley it will join the Oxford, Worcester, and Wolverhampton Railway, which opens another route to the west and to South Wales.

"A canal may also be run round the enclosure, and joined by means of locks with the Birmingham Canal, which is connected, either by basins or branch canals, with nearly every work in the manufacturing district of South Staffordshire, and is on the same level from Cannock Chase to Wolverhampton, Oldbury, Smethwick, and Birmingham. It also communicates with the other canals of England, and affords access to London, Liverpool, Gloucester, and Hull."

THE TRANSPORT SERVICE OF THE CHINA EXPEDITION.

The following are extracts from General Orders, issued at Hong Kong:—

The following will be the organisation of the horse and bullock transport for service with the expeditionary force:—

The corps to consist of 3 battalions of 4 companies each.

The general staff of the corps will be 1 commandant, 1 paymaster, 1 quarter-master, 1 adjutant, 1 veterinary surgeon (from the Military Train).

Each battalion to have 1 captain-commanding, 1 quarter-master or acting quarter-master, 1 assistant-surgeon (when detached).

Each company to consist of 1 officer, a proportion of non-commissioned officers and privates (from the Military Train), 125 drivers (Chinese, Indian, or Manilla men), 375 pack animals; the whole of the officers, non-commissioned officers, and privates to be mounted at the public expense. The pay of all appointments will be hereafter notified.

Lieut. Gordon, 47th Bengal N. I., is appointed to do duty with the corps, subject to the approval of the Secretary of State for War and the Government of India.

Troop-serjeant-major D. M'Neill, Military Train, will act as quarter-master of a battalion, subject to approval.

Officers in command of battalions or companies of the Military Train, when detached on duty from the head-quarters of that corps, will prepare estimates for the payment both of the officers and men of the Military Train, as well as for the native headmen and drivers under their command, and will draw the amount from the commissariat at the station, transmitting to the paymaster of the Military Train at the end of each month acquitted pay lists, according to forms which that officer will furnish them.

The 1st battalion of the horse transport, complete in officers, men, and drivers will embark in the Chusan for the purpose of proceeding to Japan for horses.

Staff assistant-surgeon Goodwin will proceed in medical charge.

Major Cooper, 1st battalion Military Train, is appointed commandant of the horse transport service, to take effect from the 13th inst.

By Order,
Signed, FRED. STEPHENSON, D. A.-G.

SEAT OF WAR IN SICILY.

We have been favoured by the following interesting letters from Marsala and Palermo, beginning with the landing of Garibaldi, and coming down to the later events at Palermo.

The poor Marsalese were so completely taken by surprise, and at the same time so frightened by the firing of the Neapolitan vessels on the town, that in the general panic all the shops were closed and the streets deserted, so that the gallant liberators met with a very cold reception. Among the first Piedmontese that landed on the mole head were 10 or 12 fine active fellows, who ran the whole length of the mole and towards the town at full speed, and divided into two parties, one of which made for the old Semaphore Telegraph, and the other for the Electric Telegraph Office. The former was at once crippled; at the latter they found the *employé* at work transmitting to Trapani the news of the landing. Under the influence of cocked pistols, the manipulator requested the Trapani office to open direct communication with the royal palace at Palermo, and, on receiving the prompt signal that all was ready, the communication was made that Garibaldi with the Piedmontese troops had been destroyed by Neapolitan war-vessels in the act of landing; upon which the wires were cut, and the telegraph machines carefully taken away by the magical chasseurs. This story looks so *ben trovato* that at first I did not give it much credit, but it is confirmed by the fact of this very news being published in the *Naples Official Gazette*. Garibaldi, who, with all his wonderful activity, seemed to take things very coolly, and was the last to land, immediately proceeded to the senate house, where he called a council of such of the civic authorities as he could muster, and caused them to sign a declaration of their emancipation from the Bourbon rule, and adhesion to the cause of Italian liberty, and sent to take possession of the Government Funds at the Percettores and Riccactoria, giving receipts for the sums, which however were not large; as remittances to head-quarters had been made a short time previously, the municipal funds were respected. Of the two Piedmontese steamers one was scuttled and run aground in the harbour, the other called the Piemonte was abandoned outside the mole, with her colours flying; the Neapolitan vessels peppered away at her for some time expecting she would haul down her colours, and, seeing she made no show of resistance, they got out their boats to board her; but, fearing some horrible treachery from the obstinate silence of the Piemonte, they actually went to one of the English steamers to request they would send a boat to ask them to surrender. On receiving a negative to this cool request, they at last mustered courage to board the formidable prize very cautiously, and took triumphant possession of the empty steamer.

It is said that Garibaldi as Dictator has issued some decrees from Alcamo, one of which abolishes the Macino tax, and any imposts put on by the Government since May 15, 1848, of which I believe the Carta Collata is the principal one. The party halted for the night on Saturday the 12th at the farm of a Mistretta, a few miles this side of Salemi. Here they found ample provisions provided for them, and were received with open arms next morning at Salemi.

Another of the Dictator's Alcamo decrees makes Mistretta a Baron *del Regno* (peer of the realm, I suppose), and Governor of the district of Mazara. Each of the three districts of the province to have a governor, with powers like those of the *intendenti*, but without the centralisation.

On the morning of the 15th May, Garibaldi and his party reinforced by large numbers of the Sicilian mountaineer bands and volunteers from the neighbouring towns and villages, set out from Salemi, and arrived at the small village of Vita at half-past 7 a.m., whence they discovered the Royal troops in strong position near Calatafimi. They were divided into two bodies, the foremost of which advanced to meet the approaching forces under Garibaldi. On hearing the trumpets of the tirailleurs of the Alps, the front ranks of the Neapolitans wavered for a short time, but urged on by the mass of the main body they advanced and delivered their fire, which was instantly returned by the Piedmontese carabineers; and the seventh and eighth companies, led by Garibaldi himself, charged with the bayonet with such ardour that the engagement became almost immediately general. The Sicilians fought well, and handled their muskets with dexterity, and most of them stood fire with the firmness of veterans, though they flinched a little from the bayonet. Ten charges with the bayonet were made during the action; the Piedmontese lost a flag, but in return they most gallantly took a howitzer from the Neapolitans in the act of firing. After a fight of about four hours the Royal troops were driven back to Calatifimi, with a supposed loss of about 160 killed and wounded. The loss on the other side was less, supposed to be 70 or 80.

Garibaldi's son was slightly wounded, as was also the son of Wanin. Colonel Türr commanded the 2nd line at the commencement of the action, and led on the left wing to the different attacks during the engagement. Colonel Sirton, who seemed to be everywhere in the most dangerous points of the action, was also wounded, but slightly. The Neapolitans fought well, but their movements did not seem to be well directed. For a while, during the heat of the engagement their ammunition fell short, and they in the dilemma actually threw stones at their assailants. Garibaldi was struck by a stone, but received no damage from this unusual sort of missile. Their force consisted of 8th chasseurs, 1st battalion carabineers, 1st battalion of 10th of line, 200 cavalry, and 4 pieces of artillery, in all about 3000, under the command of General Landi. At Calatifimi they reported their loss at 350; but this is exaggerated. After a short stay at Calatifimi, seeing that their victorious assailants were preparing to attack them in their position, they made a precipitous retreat upon Alcamo; and, after a short halt there, they went on towards Partenico, in the vicinity of which place they were met by numerous bands of the Sicilian mountaineers and very roughly handled. From Partenico they continued to retreat towards Monreale, not by the main road, which passes for several miles through a deep mountain gorge, but through the valley in the direction of the village of Mongilepre; here they were again met by fresh bands of Sicilians, and completely routed, leaving behind them guns, stores, baggage, and prisoners. They were now near Carini, the scene of the frightful massacre perpetrated by the Royal troops a few weeks ago; and the people, burning with the thirst of revenge, doubtless availed themselves to the full of the opportunity. We have not yet learned the further particulars as to the fate of the retreating troops, but the probabilities are that few, if any of them, will reach Monreale or Palermo. It should be noticed that in their retreat as far as Mongilepre they did all the damage they could by burning and destroying property. After the action of Calatafimi, Garibaldi and his forces remained a short time in that town, and proceeded leisurely to Alcamo, leaving the retreating Neapolitans to the courtesies of the country people on their line of march. On the 16th, a Neapolitan frigate and a small steamer arrived at Castellamare with troops; but, learning the defeat of General Landi, they immediately returned to Palermo. Garibaldi's entrance into Alcamo was a perfect triumph, the enthusiasm of the people being without bounds. It was known that he intended to march forward towards Palermo, and we anxiously await news from that quarter.

In the afternoon of yesterday, the 24th, numbers of Garibaldi's red-coated forces were descried on the Parco Road, and the approach is becoming gradually closer. The chief police authority has liberated a number of thieves, with no other apparent motive than to disturb the state of the town; whilst the burning of houses, under pretext of shots being fired from them, is irritating in the extreme. The revolutionary party is growing stronger daily, and publishes its manifesto decrees from Garibaldi and his second in command, under the very iron rule of the authorities yet unknown to them. Here is an instance of the press acting in full vigour in opposition to the most arbitrary power, and the poorest person is not found mean enough to turn informer. I inclose a printed copy of the last manifesto, which you will perceive contains an address from Garibaldi to the Sicilians, another to the Neapolitan army, an address from General G. La Masa to his brother soldiers, an address to the Sicilian ladies, an address from the heights of Gibilrossa, an order of the day, and internal notifications. I would send you the translation made *currente calamo*, but that the mail is just leaving, so there is only time to send the original.

PALERMO, May 25.—The state of this town may be in a few words described as gradually growing warmer. The plot is evidently thickening, and the crisis drawing nearer. My letter of the 23rd instant, sent *viâ* Naples, if it arrive safely, will give you an idea of the then existing state of affairs here; to which I have only to add that the excitement is becoming hourly more intense than that therein described. Another policeman has been murdered, and a sort of secret society formed for the immediate execution of any of the secret police that may be met with. The police, however, lately, have almost to a man, disappeared and wisely, as their doom is sealed, and he would be a brave man who would venture into the streets, numerous as the sentries are. Notwithstanding the opposite accounts of the authorities, the patriotic party have hitherto had the best of it, as may be seen by the intelligence contained in a private letter from the scene of Garibaldi's landing, and subsequent victories.

PALERMO, June 3.—Since the conference held on board H.M.S. Hannibal, on the 30th ult., there has been no renewal of hostilities here, as the time till the following day was afterwards further extended for three days—to expire to-day, the 3rd inst. General Letizia, who meanwhile repaired to Naples for instructions, returned last night, and the only tangible result of his mission as yet known is the still further extension of the armistice, now indefinitely prolonged. Intelligence arrived here to-day that the royalist troops are vacating Trapani and Termini, carrying off as much of the guns and stores as possible, the orders being to burn the carriages of such guns as they cannot remove.

The city of Palermo presents an aspect now in which the traces of ruin and devastation are mingled with unmistakeable evidence of determined resistance. The Via Toledo is intersected in several places by barricades formed of heavy blocks of stone and casks of earth, whilst in some of the side streets even iron gates, palings, and dismounted carriages, have been made to do good service. The principal barricade of the Toledo is protected by two pieces of ordnance, one large, the other small; but the size and structure of the barricades alone, protected as they are by the sharpshooters of Garibaldi's force, would prevent the possibility of troops pushing them. The Porta Nuova, at the extremity of the street, is the extreme position of the Neapolitan troops, and a curtain the patriots have let down across the street prevents the possibility of their communicating with the ships either by signal or telegraph. The garrison in the Finanze, looked when I saw them on Thursday—the first day of the truce—like wild beasts caged up in a menagerie, a simile by no means far drawn, as the great gates being locked, they were effectually secured against the fury of the populace, and at the same time forced to behave themselves. It was then understood that they could not hold out much longer; and the result has proved this impression true. The bank has since been given up, and a sum of money equal to a million sterling has fallen into the hands of the patriots. As everything Garibaldi does is done systematically, the manager and clerks of the Finanze are retained, and the bank-books carefully preserved. By the observance of these precautions, it was discovered that of the large sum just mentioned 900,000*l.* were the private property of individuals, mercantile companies, &c., and the remaining 100,000*l.* only was government property; in consequence of which an inventory and stock were taken of the contents of the Finanze, and the money given into safe keeping, with the exception of the 100,000*l.*, which being the property of the government, was fair spoil of war, to be used for defraying necessary current expenses.

The Bavarian troops are reported in a wavering state; but as far as appearance goes, are fine looking men, and in by no means an enviable position—within view of the barricades that face them in the streets to the left of the Toledo. The greatest enthusiasm prevails in all parts of the town, and old and young wear the tricolor rosettes, cockades, or cap-bands. As for arms, they are borne by all ages, and exhibit every variety, from the latest improvement in revolvers down to the rude blunderbuss a century old; even the young boys are armed with forks. Garibaldi's own followers are easily distinguished from the insurgents by their dress, arms, and general bearing, as well as the sort of intuition with which one picks out a man who is playing the highest game, and looks up as if he knew he was, and intends to play it out, and intends also to win. The true Garibaldi force do not admit for a moment there can be any other termination than one successful to their cause. The tricolor rosettes are universally worn, and even the sombre habilaments of the clergy, regular and secular, are rendered conspicuous by having Garibaldi's colours pinned on to their breasts. Several of the Palermo priests, not satisfied with moral force influence, have, without doffing the clerical garb, armed themselves, and are serving like men at the barricades. One of these clerical warriors I observed cross-belted, with a crucifix half thrust into the breast of his black coat, and, as he leaned on his musket, as part garrison of a barricade, might serve as illustrative of one acceptance of the term "church militant." To my demand whether he belonged to the priesthood, he promptly answered in the affirmative, and subsequently, in answer to a question whether there were many priests in arms, replied yes, as many as had the "cuore," or heart to be so. Another priest delivered an impassioned harangue to the assembled patriots in front of the senate house on Thursday, and altogether, the clergy unmistakeably identify themselves with the whole movement. Several houses in the town have suffered from the bombardment, and the populace eagerly point the attention of strangers to these evidences of their wrongs, and vow vengeance on the perpetrators of them. Although nearly all the dead bodies had been removed from the streets, there were yet remaining, during the first days of the truce, some two or three in a retired spot at the back of the cathedral, which formed as sad a picture of the horrors of war as could well be conceived. On the ground lay a man, evidently burned to death, and beside him an aged woman, whose grey hair lay soaking in the blood that welled from the death-wound on her head; near these and within a gate that served as outer covering to a doorway, crouched a boy of some 12 or 14 years old, who had to all appearance—having received a mortal wound in the right side of the front face—dragged himself thither to die, and there died, with his head against the cold iron paling. His dress and general appearance so betokened poverty that he was in all probability a beggar boy, whose lot in life was somewhat like that of Joe, in "Bleak House," and certainly, as he was seen crouching at the gate dead, the whole scene was marvellously like the illustration of Joe at the gate of the cemetery that contained the remains of his patron. The chain of barricades extended into the smaller streets from the principal ones, and in these the enthusiasm was, if anything, greater, and shared by the women and children.

The most animated scene of all was that presented by the Senate House, the head-quarters of the patriot forces. In the square was collected a great multitude of men, women, and children, all wearing the popular colours, some standing, others sitting, all gazing up at the windows in order to get a sight of the brave general, who was dining with his staff in one of the rooms facing the street; so, leaving these to be gratified, as they afterwards were when the general went out on the balcony, it may not be uninteresting to give a short description of Garibaldi's personal appearance. A singular likeness to Omer Pacha is perhaps the first thing that strikes any one who has seen that warrior, nor does that impression die out at any subsequent period, although the observer becomes aware of distinctive differences in their features. Garibaldi, whose age is fifty-two, is about 5 ft. 9 or 10 in. in height, well-made, and evidently no stranger to fatigue; his head is a remarkable one, and unquestionably indicative of intellect, his hair being fair, if becoming grey does not exhibit that change, whilst the thick beard and moustache covering the lower part of his face are scarcely tinged with grey as yet. The more striking peculiarities of the general's feature are the eyes, by no means prominent, and the almost uninterrupted line formed by the nose with the forehead. The expression of the face is essentially calm, and appears that of one "more in thought than anger." What he may look like when roused may best be described by those who have seen him, but when in repose there is great serenity in his countenance and a quiet contrasting with the noise and good humour of the fire-eaters who are around him. Garibaldi the younger is a fine strapping fellow, who, like his father, has been at sea, and has been in South America, and has already fought for liberty; he bids fair to be a terror to Italian despots should the race be allowed to continue. Both he and his father continue the South American fashion of wearing a pocket handkerchief loosely tied round the neck and falling hood-shape down the back. Conspicuous amongst those around the general is a friar who came with the expedition, and whose venerable appearance and long grey military great-coat cannot fail to make one ask who he is, a fit successor to Peter the hermit. The fraletto appears to be a general favourite, or is no doubt an ardent lover of Italian liberty and independance. A small reinforcement of men, 2000 stand of arms, and 120,000 cartridges have been landed in Sicily for Garibaldi's army, and further supplies are hourly expected. It is supposed if the garrison vacates this place it will fall back on Messina and dispute possession of it. The only reliable news is as mentioned—the continuance of the armistice indefinitely.

ARMY PAYMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last number "An Old Paymaster" complains of a violation of the recent Paymasters' Warrant, in the case of Captain Young, H.P. Had he read Article 8 of that Warrant, in connection with the Warrant of 2nd December, 1857, he must have discovered that the officer he alluded to was fairly entitled to the honorary rank of major, "on retiring from the Army after thirty years' aggregate service, of which twenty-five years shall have been as a commissioned and non-commissioned officer, including fifteen years as an officer, with not less than five years of that period as paymaster."

This affords me the opportunity to state that I know a paymaster in the thirtieth year of his service, with all the advantage of commissioned and non-commissioned officer's service above stated (and considerably over it), and in consequence drawing pay, &c., equal to an honorary captain, who has not been granted that title because he is a fraction of a year under five years as a paymaster—and who, upon attaining it, may at once become an honorary major, by retirement, without further service. Surely, this argues in favour of such old officers obtaining the first step (with reference to their former services) under more favourable circumstances.—I am, &c.,

ONE INTERESTED.

THE INDIAN ARMY, LOCAL AND NATIVE.

(*Continued from p.* 386.)

It is a remarkable circumstance that the minor mutinies to which we have alluded, have all taken place either in the midst of peace, or at a long distance from the seat of war, showing clearly, as we deem, that disloyalty had no share in the disorderly movement. If disaffection had been the groundwork of these outbreaks, it is nearly certain that the vicinity of the enemy would have been seized either for desertion or for revolt. In fine, the Hindoos who believed we had betrayed them revolted, but the Hindoos who had not suffered from our supposed aggression on their religion maintained their friendship or allegiance to the last. The deduction is obvious.

Our readers, we presume, have already inferred that we are advocates for a native army. We are so, in the conviction that it is perfectly practicable to form one in whose faith we can trust. We are so, because we are confident that it is only through that engine that India can be held with safety or profit. We believe that a day is coming when it will be dangerous to send out of England for Indian or colonial purposes a single man more than is necessary. We believe that a day is coming, and not very distant, when Egypt will become a battle-field, and when we must again dispatch to that country an expedition from India. If our efficient forces in India should be confined to Europeans, we cannot venture to send them on a distant undertaking without incurring great risk. At this very moment it is the existence of a considerable native army, which has enabled us to dispatch with ease a force of no small amount to China. If India is to be held only by the presence of one hundred thousand Englishmen, it would be better to renounce the possession of that empire rather than endanger England itself.

But we would be careful to maintain a due proportion between our European and our native force. As space presses, and lest we should exhaust the patience of our readers on a theme which has been worn almost threadbare, we must confine our observations to a few sentences.

Taking the Bengal presidency as a standard, we would form a native army of from 40,000 to 50,000 regular infantry, to whom, adopting as our model the practice followed in the regiments of the West Indies and of Ceylon, we would allot a full complement of English officers. These men should be raised from all castes, available for all service, and, above all, recruited from a variety of localities. Pay, instead of being as now liable to deduction, should be consolidated, and the sepoy should at all times receive a certain fixed sum. The Government should undertake to provide every article of clothing as the French government does for its soldiers, and to supply cattle for the march. Much bitterness and sense of injustice would be spared by this change. The rank of native commissioned officers should in our judgment be abolished as dangerous or useless—dangerous when held by active energetic men, useless when held by men of another stamp, as fortunately happened in the late rebellion. In their place we would substitute a European sergeant, and a havildar (native sergeant) major to each company; merit should be rewarded by badges of honour, accompanied by increase of pay, and by transfer as subadars to police or other corps.

To this body of infantry we would attach a suitable corps of irregular horse. No native artillery will of course be again permitted, unless a few guns in remote out-stations of peculiar unhealthiness, such as Arracan, Assam.

To preserve to this army at all times a sufficient body of officers, there should be something analogous to a staff corps, to which should be transferred all officers employed in non-military appointments. Their places in a regiment should be filled up, and their future increase of rank should be honorary. The promotion of the army should be regulated on its present footing, as the one most conducive in the long run to efficiency and fairness; that is, a combination of seniority, promotion by brevet rank for distinguished service in the field, and purchase by a system in which all are benefited, even those who do not contribute, and which contribution is voluntary. It is a great mistake to suppose the Indian service to be one of pure seniority. If it were so, Major-General Nicholson, who fell at Delhi, could never have reached that rank at the age of thirty-five.

It seems to us almost impossible to deny that we have given above the outline of a most efficient native army; one, too, that would readily admit of expansion, should we at any future time be compelled to despatch 20,000 or 25,000 men towards the east or west. The European counterpoise to this native force of 50,000 men ought, we think, to consist of something more than half its own number, including European foot, dragoons, and a large body of artillery; that is to say, 20,000 to 25,000 foot, 5000 dragoons, and 5000 to 6000 artillery. Combined with this force, if there were places of defence at the chief military stations, we defy anyone to deny that Bengal is safe from a military mutiny, whatever may be its other dangers.

If, contrary to our own convictions, there be those who see in a force of 50,000 sepoys in Bengal alone, a source of danger, their alarm might be obviated by giving a tour of duty to this native army in the Mauritius, Ceylon, the Cape of Good Hope, Australia, China. There can be little doubt that these systematic foreign tours of duty would be of great advantage, and improve discipline and efficiency, by giving habits of service out of India.

The proportions, European and native, of the armies of the presidencies of Madras and Bombay can be easily determined. Madras is protected on the south, east, and west by the sea, and on the north by the presidency of Bengal. Bombay has the sea on the west, and Bengal on the north; but on the other hand it has to guard the important province of Scinde, and requires moreover to be prepared for eventualities in the Persian Gulf and elsewhere, westward. Let us estimate the European army of these two presidencies at 20,000 men, and the native force at 40,000 or 50,000. This would make the whole army of India amount to about 50,000 European soldiers, with about 100,000 natives, a force which, far from being excessive, may, perhaps, with reference to the immensity of the population and the vastness of the territory, be liable to the imputation of being calculated on too low a scale. Unless it be Great Britain or the United States, the latter having a formidable army in militia and volunteers, no power aspiring to hold even a secondary place among the nations of the world, ventures to content itself with a force of such small dimensions. If France or Russia were the owners of India, we may safely infer from their proceedings in Georgia and Algeria, that an army more than double the amount specified above would be considered only adequate to the maintenance of authority.

The cost of this force of 150,000 men has next to be considered. The estimates of the military force of Great Britain for 1860 amount to nearly 15,000,000*l.* sterling, for an army of 145,000 men. The cost of 55,000 European soldiers in India would probably not be less 5,000,000*l.* or 6,000,000*l.* sterling. 100,000 native soldiers, officered on the same thrifty, but inefficient, footing which prevailed before the mutiny, would involve an expenditure of about 2,700,000*l.* a year; but, if a really serviceable body were desired, one perhaps not inferior to Europeans, setting aside soldiers of Celtic and Teutonic race, officered in the manner advocated in the early part of this paper, the outlay would amount to 3,200,000*l.* But in this calculation, keeping in view the extreme expediency of paying the seyoy a net sum free from all deduction, we have estimated his pay at about a farthing and a half a day more than he previously received, making his total pay sixpence a day, or fifteen shillings a month, instead of fourteen shillings, which he formerly received.*

Besides the other important considerations already alluded to, in opposition to the scheme of forming a European army of 100,000 men, and in favour of placing the native army on a useful, safe, and moderate scale, we may add the great facility with which a native is supplied with food in the field, in comparison with the European soldier. The man who uses bread and water alone has in India numerous advantages over him who requires bread, beef, and mutton, and spirits, with wine and beer for his hospital. The sepoy who, until some years ago, was mulcted in part of his pay whenever illness forced him into hospital, and who to the last suffered stoppages whenever he went on leave of absence; who out of his pittance of fourteen shillings a month, paid for his food and for a large share of his clothing, as well as for the hut in which he resided, cannot be called "pampered and petted," unless in mockery.

Quitting this part of the subject, we proceed to examine the much-canvassed question of the composition of the European forces of India—whether they shall be formed in part or in whole of the troops of the Line, or whether the larger portion shall consist of a local European army. All parties are, we presume, agreed to investigate the matter on the basis of efficiency, safety, and economy. On the score of economy we imagine all the arguments are in favour of a local force. No discussion is required to demonstate that an army transported once for all to India, must cost a considerably less sum than one for which it is necessary to provide a relief periodically, that is, every ten years. The passage of troops to and from the East is no small addition to the estimates of the forces in India, and to the taxation of a people groaning under a weight of fiscal charges, from which all the schemes of our ablest financiers seem unable to relieve them.

If we desire to alleviate these burdens, as assuredly is our duty, the difference alluded to is of sufficient importance to deserve attention, particularly when we learn from the *Times* of a recent date, that "every British soldier paraded on a barrack-ground in India is said to represent a loss to the country of 150*l.*" The mortality too in a transitory army is considerably greater than in one inured to the climate, a regiment on its first arrival always losing more men than it does after a residence of some years. Consequently a heavier expenditure is entailed in filling up these losses than would occur with an army permanently established in India.

Add to the foregoing that in the Royal army, we allude in particular to the artillery, expenditure is on a lavish scale in comparison with the habits and practice of the army of India. The defenders of expenditure in that important branch of the Service affirm that compensation is gained by superior efficiency, which is real economy. This to a certain extent is true; still there is a limit. A troop or battery of royal horse artillery in India consists of 207 men, besides natives, and horses; while a troop or battery of Bengal horse artillery consists of 109 men, besides natives, and 169 horses. Thus two troops, or twelve guns, of royal horse artillery cost more than three troops, or eighteen guns, of Bengal horse artillery. The distinguished conduct and entire efficiency in the field of the Indian horse artillery is uncontested. The Royal officers assert that economy in its administration has had injurious results, that it is undermanned and under-horsed; and that, in consequence, after one or two days' hard fighting, it is found necessary to withdraw one, two, or three guns, as may be, from an inability, through casualties, to man and horse them. The argument has some foundation if it were merely a question of one single troop of Royal horse artillery and one single troop of Indian horse artillery; but it seems to fall to the ground when several troops are collected, say, as above proposed, two Royal troops, furnishing twelve guns, and three Indian troops, with eighteen guns. It is clear that in the first action the advantage is on the side of the latter; and that, if afterwards casualties should force half-a-dozen guns out of action, they would still be at least on an equality with the Royal batteries, which, moreover, must also have suffered, and may have been forced to diminish its fire in a proportional degree.

However recent events may have shaken the opinions of others on the discipline or the loyalty of the local European army of India, the question of safety holds in our minds the same position as that of economy. We consider disaffection in the European troops, whatever be their composition, as one of the least likely occurrences; still, it is one against which it is necessary to guard. Disaffection never had any existence in India. Mutiny on the question of pay has shown itself, but disloyalty never. We are now, of course, alluding to the European portion of the troops. We believe that safety is to be found in pursuing the same system as before; that is, by dividing the European army into two bodies, one drawn from the Line, the other local. This arrangement may be the cause of occasional soreness and jealousy, but experience has proved that on the whole the machinery works well. This appears to have been the original opinion of the members of the present cabinet, who, according to public report, had come to the resolution of maintaining the existing state of things until they took alarm on witnessing the demand of several thousand men to be discharged from the Service. We ourselves attribute to these soldiers no worse feeling than an irrepressible desire to revisit their native country, to which, in point of fact, they had been in a measure invited. Briefly stated, the case stands thus. Some 20,000 or 25,000 men had been transferred by Act of Parliament to the Queen's service without telling them why or wherefore, and without the gift of the bounty they had been accustomed to see their comrades in the Royal forces receive when transferred to the Indian army. In a spirit of simple justice and manly fairness the prime minister of England had announced from Parliament his conviction of the right of these men to quit the Service if they did not relish the transfer. The Governor-General of India naturally reiterated the same sentiments; and the soldiers took these high authorities at their word. Can it excite surprise that men who had voluntarily submitted to banishment from their fatherland, should have been dazzled, and that they should eagerly have grasped at this proffer to revisit home? Is there such a want of discipline, as many seek to attribute to those soldiers, in adopting the alternative to which they were told they were entitled, men who had waded through two campaigns of blood with, in the language of the *Times*, a valour and conduct equal to the best, and surpassing some of the Queen's regiments. If the transaction had been reversed, if 20,000 or 25,000 soldiers of the Queen's forces had been summarily annexed o the Indian army, it is our conviction the result would have been the same. If there be danger, remote or otherwise, of disaffection, it appears to us that danger is alike, whether the army be Line or local, but that it is infinitely less likely when there are two bodies in presence not perfectly homogeneous ready to control each other; should such a symptom ever occur, should disloyalty or simple mutiny spread through the ranks, or should an ambitious chief be tempted to forget his allegiance, it is certain that with a double army (treble, we may say, including the native army) success is so remote, that the prosecution of the treason becomes an impossibility.

(*To be continued.*)

* The soldiers of the West India, Malay, Hong Kong, and Gold Coast Corps, receive pay varying from eightpence to one shilling and threepence a day.

NAVAL RETIREMENT.

The following is the official proposal for naval retirement:—

Admiralty, 9th May, 1860.

There are three requisites for an efficient Navy List—

1st. That the upper ranks should be supplied with a sufficient number of officers in the prime of life.

2ndly. That officers who are desirous and fit to serve, should find employment.

3rdly. That encouragement should be offered, either by promotion or otherwise, to induce officers to serve willingly, as long as they are efficient.

Of late years, the first point has been, in some measure, attained, by the numerous retirements, while the reduction of the lists and the simultaneous increase of the force in commission, have partially, though by no means sufficiently, provided for the second; the third, viz., adequate encouragement for officers in the lower grades, is still wanting, and it is towards this end that the present proposal is principally directed.

No system which could be devised would provide, by promotion alone, for the preponderating number of officers which the Service requires in the lower grades. This was clearly shown by the state of the seniority corps in the Army, the Artillery, Engineers, and Marines, previous to the augmentations which, constantly taking place of late years, have, for the time, increased the rapidity of promotion.

But in the Navy the promotion of officers below the rank of captain is made by selection, a principle which, whilst it provides an incitement and a reward, and, at the same time, conduces to the efficiency of the Service, by providing younger officers in the higher grades, yet leaves to the general body of officers diminished opportunity of advancement.

Any scheme, therefore, of retirement from the upper ranks of the profession, whether compulsory or otherwise, can never provide adequate promotion for the commanders and lieutenants; the only reward which can be obtained by many deserving officers after lengthened service, is retirement at a certain age, or when rendered physically incapable of further active employment.

Of late years the reduction of the numbers on the lists, and, at the same time, the increase of the number of officers employed, have necessarily produced this result, that on the one hand the amount of promotion is diminished, whilst on the other hand the claims to promotion on account of service are largely increased.

In this position of the Navy List it is difficult to find a sufficient number of lieutenants for the service of the fleet; and officers of that rank have little inducement, from the prospect of promotion or of increased pay, to continue in active employment.

They know that after reaching a certain age there is no chance of their being promoted to the active list, and that the retirement at present provided is equally open to them, whether they serve or not; and its advantages are small in the way of reward, since even the lowest rate—7*s.* per diem—cannot be reached at present under the age of 65.

It is proposed, therefore, to open to commanders and lieutenants a retirement on a scale adapted to their length of service, both as a reward to those officers whom it may be impossible to promote to the active list, and as an encouragement to all to continue in active service.

It is also proposed, in order to increase the facility of promotion, and, at the same time, to render the captain's list more efficient, to remove to a retired list all captains who shall attain the age of 60 without having served in that rank.

By these means every officer who does not decline to serve may be certain of attaining either promotion or a good retirement on reaching a certain age.

The introduction of compulsory retirement is no new principle, as at present captains not qualified for their flags are placed on the reserved list, and this would eventually be the case with every captain affected by the present proposal; and under the Order in Council of 1851, all commanders and

Digitized by Google

lieutenants are obliged to retire, without increase of pay, who have been unemployed for 20 years.

The following scale is proposed to be adopted :—

FIRST, AS RELATES TO CAPTAINS.

All captains who have attained, or shall hereafter attain, the age of 60, without having served in their present rank, to be placed on a retired list, and receive retired pay as follows :—

If on 10*s.* 6*d.* half-pay list when retired ... 18*s.* per diem.
If on 12*s.* 6*d.* ... ... } 20*s.* ,,
If on 14*s.* 6*d.* ... ... }

Such officers to assume the rank and title of rear-admiral at the time they would have obtained their flag by seniority, had they remained on the active list.

Captains, who may arrive at the head of the list without having served in that rank, to be placed on the list of reserved flag officers, with the pay of 20*s.* per diem.

Captains now on the 14*s.* 6*d.* half-pay list, should not be affected by these proposals unless by their own desire.

SECOND, AS RELATES TO COMMANDERS.

All commanders on the active list who have attained the age of 60, or who may hereafter attain that age, to be placed on a retired list with the rank of retired captain, and to receive half-pay according to their length of sea service, on the scale hereinafter mentioned.

All commanders, on the active list, who have not been employed either afloat, in the coast-guard, or as mail or transport agents, within a period of 15 years, to be placed on a retired list, and to receive retired pay according to their amount of sea service, also on the same scale as hereinafter mentioned; such officers to be permitted to assume the rank of retired captain on reaching the age of 60, but without further addition to their retired pay.

SCALE OF RETIRED PAY.

Total sea service in the rank of lieutenant and commander :—

	Pay per diem.
Under 9 years... ...	Half-pay they may be receiving at the time when retired.
Above 9 years, and less than 12 years' service	10*s.* 6*d.*
Above 12 years, and less than 15 years' service	12*s.* 6*d.*
Above 15 years, and less than 20 years' service	14*s.* 6*d.*
Above 20...	16*s.* 6*d.*

Officers, after 20 years' service in these ranks, or who are physically incapable of service, to be eligible for this retirement, with the rank of retired captain, irrespective of age, at the discretion of the Board of Admiralty.

Time served in the coast guard on shore to count as sea time in the scale of retired pay, in the proportion of three years in the coast-guard as one of sea service.

Time served as mail or transport agents afloat to count for the above purpose in the proportion of three years' agent's time as two of sea service. Commanders who have been promoted to the reserved list of captains under the Orders in Council of 25th June, 1851, and 30th January, 1856, will be entitled to increase of pay, on the above scale, according to their length of service.

LIEUTENANTS.

All lieutenants on the active list, who have attained, or who may hereafter attain the age of 60, to be placed on a retired list with the rank of retired commander, and to receive pay according to their sea service on the hereinafter-mentioned scale.

All lieutenants on the active list, who have not been employed, either afloat, in the coast-guard, or as mail or transport agents, within a period of 15 years, to be placed on a retired list, and to receive pay also on the same scale as hereinafter mentioned. These officers to be permitted to assume the rank of retired commander on attaining the age of 60, but without further addition to their retired pay.

SCALE OF RETIRED PAY.

Total sea service in the rank of lieutenant :—

	Pay per diem.
Under 6 years... ...	Half-pay they may be receiving at the time when retired.
Above 6 years, and less than 9 years' service ...	7 0
Above 9 years, and less than 12 years' service ...	8 6
Above 12 years, and less than 15 years' service ...	10 0
Above 15 years service	11 6

Officers, after 20 years' service in this rank, or who are physically incapable of service, to be eligible for retirement with the rank of retired commander, irrespective of age, at the discretion of the Board of Admiralty.

No further additions from the active list to be made to the present retired lists for commanders and lieutenants.

Time served in the coast-guard on shore to count as sea time in the scale of retired pay, in the proportion of three years in the coast-guard as one of sea service.

Time served as mail or transport agents afloat to count for the same purpose, in the proportion of three years agent's time as two of sea service.

Officers who may in future be recommended for the annual promotions on account of good service in the coast-guard or revenue cruisers, or as mail agents, whom it may not be considered desirable to promote to the active list, to be promoted to the retired list, and be paid according to sea service on the above scale.

Lieutenants who have been promoted to the reserved list of commanders, under the Orders in Council of 25th of June 1851, and of 30th of January 1856, will be entitled to increase of pay on the above scale, according to their length of service.

HALF-PAY OF LIEUTENANTS ON THE ACTIVE LIST.

The half-pay of lieutenants to be in future fixed according to sea service in that rank, on the following scale :—

	s.	*d.*	
Under 3 years' sea time	4	0	per diem.
Above 3 years' sea time	5	0	,,
Above 6 years' sea time	6	0	,,
Above 9 years' sea time	7	0	,,
Above 12 years' sea time	8	6	,,

Time served in the coast-guard on shore, as mail and transport agents afloat, to reckon as sea service, in the same proportion as we have recommended shall regulate increase of retired pay to officers on the retired lists.

The present rates of half-pay to be abolished for the future; but no officer, now in the receipt of 6*s.* and 7*s.* a-day, to receive less than his present amount of half-pay.

The probable effect on the Navy List, should this proposal be adopted, will be at once to remove—

8 captains, 64 commanders, 179 lieutenants,

from the active list, leaving the numbers as follows :—

	No.	No. Authorised.
Captains	347 ...	... 350
Commanders	435 ...	... 450
Lieutenants	894 ...	... 1200

Which will leave vacancies accordingly for the immediate promotion, should it be deemed desirable, of three commanders to the rank of captain, and 18 lieutenants to the rank of commander; and, what is far more important for the future efficiency of the service, will hereafter admit of a promotion for every vacancy.

WIDOWS' PENSIONS.

The following pensions will be allowed to the widows of officers retired under this scheme, viz. :

	£	
(1.) Captains of three years' standing and upwards	90	a year.
(2.) Captains under three years' standing ...	80	,,
(3.) Commanders retired with the rank of captain	75	,,
(4.) Lieuts. retired with the rank of commander	60	,,

GREENWICH OUT-PENSIONS.

(1.) All officers retired under this scheme to be eligible for the out-pension of Greenwich Hospital for the rank that they held on the active list, provided that they shall have served the following periods of commissioned time afloat :—

Captains, 15 years, including time as commanders and lieutenants.

Commanders, 12 years, including time as lieutenants.

Lieutenants, 9 years in that rank.

(2.) Officers who have received, or who may hereafter receive, severe wounds in action, or disabling hurts on actual service, are to be exempt from the above rule respecting time of service.

(3.) All officers on the active list who accept the out-pension of Greenwich Hospital are to be placed on the retired list of the rank which they may then hold; and they will be permitted to assume a step in rank on reaching the age of sixty, but without increase of pay.

(4.) Officers on the existing reserved and retired lists of captains or commanders to be eligible for the out-pension of Greenwich Hospital on the condition stated in articles 1 and 2 of this section.

(5.) The regulation laid down in the scheme of retirement respecting time served in the coast-guard, transport, or mail service, to apply to the time required to be served for Greenwich out-pension.

The above scheme was described to the House of Commons by Lord Clarence Paget on Thursday evening, when Sir John Pakington, Mr. Henley, Sir Charles Napier, Sir Michael Seymour, and other members took exception to the scheme, on the ground that it was not sufficiently comprehensive; and ultimately the debate was adjourned.

A SMALL WAR IN NEW ZEALAND.

The intelligence from New Zealand is far from satisfactory. Some weeks ago we mentioned that hostilities had taken place between the Government troops and the natives, and we are now in possession of further details. It is, however, difficult to understand the true position of affairs. The cause of quarrel was the sale of a small piece of land by Te Tieva. A rival chieftain had declared that the sale should not be permitted, but as the governor saw no reason to believe that Te Tieva's title to the land would be called in question the survey was made. On the following day a large body of natives took possession of the land, and hostilities immediately commenced. A letter in the *Times* gives the following account of these proceedings :—

Shortly after noon Colonel Gold, who was in command, opened fire. He had with him two 24-pounder howitzers, one 12-pounder howitzer, and one rocket tube. He had also with him 300 soldiers of the 65th, 25 men from the Niger, and a mounted escort of colonists. As the troops advanced, the natives blew a horn in token of defiance. The artillery opened at the respectful distance of 800 yards, on the north-west angle of the pah. After a few discharges, the natives ran up a red flag on their flagstaff, indicative of their determination to resist. The guns were then moved round to the west side, and planted this time within 200 yards, the distance being gradually reduced to 150 yards. A fresh move was subsequently made round to the north side. While this last movement was being effected, some natives were seen to be leaving, and, under the impression that they were cowed and beating a retreat, some of the mounted escort rode close up, but were received with a volley that killed one of them on the spot; and two privates, who were in the rush to the rescue, were wounded, of whom one died subsequently. The men were with difficulty restrained from making a rush at the pah. It was now evening, and the ammunition was expended. The pah had been greatly knocked about, but not destroyed or rendered untenable. The guns were withdrawn, breastworks thrown up, and the troops camped under arms on the seaward side of the pah. For a long time during the darkness the natives kept up an incessant fire, which did no harm. After breakfast Colonel Gold advanced his guns to within 30 yards of the stockade, and opened a heavy fire with shell and common case-shot. When at length a small breach was made, a rush took place immediately, when, lo! the pah was found empty. The natives had retired during the night on the side that remained unguarded, having left only two or three behind to keep up a deceptive firing.

The news that the natives had all escaped capture was heard with dismay by the colonists, who loudly condemned the commanding officer for not bringing his artillery into closer quarters at first, and "rushing" the pah over night, or, at least, surrounding it so as to prevent escape. From the testimony of one of the natives who has since been into the camp, it appears that they were terribly frightened at the effect of the artillery on their defences, and that though none were killed a great many were wounded. The natives, after recovering from their fright, began to construe the engagement as a victory, and the effect of this indecisive action on the native mind was soon seen. Manahi, a Taranaki chief, who had quite recently taken the oath of allegiance, began with his men to plunder the neighbourhood. A party of 100 volunteers, supported by a company of 200 of the 65th, were sent out to look after him, and halted within half-a-mile of his encampment. But Colonel Murray, who was in command of the regulars, declined to take his men into the bush; and the volunteers, though anxious to advance, would not do so unsupported, and so they returned to town without doing anything. Natives now began to muster round Manahi, and two days after this ineffective reconnoitre news arrived that three settlers and two lads had been found murdered. Great anxiety was then felt for several families, numbering about 35 souls in all, who were still in the bush, and who, it appears, had congregated in the house of Mr. Brown, the Episcopalian clergyman. An expedition was organised to bring them in, and this led to a second and more decisive engagement, that takes rank as the battle of Waireka. The expedition consisted of about 80 volunteer rifles, 50 militia, 25 of the naval brigade, and the light company of the 65th—in all about 260 men, under the command of Colonel Murray. The two former parties followed the beach, the two latter took the road. Starting at about 1 o'clock, the first-named, after a short march, perceived the natives on the opposite side of a stream in front of them, principally in the valley of a small affluent, their path being entirely on the ridge between themselves and the sea. The Europeans advanced in skirmishing order, and then began an irregular fight, principally in the flax gullies at the mouth of the little stream and on the flat above, in which the attacking party made up by their superiority in weapons for their inferiority in point of numbers. After about an hour of this irregular firing the naval brigade, who had come by the road, appeared on the inland side of the gully, and, getting into pretty close quarters, did considerable execution. In another hour they were joined by a detachment from the 65th, who also proved very useful. The greater portion of the regulars were halted about three-quarters of a mile off, and did not take part in the engagement. Notwithstanding their losses, the natives were so numerous that they managed to enclose the volunteers and militia on two sides. The ammunition these latter had brought with them was nearly expended, and their position was getting critical. They sent a messenger to Colonel Murray to tell him how they were situated, but without getting either sympathy or help. He returned answer that his orders were to be home before dark, and that, as they had got into a mess without his orders, they might get out of it; and he forthwith sounded the recall, taking back with him the naval brigade, whose commander, Lieutenant Blake, had been wounded at the commencement of the action. The volunteers, thus left to themselves, and expecting every moment to be "rushed," reserved what little ammunition they had left, and, thinking a retreat dangerous in the face of an expected attack, hastily protected their position as well as they could by a low breastwork of logs and straw. Shortly after dark they heard a great cheering, and could manage to see that the flag in the pah was down. They were preparing to join in the rush, but, there being no response to their own cheer, their leader thought the whole thing a *ruse* to withdraw them from their cover. It was, however, no *ruse*, but a most fortunate diversion effected by Captain Cracroft, of the Niger, and 50 of his men, who, arriving late, "rushed" the pah with cutlass, bayonet, and revolver, took the flags, and returned on the road and overtook the troops, reaching town with them at about half-past six. The natives had been so astonished by the sudden assault of Captain Cracroft that they quitted their attack on the volunteers, and returned in haste to the defence of their little stronghold. The volunteers, finding themselves no longer assailed, began, at 7 o'clock, cautiously to effect their retreat." Much ill-feeling arose between the line and the volunteers in consequence.

THE MEDITERRANEAN FLEET.

The following is an extract of a letter dated Malta, June 7 :—

Malta is really to be left without an English fleet, and intelligence has arrived that the grant from the Commons of England for the enlargement of its harbour has been acceded to. Surely this is the age of wonders; but I find I am going ahead too fast. With regard to the squadron, then, the two-decker Renown—which magnificent ship, I might observe, is worthy of her name—left here yesterday at 4 p.m. for Naples. The London, also, a two-decker, sailed this afternoon for the Gulf of Messina, with sealed instructions; probably her destination is the same port, for the news received by the Assurance, which arrived this morning from there, was anything but settled, it being no less than that the king had abdicated—that is the rumour, so you may place whatever faith you like in it. Probably you have much later news. On Saturday next, the remainder of the fleet, under the new commander-in-chief, Vice-Admiral Martin, leaves once more for the Bosphorus, its destination being our old anchorage-ground, Besika Bay. As the fine fleet passes the Golden Horn, our *allies*, the Turks, will be reminded of the Crimean days. It is the same story. We are to act as a check on the Russians, and, if possible, counteract that nation's ambitious artifices. One of our popular novelists says, in one of his works, that "human nature only wants an excuse to do dirty tricks; a magistrate's excuse is the law; a doctor's his profession; a priest's the church." He might have gone higher, even to the excuses of emperors, for it is fully exemplified in this case; but I am out of my province. After the fleet will have left there will be only the poor old guard-ship Hibernia, with the flag of Admiral Codrington flying, and the small fry. It is a sad loss to Maltese Joe, and I have not the least doubt that he will duly shrug his shoulders at the calamity. However, it is an ill wind that blows nobody good, and provisions will be much cheaper for the inhabitants. The last news from Sicily received here reports that all is going on well for Garibaldi. Everyone thinks he must succeed, for he holds all the trumps; consequently revoke will be out of the question. The Peninsular and Oriental Company's steam-ship Alhambra arrived here on Monday from Corfu, bringing news that the Ionians were very quiet and happy, and felt delighted that Garibaldi had taken Palermo. The ships lying there were the Victor Emmanuel, Liffey, and Alacrity. The Liffey was to leave for Athens and would most likely proceed afterwards to Malta. The frigate Melpomene has gone to Gibraltar, and will proceed to England. The troopship Megæra leaves to-morrow for England, with invalids.

ROYAL MILITARY COLLEGE, SANDHURST.

His Royal Highness the Commander-in-Chief on Thursday honoured the Royal Military College, Sandhurst, with a visit, the object of which was to be present at the declaration of the result of the late competitive examination for army commissions. His Royal Highness was accompanied by Sir R. Airey, Quartermaster-General; Sir J. Scarlett, Adjutant-General; General Romley, Vice-President of the Council of Military Education; Colonel Elwin and Colonel Addison, Members of the Council; and Colonel Thyrritt, Aide-de-Camp. A variety of military movements were gone through in first-rate style by the students. General Romley read the report of the Council of Military Education, expressing the gratification of the Commissioners at the result of the recent examination, which they regarded as "very satisfactory;" 57 candidates had presented themselves for examination, of whom 20 obtained more than 4,100 marks, while 20 others had exceeded the number of 3,000, fixed as the *minimum* for obtaining commissions without purchase. Out of the entire number, 11 had failed to pass the prescribed examination. The Council, while recording with pleasure their opinion of the general answering, felt gratification in adding that some of the examiners had noticed a marked improvement in special subjects. They also felt it right to mention in an especial manner the name of Mr. George F. Chambers, the 13th in order of merit among the most successful candidates, who had only been for two terms in the College, and had yet succeeded equally with those who had gone through the entire course.

His Royal Highness the Commander-in-Chief then addressed the gentlemen cadets, and expressed his regret that, owing to the requirements of the service. he was unable to allot more than 20 commissions among the successful competitors. These would, of course, be distributed in the order of merit, and the recipients would be gazetted with the least possible delay. Referring to the report of the Council on Military Education, his Royal Highness stated his entire concurrence in the sentiments of the Commissioners, and added that what he had that day seen, afforded the strongest evidence of the earnest and persevering spirit in which the gentlemen whom he was addressing had applied themselves to their various duties. The Commander-in-Chief alluded to a fact which he heard with regret, that the report for the last half year did not speak as highly of "conduct" at Sandhurst College as in the previous term, and emphatically pointed out the necessity for amendment in this particular.

The following are the names of the successful cadets, with their respective marks, in the order of merit as determined by the Examiners:—

	No. of Marks.
1. William S. Cooke	6620
2. John A. Grattan	6149
3. Francis E. Lloyd	5698
4. Philip Walker	5595
5. Hendley P. Kirkwood	5447
6. Russell Skinner	5303
7. William B. Burton	5286
8. Henry W. Ashford	5006
9. Thomas C. Lambert	4925
10. Charles De J. Græme	4646
11. George U. Prior	4529
12. William Wilmer	4515
13. George F. Chambers	4514
14. Philip P. D. Clarke	4354
15. Owen Phibbs	4347
16. Sylvanus R. B. Partridge	4303
17. John C. Robinson	4238
18. John A. Dawson	4229
19. Edward W. Sawyer	4188
20. John De R. Dick	4159

Prizes were then presented by the Governor to gentlemen cadets who had distinguished themselves during the last half-year in the various branches of study, as follows:—

Mathematics.—First prize, Skinner; second, Walker; third, Tylden.

Fortification.—First prize, De Wend; second, Howes.

Military Surveying.—First prize, Cooke; second Græme.

Military Drawing.—Bleazby.

Landscape Drawing.—Nangle.

French.—First prize, Cooke; second, Fitz Herbert.

German.—First prize, Cooke; second, Fitz Herbert.

Military History.—First prize, Kirkwood; second, Creek.

Geology.—Lambert.

Exemplary Conduct.—First prize, Gibbons; second, Cargill; third, Ashford; fourth, Walker.

The successful students, to whom with their prizes a few words of counsel and encouragement were addressed by Sir H. Jones, were loudly cheered by their companions; and, though it was necessarily matter of regret that more commissions were not at the disposal of the Commander-in-Chief, an excellent feeling pervaded the entire school. On quitting the Hall, the Governor received a no less hearty round of cheering than any by which it had been preceded.

Her Majesty held an investiture of the Bath on Monday afternoon at Buckingham Palace, at which the following officers were decorated Knights Grand Cross of the Order:—Admiral of the Fleet Sir John West, Admiral Sir William Hall Gage, General Sir George Scovell, General Lord Downes, Admiral Sir Thomas John Cochrane, Admiral Sir George Francis Seymour, General Sir Frederick Stovin, General Sir James Fergusson, and Lieut.-General Sir John Bell. Sir James Fergusson also received from the Queen the honour of Knighthood with the Sword of State. The following Knights Commanders were then severally introduced:—Colonel Alfred Hastings Horsford, late Rifle Brigade; Lieut.-General Philip Bainbrigge, Lieut.-General Thomas Erskine Napier, Lieut.-General the Hon. Charles Gore, Lieut.-General Samuel Burdon Ellis, Vice-Admiral Provo William Parry Wallis, and Lieut.-General George Judd Harding. After which the undermentioned Companions of the Order received from the Sovereign their respective decorations:—Lieut.-Colonel John Archibald Ballard, Bombay Engineers; Lieut.-Colonel Arthur Scudamore, 14th Light Dragoons; Colonel George Le Grand Jacob, 5th Bombay Light Infantry; Colonel Maurice Griffin Dennis, 60th Rifles; Lieut.-Colonel William Payn, 53rd Regiment; and Lieut.-Colonel Edward Hocker, Royal Marines.

Obituary.

ADMIRAL EDWARD HAWKER, who died on the 8th inst., was the son of Captain James Hawker, R.N., who when commanding the Mermaid frigate on the coast of America, was chased one moonlight night by a French squadron, and, finding escape impossible, ran his ship ashore near Philadelphia and burnt her, to prevent her becoming a prize to the enemy. He and his crew were taken prisoners, and very badly treated; but upon his liberation he was at once appointed to the Iris, a 12-pounder frigate, and in her, after taking many enemy's vessels, he fought a very severe action in a calm with the Hermione, an 18-pounder frigate, commanded by the distinguished Latouche Treville. A breeze springing up, the Hermione, whose masts and rigging were less crippled than those of the Iris, made sail and escaped. Captain J. Hawker afterwards commanded the Hero, 74, when Commodore Johnstone's squadron was attacked by a French fleet at Porto Praya in 1781, and the English Hero engaged the French line-of-battle ship of the same name, the flagship of M. de Suffrein. Captain J. Hawker accompanied Commodore Johnstone's squadron to the Cape, but was compelled by ill-health to return to England, and died soon after his return. His son, Edward, the subject of this notice, was born on the 7th of November, 1782; and on the 28th of May, 1786, was entered by H.R.H. Prince William Henry on board his ship the Pegasus, 28. Mr. Hawker's name was subsequently upon the books of the Powerful, 74, commanded by his cousin, Captain O'Brien, and of the Impregnable, 98, Captain Sir T. Byard; and in 1793, at the early age of ten years, he was a midshipman on board the Pegasus, 28, and then of the Swiftsure, 74, each commanded by his brother-in law, Captain (afterwards Admiral) Boyles. In May, 1794, the Swiftsure chased two French frigates, who separated when she closed with them; but after thirty-six hours chase, and a running fight, she captured the largest of them, the Atalante, 38, commanded by M. (afterwards Admiral) Linois. The Atalante had 10 men killed, and about 30 wounded; the Swiftsure had 1 man killed, and 2 or 3 wounded. In July, 1796, Mr. Hawker was made lieutenant, when only thirteen years old, and with Captain Boyles exchanged into the Raisonable, 64, and was employed on the Jamaica station for a year and a-half, and then at the Cape of Good Hope for two years and a-half, cruising and making some captures off the Isle of France. In 1799 Mr. Hawker was appointed lieutenant of the Spitfire, of 18 guns, commanded by his brother-in-law, Captain Michael Seymour (afterwards Rear-Admiral Sir Michael Seymour, Bart., K.C.B.); and, cruising off the coast of France, captured two large French privateers, the Heureuse Société, of 18 guns, and the Heureux Courier, of 14 guns. In 1800 he was first lieutenant of the Garland, Captain Honyman, M.P., cruising off the coast of France; and in June, 1801, he became first lieutenant of the Thames, 32, cruising off Cadiz; and on the 21st of September commanded her boats at the very spirited capture of a Spanish privateer carrying two 4-pounders, two brass swivels, and 31 men—then engaged in the Mediterranean, and took the news of the peace to Alexandria, and was paid off with the Thames. At the renewal of the war in 1803, Mr. Hawker was appointed to the command of the Swift, cutter, of 79 tons, eight 4-pounders, and 24 men; and was sent out with despatches to Rear-Admiral Sir Samuel Hood off Martinique, and was afterwards sent to keep a look-out off the Diamond Rock. Observing two schooners in a narrow harbour to the eastward, he attempted, with the help of a small English privateer, to cut them out, having observed that a fort at the entrance of the harbour was not manned. Mr. Hawker succeeded in carrying off one schooner, but the other was aground, and whilst endeavouring to get her afloat the French came down in force, and Mr. Hawker was compelled to retreat through a very heavy fire, which, disabling one boat, three men of the Swift and four belonging to the privateer were taken prisoners. Sir Samuel Hood, in a private letter, spoke with high approbation of this dashing affair, of which Mr. Hawker had made no official report. On reaching Jamaica with his prize, Mr. Hawker was appointed first lieutenant of the Bellerophon, 74, Captain Goring; and on the 29th of August, 1803, he was promoted to the command, first of the Port Mahon, brig, and then of the Mignonne, of 18 guns, on the Jamaica station. Whilst under his command, the Mignonne had one of her topmasts shivered, and three men killed by lightning. In June, 1807, Captain Hawker was made Post-Captain into the Theseus, 74, bearing the flag of Admiral Dacres, and in company with the Hercule, 74, experienced a terrific hurricane, which lasted for three days, and in which the Theseus was totally dismasted, and kept afloat only by the most extraordinary exertions of officers and crew, and by throwing many of her guns overboard. From the Theseus, Captain Hawker was given the command of the Tartar, 32, and cruised for two years off the West Indies and coast of America, capturing L'Observateur, of 18 guns and 104 men, and many neutrals carrying enemy's property. In 1806, the Tartar being ordered home, in consequence of damage sustained in a hurricane, Captain Hawker exchanged into the Melampus, 36. In her he convoyed a fleet of transports from Halifax to Barbadoes, and captured Le Colibri, of 16 guns and 92 mens, Le Béarnais, of 16 guns and 109 men, and also cut out a felucca from Aguadilla. He then assisted at the reduction of Guadaloupe, and after capturing La Fautome, letter of marque, of 20 guns, he returned to the Halifax station till 1812, when, the Melampus being paid off, Captain Hawker was appointed in March, 1813, to the command of the Bellerophon, 74, and in 1815 to the Salisbury, flagships of Vice-Admiral Sir Richard G. Keats, on the Newfoundland station, and in the former captured Le Génie, of 16 guns. In 1827 Captain Hawker was appointed Flag-Captain to Admiral the Earl of Northesk, Commander-in-Chief at Plymouth, first in the Britannia, 120, and then in the St. Vincent, 120. In 1830 he went on half-pay, and attained Flag rank in 1837. In 1858 Admiral Hawker accepted the "good service" pension vacant by the death of Admiral Lord Aylmer.

Admiral Hawker married, first, Joanna, eldest daughter of George Poore, Esq., of The Grove, Newchurch, and Egypt, in the Isle of Wight; and secondly, in 1843, Lady Williams, widow of Admiral Sir Thomas Williams, G.C.B. She died in 1858. By his first marriage, Admiral Hawker leaves six sons and three daughters.

The obituary for the past few weeks has teemed with deaths of Senior Officers. General Sir W. Cotton, G.C.B.; General B. Drummond; Colonel Sir A. Murray, Bart., &c. &c. ; to which may be added that of their comrade, Lieut.-Col. Thomas James Barrow, whose bravery and zeal ought not to pass unnoticed. He was son of Major-General Barrow. The late Lieut.-Colonel Barrow, on leaving Eton College, joined the Coldstream Guards at the age of 18, in 1803. He served in the expedition in the North of Germany, commanded by Lord Cathcart, in 1805; in the expedition to Copenhagen in 1807; in the expedition to Walcheren, in the Light Infantry Brigade of the Guards, under Lord Cathcart, in 1809; he joined the 1st Battalion of the Coldstream Guards in Portugal. On Sept. 27, was present at the Battles of Busaco, Fuentes d'Onor, the siege of Cieudad Rodriego, and Battle of Vittoria; at the assaults and capture of St. Sebastian, where he commanded the assaulting party of the Guards, and for which service he was promoted to the rank of Major in the Army, and had the honour to receive thanks (in Public Orders) from his commanding officer, His Royal Highness the late Duke of Cambridge. He was also present at the action of Nivelles and Nive. After 29 years' service, this officer received the war medal and 7 clasps, and was honoured by the personal friendship of the late king, and a numerous circle of acquaintances. For good service, correct judgment, and highly polished manners, he has been scarcely excelled.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAYLY—June 10, at 20, Woodside Terrace, Glasgow, the wife of Major John Bayly, Royal Engineers, of a daughter.

BIDDULPH—June 8, at 22, Chester Square, the wife of Colonel T. M. Biddulph, of a son.

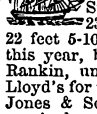
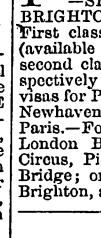
Every description of army business transacted.



FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O. M. 236 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9½ knots on a remarkably light consumption of fuel, being 2½ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to

CURRY, KELLOCK, & Co., Brokers, Liverpool.



FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—700 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to

CURRY, KELLOCK, & Co., Brokers, Liverpool.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.,; and at Messrs. PARIS & Co., 10, St. James' Street, S.W. EDINBURGH, 5, George Street. DUBLIN, 65, Upper Sackville Street.

INDIA.—OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.

Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.

C. DOUGLAS SINGER, Secretary.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King Street, Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application.

CHARLES INGALL, Actuary.

Aldershot.—Two handsome Residences, in a pleasant and healthy position, within an easy distance of and on the main road between the Camp and Tongham and Ash Stations.

MESSRS. DEBENHAM & TEWSON will SELL, at the Mart, on TUESDAY, JUNE 26, at 12, TWO ornamental well-built FREEHOLD VILLA RESIDENCES, each having five bed-rooms, dressing-room, two drawing-rooms, dining-room, two kitchens, and offices, with good garden, stable, and coach-house, groom's room, &c. One is let to a highly respectable tenant, at £70 per annum, and of the other possession can be had. Particulars of J. PATTISSON, Esq., solicitor, 13, Furnival's inn; of Messrs. BLOOD and DOUGLAS, solicitors, Witham, Essex; and at the Estate Offices, No. 80, Cheapside, E.C.

Freehold Villa, on the Banks of the Thames, between Twickenham and Kingston, and within a few minutes' walk of the proposed new Railway Station at Hampton Wick.

MESSRS. DEBENHAM AND TEWSON will SELL, at the Mart, on WEDNESDAY, JULY 4, at 12 o'clock, the elegant modern FREEHOLD VILLA, known as Denbigh House, Hampton Wick, standing quite detached, in grounds of nearly an acre, fronting the main road from Twickenham to Kingston, and having lawns and terrace walks sloping to the river. The residence is finished in a superior manner, and contains eight spacious and lofty bedrooms, three handsome reception rooms and offices; adjoining is stabling for two horses, coach-house, and man's room. Also will be offered, in a separate lot, a piece of Freehold Land, available for additional garden ground, or for the erection of another residence. The soil is gravel; excellent spring water. The neighbouring parks of Bushey, Hampton Court, and Richmond afford a variety of beautiful walks and drives in every direction. Particulars of THOMAS JOHNSTON, Esq., Solicitor, 5, Raymond Buildings, Gray's Inn, W.C.; and of the Auctioneers, 80, Cheapside, E.C.

Near Reading, Berks.—The Freehold Mansion and 54 Acres, known as Peppar Park.

MESSRS. DEBENHAM & TEWSON, have received instructions to offer to AUCTION, at the Mart, on WEDNESDAY, JULY 4 (unless previously disposed of by private contract), the choice FREEHOLD ESTATE known as Peppar Park, delightfully situate within two miles of the railway stations at Reading, and comprising an elegant modern mansion, possessing every necessary accommodation for the establishment of a nobleman or gentleman of affluence, with first-rate stabling and other out-offices, pleasure and productive gardens, grapery, and forcing pits, and a nicely timbered park, the whole comprising about 54 acres. The locality is pre-eminent for salubrity, the soil being light and dry, and the air healthy and bracing. It is also celebrated as a good sporting district, and one of the best neighbourhoods in England. Further particulars may be obtained of Messrs. CROWDER, MAYNARD, SON, and LAWFORD, 57, Coleman Street, E.C.; and at the Auctioneers' Offices, 80, Cheapside, E.C.

ARMY AND NAVY PENSIONERS' EMPLOYMENT SOCIETY, 22, Parliament Street, S.W.—The FIRST ANNUAL MEETING of this Society will be held at the United Service Institution on THURSDAY, the 21st instant, at Two o'clock.

June 12th, 1860.

THE SOLDIERS' DAUGHTERS' HOME, Hampstead, for the Maintenance, Clothing, and Education of the Daughters of Soldiers, orphans or not.

The ANNUAL GENERAL MEETING of the Subscribers and Friends of this Charity will be held in the Theatre of the United Service Institution, Whitehall Yard, S.W., on MONDAY, the 18th instant, at 3 o'clock p.m., the Rev. the Chaplain-General in the Chair.

H. L. POWYS, Major, Chairman of the Committee.

SHIPWRECKED FISHERMEN AND MARINERS' ROYAL BENEVOLENT SOCIETY.

The recent terrific gales compel the Committee earnestly to APPEAL to the public for HELP to relieve the poor castaways, or their widows and orphans. The Shipwrecked Mariners' Society is entirely dependent on voluntary contributions. For the last three years its expenditure has been beyond its income 2500*l.*, and the incessant demands made on its funds from sufferers by disasters of the sea continue to increase, 10,354 persons having been relieved last year, which tells its own tale, and the demands for the first quarter of this year have exceeded that of the last by 1000*l.*

HENRY HOPE, Admiral, Chairman.
FRANCIS MAUDE, Capt. R.N., Deputy-Chairman.
Bankers—Messrs. Williams, Deacon, & Co., Birchin Lane, City, E.C.
FRANCIS LEAN, R.N., Secretary.
Office, Hibernia Chambers, London Bridge, S.E., May, 1860.

GARIBALDI FUND. Having been appointed by General Garibaldi to receive and forward subscriptions for "Il millione fucili" (the million muskets), I beg to state that I am ready to receive and duly remit any sums of money that may be subscribed for the above object.

TO PRESIDENTS OF MILITARY MESSES.

BAVARIAN TONIC BEER.—This highly popular Tonic Beer is now in its highest perfection; it is pure and refreshing, and is patronised by most of the leading members of the medical profession. Price, for cash, 4s. per dozen quarts, delivered to all parts of London free. Best Devonshire Cider, quarts 7s., pints 4s. Hereford Rough, quarts 8s., pints 4s. 6d.

C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

EAU-DE-VIE.—This Pure PALE BRANDY, though only 16s. per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 34s. per doz.; or securely packed in a case for the country, 35s.—HENRY BRETT & Co., Old Furnival's Distillery, Holborn, E.C. To be obtained only at their Distillery.

KINAHAN'S L. L. WHISKY *v.* COGNAC BRANDY. — This celebrated OLD IRISH WHISKY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s. 6d. each, at most of the respectable retail houses in London, by the appointed agents in the principal towns in England; or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET.—Observe the red seal, pink label, and cork branded, "Kinahan's L. L. Whisky."

CYDER AND PERRY IN THE GREATEST PERFECTION. — Devonshire Cyder, 8s. qrts., 4s. 6d. pts.; Cockagee Somerset Cyder, 14s. qrts.; Old Field Perry, 18s. qrts., 10s. pts.; the real Taynton Squash Perry, 25s. qrts., 15s. pts. Hampers and bottles, 3s. per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

COVENT-GARDEN MARKET.—To Clubs, Hotels, and large Establishments.—PULLEN & SON are confident the above would effect a great saving by having their supply of FRUIT and VEGETABLES fresh every morning from their Wholesale and Retail Warehouse, Centre Avenue, Covent Garden and Farringdon Markets. Wedding Bouquets provided. Country orders punctually attended to. A list of prices forwarded on application. Carriage free to any part of town.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

YOUTH, BEAUTY, AND ARTICULATION.—Mr. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10s. per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10s. 6d. per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11s., 22s., and four quantities in one for 33s. Attendance daily, from 10 till 6.

TEETH. — MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.

Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.

Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post freee for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

SEQUELIN'S OIL.—This vegetable preparation is most successful as an instantaneous restorative, strengthening weak hair, opening pores of the skin, most effectual in the growth of hair and eyebrows, &c., preventing its falling off, curing the scurvy, giving also brightness, softness, and keeping its natural colour, and checking the most obstinate baldness in two months. One bottle is sufficient. Price One Guinea. Sold by S. SEQUELIN, 40, Wharton Street, Lloyd Square, W.C. Depôt, G. JOZEAU, French Chymist, 49, Haymarket, S.W.; METCALFE, BINGLEY, & Co., 131, Oxford Street, W. The most satisfactory testimonials shown on application.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

MONEY.—TO OFFICERS, NOBLEMEN and GENTLEMEN.—Wanted to place out several sums of money upon Real and Personal Estate. To those having reversionary interests, life estates, and property in settlement, and to whom payment of interest would be a consideration, can have it deferred till in possession. Advances made to Loans effected for short periods upon approved Personal Securities. Apply by letter, or personally between 1 and 5 o'clock to Mr. COLLINS, 13, Duke Street, St. James's, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. & MRS. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Uniforms, clothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

*** Either Volume may be had separately.

This day is published, price 2l. 2s. (completing the work in 4 Vols., price 8l. 8s.) Vol. IV. of the

NATURE-PRINTED BRITISH SEA-WEEDS; A History, accompanied by Figures and Dissections, of the Algæ of the British Isles. By WILLIAM GROSART JOHNSTONE and ALEXANDER CROALL. Nature-Printed by HENRY BRADBURY.

CONTENTS:

VOLS. I. & II.

RHODOSPERMEÆ.—RED SEA-WEEDS.

VOL. I.—SERIES I. DESMIOSPERMEÆ. 90 Species. 70 Plates.

VOL. II.—SERIES II. GONGYLOSPERMEÆ. 88 Species. 63 Plates. With Dissections of all the Species.

VOL. III.

MELANOSPERMEÆ.—OLIVE SEA-WEEDS.

SERIES III. 95 Species. 52 Plates. With Dissections of all the Species.

VOL. IV.

CHLOROSPERMEÆ.—GREEN SEA-WEEDS.

SERIES IV. 102 Species. 25 Plates. With Dissections of all the Species.

Synoptical Tables of the Orders, Genera, and Species. General View of the Structure and uses of the Sea-Weed Family. Sketch of their classification and Distribution. Instructions for the Cultivation of the Algæ, their preservation in the Herbarium, and their preparation as objects for the Microscope.

Either Volume may be had separately, price £2 2s. each.

NOTICES OF THE PRESS.

"In this Work of 'British Sea-Weeds' is to be found all that could be wished for, and more than could be expected, in reference to the tribe in question. The specimens you gather from the beach, wash and carefully display before admiring eyes, are not more fresh and perfect than are these illustrations now before us. Drawings, however highly finished in coloured plates, and however faithfully they represent what they are intended to place before you, are not to be compared with these prints. You touch them with your finger to ascertain whether they lie upon the surface of the paper or are a part of it."—*Morning Chronicle.*

"This volume is well qualified to receive popular approval, but it has, beyond this, other recommendations. It is a first-class book, and it is a first-class scientific book as regards its execution. . . . As a scientific book, the authors have well done their part too; for they have given us a clear, correct and comprehensive scientific account of the plants they have treated on, adding such popular information as the subject admitted of; and they have given us in addition, well-executed magnified dissections of the parts essential for scientific study."—*Illustrated London News.*

"For this kind of work Nature-Printing is exactly adapted. Every delicate and inimitable ramification is most attractively and accurately represented. The forty-six plates in this volume can scarcely be surpassed, and have not, as far as we know, been equalled. . . . We have found them pleasing, and still pleasing during several inspections. The volume is handsomely got up, and will make a very attractive drawing-room table-book at home or at the sea-side."—*Athenæum.*

"The process by which it is produced is that delightful one which has been a labour of love to Mr. Henry Bradbury in bringing to perfection, and which was first applied to the Ferns. To speak of the accuracy of the plates is of course a misnomer. They are of the nature of photographs; and the only possible drawback to the work is, that its extreme beauty will banish to the drawing-room table, as a more example of pretty drawing, what, as a scientific manual, has not been equalled."—*Saturday Review.*

"While the lover of books will admire this volume for its singular beauty, lovers of natural history will feel that it is indispensable to the library of all who occupy themselves with the study of the vegetation of the mighty deep."—*Gardener's Chronicle.*

OFFICE, 11, SOUTHAMPTON STREET, STRAND, W.C.

Post-office Orders to be made payable at the Charing Cross Office, to W. LITTLE, MANAGER.

A Single Specimen Copy sent free by Post on receipt of Four Postage Stamps.

NEW WORK by the AUTHOR of "CURIOSITIES OF WAR."

Preparing for early Publication in Monthly Parts, price One Shilling, with fac-simile Illustrations printed in Colours,

MEDALS OF THE BRITISH ARMY,

AND

HOW THEY WERE WON.

BY THOMAS CARTER,

AUTHOR OF "CURIOSITIES OF WAR, AND MILITARY STUDIES."

"What is a ribbon worth to a soldier?
Everything! Glory is priceless!"—SIR E. B. LYTTON.

NO general history of these Distinctions having been yet attempted, it is considered that a Work which shall afford a clear insight into the circumstances under which such Honours were gained is likely to be received with favour by the public, when accompanied by fac-similes printed in colours of the Medals and Ribbons, and interspersed with notices of Regimental and Individual Acts of Heroism, and Military Statistics of an interesting character.

In order to render this National Work generally accessible, it will be published in Three Sections, of about Five Parts each, commencing with the Crimean Campaign:—the First Section, containing "THE CRIMEAN CAMPAIGN," Dedicated, by Permission, to MAJOR-GENERAL THE HON. SIR JAMES YORKE SCARLETT, K.C.B., Adjutant-General of Her Majesty's Forces, &c., &c.—to be followed by the remaining two portions, the one comprising the Services enumerated in the General Order of the 1st of June, 1847, from the Battle of Maida, and terminating with Waterloo—Dedicated, by Permission, to HIS GRACE THE DUKE OF RICHMOND, K.G.;—the concluding Section being devoted to the Campaigns in India, Egypt, China, &c., from 1799 to the suppression of the Indian Mutiny, and including the Medals accorded with annuity, gratuity, or otherwise, for distinguished conduct and long service.

When completed, the series will form a handsome volume, elegantly illustrated, which will contain a record of unsurpassed Military Prowess; and it is anticipated that such an attempt to perpetuate the memory of the brave, by bringing together the gallant deeds of officers and men, will meet with patronage from a public so deeply indebted to, and interested in, the proud achievements of the British Army.

*** Orders received by the principal Booksellers.

London: GROOMBRIDGE & SONS, 5, Paternoster Row, E.C.

This day is published, price 10s. 6d.; or, separately, 1s. each,

MAJOR FITZROY SMITH, 7th Dragoon Guards, India, son of Captain Smith, of Rushlands, or Rush House, Thirsk, Yorkshire, will HEAR of SOMETHING to HIS ADVANTAGE by applying to Messrs. J. & H. COPPERWITH, Dundee, Scotland.

TO *RIFLE* VOLUNTEER CORPS.—An officer, who is qualified for the duties of an *ADJUTANT*, but who has no influential friends to help him, would be very grateful to any gentleman who would put him in the way of getting such an appointment. He can produce the most unequivocal testimonials as to character and ability, but having risen to his present position entirely through his own exertions, he finds it impossible to obtain an appointment, from having no person of influence to assist him. Address R. V. A., ARMY AND NAVY GAZETTE Office.

TO RIFLE VOLUNTEER CORPS.—An officer of five years' service, who has taken a First Class Certificate at Hythe, will conclude the Annual Course of his Regiment on the 30th inst., and wishes to employ himself for three months, or permanently, as MUSKETRY INSTRUCTOR to a Rifle Volunteer Corps. He is qualified to act as Adjutant. Address H. C., Musketry Instructor, ARMY AND NAVY GAZETTE Office.

MESSMAN WANTED.—A MESSMAN is required by the 47th Regiment at Dover, as their present one leaves them on the 6th July. Terms and testimonials to be sent to the President of the Mess.

WANTED, for the Permanent Staff 4th D.L.O. Light Infantry Militia, TWO BUGLERS. Solo Cornet-players will be preferred. Apply to Mr. OAKDEN, Bandmaster, Warrington.

WANTED, a RIFLE INSTRUCTOR for the 8th Lincolshire Rifle Corps.—Head Quarters, Sleaford.

RIFLE VOLUNTEERS.—A SECRETARY WANTED for a Rifle Corps in its infancy, but with good prospects and patronage. A gentleman who can make himself useful in adding to the number may find this a profitable mode of employing his spare hours. Address A. B. C., care of Mr. MILLER, 47, Bedford Street, Strand, W.C.

NAVAL CADETS.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

CONDUCTED BY MR. THOMAS EASTMAN, R.N., Five Years Naval Instructor on Board H. M. S. "Excellent."

The following GENTLEMEN have PASSED as NAVAL CADETS from this ESTABLISHMENT since SEPTEMBER, 1859.

* W. H. Roberts.	H. W. Gibson.
* C. G. Hunt.	M. W. Abbott.
H. E. Walters.	* J. L. Smith.
A. P. Pascoe.	L. W. Hyman.
* H. Pugh.	H. M. Milman.
W. F. E. Freeland.	C. G. St. J. Hough.
* R. R. Jaffray.	E. T. Dugdale.
Lord Albert Clinton.	F. Coddington.
* S. J. Weld.	C. E. Gissing.
R. G. Fairfax.	G. L. Lindeman.
* A. Hutchinson.	A. E. Bancroft.
C. W. Atkinson.	A. H. Campbell.
* A. W. Brabazon.	C. W. Herbert.
* E. G. L. Law.	A. Kingscote.
J. Hazel.	L. F. Wells.
J. Needham.	H. A. Baring.

* Passed from H.M.S. BRITANNIA, for sea-going ships, at the Quarterly Examination which terminated the 26th ult.

Mr. W. H. Roberts passed from H.M.S. BRITANNIA *first of 55 Naval Cadets.*

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. *Hon.* St. John's, Cam., receives 25 PUPILS to educate for the Royal and Indian Navies, the Army, Woolwich, and Addiscombe. Terms, 70, 80, and 100 guineas, according to age. Upwards of 70 pupils have passed sine 1854.—St. Mary's Hall, Southsea, Hants.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. THE Duke of Somerset's scheme of Naval Retirement was no sooner published than it was withdrawn. It was issued only on Friday last week, and we printed it *in extenso*, in next day's GAZETTE. But while we were at press, producing it for the general information of the Service, it was being attacked by the late First Lord of the Admiralty and various naval officers in the House of Commons, where it met with such opposition that Lord Clarence Paget withdrew from the vote for Half-pay and Retirement the 12,000*l.* he had asked to carry the scheme into effect. We regret this exceedingly. We do not hesitate to say so, although we are necessarily not in a position to give an opinion as to the merits of the scheme in all its bearings. We regret it, because something must be done to put the Active List on a more satisfactory footing; and yet two successive, and we might say, without offence, rival Boards have brought forward schemes for the purpose, both of which have been summarily rejected. This leads us gravely to consider this important question in its two-fold aspect, as regards its expense and as a reward for service, being ourselves outsiders and personally disinterested. To us it appears to be more a question for a referee than for a Royal Commission. Two Boards of Admiralty or "Commissions," as indeed they are, consisting chiefly of naval officers, have already gone into the subject, we presume after mastering all its details. All that is now necessary is, to hear the *pros* and *cons* of the two awards attempted to be delivered, and to decide between them. One result of a Commission of course would be a loss of time; and, in the meantime, we venture to suggest that it might even yet be prudent to accept the Duke's scheme at once, subject to any modification or extension of it a year or two hence, when a Royal Commission (if there is to be one) shall have gone over the ground a third time. For let us see the immediate effects of this scheme, and what three ranks of the Service have been deprived of, through the zeal of their "friends" in the House of Commons.

In the first place, here is a vote of 12,000*l.* asked from Parliament, to be applied in augmentation of the retired pay of certain naval officers, and in order to place some 250 others above sixty years of age on the retired list—"8 captains, 64 commanders, and 179 lieutenants." At all events, this amount of money was intended to be distributed during the year among a few hundred naval veterans, who will now continue 12,000*l.* poorer, the vote having been refused. Sir John Pakington led the opposition, and, of course, contrasted the "limited scheme" of the Duke of Somerset with his own plan of retirement, of which he naturally—we do not say with or without good reason—had a higher opinion. But we all remember the fate of his own scheme. Its proposal was perhaps the only "unpopular" step taken by Sir John Pakington when at the Admiralty. Admirals, especially, were savage when they heard of it. One distinguished flag-officer declared he would go to Her Majesty direct if the scheme were attempted; and Sir Charles Napier—after taking undue liberties with the "most confidential" paper on the subject which had been confided to him—publicly pulled it about in the House, and indeed was chiefly instrumental in securing its rejection. And yet we find Sir Charles Napier joins fervently with the late First Lord in denouncing the present Board's scheme, although it does not touch Admirals at all. Perhaps he thought, the Duke's scheme once accepted, their turn must needs come.

Now, we are not clear that the rejection of this grant of 12,000*l.*—if we are to consider it was really rejected by the Service—was at all wise. At least it would have been more satisfactory to know how much money Sir John Pakington was prepared to bestow, as retirement upon the same classes of officers. His scheme, as well as the Duke's, has been printed and laid before Parliament, but Sir John's never got so far as to form an item in the votes asked from Parliament; and therefore it is not very certain what would be the expense to the public of the boon intended to be conferred upon the lieutenants, commanders, and captains, who would have been retired by his scheme. We cannot perfectly work out such results ourselves, nor can individual officers do so; and we think it an inadequate and unsatisfactory criterion by which to judge any general scheme whatever, for individual officers to apply it to their own single case—or to a few known cases—and be guided by such isolated results. We can easily imagine that any possible scheme, if thus judged, might be hastily condemned and frustrated by the outcry of a few, greatly to the detriment of the Service at large. Truly the Service complains, that each class, but chiefly "Captains, R.N.," are swamped under the present state of things. Unfortunately the Service also seems to cry, "I *will* be drowned and nobody *shall* help me!" And we fear the public must begin to think that more compassion may now be due to "humane" First Lords attempting a rescue, than to the impatient and troublesome man who flounders about in the water! So much, at any rate, for the mere money view of the case;—12,000*l.* was offered for the retirement of these officers above sixty years of age, and it has been refused.

The next result of the rejected scheme would have been an immediate promotion of 3 commanders to be captains, and of 18 lieutenants to be commanders. These 21 officers, however, must now remain where they were, with their present rank and pay. Besides these immediate results, the active list of lieutenants would also have been immediately reduced to 876, leaving no less than 324 vacancies to make up the 1200 authorised; and, to quote the words of the scheme, "what is far more important for the efficiency of the Service," this state of the Lists of these three ranks of officers "will hereafter admit of a promotion for every vacancy." This great boon to the Service has also been rejected; and upon death vacancies occurring, officers must remember that each death would have been followed by promotion had this retirement scheme been accepted, instead of only one promotion after three deaths.

As regards the time served as mates, or in the Coast-Guard on shore, and as Mail and Transport agents, there appears to be considerable misunderstanding. If mate's time were counted for the retirement of lieutenants, it must be evident that the same ratio of pay for the same periods of service could not be allowed, unless, indeed, the Admiralty had unlimited supplies, and no House of Commons to satisfy. We will not, however, say more on this point, but would suggest to those who think we are so egregiously wrong in taking this view, to work out some dozen cases, counting such service and applying it either to the scheme of the present or late Board of Admiralty, and send us the results, which we shall gladly print in our columns. We are most anxious to see the Service benefited; and, if Sir John Pakington will say he was prepared to ask for double what was asked by the Secretary of the Admiralty, and to give the same rates of retired pay for 6, 9, 12, 15, and 20 years' service, counting mate's time in these several periods, we can only say we shall be most glad to hear it, as we presume he would have been able to satisfy the House (as he would doubtless the Service) before laying such a scheme before it. Our correspondents who have got warm on this subject will probably cool down when they go somewhat deeper into it; and some of them may bye-and-bye begin to think that the 12,000*l.* offered might have been accepted, if not as final, at least as an instalment and better than "the nothing" we see is the result of rejecting everything.

We think those officers who have been in the Coast-Guard service have also unwisely overstated their case. As far as we can learn, the merit of such service is not denied, nor intended to be underestimated or slighted, in three years being only counted as two of sea service, in the Duke of Somerset's scheme. Here, at any rate, it has the advantage over Sir John Pakington's, in which Coast-Guard time was only counted as equal to half sea service. In both, Coast-Guard, Mail, and Transport services, are not reckoned the same as sea service in the fleet, because of the more constant employment of the officers, and greater length of their services when so employed, relatively to the ordinary periods of the services of their brother officers. This seems to us very like justice. Since the war, forty years ago, it has been a piece of good fortune for naval officers to be much employed. The criterion of service, therefore, must not be applied too rigidly to govern the rate of retirement, otherwise the least fortunate officers will be made to suffer doubly, in being first denied full pay and employment, and afterwards, and in consequence, in being paid a less rate on retirement. At the same time we do not see how actual service can be left out of the calculation, though we are aware of the clogged state of the Active List for many years past. For the same reason, however, we are most anxious to see the Active List now weeded and placed on such a footing, that promotions would be rapid, service almost constant, and that this accomplished, a scheme of half-pay and retirement, based upon such service, might be both liberal and just for the future.

Of course we do not for a moment advocate an age of retirement for captains and lower ranks, and not for those above them. We are glad to find that one very distinguished officer — Sir Michael Seymour — commended Sir John Pakington's scheme of retirement, although it did apply such a rule to admirals. We only say we should rather accept the last scheme, even as an instalment, than go on rejecting everything. We had hoped the Duke of Somerset would not have hesitated to deal with flag-officers as Sir John Pakington attempted; but we are aware of the powerful political interest the admirals can command. The Duke was, therefore, probably wise in leaving them out *at first*; but we must frankly tell the old admirals of England that theirs is a shortsighted policy. We must also say to all other officers in the Service, that this is not the time to raise over-nice questions as to their pay and emoluments, with the large and increasing armaments which are necessary for our national safety, and while public accusations are made by men who have in some degree the ear of the people and too much influence in the House of Commons, that our Army and Navy are kept up at their present enormous cost only to provide places for the sons of the aristocracy.

The following is a comparative view of the two schemes of Naval Retirement, as regards the immediate expense for Captains, Commanders, and Lieutenants; and also how time was to be reckoned:

SIR J. PAKINGTON'S SCHEME.		DUKE OF SOMERSET'S SCHEME.
Extract from "immediate financial consequences," excluding Flag Officers		Proposed Vote, £12000
25 Captains	£3300	
110 Commanders, to be placed on Captain's Reserved List	1000	
Good Service Pensions (new)	1200	
Increase of Greenwich Half-pay ...	1600	
Margin for any consequent promotions on Commanders' and Captains' Lists	800	
	£7900	£12,000

SCALES OF RETIRED PAY.

COMMANDERS.

	s. d.		s. d.
After 15 years' service ...	10 6	Under 12 years' service ...	10 6
,, 20 ,, ...	12 0	,, 15 ,, ...	12 6
,, 25 ,, ...	14 0	,, 20 ,, ...	14 6
,, 30 ,, ...	16 6	After 20 ,, ...	16 6

LIEUTENANTS.

	s. d.		s. d.
Under 10 years, service ...	5 0	Under 6 years' service, half-pay

Above 30 ,, ...	11 0		

Mate's time counted. Coast-guard, mail, and transport services counted as half-time only.

Mate's time not counted. Coast-guard, mail, and transport services reckoned 3 years as equal to 2.

The observations in our last number on the condition of the wives and families of our soldiers have

Digitized by Google

found an echo in Parliament. The House of Commons would not pour its cornucopia into the pockets of the Minister for War without fastening on his back a budget of grievances, which start him on his annual course, like Bunyan's Pilgrim, in heavy marching order; but, of all the huge pile, nothing was so distasteful as this one subject. The right honourable gentleman showed it a decidedly cold shoulder, observing that he "would not enter into the marriage question." There is always one obligation which the prodigal who comes to his father for the settlement of his debts, keeps in the background, or on which, should it happen to crop up, he so stifles inquiry that it is omitted from the schedule, and what might easily be met at first is thus allowed to grow into ruinous dimensions. Mr. Sidney Herbert has just taken this course with the "marriage question." The House was disposed to be generous; Colonel Gilpin and Colonel Lindsay afforded an opportunity for a full discussion of the subject; but the Minister for War shuffled out of it. He has succeeded for the present, but the consideration of the question is only deferred; for all the other arrangements of our military establishment tend to environ it with new difficulties, which sooner or later will give it irresistible potency.

The augmentation of the Army at home must render the existing regulations more odious, from their affecting such a much larger number of women and children; while, as regards foreign service, the amalgamation of our Indian force will add to the mortality at sea, as a proportion of the wives and families of soldiers will always be afloat. Thus the evil is one that will grow in magnitude, and become more serious every day. It is vain to think of elevating the character of our soldiers if we leave this gangrene untended. Gymnasiums, reading-rooms, lectures, and all the civilising influences we have introduced, will, we may be sure, be of little avail, if camp and barrack retain in their core such a fruitful source of demoralisation. A soldier cannot be brought to take pride in his profession while his wife, or the wife of his comrade, occupies a position inferior to the spouse of the humblest labourer, and indeed is sunk in a slough, in which it requires almost superhuman virtue to escape contamination. Schools can do little for children reared in an atmosphere pregnant with typhus, consumption, and scrofula,—those scourges of the soldier's offspring, and which exercises as baneful an influence on the mind as on the body. We may fear these children acquire their deepest impressions in the huts where families grow up, from the necessity of their situation, in oblivion of the decencies of life, and even of the most obvious limits of association; or, out of barracks, they run wild in the lowest slums, among the dregs of the population. We are as anxious as the Minister for War, or Sir Frederick Smith, to discourage the soldier from marrying; but, however desirable, this object must not be attained at the expense of humanity. After every practicable amelioration, the position of a soldier's wife will still be unenviable, and the portion of his children a hard one. There will be nothing in the picture to render it attractive, or to tempt others to embrace the same life of struggle and privation. But, on the other hand, to be innocuous, it should not give the soldier an impression that his calling is a bondage, and connection with him a reproach. Those who compare the position of the English with that of the French soldier, should remember in their estimate that one Service is recruited by conscription, the other by voluntary enlistment. What, therefore, is compulsory on all classes in France, in England addresses itself to the choice of a limited number, and as emigration and new sources of employment are tending every day to narrow the field, we must be careful to divest military servitude of every repulsive feature. Much has been done for the soldier, and comparing his condition with that of the class from which we usually recruit, he has little ground for complaint; but the national interest in him is confined to the barrack-yard—to himself, and excludes all his belongings. It may be right to deny him household gods, and we recognise the stern necessity; but that the woman who, with a life of hardship before her, unites her fate with his, should be made a pariah, is more than we can concede.

It has been proposed that the authorised number of married women in a regiment should be increased; but this would be of little benefit, unless the accommodation they obtain in barracks, or the lodging-money given in lieu, were also augmented, and some assistance afforded beyond a participation in the company's washing. Each married couple should have a separate room, and this might be of larger size for a family, particularly where the children are growing up. Colonel Lindsay suggests that buildings for this object should be erected at every barrack, on the principle of the model lodging-houses; and assuredly no better arrangement could be conceived. Separation of families is the first step to be effected in the way both of relief and improvement. Let us establish for the married soldier the privacy of the domestic hearth; and this recognition of the proprieties of life, which camp and barrack have been taught to hold of small account, may, while raising the character of those most concerned, be expected to produce a salutary impression on all around. At the same time, no one can apprehend that such an arrangement will operate as a premium to encourage marriage, and we are persuaded the strictest martinet will soon bring himself to admit that it is a step in the right direction, and one that could not prudently be delayed.

Little more than a week ago, the Emperor of the French reviewed a magnificent army, with cavalry, infantry, artillery, ambulance, and pontoon corps complete, almost in the heart of his capital. Upwards of 55,000 horse and foot, and 196 rifled guns passed before him. At that very moment Marshal Mac Mahon, Duke of Magenta, and mythic King of Ireland, was superintending the movements of a force scarcely less considerable outside the fixed camp, of which he is a chief, in the centre of France. The professional journals of our neighbours have commenced paying particular attention to our naval and military organisation. If the *Moniteur de l'Armée* contains a succession of articles on the National Defence Commission, the *Moniteur de la Flotte* is sure to cry out for more ships, in order that France may obtain the means of securing the liberty of the seas. The harmless expressions of natural pride; the manly and patriotic sentiments of Englishmen celebrating an event in the military history of their country, are resented as though they were direct insults, because, forsooth, the allusions to the services of distinguished regiments are necessarily accompanied by the names of the victories which they had gained, against almost the only enemy against whom their arms have been employed in Europe.

If we would, we could not underrate the efficiency and valour of the army and of the people in conflict with whom we have won our greatest triumphs, and attained to the height of our military renown. We see with regret the unjustifiable tone adopted by some of our public journals when they are forced to speak of French policy. We allude to the personal attacks on the Emperor, which are apt to be regarded by the French army as insulting to them and hurtful to their dignity. The articles of the French press, whether they be provocations or retaliations, must, as has been said over and over again, be regarded as productions which have received so much of the favour of Government as may be implied from the inaction of the censorship. It is not wise, even if it were chivalrous, in us to proclaim with one voice that we are weak and helpless, and to shout out with the other that we defy the enemy of ourselves and of liberty.

But if the consequences of our freedom of speech and of the press be dangerous, our right hands must be ready to vindicate that which the tongue has uttered and the pen has written if we be but right in our opinions. Our gunboats are rotten, our liners are shaky, our fleets want rifled guns—we have no Naval Reserve—some of our crews are mutinous—many classes of our naval officers are discontented—of our fleet thus scattered over the world the communications are difficult by reason of great distance, the administrative body which directs this machinery is viewed with suspicion, and is in danger from time to time of dissolution, which must precede reconstruction. Finally, it has been decided by a commission of eminent authorities that the fleet is not only unable to secure our shores—not only is it in its present state, or even in any possible development, inadequate to protect Ireland or Scotland—it cannot secure London or even Portsmouth against the assaults of an enemy, who, to come at us at all, must come at us by sea. The naval organisation and power thus described cost 15,000,000*l*. Speculating on the continuation of a peace, the rupture of which we nevertheless declare we ought at any time to be prepared for, we are now discussing the propriety of laying out 12,000,000*l*. on forts which shall defend a few arsenals and harbours, and we accept as a mournful truth the statement that London can only be defended, if danger should arise, by the stout hearts of Englishmen outside her open suburbs.

Our Army, thrown broadcast over all the world, is reduced to the minimum of garrison strength at a few points at home. Its organisation may be said to be doubtful; for the Indian debate has opened more than the mere question of amalgamation. The men are indeed admirable in their *physique*, but our Artillery is not yet provided with arms of precision, although our infantry is better equipped in that respect than any army in the world; and our small force of cavalry is considered by at least one high military authority to possess in an excessive degree certain requirements of heavy horse. Such are the statements distributed all over the world. It might be desirable to suppress them, but we cannot gag the press or muzzle the Parliament of Great Britain and Ireland. Let us suppose that defects as great—of which we hear nothing, however, and can see no proof—exist in the army and fleet of our ally, for whose hostility we seem to be preparing. We cannot trust to hypothesis; wherein then lies the remedy? Where are we to find safety should danger come? A hundred voices cry out from the clubs, and from every chink of every floating thing under a pennant, "There's nothing like leather; give us more money, adopt my nostrum." But the nation says "We already pay you 15,000,000*l*." There is a point beyond which the worst apprehensions of Mr. Lloyd Jones may be realised by bankruptcy from within—a certain prelude to destruction from without. At the demand, too, there comes from military circles various adjurations to spend more money, not unmingled with appeals from Militia and Yeomanry. To them must be given the same reply. "The military service of the kingdom costs 15,000,000*l*. this year."

We would fain hope that the spectacle of to-day will give us fair grounds to think the solution of our difficulties may be at hand.

In a large and efficient army of Volunteers there is safety—safety from bankruptcy, and safety from external foes, safety for our honour, and safety for our liberties.

No power on earth can affect alarm at the size of this force, should it include a tenth of the adult population of Great Britain; but, to be of real service and of a significance to leave its mark, it must be large. It is the healthy action of the nation, erected to supplementalize its own wants, and it should not be made the base of any boasting except that in which a nation may reasonably indulge when it speaks of the courage, the zeal, and the patriotism of its members. Those who at home and abroad have called us a *nation boutiquiere* may well admit these taunts are unfounded, when they see added to a volunteer paid Army and Navy an unpaid army of Volunteers, composed of classes who as classes have hitherto contributed but little to the military service of their country.

We do not expect from them after a few short months' existence the rigid movements of a well-trained army, but we rely on them for exhibiting the spirit which makes discipline attainable, and of sterling service in war.

The ground will be kept for our Volunteers to-day by regiments which have within the last week celebrated the 200th anniversary of their military life. There may be incidents in the course of the Review which by comparison may force the spectator to draw erroneous conclusions; and most of all will those materials be found in the tendency — if unsuccessful in its development — to imitate in non-essentials the outward forms of a strictly military organisation. But we have been ever constant, and are now sincere in our exhortations to the Volunteers not to believe that universally, and as a body—either in their elegant leisure or in hours snatched from the forum, from the lecture room, from professional practice, from the official desk, from the pursuits of commerce, or from the labours of hard-handed toil—they can equal the regular Army in spontaneous action, in large and universal mobility, or in the simultaneous obedience to one will, which constitutes the excellence of disciplined troops. We tell them, nevertheless, that if they be but numerous enough to hold a line front for front with any enemy who may stand on English soil, they must be invincible.

We would tell them, too, that on pages which history was written with ink as yet undried, there is penned a story which should give them confidence in the strength of freemen fighting for liberty. The very annals of the glorious regiments which keep the ground for them should tell them how great are the odds on the side of men who fight for their country with their foot on its sacred earth. A great republic beyond the Atlantic tells them that discipline and military skill, the command of the seas, the possession of wealth, of fortified places, of munitions of war, were as nothing in opposition to untrained bands of freemen fighting for national life and honour. But they must be as those men were who achieved such great deeds. We can have no Thermopylæ in England! We must be unanimous—we must be universal! In days gone by foreign ministers could declare that it was the Court of St. James's—that it was a Queen, or a Minister—the feebleness of an Anne, or the inveteracy of a Pitt—which opposed their views by mercenary fleets and subsidised armies.

A nation of Volunteers presents such a spectacle to the world as to render utterly ridiculous the insinuation that the people disapprove of the resistance which the Government calls upon the empire to make against

Digitized by Google

those who seek to destroy its liberties. May the sun shine fair this day on the advance guard of the great Army of Volunteers who pass before the eyes of their Sovereign! May their example diffuse its influence among the myriads of sympathising countrymen who shall gaze upon them! Eyes that have quailed not in the fiercest fights will look upon those bands; and soldiers who have won renown in famous fields will be there to direct and to applaud—we will not add, for it cannot be, to censure. If come there must a day when Queen Victoria may have to review the men who shall be called upon to defend the very centre of our power, and to strike one decisive blow for England, we doubt not that with hearts as full and joyous as now beat within their breasts as they cry "God save the Queen," they will march to victory then, uttering in confident reliance on the God of Battles and of Justice, "Ave, Victoria! Morituri te salutant!"

THE ARMY.

2nd Dragoon Guards. Captain G. Allfrey is on leave to Mussoorie, from 16th April to 15th October.

7th Dragoon Guards. Major A. W. D. Burton is on leave from 15th April to 15th October, 1860, to Simla, and hills north of Deyrah. Lieutenant E. H. O'Dowd is on sick leave to Murree for six months.

7th Hussars. Brevet-Major the Honourable J. Fiennes has leave from March 31 to November 30, in extension. Lieutenant and Adjutant J. Mould is on sick leave to Calcutta for two months.

12th Lancers. Assistant-Surgeon Gibson has arrived home in charge of detachments, preceding the regiment.

Royal Artillery.—Major J. Singleton has leave to Simla from April 1 to November 15. Lieutenant E. C. Cuthbert has sick leave to Calcutta for two months, and to England under new rules. Captain and Brevet-Lieut.-Colonel the Honourable D. M. Fraser, has sick leave from February 1 to August 1. Lieutenant H. A. Tracey has sick leave from February 1 to August 1, and Veterinary Surgeon J. B. Hall, from April 25.

Grenadier Guards. The following regimental steps without purchase, will take place consequent on the promotion of Colonel Lewis to be major-general:—Colonel Hamilton to command the regiment; Colonel the Hon. H. Percy, V.C., to be regimental major; Brevet-Major Barnard, to be captain and lieut.-colonel; Lieutenant and Adjutant, the Hon. W. E. Sackville West and Lieutenant H. O. Gould, to be lieutenant and captain.

1st Royals. Lieutenant Fawcett has arrived home from India with detachments.

6th Regiment. Captain J. Dawson has obtained leave to England, under new rules.

8th Regiment. Surgeon-Major F. C. Annesley is ordered to precede his regiment to England by the overland route, reporting himself on arrival to the Adjutant-General, Horse Guards. Assistant-Surgeon Biddle is in charge of invalids and time-expired men, proceeding to England on board the transport *Sevilla*.

11th Regiment. Lieutenant W. Norman and Ensign H. R. Lewis have passed their examinations for superior rank before the commission now sitting in Portsmouth, and have qualified accordingly.

15th Regiment. The 1st Battalion has arrived at the Curragh from the Channel Islands.

17th Regiment. Major Colthurst has arrived from Quebec in charge of a party of invalids of the regiment and of the Canadian Rifles.

18th Royal Irish. Captain Kemp has arrived home from Bombay in command of invalids of various regiments stationed in that Presidency, and Surgeon Hyde has also arrived in England. We are sorry to have to record the death of Lieutenant J. Shadwell Theobald, which took place at Secunderabad, on the 9th of May, in his 25th year. He had been in the Service since November, 1854, and served in the Crimea with the regiment.

20th Regiment, 1st battalion. Lieut.-Colonel G. Bennett is on leave to Simla from 15th April to 15th October.

24th Regiment. Lieutenant R. P. Fox has leave for two months, to Bombay, from date of departure from the battalion.

25th Regiment. The 2nd battalion moves from Preston to Aldershot.

27th Regiment. Major B. Thomas has sick leave from January 29 to January 31, 1861. Lieutenant W. S. C. Pinwill is on leave, from 1st May to 1st September, to hills.

32nd Regiment. The departure of this regiment from Dover has been postponed to the end of the month, when it will proceed to Aldershot.

33rd Regiment. Lieut.-Colonel J. E. Collings and Lieutenant the Hon. de R. H. Montmorency have obtained leave to England for 18 months.

34th Regiment. Lieutenant E. P. L. Mathew has leave until his retirement from the Service. Lieutenant Spenser L. Greares, of the depôt of this regiment, has been ordered to join the service-company of his regiment in India.

35th Regiment. Lieutenant M. M. Pohle has sick leave to England, under new rules.

37th Regiment. Lieutenant S. L. Curgenven has leave to England for one year.

42nd Regiment. Ensign W. H. Spooner is on leave from April 15 to August 15 to Almorah and the hills.

48th Regiment. Captain W. R. Williamson and Lieutenant A. G. Wyse have leave to England for eighteen months from date of quitting the regiment.

Royal Marines.—Major-General S. R. Wesley, Deputy Adjutant-General of the Royal Marine forces, returned to town on Saturday from his official inspection of the Portsmouth divisions of Royal Marine Light Infantry and Artillery. Prior to leaving Portsmouth, the gallant general again expressed to Colonel Anderson his gratification at the state and discipline of the divisions.

The Plymouth division of Royal Marines, which at present consists of between 1300 and 1400 men, was inspected by companies on the barrack parade at Stonehouse, on Wednesday morning by General Wesley, who expressed to Colonel Holloway the pleasure he experienced at the soldier-like appearance of the division under his command, and the efficiency of the men in battalion and in light infantry movements; it would afford him much gratification to render an unqualified report of his entire satisfaction to the Board of Admiralty on his return to town.

Acting Serjeant-Major Woon, belonging to the 1st battalion Royal Marine Light Infantry, has been presented by Colonel Stransham, commanding the division at Woolwich, with a gold watch and Albert chain, value 30 guineas, subscribed by Colonel Holloway, C.B., Aide-de-Camp to the Queen, Colonel Walsh, C.B., and the officers of the battalion, late serving in China, in testimony of their appreciation of his undaunted courage and bravery under the many circumstances to which he was exposed from the Chinese guns during the attack on the forts in the Peiho river.

52nd Regiment. Brevet-Major S. Blane (Brigade-Major at Fort William) is on leave to Simla for six months from date of leaving Calcutta, on m.c.

53rd Regiment. Lieutenant F. R. S. Flood has leave to precede the regiment to England by the overland route.

54th Regiment. Captain E. T. Shiffner and Lieutenant V. T. Bayly are on leave to England for eighteen months, and Lieutenant J. Stevenson, from April 15 to October 15, to Nynee Tal and Mussoorie. Ensign Charles S. Chapman, of this regiment will leave the depôt with the draft about to proceed to India.

64th Regiment. Lieut.-Colonel G. W. P. Bingham is on leave in extension from October 11, 1860, to April 30, 1861.

65th Regiment. The following steps without purchase will take place consequent on the promotion of Colonel Gold to be major-general:—Major and Brevet-Colonel Wyatt to be lieut.-colonel; Captain and Brevet Lieut.-Colonel Murray to be major; Lieutenant Buck to be captain, and Ensign Talbot to be lieutenant.

68th Regiment. Lieutenant A. H. Tucker has leave to England, under new rules, to take charge of invalids on the passage.

70th Regiment. Lieutenant E. Cay is on leave to England for 18 months.

71st Regiment. Assist.-Surgeon E. Wilson has leave to Calcutta for two months, on medical certificate.

72nd Regiment. Lieutenant G. L. Bosset has leave to England for eighteen months.

74th Regiment. Lieutenant A. D. Keane has leave to England.

75th Regiment. Captain and Brevet-Lieut.-Colonel J. H. Cox has leave to England for eighteen months.

79th Regiment. Brevet-Major G. M. Miller has leave to England for eighteen months. Captain W. H. Mackesy has leave from date of leaving the regiment to 1st November, 1860, to study at the Thomason College; and Captain P. Percival, to 31st July, to Simla.

83rd Regiment. Lieut.-Colonel C. W. Austen is on leave to England from April 25 to October 24, 1861. We have to record the death of Lieutenant J. R. A. Colebrooke, at Camp Mysana, on the 29th of April, in his 22nd year. He entered the Service in April, 1856.

84th Regiment has moved from Sheffield to Manchester, relieving the 96th Regiment.

89th Regiment. Captain Holmes has arrived in England in charge of detachments on board the Startled Fawn. Captain M. C. Browning is on leave home for eighteen months.

91st Regiment. By the death of Lieutenant Obbard, Ensign C. L. Harvey obtains a lieutenancy without purchase.

96th Regiment has arrived at the Curragh from Manchester.

98th Regiment. Major Ellerman and Lieutenant Gardiner have arrived in England; the former from the Cape, the latter from India.

100th Regiment. The death of Captain G. B. Coulson will promote Lieutenant and Adjutant Lee, to be captain, and Ensign Ridout to be lieutenant, the previous promotion by purchase of the latter officer being cancelled.

The arrangements for the season at the Curragh Camp are organised as follows:—The whole of the cavalry, together with the battery of Horse Artillery at Newbridge, to be under the command of Major-Gen. Parlby. The field batteries of artillery under the command of Lieut.-Col. Shakespear. The first brigade of infantry, consisting of the 3d battalion Grenadier Guards, 2d battalion 14th Foot, 1st battalion 15th, 2d battalion 20th, and 4th battalion 60th Regiments under Major-Gen. Bloomfield. The second brigade of infantry, consisting of the 2nd battalion 16th, 26th, 36th, 96th, and Louth Militia Regiments, under Major-Gen. Shirley C.B. For the purpose of exercise and evolution, a third brigade will be formed by selection from the corps above specified, and will be placed for the occasion under the command of the senior regimental officer in camp; it will consist of the 2d battalion 20th, 36th, 4th battalion 60th, and Louth Militia Regiments. The whole of the troops in the camp, and in the neigbourhood of it, will be under the immediate command of Lieut.-Gen. Gascoigne, who will have his head-quarters at the Curragh. The troops remaining in Dublin after the formation of the camp will report to head-quarters through Major-Gen. Gough, C.B., who will assume the command of the garrison.

Army Troop Horses.—A return issued under this head shows the sums actually expended in the years from the 1st of April, 1858, to the 31st of March, 1859; and from the 1st of April, 1859, to the 31st of March, 1860, respectively, for the purchase of troop horses for each of the regiments of the cavalry at home, including the regiments of the Household Brigade, as well as for the Royal Artillery and the Royal Engineers at home, and specifying the number of horses that have died or been destroyed, or sold in each of those years, and the sums realised by the sales. The sum expended in the purchase of horses in 1858-59 was 81,463*l*. The number that died was 251; destroyed, 159; sold, 924, and the sum realised, 12,256*l*. The sum expended for the purchase of horses in 1859-60 was 55,792*l*. The number that died was 166; destroyed, 176; sold, 928, and the sum realised, 11,799*l*. The whole number of horses on the 1st of April, 1859, was 11,254.

A return just issued gives the strength, regimentally, in officers, men, and horses, of the regular local army, of the several arms in India, European and native, at the different presidencies from the latest returns. It appears from this document that in Bengal there were in the artillery 312 officers, and of men 2036 Europeans and 2309 natives; of cavalry there were 459 officers, and of men 1261 Europeans and 22,522 natives; of infantry the officers numbered 1147 and the men 2775 Europeans and 68,828 natives. In Madras the officers of artillery were 199, and the men 1878 Europeans and 2174 natives; in the cavalry there were 178 officers, and of men not any mention is made of Europeans, but the natives are set down at 2988; the infantry had 1522 officers, and of men 2342 Europeans and 64,878 natives. The artillery of Bombay had 152 officers, and of men 1426 Europeans and 1883 natives; the cavalry numbered 72 officers; and of men no number of Europeans is given, but 7672 natives are set down; in infantry the total number of officers was 939, and of men, Europeans 2166 and natives 37,215. Giving a total of officers in the presidencies of 4980, and of men 18,884 Europeans and 210,469 natives.

At the Levee on Wednesday Her Majesty conferred the honour of knighthood upon Colonel Lockyer Freestun. He served in all 22 years in the British Army, 18 of them as a subaltern in different parts of the world, 7 years in the West Indies, and again on the staff of Sir De Lacy Evans's Auxiliary Force in Spain in 1835-36, and '37, where he was three times wounded, once severely, and had two horses shot under him. He received from the Queen of Spain, and with permission to accept and wear them, the following decorations:—Knight Commander, with the Star of Charles III., Knight of the Royal Military Orders of San Fernando and Isabella the Catholic, together with the medals of the 5th of May, 1836, and storming of Irun, June, 1837. He served his last campaign on a particular service in Syria in 1840-41, and '42, as Field Officer on the Staff, receiving the gold medal from the Sultan, with permission from Her Majesty to accept and wear it. Colonel Freestun represented Weymouth in Parliament from 1847 to 1859.

His Royal Highness the General Commanding-in-Chief inspected on Saturday afternoon the troops at the Indian depôt at Warley, near Brentwood. His Royal Highness was accompanied on the occasion by Major-General Forster, Assistant-Adjutant-General, and Sir R. Vivian and Mr. W. J. Eastwick, members of the Council of State for India. The entire strength of the depôt is at present 1211 men, and the manœuvres through which the troops passed on Saturday were executed in a manner which called forth general approbation.

The examination of candidates for direct commissions before the members of the Council of Military Education—Generals Rumley and Portlock, and Colonels Elwyn and Addison—commenced on Thursday forenoon, at the Royal Hospital, Chelsea. There were 140 candidates. The examination will continue daily up to the 26th inst.

A Circular has been issued from the Horse Guards, addressed to the Army, in which it is announced by the authority of the General Commanding-in-Chief that soldiers are not required to salute the officers of the civil departments of the War Department.

A General Order has been issued by the direction of the Duke of Cambridge, and addressed to the Royal Artillery and cavalry corps, determining the position and rate of pay of farrier-majors, farriers, and shoeing-smiths of cavalry regiments and other mounted corps. The farrier-major, for misconduct, is liable to be reduced to the rank and pay of farrier, at the discretion of his commanding officer. The farrier can only be reduced, and the shoeing-smith displaced, by sentence of court-martial, except in instances of inefficiency, when their cases may be disposed of by order of the colonel of the regiment. Farrier-majors and farriers may, at the discretion of the commanding officers, be members of the sergeants' mess.

Surgeon-Major W. Howe, M.D., Assistant-Staff-Surgeon F. T. M'Carthy, and Staff-Assistant-Surgeon G. F. Spry, are ordered to China with detachments.

The strength of the force at present stationed at Colchester is 86 officers and 2845 non-commissioned officers and privates. There are besides 202 women and 257 children living in the camp.

Mr. Whitworth has forwarded a communication to the Ordnance Select Committee at the Royal Arsenal, to the effect that he will not be prepared with the necessary projectiles, &c., for the competitive trial between his 12-pounder gun and that of Sir W. Armstrong under the middle of July. The experiments to test the merits of the two weapons as to the length of range, &c., have, therefore, been postponed until the period named, when they will be carried out at the Government practice range, Shoeburyness. The War Department has also sanctioned the carrying out experiments to test the merits of a muzzle-loading rifled gun, the invention of Commander Scott, R.N., who has recently been appointed as additional master to the Fisgard, flag-ship at Woolwich.

Staff-Surgeon J. Hoffmann, M.D., is ordered to hold himself in readiness to embark for the West Indies, and Staff-Assistant-Surgeon F. O'Conor for New Zealand.

The French Steam Rams.—The *Phare de la Manche*, published at Cherbourg, announces that the completion of the steel-plated frigate Normandie is being carried on with all possible dispatch. The plating is 12 centimetres thick, and is impervious to cannon-shot, unless a ball should strike the same spot 13 times; on the 13th shot it will be perforated. The Normandie is about to receive her masts, which are colossal. One remarkable weapon attached to this huge steamer is a plate, which projects from her prow, and which will, when impelled by steam, cut a ship in two. This addition is regarded as a remarkable progress in the construction of such steamers. This idea of a projecting sharp stem is not new, as, if we are not mistaken, it was suggested by Admiral Sir George Sartorius. The calculation about the 13th shot must have been arrived at by a very curious course of experiments. All we know is this, Mr. Whitworth has not yet had an opportunity of bringing one of his steel bolts to bear on the plates of the Normandie.

Military Discussions in Parliament.—In the House of Commons on Monday evening Colonel Dunne called

Digitized by Google

attention to the proceedings of the Weedon Commission, and to the expense incurred by it, together with the Report of the Auditors of the Treasury on that expenditure, by which they refused to sanction the payment of a sum of 8100*l.* for the payment of a professional accountant, who went into the accounts. The total expenses of the commission exceeded 12,000*l.*—Mr. Turner, as one of the commissioners who conducted the inquiry, said that when he accepted the duty he determined to have a thorough investigation, and early in the proceedings notice was given there would be an examination of the accounts, independent of the Government officials; and that course was sanctioned by the War Office. The accountants made a thorough investigation, and though they had made too large a charge, yet they had established the fact that there was no great defalcation of stores at Weedon. Mr. S. Herbert said that the Government entertained a due sense of the labours of the Weedon Commission. He believed the original confusion arose from a substitution of the War Office system for that of the Ordnance, which was better adapted to matters of this sort, and which took place on the consolidation of the War Department. The defalcations at Weedon had been shown not to amount to more than 250*l.*—Sir H. Willoughby complained of the unsatisfactory manner in which the Army Estimates were framed, and by reason of which they formed no guide to the actual expenditure incurred.—The House then went into committee on the Army Estimates, commencing with the vote for the departments of the Secretary of State for War and the Commander-in-Chief. Several votes were agreed to after discussion. In the course of a conversation on the vote for warlike stores, the comparative merits of the Armstrong and Whitworth guns were discussed, and Mr. S. Herbert stated that if it was proposed to supersede the Enfield by the Whitworth rifle, the House must be prepared for an immediate expenditure of ten millions. He also stated that an offer had been made for the purchase of the Whitworth gun.—On a vote of 8000*l.* for gymnasiums, Mr. B. Osborne objected to the system of putting men through gymnastic exercises, and opposed the vote. On a division, the vote was retained by 154 to 18. On the vote for educational and scientific branches, a discussion on the question of the scale on which the Ordnance Survey should be constructed was closed by the postponement of the vote, and the House resumed.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD.—The fifth annual meeting of the subscribers and friends of this institution took place on Monday afternoon at three o'clock, in the Theatre of the United Service Institution, Whitehall Yard, the Chaplain-General of the Forces in the chair. Among those present were the Bishop of Sodor and Man, Colonel Hogg, the Rev. F. Jackson, Major-General Boileau, Major Powis, and the Rev. W. Hare. It appeared from the report for the past year that the number of girls now in the home is 170, and since its foundation upwards of 280 girls have been provided for. The amount of subscriptions and donations invested is 24,500*l.* 17*s.* 4*d.*, which produces an annual income of 950*l.* There is no debt, and the new buildings are paid for, so that the charity is no longer burdened with a heavy house rent. To maintain the present number of children it is necessary to raise annually about 1,500*l.* in addition to the regular income. This sum has hitherto been easily raised, and the committee state that they have every reason to believe that it will be continued. The committee were anxious to raise sufficient funds to enable them to receive altogether 200 children, for whose accommodation the buildings were amply sufficient. The meeting having been addressed by several gentlemen, and the resolutions having been carried unanimously, the meeting separated.

COLCHESTER CAMP.

The Commandant, who now ranks as Major-General Wood, held a field day on Wednesday, on Middlewick Farm, when the men of both battalions were put through a variety of evolutions, and discharged five rounds of cartridge each. There is a very strong body of men under the careful training of several efficient musketry instructors, and great pains are taken to perfect the men in the use of the Enfield rifle, more particularly in file firing.

His Royal Highness the Commander-in-Chief is shortly expected on a visit to the camp, for the purpose of inspecting he newly purchased ground for the new barracks, and also for ascertaining the general efficiency of the Indian depôts, veral of which are now in greater strength than the service companies abroad. The House of Commons having passed the estimate of 60,000*l.* for the purchase of ground and the erection of a new camp, parties from the Engineers' office have been engaged taking the levels of the extensive plot of ground with a view to a new and comprehensive system of sewerage for the whole garrison. It is expected that the camp will cost nearly double the amount granted in the army estimates.

A private of the 97th regiment has been apprehended for breaking the windows of a jeweller's shop in Colchester, and stealing several silver watches. The fellow, who is under orders for India, has adopted this plan of escaping from the draft, it being no less than the fifth time he has been tried by court martial for neglecting to join the service company of his regiment in India.

THE VICTORIA CROSS.

(FROM TUESDAY NIGHT'S *Gazette.*)

WAR OFFICE, JUNE 19.—The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the under-mentioned soldiers of Her Majesty's Army, whose claims to the same have been submitted for Her Majesty's approval, on account of acts of bravery performed by them in India, as recorded against their several names, viz.:

9th Lancers.—Pensioned-Sergeant H. Hartigan—for daring and distinguished gallantry in the following instances:—At the battle of Budle-ke Serai, near Delhi, on the 8th June, 1857, in going to the assistance of Sergeant H. Helstone, who was wounded, dismounted, and surrounded by the enemy, and at the risk of his own life carrying him to the rear. On the 10th October, 1857, at Agra, in having run unarmed to the assistance of Sergeant Crews, who was attacked by four rebels. Hartigan caught a tulwar from one of them with his right hand, and with the other hit him on the mouth, disarmed him, and then defended himself against the other three, killing one and wounding two, when he was himself disabled from further service by severe and dangerous wounds.

1st battalion, 5th Regiment.—Sergeant Robert Ewart—For conspicuous devotion at Alumbagh, on the 24th September, 1857, in proceeding under a heavy and galling fire to save the life of Private E. Deveney, whose leg had been shot away, and eventually carrying him safe into camp, with the assistance of the late Lieutenant Brown, and some comrades.

1st battalion, 5th Regiment.—Private Patrick M'Hale—For conspicuous bravery at Lucknow on the 2nd October, 1857, when he was the first man at the capture of one of the guns at the Cawnpore Battery—and again, on the 22nd December, 1857, when, by a bold rush, he was the first to take possession of one of the enemy's guns, which had sent several rounds of grape through his company, which was skirmishing up to it. On every occasion of attack Private M'Hale had been the first to meet the foe, amongst whom he caused such consternation by the boldness of his rush, as to leave little work for those who followed to his support. By his habitual coolness and daring, and sustained bravery in action, his name has become a household word for gallantry among his comrades.

The Army Gazette.

WAR OFFICE, PALL MALL, JUNE 19.

COMMISSARIAT DEPARTMENT.

Deputy-Commissary-Gen. Charles Williams, having been placed upon retired pay, to have the honorary rank of Commissary-Gen. under the Royal Warrant of the 28th of October, 1858.

Assist.-Commissary-Gen. William Robert Alexander Lamont, having been placed upon retired pay, to have the honorary rank of Deputy-Commissary-Gen. under the Royal Warrant of the 28th of October, 1858.

WAR OFFICE, PALL MALL, JUNE 22.

Coldstream Regiment of Foot Guards—General Lord Clyde, G.C.B., from the 93rd Highlanders, to be Colonel, vice Field Marshal the Earl of Strafford, G.C.B., deceased.

5th Regiment of Light Dragoons—Captain Charles Edwyn Wyatt, from the 14th Light Dragoons, to be Captain, vice Brevet-Major Hillier, who retires upon half-pay, receiving the former difference between Infantry and Cavalry.

6th Dragoons—Ensign Hamilton John Wallace, from the 12th Foot, to be Cornet, vice Orde, promoted.

7th Light Dragoons—The transfer of Lieutenant and Adjutant James Giles, from the 14th Light Dragoons, as stated in the *Gazette* of the 20th December, 1859, has been cancelled.

13th Light Dragoons—Surgeon Robert Carew Anderson, M.D., having completed a period of twenty years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

Royal Artillery—Lieutenant Henry John Foquett Ellis Hickes to be Second Captain, vice Tucker, placed upon half pay; Lieutenant Frederick George Baylay to be Second Captain, vice Noble, placed on the Supernumerary List; Acting Veterinary-Surgeon John Mills to be Veterinary Surgeon; Acting Veterinary-Surgeon Henry Dunsford to be Veterinary-Surgeon; Serjeant-Major Richard Stoyell to be Riding Master; Serjeant-Major George Hadcock to be Riding Master; Surgeon William Henry Mackintosh, M.D., having completed a period of twenty years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

Military Train—Brevet-Major Charles Edward Johns, from the 17th Foot, to be Captain, vice Atkinson, who exchanges; Lieutenant John Murphy, from half-pay late Land Transport Corps, to be Lieutenant, vice Hall, who exchanges; Lieutenant Wentworth Dawes to be Adjutant, vice Witchell, who resigns the Adjutancy only.

11th Regiment of Foot—Ensign Owen Campobello Robinson to be Lieutenant, by purchase, vice Davies, who retires.

15th Foot—Ensign Francis Henry Garnett to be Lieutenant, by purchase, vice Horsfall, who retires.

16th Foot—Lieutenant Albert Andrew Pinson to be Instructor of Musketry, vice Gibson promoted.

17th Foot—Captain Thomas George Brutton Atkinson, from the Military Train, to be Captain, vice Johns, who exchanges; James Henry de Robeck Lynch, Gent., to be Ensign, by purchase, vice Elgin, promoted; Arthur Vesey Nugent, Gent., to be Ensign, by purchase, vice Deane, promoted; Serjeant-Major William Walsh Monk to be Quartermaster, vice Falkner, removed to the 75th Foot.

22nd Foot—William Brooks Butlin, Gent., to be Ensign, by purchase, vice Oliver, promoted.

25th Foot—Surgeon William Boyd, from the 32nd Foot, to be Surgeon, vice Carr, who exchanges.

32nd Foot—Surgeon Jonas King Carr, M.D., from the 25th Foot, to be Surgeon, vice Boyd, who exchanges.

34th Foot—Assistant-Surgeon David Chambers McFall, from the 87th Foot, to be Assistant-Surgeon, vice Haward, who exchanges.

37th Foot—Ensign John Reilly to be Quartermaster, vice Crutchley, deceased.

40th Foot—Lieutenant Arthur Frederick Fitz-Simons to be Captain, by purchase, vice Eagar, promoted, by purchase, in a depôt battalion; Ensign and Adjutant Thomas Ormsby Johnston to have the rank of Lieutenant; Ensign Robert Brooks Clarke to be Lieutenant, by purchase, vice Fitz-Simons.

43rd Foot—Lieutenant Frederick Guy Eaton Glover to be Instructor of Musketry, vice Sargent, who resigns that appointment.

47th Foot—Assistant-Surgeon William Stewart, M.D., from the Staff, to be Assistant-Surgeon, vice White, appointed to the Staff.

50th Foot—Assistant-Surgeon Johnston Ferguson, from the Staff, to be Assistant-Surgeon, vice Joseph Johnston, appointed to the Staff.

54th Foot—Ensign William Patrick Hodnett, to be Instructor of Musketry, vice Lieutenant Parker, who resigns that appointment.

60th Foot—Cornet and Adjutant Latham Coddington Brownrigg to be Lieutenant, without purchase, vice Treeve, whose promotion on 9th March, 1860, has been cancelled.

69th Foot—Ensign Peter Shuttleworth to be Lieutenant, without purchase, vice St. George, deceased.

71st Foot—Assistant-Surgeon Edward Hopkins, from the Staff, to be Assistant-Surgeon, vice Wilson, appointed to the Staff.

80th Foot—Lieutenant William Whitehead, to be Captain, without purchase, vice the Honourable John Howe Montague Browne, deceased; Ensign Henry James Brown, to be Lieutenant, without purchase, vice Whitehead.

87th Foot—Richard Hay Kirkbride Saul, Gent., to be Ensign, by purchase, vice Von Beverhoudt, promoted; Assistant-Surgeon Wallace Haward, from the 34th Foot, to be Assistant-Surgeon, vice M'Fall, who exchanges.

90th Foot—Lieutenant Charles B. Wynne to be Captain, by purchase, vice Herford, who retires.

95th Foot—Lieutenant Robert M. B. Maurice to be Captain, by purchase, vice Moore, who retires; Ensign Leonard Knipe to be Lieutenant, by purchase, vice Maurice.

100th Foot—Lieutenant John Lee to be Captain, without purchase, vice Coulson, drowned; Ensign John Gibbs Ridout to be Lieutenant, without purchase, vice Lee; Lieutenant Frederick Morris to be Adjutant, vice Lee, promoted.

Cape Mounted Riflemen—Veterinary-Surgeon Thomas Paton, from the Military Train, to be Veterinary-Surgeon, vice Kingsley, who retires upon half-pay.

Royal Canadian Rifle Regiment—For Lieutenant Alexander Moore Armstrong to be Captain, by purchase, vice Taylor, who retires, read Lieutenant John Fellows Armstrong, &c.

CAVALRY DEPOT (Maidstone).

Staff-Veterinary-Surgeon James George Philips to be First Class Veterinary-Surgeon, vice Brett, who retires upon half-pay, under the Royal Warrant of 1st July, 1859.

CAVALRY DEPOT (Canterbury).

Cornet Arthur Brett, 2nd Dragoon Guards, to be Instructor of Musketry, vice Cornet Pulleyne, 8th Light Dragoons, about to proceed to India.

DEPOT BATTALION.

Captain Edward Hungerford Eagar, from the 40th Foot, to be Major, by purchase, vice Warry, who retires.

ROYAL HIBERNIAN SCHOOL.

James Lewes, late Sergeant-Major 1st Dragoons, to be Quartermaster.

STAFF.

Brevet-Colonel Edmund Haythorne, of the 1st Foot, to be Adjutant-General to Her Majesty's Forces serving in the East Indies, vice Brevet-Colonel William Lygon, Earl of Longford, C.B., who resigns that appointment.

HOSPITAL STAFF.

The appointment of Inspector-General of Hospitals James Brown Gibson, M.D., C.B., to be Director-General of the Army, Medical Department, to be antedated to the 7th March, 1860.

Surgeon John Summers, M.D., having completed a period of twenty years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

To be Assistant-Surgeons to the Forces—Assistant-Surgeon William Alexander White, M.D., from the 47th Foot, vice Stewart, appointed to the 47th Foot; Assistant-Surgeon Joseph Johnston, M.D., from the 50th Foot, vice Ferguson, appointed to the 50th Foot; Assistant-Surgeon Edwin Wilson, from the 71st Foot, vice Hopkins, appointed to the 71st Foot.

VETERINARY MEDICAL DEPARTMENT.

To be Acting Veterinary Surgeons—George Abert Oliphant, Gent.; Frederick Fitzhugh Marshall, Gent.

BREVET.

Captain Edward Lawes Pym, Royal Marines, to be Major in the Army.

ROYAL MILITARY COLLEGE, ADDISCOMBE.

The following is the official list of successful candidate for admission to the Royal Indian Military College, Addiscombe, at the examination held by the Council for Military Education, at the Royal Hospital, Chelsea, in May and June, 1860:

Clayton S. Beauchamp, 18, The College, Cheltenham, 5289 marks; John F. Maurice, 18, Rev. C. Pritchard, Clapham, Rev. Alexander Thurlett, Oxburgh Rectory, Norfolk; Mr. Kiezer, Blackheath, 5071; Fred. W. Joseph, 17, Merchant Tailors' School, 5063; William F. Sedgwick, 18, Blackheath Proprietary School, 4746; Geo. W. Gifford, 18, King Edward's School, Birmingham, 4274; Hamilton Geary, 17, King's College, London, and Wimbledon School, 4225; Edmond Waller, 18, Kingston School, Dublin, 4158; Townsend Griffin, 18, King's School, Rochester, and private tuition, 3955; Andrew W. Baird, 18, Marischal College, Aberdeen, 3943; William Osborne, 18, at home, 3805; Thos. B. B. Savi, 18, Edinburgh Academy and Rev. John P. Sargent's, M.A., Regent's Park, 3727; Lestock F. Boileau, 17, Military Establishment, Harcourt Street, Dublin, and Hollyville Park School, Monkstown, 3624; Albert H. Hime, 17, Trinity College, Dublin, and private tuition, 3530; Thompson C. Capper, 17, Forest School, Walthamstow, and Wimbledon School, 3475; Charles E. Souper, 18, Brighton College, private tuition, and Military School, Woodford, 3425; Alexander Laing, 17, King's College, Aberdeen, and Military College, Farnborough, 3393; George S. Chiene, 17, private tuition, Aberdeen, and Southlands, Battersea, 3306; Archd. F. Cumberlege, 16, Grosvenor College, Bath, 3304; Claude B. Sandys, 17, private tuition and Wimbledon School, 3284; Charles R. Foulger, 17, Stepney Grammar School, private tuition, and establishment for military education, Norland Square, 3276; Charles C. Pridden, 18, King's College, London, and Sandhurst, 3158; Edwin H. Blenkinsopp, 18, St. Peter's School, York, and private tuition, 3114; Robert Warburton, 17, the Rev. G. Frost, Kensington School, 3018; John Day, 18, Trinity College, Dublin, 2850; Thomas R. Disney, 17, Collegiate School, Sheffield, and military establishment, Dublin, 2832; Frederick L. Weston, 17, private tuition, 2748; James Keith, 17, King's College, Aberdeen, 2698; Julian B. Lawrence, 18, Schoolhouse, Tunbridge, and Tunbridge Castle, 2584; George H. Marshall, 17, Kensington School, 2559.

THE ROYAL MILITARY ACADEMY, WOOLWICH.

His Royal Highness the General Commanding-in-Chief, in his capacity of President of the Council of Military Education, on Tuesday honoured the Royal Military Academy at Woolwich by a general inspection, under arms, of the Company of Gentlemen Cadets studying at the institution, and dispensed the prizes issued as rewards of merit to those who had excelled in the various studies entered into by the competitive class during the past half-year.

His ROYAL HIGHNESS then, addressing the whole of the cadets, informing them that he was extremely gratified with the result of his visit, expressed his concurrence with the excellent regulations carried out by the Governor and officers directing the establishment, and commented with much satisfaction on the course of instruction which the classes underwent, and of which they had exhibited so much fruit. The judgment and energy of their masters, he was informed, could not be surpassed. The whole of the first class would now receive their commissions.

General Rumley then read a memorandum containing the following:—"The Council of Military Education have the honour to forward to His Royal Highness the General Commanding-in-Chief the result of examinations for commissions of the first class of the Royal Military Academy at Woolwich. That class consists of 38 cadets. The Council recommend that the whole should receive their commissions, although the number of attendants in the mathematical class has not been so frequent as desired. The Council have returned the candidates in the order of their merit as follows:—For commissions, Mr. O'Connor, 18,611 marks; Mr. Fowler, 18,274; Mr. C. Jones, 17,854; Mr. Urquhart, 17,617: Mr. Baker, 17,548; Mr. Bowley, 17,411; Mr. Cunningham, 16,993; Mr. Orange, 16,628; Mr. A. B. Brown, 16,262; Mr. Barker, 16,080; M. Hime, 15,674; Mr. C. Smith, 15,602; Mr. Downes, 15,403; Mr. Greig, 14,679; Mr. Bernard, 14,405; Mr. Ormsby, 14,311; Mr. Hand, 14,194; Mr. Inge, 13,883; Mr. W. Browne, 13,770; Mr. England, 13,646; Mr. Cook, 13,495; Mr. Holley, 13,458; Mr. Milner, 13,055; Mr. Fitzroy, 13,025; Mr. Mulloy, 12,982; Mr. Hezlet, 12,956; Mr. French, 12,394; Mr. Lockhart, 12,252; Mr. Wood, 12,103; Mr. Hitchins, 11,835; Mr. Galloway, 10,504; Mr. Jenkin, 9838; Mr. Cuttwell, 13,304; Mr. Lane, 9520; Mr. Nicolas, 9338; Mr. Blackwood, 8,344; Mr. J. Campbell, 7455. This will create 60 vacancies in the establishment, and no less than 180 competitors are already in the field."

At the conclusion of the above Colonel Yorke read a report, giving a very satisfactory account of the good conduct and proficiency of the gentlemen cadets.

On the Duke leaving the parade of the Academy a party of cadets manned their field guns, and fired a Royal salute, a similar salute having been fired by the Royal Artillery on His Royal Highness's arrival.

THE NAVY.

ADMIRALTY, JUNE 19.

PROMOTIONS AND APPOINTMENTS. — Lieutenants F. H. Blair, to the Centurion; G. Worsfold to the Blenheim; A. Bagley, to the Edinburgh; H. Rogers, to the Ajax; Samuel Long, to the Bloodhound.

Master George H. Allen (1856), to the steam guard-ship Asia, at Portsmouth, for service in the Hornet.

Second Master W. M. Lowick, to the Bloodhound.

Naval Cadets T. Ferris, to the Terrible; L. Dacres, A. J. Booth, and R. O. Webb, to the Bacchante, additional for disposal.

Engineers: Chief Engineer Charles Cottew (1857), to the Colossus, 80, screw, at Portsmouth. David Bowen, Acting First-Class Assistant-Engineer, for temporary service, to the Saturn, for service in the Asp. Thomas W. Hampshire, First-Class Assistant-Engineer, to the Bloodhound; William Sides, promoted to Second-Class Assistant-Engineer in the Ardent; William Henry Tweedy, promoted to the rank of Acting Second-Class Engineer in the Asia, for service in the Grinder; Job Annable, promoted to the rank of Second-Class Assistant-Engineer, and appointed to the Majestic; John King (a), promoted to the rank of Second-Class Assistant-Engineer in Fisgard, as additional, for service in gun-boats; Richard Elias Denison, promoted to the rank of Second-Class Assistant-Engineer, and appointed to the Royal Albert, for service in the Porpoise; James Hall, promoted to the rank of Second-Class Assistant-Engineer in the Termagant; John Boxell, promoted to the rank of Second-Class Assistant-Engineer in the Assurance: Edward F. Read, Second-Class Assistant-Engineer, and George Lucas, Acting Second-Cass Assistant-Engineer to the St. George; Thomas Edgar, Second-Class Assistant-Engineer, to the Wellington, for the charge of the Charon, and William Todner, Acting Second-Class Assistant-Engineer, to the Wellington, for charge of the Goldfinch; Francis Thornton, Third-Class Assistant-Engineer, and Thomas Smith, Third-Class Assistant-Engineer, to the Bloodhound; Charles H. Pillar, Third-Class Assistant-Engineer, and David Grant, Acting Third-Class Assistant-Engineer, to the St. George; John R. Harvey, Acting Third-Class Assistant-Engineer, to the Orion; Thomas W. Sanders, Acting Third-Class Assistant-Engineer, to the Wellington, for service in the Lark; Charles Wise, Third-Class Assistant-Engineer, to the Royal Albert, for service in the Porpoise.

Surgeons John Stirling, M.D. (1845), to the St. George, 90, at Devonport; Clark A. Ducket (1859), from the Algiers, to the Geyser, 6, paddle, at Devonport. George P. Cooke (1859) to the Rhadamanthus.

Assistant-Surgeons James N. J. O'Malley, from the Victory, to the St. George; Benjamin Crabbe, from Plymouth Hospital, to the Hawke, 60, coast-guard vessel on the Irish coast; Alfred S. Pratt, from the Pluto, to the Rolla, 6, tender to Victory at Portsmouth, vice O'Malley; E. P. Forrest to the Colossus; and T. Fulton, M.D., confirmed in the London.

Acting Assistant-Surgeons James Ferguson, M.D., from the Hawke, to the St. George; George A. Campbell, from the *Virago*, to the *Algiers*, 91, screw, Channel Squadron; Henry S. Lauder, to the Melville, hospital ship, at Hong Kong; Henry F. Nathan to the Orion, 91, in the Mediterranean; C. J. Fennell, to the Torch.

Paymasters J. E. Terry, to the Geyser, and F. F. Eversfield, to be additional to the Majestic; J. G. Simmonds, to the Imaum.

Clerk *A. C. Jeffreys, to the* Edinburgh.

Clerk's Assistant *Montagu* B. Williams, to the St. George; W. H. Bowen, to the Blenheim.

Lieutenants—A. G. Gellett, to the Marlborough; H. Smith, to the Formidable.

Clerks—R. Drury, to the Geyser; H. W. Essex and C. Batchelor, to the Terrible.

Agamemnon, 91, screw, Captain T. Hope, left Malta on the 13th inst. for Palermo.

Ariadne, 26, screw, Captain Vansittart, arrived at Spithead on Sunday last from Leith, and will repair defects and prepare as one of the squadron of honour to accompany His Royal Highness the Prince of Wales to Canada.

Asia, sailing two-decker, in commission as guardship of steam-ordinary at Portsmouth, is ordered to be placed in dock for alteration and conversion to a screw. The Asia was built of teak in Bombay after the model of the French Canopus, which was always considered by naval officers of the old school, as one of the finest line-of-battle-ships we ever had in the Service.

Atlas, 91, one of several of the screw steamers ordered to be built at Chatham dockyard, is completed, and is ordered to be launched on the 21st of July next, when another screw steamer of equally large dimensions will be commenced on the same slip.

Bacchante, 50, screw, Captain D. McL. Mackenzie, bearing the flag of Rear-Admiral Sir Thomas Maitland, C.B., steamed out to Spithead on Thursday last. The customary salutes were exchanged.

Blenheim, 60, screw, Captain C. F. Scott, C.B., hauled into the steam-basin Portsmouth on Wednesday last, and is expected to go into dock this day to have her steam apparatus and valves thoroughly overhauled.

Bloodhound, 3, iron paddle-wheel steamer, has been commissioned at Woolwich.

Brunswick, 80, was hauled on Tuesday from under the sheers at Devonport to the West Wall in Hamoaze.

Bulldog, 6, paddlewheel, Captain F. L. McClintock, is taking in her coals from the coal depôt in Portsmouth Harbour, preparatory to her departing on her expedition to survey the North Atlantic, to ascertain the practicability of laying down an electric cable between this country and America. She has shipped her sounding lines, consisting of 75 reels, each of 1000 fathoms length, and every possible exertion is used to get her away without delay.

Colossus, 80, screw, Captain F. Scott, C.B., was swung on Wednesday in Portsmouth harbour, for the adjustment of her compasses.

Coquette, 4, steam-sloop, in No. 5 dock, Portsmouth, has been partially opened up forward and aft, and also stripped of her copper. Her timbers now exposed to view forward are in a very defective state. On her starboard quarter, the upper parts of her frame are perfectly decayed, and some of the timbers bear strong evidence of sap, equal to anything, indeed, seen in that hospital for decayed gun-boats—Haslar slipway. Considerable anxiety is evinced to see her further opened up, both forward and aft; until this is done, no correct opinions can be given as to her condition in these sections. A considerable number of men are employed upon her, punching out her copper bolts, ripping off her planking, ceiling, and other parts of the vessel. Although her copper has been removed, no opinion can be given as to the state of her planking, some of which must be stripped off first. The rotten gun-boats at Haslar looked sound enough externally; but when they were opened in places, the decayed state of the inner edges of the planks showed what little reliance could be placed upon outward appearances.

Dee, 4, paddle, Master Commander Pullen, has arrived at Portsmouth with boilers and machinery.

Doris, 32, screw-frigate, was, when our latest despatches left Malta, expected there from Gibraltar.

Elk, 12, sailing-sloop, Commander Hubert Campion, having been in commission since May, 1856, has been ordered home from the Australian station.

Emerald, 51, Captain Arthur Cumming, will, as soon as she is relieved by the Nile, Captain Barnard, leave the West India station for England.

Espoir, 5, screw steam gun-vessel, is to be taken out of the basin at Keyham, Plymouth, and placed in the first division of the steam ordinary.

Exmouth, 90, screw-liner, has left Malta for Beyrout, in consequence of the serious disturbances which have broken out between the Christians and the fanatical Moslems in that neighbourhood.

Fire Queen, steam tender, Master-Commander Paul, is taking in her machinery, &c., in the steam-basin at Portsmouth, preparatory for further service.

Flying Fish, 6, screw dispatch-boat, commander Chas. W. Hope, is refitting alongside the jetty in Portsmouth Harbour. She will accompany the royal squadron to Canada on the occasion of His Royal Highness the Prince of Wales's visit to that colony in the ensuing summer.

Herald, 8, surveying-ship, Captain H. M. Denham, is on her way to England, from Australia. The Herald has been in commission since February, 1852. Captain Denham must have a store of interesting information for the scientific world.

Himalaya, screw steam troop-ship, Captain Seccombe, is to be taken out of No. 1 dock in Keyham, and to be moored in the basin.

Hornet, 17, screw, at Portsmouth, has received her lower and topmasts, and is fitting for the first class-steam-reserve, and will it is supposed be put into commission very shortly.

Immortalité, 51, screw, tested her machinery at moorings in the steam-basin, Portsmouth, on Wednesday last. Great expectations are entertained of this vessel's speed, in consequence of her fine lines forward. She will try her measured mile in Stokes Bay shortly, when we shall notice the result.

Liffey, 51, screw-frigate, was by our last advices from Malta daily expected there from Corfu.

Linnet and Pigeon, 4-gun screw despatch gun-vessels, built by Messrs. Briggs and Son, Sunderland, were taken into the No. 2 dock at Chatham, last Saturday, for the purpose of undergoing the Admiralty survey, and if found to be properly constructed to be coppered and prepared for sea.

Locust, 3, paddle-wheel steamer, 150-horse power, Lieutenant and Commander J. B. Field, has arrived at Sheerness from the Channel Islands, where she has for some time been employed in protecting the fisheries and in exercising the Pilots and Coast Volunteers. After coaling and taking in a stock of provisions she will proceed to Leith, to be placed under the orders of Vice-Admiral Sir Charles H. Fremantle, C.B., Commander-in-Chief of the Channel Fleet.

Magpie, steam gun-boat, has arrived at Plymouth from Ireland.

Melpomene, 51, screw, Captain Charles F. Stewart, entered Spithead on Wednesday morning under canvas, having left Tetuan on the 14th inst. She has on board His Excellency Seeyed Mohammed El Shamee, ambassador from the Emperor of Morocco to Her Majesty Queen Victoria. His Excellency is accompanied by Seeyed El Hadj Abd Enahman El Ajee, plenipotentiary, and five other Moorish gentlemen. Mr. Drummond Hay, the British consul at Tetuan, accompanies the embassy, and acts as interpreter. The distinguished party left the frigate at half-past two, and were saluted both by the ship and the battery on the ramparts, and entered the harbour in the Sprightly, steam-tender. On landing at the King's stairs in the dockyard, His Excellency and suite were received by Vice-Admiral H. W. Bruce the commander-in-chief of the port, Captain Coote and several other naval officers, Major-General Lord William Paulett, C.B., the Governor of Portsmouth and his staff (consisting of Colonel Somerset, Colonel Thackwell, Major Bruton, and Captain Milligan, A.D.C.), and a guard of honour of the 1st battalion of the 11th Regiment, with their band and colours. The weather was extremely disagreeable, and must have given our Moorish visitors a distaste to our climate. Their reception, however, was extremely cordial during their brief stay in the dockyard. His Excellency and suite were conveyed in carriages to the railway-station, which they left by the train for London. The Melpomene had remarkably fine weather from the coast of Africa until reaching the Channel.

Nelson, 91, screw. This converted ship has been for some time fitting for the steam-reserve at Portsmouth, and having now taken in the whole of her machinery, steamed out of harbour on Wednesday last to test her speed at the measured mile at Stokes Bay. As she was tried at half-boiler power, the result obtained at a great expense of fuel affords no satisfactory data for estimating her speed, particularly as she was as a matter of course light, having only her engines on board. The trial was resumed at full boiler power on Thursday. These trials may be of some consequence to the makers of the engines, but they afford no criterion to judge by, what a vessel's speed will be when she has all her weights—guns, stores, masts, and men on board. The depth of water forward was 17 ft. 6 in., and aft 21 ft. 10 in. The Nelson was built at Woolwich in 1814, as a 120-gun ship, after a plan by the then Surveyor of the Navy. She is now 46 years old, and has never been commissioned. After she came round to Portsmouth, she was exhibited as one of the nautical wonders of her day, being at that time the largest three-decked ship in the Navy. Her original tonnage was 2617 tons.

Nimrod, 6, screw steam-sloop, Commander Wyuniatt, has been ordered home from the East India station.

Partridge, steam gun-boat, at Devonport, was put out to commission on Saturday, and the Porpoise commissioned to take her place as tender to the flag-ship of the Commander-in-Chief of the Channel Fleet.

Pigmy, 3, Master-Commander Wm. Johnstone, has been placed in No. 1 dock, at Portsmouth, to clean copper and repair defects.

Queen, 86, screw, Captain C. F. Hillyar, was at Malta on the 13th inst.

Racehorse, 4, contract-built screw gun-vessel, having been surveyed at Chatham Dockyard, was taken out of No. 2 dock on Saturday afternoon. The survey of this vessel was made under the superintendence of Mr. Lang, the master shipwright, and his assistants, and was of a very searching character. The results, however, were very satisfactory, the ship, which is a model of the new class of vessels, being found to be constructed of the soundest materials and workmanship. Since the Racehorse has been in dock at Chatham she has been coppered, and will shortly be fitted for the steam-reserve.

Rodney, 91, has been towed from Chatham to the coaling depôt at Sheerness to receive her coals on board, preparatory to proceeding on a trial trip, for the purpose of testing her machinery.

Sealark, 8, Lieutenant-Commander C. E. Stevens, having repaired defects, has hauled out of dock at Portsmouth to resume her Channel cruise for exercise.

Sirius, old sailing frigate, has been brought down to Portsmouth Harbour and berthed alongside the dockyard jetty, for the purpose of being cleared out and prepared as a target-ship for the Excellent.

Torch, 4, Commander V. H. Smith, at Chatham, has commenced shipping her armament, which is to be of the heaviest kind, consisting of one 68-pounder of 95 cwt. and 10 feet long, one 32-pounder of 56 cwt. and 9 feet 6 inches long, and two 24-pounder howitzers. She is ordered to be victualled and stored for foreign service, her destination, it is thought, being China.

Wasp, 13, screw, Commander Sterling, sailed from Plymouth on Saturday for the Cape of Good Hope.

Wrangler, 4, screw, Commander Beamish, has gone into harbour at Plymouth to have defects made good, which would be completed yesterday.

The committee for inquiring into the history of the gun-boat contracts commenced its labours last week, and have had several sittings. They have examined the surveyor of the navy, Mr. Baldwin Walker, Mr. Oliver Lang, master shipwright at Chatham Dockyard, Mr. Abethell, master-shipwright at Portsmouth Dockyard, and Mr. Luke, Inspecting officer. The progress made by the committee is very slow, and in many quarters it is considered that its labours are now needless, Sir Charles Wood having taken upon himself the responsibility attached to the "green wood," and the Lords of the Admiralty having decided upon taking legal proceedings against the firm that used short bolts. The following are the names of the members who compose the committee:—Mr. Frederick Smith, chairman; Mr. Henley, Mr. Berkeley, Sir James Elphinstone, Mr. Horsman, Mr. Hankey, Admiral Duncombe, Mr. Whitbread, Mr. Edward Ellice, Lord Lovaine, Captain Gladstone, Mr. W. S. Lindsay, Sir Charles Napier, Mr. Joseph Locke, and Mr. Bentinck.

In the House of Commons, Lord Raynham asked the Secretary to the Admiralty why the description of anchor reported by the Anchor Committee of 1852 as the most approved, and now used on board Her Majesty's yacht, the Victoria and Albert, had not been generally adopted in the Royal Navy? Lord C. Paget said there was no objection to any officer having one of these anchors supplied to him if he asked for it. Lord Raynham.—Why are they not in general use? Lord C. Paget.—Because they are objected to generally by the profession. There are very few officers who do not object to the use of them. Then it strikes us as somewhat strange that an anchor should be supplied to Her Majesty's yacht which is objected to generally by naval officers. Captain Denman should look to this. Mr. Cochrane asked the Secretary of State for Foreign Affairs whether he would lay on the table a despatch from Admiral Sir Michael Seymour, dated the 14th of December, 1858, in which the admiral urged the propriety of giving additional pay and allowances to the naval forces employed in the Chinese war, in conformity with the precedents of the war in 1842, and of the Burmese war? Lord C. Paget said there was no objection to the production of the despatch. On the motion of Sir H. Stracey there was ordered a return of all sailors' homes erected, or in the course of erection, in the United Kingdom; distinguishing each as a home, as a shipping-office, as Well Street Home; an institute, as that at Mercer's Street, Shadwell; an institute and home together, as that at Dover; or as a Sailors' Home for all Nations, Institute and Refuge for the Shipwrecked Mariners, now erecting by private voluntary contribution, as at Great Yarmouth. How they are supported; whether by royal or parliamentary grants annually, as Plymouth, Portsmouth Dover, Shadwell; or by private exertions, like Yarmouth.

NAVAL FORCES ON THE COAST OF CHINA. — As at th time it is probable that the combined forces on the coast o China are actively employed, it will be interesting to our readers to learn with as much precision as possible the strength of the British squadron on the East India station, the whole of which, with a slight deduction, may be concentrated in the China stations. We have two Admirals—Vice-Admiral James Hope, C.B., and Rear-Admiral Lewis T. Jones, C.B.; one Commodore, twelve Captains, one Acting Captain, seventeen Commanders, two Acting Commanders, twenty-five Lieutenants-Commanding, and two Masters-Commanding. There are serving under these officers, in addition to a number for disposal in the event o f casualties, the usual complement of Lieutenants, &c., according to the ratings of the different ships.

Digitized by Google

The Duke of Somerset has conferred the captain's good service pension, vacant by the promotion to flag rank of Captain R. G. Robinson, on Captain G. W. D. O'Callaghan, now in command of the screw line-of-battle-ship Algiers, attached to the Channel squadron.

The Lords of the Admiralty are acting vigorously in the spirit of the suggestions which were thrown out in this Journal lately respecting the entry of boys for the Naval Service, though we are not prepared to assert a *post hoc propter hoc*. Orders have been issued to the proper authorities at Woolwich, to enter until further orders, fifty lads weekly, instead of the old number of twenty. Similar orders should be sent to the out-ports, and we should then soon have what has been long sought after—a steady supply of effective men for our Navy.

The Royal Commissioners for inquiring into the state of Her Majesty's dockyards, assembled on Wednesday for the first time at the private residence of Mr. Ricardo, the chairman.

The court-martial which assembled on Saturday last on board the flag-ship Impregnable, 104, in Hamoaze, consisted of Captain Woodford J. Williams, president, and Captains G. H. Seymour, Astley Cooper Key, A. W. Jerningham, the Hon. F. Egerton, and John Seccombe. Mr. William Eastlake officiated as Judge Advocate. Commander Sterling, of the screw steam-sloop Wasp, prosecuted. Lieutenant Edward St. John Daniel pleaded guilty to the charge of drunkenness, but, in extenuation, referred to his exposure to the severities of the weather in the Crimea, and subsequently to the climate of the East Indies. He produced testimonials from officers under whom he had served, and exhibited the Victoria Cross and several medals and orders. In consideration of his gallant services before the enemy the court adjudged that he should be sentenced only to dismissal from the Wasp, and to have his name placed at the foot of the list of lieutenants for a period of five years. Lieutenant Daniel has had a narrow escape, and it is to be hoped that an officer so young and gallant will not fail to profit by the severe lesson.

Captain Charles Wise (1847), who has been appointed to supersede Captain R. B. Watson, C.B. (who retires at his own request), as superintendent of Sheerness Dockyard, arrived there on Wednesday last, but he will not commence his official duties till the 1st of July.

Naval Cadets.—The following naval cadets having completed their course of instruction on board Her Majesty's training ship Britannia, Captain Robert Harris, at Portsmouth, have been drafted into sea-going ships:—Mr. H. H. Grenfell was awarded a regulation dirk for proficiency in mathematics and navigation; A. Ross second in mathematics and navigation; E. W. Hennan was presented with a pocket compass for proficiency in French and drawing combined; J. L. Luckraft and C. T. Hodgkinson, a telescope for proficiency in seamanship; Messrs. J. H. Seventhorpe, A. M. Ducat, P. B. Aitkins, P. S. Menteath, J. S. Bruce, G. Usborne, C. T. Francis, H. E. Walters, and B. H. Dunn, second in seamanship; T. Ferris and W. Wiseman, second in French and drawing; E. T. Dugdale, R. B. Needham, A. O. Tottenham, J. A. Clifton, E. G. Festing, T. J. Hoghton, J. A. Wilkins, G. La Coste, Hon. E. Brown, B. W. Fielding, E. Herrick, P. E. Bowley, H. Ching, F. M. Bland, L. Dacres, E. W. Cole, G. J. Bolton, A. J. Booth, P. A. Black, W. Freeland, F. A. Gataker, H. B. Lang, C. J. Prevost, G. G. Boys, and R. O. Webb.

Royal Naval College.—The following officers have passed their examination, and have received certificates under steam qualification; Commander N. B. Bedingfield, Commander J. H. N. Martin.

Distribution of Naval Prize-Money.—Notice was given in Tuesday's *Gazette* that preparations are now being made for the intended distribution of the proceeds and tonnage bounty, &c., of the slave-vessel Marianne, captured on the 22nd of March, 1858, by Her Majesty's ships Styx and Jasper; and that the distribution of a moiety of the proceeds of certain piratical junks, captured on the 11th of May, 1853, by Her Majesty's ship Rattler, will commence on Monday, the 25th June, 1860, in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset House. The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Commander ...	14	18	3	Seventh class ...	0	17	0
Third class ...	4	4	4	Eighth class ...	0	8	5
Fourth class ...	2	10	7	Ninth class ...	0	5	3
Fifth class ...	1	9	8	Tenth class ...	0	3	1
Sixth class ...	1	5	4				

Additional Pay for Seamen Gunners.—It cannot be too well known that, as an additional inducement for intelligent seamen of the fleet to join the gunnery establishments, the Lords Commissioners of the Admiralty have for some time past directed that a proportion of seamen gunners on board each ship shall in future be borne as gunnery instructors, and receive sixpence per day in addition to the ordinary pay of seamen gunners. By this new regulation a petty officer or seaman, while borne on the ship's books as gunnery instructor, will receive in addition to his ordinary pay fourpence per day as the holder of a first-class certificate for gunner's mate, and sixpence for being a qualified instructor, making a total of tenpence additional pay. The number of instructors borne in the different classes of ships will be as follows:—first-rates, 6; second and third-rates, 5; fourth-rates, 4; fifth and sixth-rates, 2; sloops, 1. Gunnery instructors, on returning to the gunnery ships on being discharged or paid off, will revert to the ordinary pay of seamen gunners. As marks of distinction, seamen gunners of the first-class are entitled to wear on the right arm a gun and crown, and seamen gunners second-class, a gun. Also, with a view of encouraging men to make themselves acquainted with the practical part of the gunnery and small arm exercises, a new class to be called "Trained Men," has been established, entitling those belonging to it to receive one penny a day in addition to their ordinary pay. Any seaman above the rank of second-class ordinary will be entitled to the additional penny a day as a trained man on his passing an examination before the Gunnery Lieutenant or gunner of his own or any other ship, proving that he is capable of performing the duties of all the numbers at a gun, that he is able to fit gun gear, and that he knows the manual and platoon exercises for the rifle, and has a fair kuowledge of the sword exercises.

MEDITERRANEAN.

Vice-Admiral Fanshawe, the late Commander-in-Chief of the Mediterranean fleet, made an address to the sailors under his command, before bidding them farewell. The following are the chief points:—The Commander-in-Chief having condemned in strong terms the outbreaks which lately disgraced a small portion of the fleet; and having stated that such outbreaks were both stupid in themselves, and incapable of being palliated on the grounds of any palpable grievance, called upon the men to show themselves worthy of themselves, their country, and their vocation, by showing for the future a suitable horror of such unwarrantable and disloyal proceedings.

The Commander-in-Chief proceeded then to state that the Service afforded every facility for hearing and redressing reasonable complaints, but that the men would most certainly not be permitted to take the law into their own hands. And that any such attempt on their part would be attended only with failure and disaster to themselves, inasmuch as in such cases officers in charge would be called on not to listen to complaints, but to take every opportunity of quelling disturbances. Petty officers especially he called upon to bring before the notice of the superior officer any just cause of complaint, or any evidences of dissatisfaction on the part of the crew, whether arising from real or imaginary causes; and by all means to lend themselves to quell at once any lawless attempt on the part of the young and inexperienced to take the fatal step, endeavouring to gain their object by an application to force, as all such attempts will end, as they have hitherto done, inrecoiling on the heads of those who make them.

Malta.—The fleet, under the command of Admiral Martin, proceeded to sea on the 16th instant. The line-of-battle-ship Queen entered our port on the 10th instant from Spithead and Gibraltar. The line-of-battle-ship Agamemnon sailed on the 13th instant. The paddle-wheel steamer Caradoc arrived from Palermo on the 13th instant.

Letters from Naples of the 11th of June say, that in addition to a French line-of-battle-ship and dispatch-boat, which were in the bay, four French line-of-battle-ships (one a three-decker) arrived there on the 10th. The English liners Cæsar and Neptune were still at Naples, and the London and Renown were expected. A Russian line-of-battle-ship, and a Spanish steamer, were also in the bay.

In consequence of the receipt of a Consular report, stating that an insurrection of the Christians had broken out in Syria, Her Majesty's Ship Exmouth, Captain Paynter, was ordered to proceed to Beyrout, being preceded by the dispatch-boat Mohawk. We understand that Her Majesty's ship Queen was selected for this service, but she could not be got ready for sea immediately.

Barracks for one thousand men are being constructed at St. George's Bay. The work was commenced under the directions of Captain Bland, Royal Engineers. We understand that the plan selected is a double row of one-storied buildings, with colonnades for the object of coolness, and that the estimated cost is 8000*l*.

SERVICE AFLOAT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I would beg, through the medium of your professional Gazette, to offer a few remarks respecting the system proposed of increase to full and half-pay and retirement for the lieutenants, &c., of the Navy on the plan of length of service afloat.

Such a scheme must and will work ever most unjustly towards officers without powerful patronage, as the Navy is at present constituted. For, with 1200 lieutenants, and only about one-third employed in peace, how could all serve and thereby rise to the higher scale of pay, &c. It would, therefore, be only those officers who could command employment that could hope to do so; and, as all appointments have been distributed by the Admiralty for years and years through powerful interest and patronage, the officers without interest would never rise beyond the 10*s.* a-day full-pay, and the 5*s.* a-day half-pay list. And, should a war break out at some future time, we should see lieutenants of 12 or 14 years' standing, and with 6 or 7 years' service as mates afloat, serving as 1st or senior lieutenants of line-of-battle ships on 10*s.* a-day, while their junior officers, of only 9 years' standing, without any mate's time, would be in receipt of 12*s.* a-day. So that the senior would have 12 years' time afloat as lieutenant and mate, while his junior would only have 9 years, yet be in receipt of 2*s.* per diem more pay.

The scheme of retirement would, of course, act entirely the same; so that old officers, without political interest or friends, would be in a much worse position than at present, for now they have a prospect of rising to 6*s.*, 7*s.*, or 8*s.* 6*d.* a day. If the Navy was a permanent service, and all took fairly their turn afloat as the Marines, the scheme of length of service afloat for increase of pay and retirement would be just; but, as at present constituted, it would act most unfairly in every way to the friendless officer, and be seriously detrimental to the service.

If the projectors of such an absurd scheme had in view the object of keeping the Navy entirely for the upper classes' sons, their plan was likely to be successful; but it is to be seriously hoped Parliament and the country will have their eyes open, and never permit such an abuse of power, or tolerate such a movement. Officers are much, and with reason, dissatisfied, and may be made more so, by injudicious regulations; and this is no time to trifle with the feelings of old officers or the rising generation.—I am, &c., R. N.

There are fifty-nine effective vessels of various classes, mounting 490 guns, manned by upwards of 7000 seamen and mariners.

There are also borne on the books of the flag-ship Chesapeake, 2 battalions of Royal Marine Light Infantry, and 1 company of Royal Marine Artillery, making together some eighteen hundred men. We have, therefore, on the East India station, besides the army dispatched from India and from England, nine thousand sailors and marines.

We have not taken into account the vessels and the crews of the late East India Company's navy, as they are chiefly employed on other parts of the station, and have not hitherto taken part in the new war with China.

THE MILITIA.

The Edinburgh Artillery are ordered to Edinburgh for disembodiment.

2nd Lanark, ordered from Glasgow to Lanark to be disembodied.

Northumberland Artillery, ordered from Cork to Kinsale.

The Militia Gazette.

WAR OFFICE, PALL MALL, June 19.

1st or Royal East Middlesex Regiment of Militia.—Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Lieutenant William Thomas Croft; Ensign Edmund Parker to be Lieutenant, vice Fraser deceased; Ensign Archibald Dudingston Boyd to be Lieutenant, vice Croft, resigned.

4th or Royal South Middlesex Regiment of Militia—Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Lieutenants Henry Edgerton King and Thomas Fitzmaurice Burke respectively.

Dumfries, Roxburgh, Kirkcudbright, and Selkirk Militia—Charles Ferdinand Rutherford, Gent., to be Lieutenant, vice Thomson resigned.

Memorandum.—King's Own Light Infantry regiment of Militia.—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Hewitt Massy Dillon.

Warwickshire Militia.—1st Regiment.—Major Charles Wise, Brevet-Colonel Unattached in Her Majesty's Army, to be Lieut.-Col., vice Boultbee, deceased.

Memorandum.—Warwickshire Militia.—2nd Regiment.—Her Majesty has been graciously pleased to accept the resignation of the commission held by Assistant-Surgeon Charles Rice Williams.

6th Regiment of West York Militia.—The name of Captain Charles Horton Rhys, who was absent without leave from the last training, has been struck off the strength of the regiment.

Dorset Regiment of Militia—Lieutenant Charles Hall to be Captain, vice Wood, promoted.

WAR OFFICE, PALL MALL, June 22.

5th or Royal Eltborne Light Infantry Regiment of Militia—Antony Delacombe Bell, late Captain and Adjutant 2d Guernsey Militia, to be Adjutant, vice Bell, resigned.

1st or Royal East Middlesex Regiment of Militia—Captain William Frederick Northey to be Major, vice Prince, resigned.

2nd or Edmonton Royal Rifle Regiment of Middlesex Militia—Lieutenant Francis Byass to be Captain, vice West, resigned.

Memorandum.

The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Captain Algernon Edward West.

3rd or Royal Westminster Light Infantry Regiment of Middlesex Militia—Lieutenant John Willcocks to be Captain, vice Parsons, resigned; Lieutenant Frederick Alfred Stone to be Captain, vice Rulfs, resigned; John Harlowe Turner, Gent., to be Lieutenant, vice Stone.

5th or Royal Eltborne Light Infantry Regiment of Middlesex Militia—Ensign Austin Heuston to be Lieutenant, vice Weld, resigned.

3rd Regiment of King's Own Staffordshire Militia—Ensign Charles Donaldson to be Lieutenant, vice Lord Alexander Paget, resigned; Hamar Bass, Gent., to be Lieutenant.

Royal Berks Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant the Lord Norroys in the above Regiment.

1st Somerset Regiment of Militia—Ensign Lionel Patton to be Lieutenant, vice Winsloe, made Quartermaster.

Bedfordshire Regiment of Militia.—Major William Stuart to be Lieutenant-Colonel, vice Wilkinson, resigned; Captain William Copland Redmond Judd to be Major, vice Stuart, promoted.

A Big Buoy.—At Havre an enormous buoy, of riveted iron, has excited some interest. This buoy, measuring at least eight metres from the base to the summit, has the form of an inverted balloon. On the round or upper portion an open-work map of the world is displayed; beneath is suspended a bell, of pretty large dimensions, with seven hammers, ranged around it, and disposed so that the slightest oscillation is sufficient to render sound. The lower portion submerged is hollow and water-tight. On the outside are four ladders, uniformly spaced for ascending to the top of the buoy from the water.

Sir F. L. M'Clintock at Oxford.—Captain Sir Francis L. M'Clintock, R.N., was present at the commemoration at Oxford on Wednesday, and the honorary degree of D.C.L. was conferred upon the gallant Arctic voyager. The undergraduates were loud in their applause when Sir Francis made his appearance, and it is a question whether Lord Brougham or he were the hero of the day, as the cheering appeared to be bestowed in nearly equal proportions on these very distinguished men.

The Liability of Volunteers to Pay Toll.—It will be remembered that there have been one or two cases arising out of this question before the magistrates, and that a summons was taken out a few days ago at the Lambeth Police Court for exacting toll from some gentlemen belonging to a rifle corps. This week Mr. Elliott gave judgment in the case as follows. He said, "The claim for exemption from toll made in this case by three Volunteers returning from their duty, in their regimentals, in a cab is founded on a provision in the General Turnpike Act, which exempts from toll 'any carriage conveying Volunteer infantry.' These words are no doubt general; but I think they must be construed with reference to another provision in the same Act for exemption from toll in the case of the regular forces, by which such carriages only as are used in the performance of some public duty, as for the conveyance of baggage or stores, or are employed in carrying or conveying sick, wounded, or disabled officers or soldiers, are exempt from such toll. The intention appears to me to have been to provide that when the corps was on the march carriages conveying them or their baggage might pass toll free, but not that any individual officer or soldier belonging to the corps should have that exemption either for his own or for any hired carriage at any time used for his private conveyance and case, which I think must be taken to have been the case on the present occasion. Reference has been made to the provision contained in the Vauxhall Bridge Act, but the wording of that Act is very different. The summons must be dismissed." Mr. Stockbridge, one of the complainants, said that it was the wish of several noblemen and gentlemen to have the case carried to one of the higher courts in case his worship should be against the right to exemption, and asked Mr. Elliott whether he had any objection to give them a case to enable them to go to the Queen's Bench. Mr. Elliott replied that he had no objection whatever, and thus the matter at present rests.

VOLUNTEERS.

METROPOLITAN.

A grand field day and preliminary review took place in the Regent's Park on last Saturday evening, under the command of Lord Elcho, and in the presence of Colonel M'Murdo, Inspector-General of the Volunteer Forces. The various corps under review mustered on the ground about 6 o'clock, accompanied by their bands, and were received with enthusiasm by the spectators, who could have been little short of 50,000 or 60,000. The corps assembled consisted of the Queen's (Westminster), twelve companies, under the command of Earl Grosvenor; the Inns of Court, seven companies, commanded by Colonel Brewster; the Civil Service, eight companies, commanded by Lord Bury; the London Scottish, four companies, commanded by Lord Elcho; the West Middlesex (Marylebone), four companies, commanded by Lord Radstock; the Volunteer Guards, one company, commanded by the Hon. H. C. Bruce; the North Middlesex (late St. Pancras), two companies, under the command of Captain Ross; the Highgate (14th Middlesex), under the command of Captain Wilkinson, two companies; the Engineers, two companies; the St. George's, under the command of the Hon. Colonel Lindsay, four companies; the Artists, one company; the Hampstead, one company; the Hornsey Rifles, one company; and the 20th Middlesex (or Railway Rifles), under the command of Major Bigge, who, in conjunction with a detachment of the London Scottish, kept the ground. There were in all 13 corps represented, comprising in the aggregate about 5000 men.

CHESHIRE.

A Volunteer review was held on the Roodee, Chester, on Wednesday, the force being made up of detachments of Volunteers from all the regiments in the neighbourhood. About 1200 Volunteers were reviewed, and a large number was present as spectators. An immense concourse of people also attended. Colonel Wilbraham, the officer who reviewed the Volunteers, complimented them in the highest terms, and declared that the manner in which they had performed their evolutions would do credit to any infantry regiment.

ESSEX.

THE WEST ESSEX YEOMANRY.—The officers of the West Essex Yeomanry Cavalry held their annual mess dinner at the Albion, in Aldersgate Street, on Wednesday, the 13th inst., at which Lord Ranclagh, the Lieutenant-Colonel of the South Middlesex Rifle Volunteers; Major Robinson, Captains Bokenham and Jay, of the Hon. Artillery Company; Major Capper and officers of the Victoria Dock Rifles; Captain Davis and Lieutenant Clifton, of the Ilford Rifles; and an officer of the Eastern Counties Railway Rifles, were present. The commandant of the West Essex Yeomanry Artillery and Cavalry purposes collecting a large volunteer force in Hyland's Park, near Chelmsford, on the 4th of August, for a brigade field-day similar to the one which took place last September.

GLOUCESTERSHIRE.

CHELTENHAM.—The Cotswold (10th Gloucestershire) Rifle Volunteers were inspected, on Friday evening last, in the Montpellier Gardens, in the presence of a large number of the residents of the town. The company, numbering 63 rank and file, 1 sergeant-major, and 4 sergeants, under the command of Ensign Speer, took up their position about 8 o'clock, and, as the clock struck, Major Noel, of the 2nd County Battalion, arrived and was received with a general salute. The inspecting officer having passed through the ranks, and carefully examined every man, requested Ensign Speer to put the corps through the manual and platoon exercise; after which, Sergeant Philipps was called to the front, and in the most soldierly and efficient manner proved the company. Major Noel then took the command into his own hands, and for nearly an hour, in a truly military style, put the company through the whole of their drill. Every movement was quickly and easily done, and in such a manner as to elicit evident marks of approval from the spectators present. The company then formed close column of square on No. 1 section; and Major Noel, in a short speech, complimented the company upon the very efficient manner in which they had executed all the movements; and he must say, considering the short time they had been embodied, their appearance and movements were a credit to themselves and every one connected with them; and he would take care the report he should forward to Colonel Purnell should contain the highest praise he could give them. Colonel Wood, who commands the corps, has been confined to his house for the last month, the result of an accident, was present in a wheel-chair. C. Swiny, the Lieutenant, is on leave in Ireland.

KENT.

FIRST BATTALION OF KENT RIFLE VOLUNTEERS, under the command of Colonel Thorold, viz., Lee, Greenwich, Deptford, Woolwich, Kidbrooke, Sydenham, Bromley, Lewisham, Charlton, Blackheath, and Eltham. The Royal Arsenal Artillery and Rifle Corps, consisting of 1600 effectives, are daily engaged in drill exercise.

NOTTINGHAMSHIRE.

THE VOLUNTEER RIFLE CORPS' REVIEW.—Five hundred effective members of the Nottingham rifle corps, under the command of Lieut.-Colonel Crawford, will be present at the Review in Hyde Park to-day. Three battalion drills of the entire corps are being performed this week. The appearance of the men is very soldier-like, and the skill with which they go through their evolutions excites the admiration of experienced military men.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JUNE 19.

The Civil Service Corps of Rifle Volunteers—His Royal Highness Albert Edward, Prince of Wales, K.G., to be Hon. Colonel.

South Middlesex Rifle Volunteer Corps—Lieutenant Charles Townshend Murdoch to be Captain; Ensign St. Pierre Butler Hook to be Lieutenant, vice Murdoch, promoted.

West Middlesex Rifle Volunteer Corps—Captain Charles Francis Compton to be Major, vice Lord Radstock, promoted; Frederick Peake, Gent., to be Ensign.

St. George's Rifle Volunteer Corps—Ensign Henry Bennett to be Lieutenant; Ensign Robert Lincoln Cocks to be Lieutenant; Thomas Hames Savory, Gent., to be Ensign, vice Bennett, promoted; William Houghton, Gent., to be Ensign, vice Cocks, promoted; John Thomas Wimperis, Gent., to be Ensign; William Agnew Pope, Gent., to be Ensign; Robert Wilby Ollivier, Gent., to be supernumerary Lieutenant.

Queen's (Westminster) Rifle Volunteer Corps.—Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Major Lord James Wandesforde Butler; Captain Richard Radcliffe Twining to be Major, vice Lord Butler, resigned.

Inns of Court Rifle Volunteer Corps.—Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Captain Henry Ross Johnston; Lieutenant Henry Griffith, to be Captain, vice Johnston resigned.

27th Middlesex Rifle Volunteer Corps.—Memorandum.—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Lieutenant Henry Eardley Aylmer Dalbiac; Ensign Frederick Brooksbank Garnett to be Lieutenant vice Dalbiac resigned; Peter Dickinson, Gent., to be Ensign vice Garnet, promoted.

28th Middlesex Rifle Volunteer Corps.—William Burnett Coates, Gent., to be Ensign; Joseph Clarke, Gent., to be Ensign.

Kent Rifle Volunteers—Colonel George Edward Thorold, to be Lieut.-Colonel; Captain Henry Burrard Farnell, to be Major.

22nd Company—George Filmer, Gent., to be Ensign, vice Selby, resigned.

Great Yarmouth Rifle Volunteer Corps—Lieutenant Joseph Tomlinson to be Captain, vice Orde, promoted; Samuel Waters Spelman to be Lieutenant, vice Tomlinson, promoted.

2nd Isle of Wight Rifle Volunteers—Dr. Ernest Powell Wilkins, Physician and M.R.C.S., to be Hon. Assistant-Surgeon.

16th Rifle Volunteers—Peter Esdaile Bearblock, Esq., to be Captain; William Mashiter, Esq., to be Lieutenant; Richard Dendy, Esq., to be Ensign.

1st Wiltshire Mounted Rifle Volunteers—Lord Edward Percy St. Maur to be Captain, vice Lord Seymour resigned.

5th Cinque Ports Rifle Volunteers—The Rev. Alfred Gay to be Hon. Chaplain.

5th Cambridgeshire Rifle Volunteers—Robert Charles Catling, Esq., to be Lieutenant; Robert Dawbarn, jun., Esq., to be Ensign; Henry Wright, Esq., to be Hon. Surgeon.

3rd Glamorgan Artillery Volunteers—John Hewett, Esq., to be Capt.; Arthur Charles Goodrich Langley Esq., to be Second Lieut.; John Robert Reece Esq., to be Hon. Assist.-Surgeon.

4th Glamorgan Artillery Volunteers—John Whitlock Nicholl Carne, Esq., to be Captain.

4th Company of Cheshire Rifle Volunteers—Ensign William Stock Bower to be Lieut., vice Walford, resigned.

8th Company of Cheshire Rifle Volunteers—Hon. Assist.Surg. John Mayor to be Assist.-Surgeon.

4th Westmoreland Rifle Volunteers—Edward William Yeeles, gent., to be Lieutenant.

6th Westmoreland Rifle Volunteers—The name of Ensign Green gazetted on the 29th of May last, is Joseph Fleming Green, and not Fleming Green.

4th Tower Hamlets Rifle Volunteers—Henry Adolphus Bale, Esq., to be Captain; William Taylor, gent., to be Lieutenant; William Smith Yarrow, gent., to be Ensign; the Rev. Edward Whitley to be Hon. Chaplain; Thomas Leonard, Esq., M.D., to be Hon. Surgeon.

15th Suffolk Rifle Volunteers—John Francis Vincent, gent., to be Lieutenant; Samuel Allen Goodwyn, gent., to be Ensign.

16th West Riding of Yorkshire Rifle Volunteers (Harrogate)—Thomas Broadbent, gent., to be Lieutenant; James Coates, gent., to be Ensign.

32nd West Riding of Yorkshire Rifle Volunteers (Holmfirth)—John Earnshaw Moorhouse, Esq., to be Captain; John Harpen Gent., to be Lieutenant; George Henry Hinchliff, Gent., to be Ensign; Charles John Trotter, Gent., to be Hon. Assistant-Surgeon.

Memorandum.—1st Battalion West Riding of Yorkshire Rifle Volunteers.—The Commission of Major George Briggs is antedated 11th of May, 1860, instead of 26th of May, as previously gazetted.

1st Brigade of Sussex Artillery Volunteers—Captain Lieut.-Colonel Joseph Estridge, to be Major; John Cordy Burrows, to be Surgeon.

17th Sussex Rifle Volunteers—James Brooker to be Ensign.

Memorandum.—1st Sussex Rifle Volunteers.—The correct names of Lieutenant Glasier are William Bussell Glasier, and not William Russell Glasier, as gazetted on the 5th inst.

13th Sussex Rifle Volunteers.—The correct names of Hon. Assist.-Surgeon Holman are Henry Martin Holman, M.D., and not Martin Holman, as gazetted on the 15th inst.

17th Sussex Rifle Volunteer Corps.—The correct name of Lieut. Reeves is Francis Reeves, and not Frank Reeves, as gazetted on the 15th inst.

1st Sussex Artillery Volunteer Corps—R. Branwell to be Second Lieutenant, dated 6th June, 1860, and not R. Bramwell, as gazetted on the 15th inst.

20th Company of Surrey Rifle Volunteers—Captain John Ouchterlorry (Royal Madras Engineers) to be Captain; the Rev. Rupert Montague Browne to be Hon. Chaplain.

2nd Battalion of Lancashire Rifle Volunteers—Robert John Tinley, Esq., Captain in the 5th Lancashire Rifle Volunteers, to be Major.

11th Lancashire Artillery Volunteers—First Lieutenant James Currie to be Captain; Second Lieutenant John MacIver to be First Lieutenant; Second Lieutenant William Balfour Crawford to be First Lieutenant; George Wilson, Gent., to be Second Lieutenant; John Spencer Tumilty, Gent., to be Second Lieutenant; Edward Dreossi, Gent., to be Second Lieutenant.

72nd Lancashire Rifle Volunteers—Charles Arthur Julius McBride, Esq., to be Captain: Richard Sutton Harding, Gent., to be Lieutenant; Thomas Varty, Gent., to be Ensign.

8th Monmouthshire Rifle Volunteer Corps—The Hon. James Fitzwalter Butler to be Captain; William Henry Nicholl, Gent., to be Lieutenant; Henry William Francis Greatwood, Gent., to be Ensign.

East York Artillery Volunteers, Hull Brigade—Simeon Moseley, Esq., to be Captain, in augmentation; Second-Lieutenant Joseph Williams Pettingell to be First Lieutenant, in augmentation; Charles Copeland, Esq., the younger, to be Second-Lieutenant in augmentation; Herbert Archibald Gibson Mands, Esq., to be Second-Lieutenant, vice Pettingell, promoted; the Rev. Henry William Kemp, B.A., to be Honorary Chaplain.

Memorandum.—Oxford University Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the commission held by Ensign John Cecil Russell.

4th Cumberland Artillery Volunteers—Thomas Sadler Douglas, Gent., to be Hon. Assistant-Surgeon; the Rev. John Irving to be Hon. Chaplain.

City of Edinburgh Rifle Volunteer Corps—Major David Davidson to be Lieut.-Col.; Duncan Menzies to be Lieutenant; David Kerr to be Ensign.

1st Newcastle-upon-Tyne Rifle Volunteers—William Adamson, Gent., to be Ensign.

The following appointment is substituted for that which appeared in the *Gazette* of the 4th of May last.

6th Corps of Northumberland Rifle Volunteers—John Elliott, Gent., to be Hon. Assistant-Surgeon.

WAR OFFICE, PALL MALL, JUNE 22.

73rd Lancashire Rifle Volunteers—William Thomas Blacklock, Esq., to be Captain; Thomas John Gillespie, Gent., to be Lieutenant; George Hilton, Gent., to be Ensign.

67th Lancashire Rifle Volunteers—Lieutenant Nathaniel Topp to be Captain; Ensign John Nightingale Key Grover to be Lieutenant.

5th Kincardineshire Rifle Volunteers (Auchinblae).—Captain James C. Burnett to be Captain; Alexander Taylor, Gent., to be Lieutenant; George Smart, Gent., to be Ensign.

1st Sutherland Artillery Volunteer Corps—Thomas Houston Rutherford, M.D., to be Honorary Assistant-Surgeon.

1st North Riding of Yorkshire Artillery Volunteer Corps—Thomas William Spink Locke, late Staff Acting Assistant-Surgeon, attached to Captain Elgee's battery of Royal Artillery, to be Surgeon.

11th (or Cumbernauld) Company of Dumbartonshire Rifle Volunteers—James Mackenzie, Esq., to be Captain; Thomas Watson, Gent., to be Lieutenant; David Coutts, M.D., to be Ensign.

4th Company of Dumbartonshire Rifle Volunteers—James Humphreys to be Honorary Assistant-Surgeon.

2nd Warwickshire Rifle Volunteers (Coventry), 2nd Battalion—Ensign Richard Caldicott to be Lieutenant, vice Robins, resigned; John Cleophas Ratliff, Gent., to be Ensign, vice Caldicott, promoted.

8th Warwickshire Rifle Volunteers (Coventry)—Josiah Yeomans Robins, late Lieutenant, to be Captain; James Sibley Whittem, Gent. to be Lieutenant.

1st Middlesex Engineer Volunteer Corps—Richard Burchett, Gent., to be First Lieutenant; Edward Stanley Poole, Gent., to be Second Lieutenant.

Victoria Rifles—Frederick George Whitehead, Major East Essex Militia, to be Major, vice Clifford, resigned. The Queen has been graciously pleased to accept the resignation of the Commission held in this corps by Major Edward Clifford and Ensign Andrew Steinmetz respectively.

South Middlesex Rifle Volunteer Corps—John Furtado, Gent., to be Ensign.

4th, 5th, and 6th Middlesex Rifle Volunteer Corps—Her Majesty has been graciously pleased to approve of the amalgamation of these Companies into one Corps, which is numbered 4th, in the county of Middlesex.

4th Middlesex Rifle Volunteer Corps—The Right Honourable Charles Robert Claude Baron Truro, to be Captain Commandant; The Queen has been graciously pleased to accept the resignation of the Commission held in this corps by Ensign John William Docwra.

9th or West Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this corps by Captain Reginald Howard Alexander Ogilvy.

London Scottish Rifle Volunteer Corps—Major Sir David Baird, Bart., to be Major; Theophilus Sandeman, Gent., to be Ensign; The Right Honourable James, Viscount Hamilton, to be Ensign.

16th Middlesex Rifle Volunteer Corps—George Brodie Clark, Gent., to be Ensign.

19th Middlesex Rifle Volunteer Corps—William Thomas Sutton, Gent., to be Lieutenant; George Tansley, Gent., to be Ensign.

20th Middlesex Rifle Volunteer Corps—Major Thomas Edward Bigge to be Lieutenant-Colonel; Lieutenant Thomas Henry Tims to be Captain; Frederick Wakefield Collard, Esq., to be Captain; George Griffiths, Gent., to be Lieutenant; Robert Philip Macklin, Gent., to be Ensign; William Henry Newman, Gent, to be Ensign.

Civil Service Corps of Rifle Volunteers—The Right Honourable William Coutts, Viscount Bury, late Captain Commandant 38th Middlesex Rifle Volunteer Corps, to be Lieutenant-Colonel.

Queen's (Westminster) Rifle Volunteer Corps—Alfred Sartoris, Esq., to be Captain, vice Twining, promoted.

Inns of Court Rifle Volunteer Corps—Ensign Wyndham Holgate to be Lieutenant; Francis Hobson Appach, Gent., to be Ensign, vice Holgate, promoted.

London Irish Rifle Volunteer Corps—Thomas Boutchier Irwin, Gent., to be Lieutenant; Robert Jones, Gent., to be Ensign; Arthur Blennerhassett Leech, Gent., to be Ensign.

35th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this corps by Ensign Henry Johnson Stewart Flint.

36th Middlesex Rifle Volunteer Corps—Christopher Petty Lochner, Gent., to be Lieutenant; Charles Mills Roche, Gent., to be Lieutenant; Robert John Child, Gent., to be Ensign; Thomas Henry Baylis, Gent., to be Ensign.

37th Middlesex Rifle Volunteer Corps.—The Queen has been graciously pleased to approve of Captain John William Jeakes bearing the title of Captain Commandant in the above corps; Lieutenant John Malcolm Corrie to be Captain; Ensign Francis Robert Warren to be Lieutenant; Samuel Smith Crosland Richards, Gent., to be Ensign; Charles Taylor Ware, Gent., to be Ensign; George Duplex, Gent., to be Assistant-Surgeon.

38th Middlesex Rifle Volunteer Corps.—The Queen has been graciously pleased to accept the resignation of the Commission held in this corps by Captain the Viscount Bury.

40th Middlesex Rifle Volunteer Corps—Lewis Henry Isaacs, Esq., to be Captain; Robert Jewell Withers, Gent., to be Lieutenant; William Fell Woods, Gent., to be Lieutenant; Edwin Low, Gent., to be Ensign; George Aickin, Gent., to be Ensign.

41st Middlesex Rifle Volunteer Corps—Gordon Sutherland Munro, Esq., to be Captain; Charles Sendey, Gent., to be Lieutenant; Robert Eager White, Gent., to be Ensign.

42nd Middlesex Rifle Volunteer Corps—Thomas Wilson Collet, Esq., to be Captain; Thomas Crundwell, Gent., to be Lieutenant; Rupert Flindt, Gent., to be Ensign.

2nd Battalion Rifle Volunteer Corps—Major Charles Capper, to be Lieutenant-Colonel.

19th Surrey (or Lambeth) Rifle Volunteers—Oliver Henry Davis, Gent., to be Captain; Henry Plews, Gent., to be Lieutenant; Frederick Thomas Prewett, Gent., to be Ensign.

South London Rifle Volunteer Battalion—Major James Horsburg Macdonald, late Lieutenant-Colonel of the Bengal Artillery, to be Lieutenant-Colonel, vice Boucher, resigned. The Queen has been graciously pleased to accept the resignation by Lieutenant-Colonel Boucher, of the Commission held by him in the South London Rifle Volunteer Corps.

26th Staffordshire Rifle Volunteers—Thomas Henry Cross, Gent., to be Ensign.

15th Company Wiltshire Volunteer Rifle Corps—Richard Bradford, Gent, to be Lieutenant.

East Riding of Yorkshire Artillery Volunteers (1st Brigade)—Captain Benjamin Blaydes Haworth to be Major. 1st Corps (Burlington)—First Lieutenant Edward Ridsdale Harding to be Captain, vice Haworth, promoted; Second Lieutenant Robert Crowe to be First Lieutenant, vice Harding, promoted; Edward Foster Holden, Esq., to be Second Lieutenant, vice Crowe, promoted.

Ayrshire Rifle Volunteers—1st Company—Hugh Hutchison Smith, M.D., to be Honorary Assistant-Surgeon. In consequence of the amalgamation of the Galloway Rifles with the Royal Ayrshire Rifles and the Dumfries, Roxburgh, and Selkirk Militia Corps, Major Walter Ferries Hamilton is permitted to wear his uniform and retain the rank of Major.

2nd Company of Dumfriesshire Volunteer Rifle Corps—William Maxwell, Esq., to be Captain; Thomas Dickson, Esq., to be Lieutenant; William Smith, Esq., to be Ensign.

Annan or 5th Company of Dumfriesshire Volunteer Rifle Corps.—Frederic McConnel, Esq., to be Captain; William Dobbie, Esq., to be Lieutenant; William Roxburgh, Esq., to be Ensign.

8th Hampshire Rifle Volunteer Corps—Joseph James Parish Hoare, Gent., to be Lieutenant; William Bracher Gater, Gent., to be Ensign; The Rev. John Silvester Davies, M.A., to be Honorary Chaplain.

13th Hampshire Rifle Volunteer Corps—Allan Borman Heath, Esq., to be Lieutenant; Philip Henry Poore, Gent., to be Ensign; John Mills Goodinge, Gent., to be Honorary Assistant-Surgeon.

14th Hampshire Rifle Volunteer Corps—Francis Frederick Lovell, Esq., to be Captain.

Berks Rifle Volunteers (3rd Corps)—Broome Pinniger, Gent., to be Ensign; Silas Palmer, M.D., to be Honorary Assistant-Surgeon. (6th Corps)—James Gale Barford to be Honorary Assistant-Surgeon.

Wellington or 8th Somerset Company of Volunteer Rifle Corps—Ensign Franklin Sealy Bridge to be Lieutenant, vice Thomas, resigned.

Langport or 21st Somerset Company of Volunteer Rifle Corps—Samuel Slee Larcombe, Gent., to be Honorary Assistant Surgeon; the Reverend Edward Pering Henslowe, Clerk, to be Honorary Chaplain.

Clevedon or 1st Somerset Company of Volunteer Artillery Corps.—Sir Arthur Hallam Elton, Bart., to be Captain; William Jerdone Braikenridge, Gent., to be First Lieutenant; George Pizey, Gent., to be Second Lieutenant; Martin Noble Shipton, Gent., to be Honorary Assistant-Surgeon; The Reverend Ernest Henry Fothergill, Clerk, to be Honorary Chaplain.

Bedfordshire Rifle Volunteers (6th Company).—Alfred Heale to be Honorary Assistant-Surgeon.

6th Monmouthshire Rifle Volunteer Corps.—Thomas Mountjoy Fisher, Gent., to be Ensign, vice Isaacson, resigned.

1st Lanarkshire Artillery Volunteers, Glasgow—First Lieutenant John Samuel McDowall to be Captain of the 2nd Company, vice James Mitford Morison, promoted; Second Lieutenant Duncan McDonald to be First Lieutenant in the 2nd Company, vice McDowall, promoted; Matthew Clark, Gent., to be Second Lieutenant in the 2nd Company, vice McDonald, promoted: First Lieutenant Alexander Smith Baird to be Captain of the 3rd Company, vice James Reid Stewart, promoted; Second Lieutenant George Russell to be First Lieutenant in the 3rd Company, vice Baird, promoted; Peter Gorrie Kennedy, Gent., to be Second Lieutenant in the 3rd Company, vice Russell, promoted; First Lieutenant Duncan McFarlane to be Captain of the 6th Company, vice William Holms, promoted; Second Lieutenant Frederick David Rait to be First Lieutenant in the 6th Company, vice McFarlane promoted.

38th Lanarkshire Rifle Volunteers, Glasgow—Archibald Patterson, Gent., to be Lieutenant.

Oxfordshire Rifle Volunteers—The 2nd, 3rd, 4th, 5th, 6th and 7th Oxfordshire Rifle Volunteer Corps have been formed into a Battalion for drill and administrative purposes instead of administrative purposes only, as at present, with a Staff consisting of a Lieutenant-Colonel and an Adjutant. The Battalion to be numbered the 2nd in the county.

THE HONOURABLE ARTILLERY COMPANY.

His Royal Highness the Prince Consort as Captain-General and Colonel-in-Chief, inspected the Honourable Artillery Company yesterday, at the head-quarters, Finsbury. There was a strong muster of the Members of the Corps as early as three o'clock, but His Royal Highness did not reach the ground till about a quarter to six. The interval was employed in putting the men through various evolutions which were most manfully performed. The heat, and the weight of the bear skins, however, had the effect of causing several of the men to fall out of the ranks in a fainting state; and, we regret to say, that rather a serious accident occurred to a member of the mounted troop; his horse having shied and thrown him, his head coming in contact with the wall of the enclosure, he was picked up in a sensless state, and removed to the Armoury house. Fortunately, all these *contretemps* occurred before the arrival of the Prince, as subsequently nothing could have been more satisfactory than the proceedings. The men having been inspected and marched before His Royal Highness in slow and quick time, they formed into a square for receiving cavalry, and performed with great precision the other usual infantry manœuvres, and finally advanced in line, the band playing the National Anthem.

Lord Colville, the Lieut.-Colonel, was in command, and His Royal Highness expressed to his Lordship his high approbation of the state of the corps.

The Prince Consort after quitting the parade-ground, proceeded to the Armoury, which was found to be in that excellent order for which the Company is so marked. It is intended to make considerable alterations and enlargements in this department as the requirements of the corps, owing to its great increase of late, cannot be met by the existing arrangements. The number of men under arms amounted to between 500 and 600, out of which 80 were told off as a guard of honour to the Prince. There were about 4000 spectators on the ground, while almost an equal number occupied the windows and roofs of the houses by which it is on three sides surrounded. We are rapidly becoming a military nation; for, if some 6000 or 8000 persons assemble to see 500 men passed in review, we may ask how many will be present to-day in Hyde Park to see the muster of 15,000 Volunteers!

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

W. O. MITCHELL, Military Bookseller and Publisher, 39, CHARING CROSS, S.W. Catalogues sent on application.

TO RETIRED CAPTAIN, CLIFTON.—Thanks; I will send you a book in a few days, to the above address, by post.—J. C. M.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.
First Time this Season of the powerful Adelphi Drama of the FLOWERS OF THE FOREST. 9th Week of the Popular American Actress, Miss Julia Daly.
On Monday, and during the Week, the FLOWERS OF THE FOREST. Messrs. J. L. Toole, P. Bedford, Billington, Stuart, C. Selby, C. J. Smith, Powell, Eburne; Miss Woolgar, K. Kelly, Mrs. Billington, Miss Laidlaw. And OUR FEMALE AMERICAN COUSIN Castas before. Commence at Seven.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly, Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.
The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, AVERY ROW, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.
The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.
Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0

Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 23, 1860.

The general public must have been startled on Monday last upon reading in the *Times* what an extraordinary question had been put to Lord Overstone by the Coast Defence Commissioners. Mr. Cobden and Mr. Bright are the only two men in England, hitherto, who are known to have spoken calmly of the occupation of London by an invader. And we must confess we cannot understand how a Royal Commission of naval and military officers, with only one civilian among them, can have brought themselves to frame such questions as they asked Lord Overstone; or that, having asked them, and received his answers, they could issue the report they have done, proposing to expend near twelve millions on "the defences of the United Kingdom," but omitting altogether the defence of the capital. His lordship's answers amount to a positive rebuke; and though they may be regarded as merely a civilian's view of the case, that is quite a mistake—the principal military witnesses examined by the Royal Commissioners told them just the same thing:

"In fact" (says Sir John Burgoyne, on 12th Nov. last), "I cannot help thinking that if an enemy gets into London, it is all over; then we must make peace, and submit to almost any terms." (Q. 690.)

But to revert to Lord Overstone's opinions, sent to the Commissioners on the 29th October preceding. Yield up London, he exclaims, to an enemy! Calculate upon having to do so beforehand, and ask me to estimate the cost. There is but one answer—"IT MUST NEVER BE!" It ought not to be even contemplated as a possibility! You ask what would be the results? Can there be any doubt? THE UTTER AND ABSOLUTE RUIN OF ENGLAND! The questions were certainly such as might become a "mere nation of shopkeepers." The answers, thank God, exhibit both the spirit and wisdom of a Wellington!

Before going into this matter with reference to the military testimony to the soundness of Lord Overstone's views, let us glance at the subject for a while, as it were, with "City" eyes. Although the Royal Commissioners had the benefit of Lord Overstone's replies, they have put forward an elaborate and expensive scheme, purporting to to be "for the defence of the United Kingdom," but leaving the heart of the kingdom exposed, its most vital spot unprotected. It is true they excuse their not providing for the defence of London upon the plea, that their instructions rather directed their attention to the existing nucleus of fortifications about our arsenals and dockyards. But we have yet to learn why Mr. Sidney Herbert's memorandum of instructions should override the prior and higher authority of Her Majesty's Commission, to inquire generally into what is necessary "for the defence of the United Kingdom," not only by means of works "now in progress," but "by any other plans or designs" whatever. Moreover, even the letter of Mr. Herbert's instructions clearly does not limit them from considering the most important part of the subject; for, speaking of the works required for the defence of Woolwich, "with a view to its protection against an attack by land," he adds, "which would, at the same time, form an important element in the means of defence for the metropolis." The writer of the able article on "London, the stronghold of England," in the *Cornhill Magazine*, for June, overlooks the fact, and exclaims, "Not a word about the metropolis! Such an omission seems hardly credible." But, even had the word not occurred, we apprehend "the defence of the United Kingdom" can scarcely be imagined as possible, if London is not to be defended: London, at once its weakest point and stronghold!

But say the Commissioners,

"The defence of London has not been brought under our consideration;"

adding this strange *non sequitur:*

"It is, therefore, only necessary to point out that it does not materially affect the conclusions we have arrived at with regard to the fortifications of the dockyards."

This reads very like nonsense. If they had not considered the subject, how do they know that its proper consideration would not affect their conclusions? But it is really not true. Besides what Sir John Burgoyne told them, as already quoted, and besides their specific questions addressed to Lord Overstone, and what Mr. Secretary Herbert says in his memorandum, all on the subject of the defence of London, Captain Sullivan, in answer to Question 202, says:

"I have been very much interested in that question (scarping down hill), in connection with the chalk ridges for the defence of London on the south. I believe that that is a very important question, and that it bears indirectly upon the defence of our ports, because, if you make Portsmouth impregnable, and an invading army ever lands, it makes it the more certain that they will go to London, and, if so, the defence of London becomes very much connected with the defence of Portsmouth!"

So much for this subject not having been under the consideration of the Commissioners, and its "not materially affecting their conclusions." Unfortunately these last words are true!

But the Commissioners turn Captain Sullivan's position by a double feint, that certainly will not materially affect the conclusions of the citizens of London:

"If London could be rendered secure," [what say Lord Overstone and the *Cornhill?*] "then an invader's attention would be turned to the dock-yards and arsenals; and, on the other hand, if London cannot be secured, and if our army is defeated in the field, then the dockyards and arsenals, if fortified, will become places of refuge for the army, but if not fortified, they would fall with the capital!"

Lord Overstone, *tam Marti quam Mercurio*, says:

"We have means for defence of every kind. Negligence alone can bring about the calamity under discussion."

But the Commissioners contemplate that we may be beaten at sea,—beaten in the field on English soil, and that London is to be left to fall. And they propose that we shall pay nearly twelve millions sterling, that, after all this has happened, our Army may run into refuge at Portsmouth and Plymouth, "to protect the defence, and organise the means of resistance!"

The Royal Commissioners do not appear to appreciate, like Sir John Burgoyne and Lord Overstone, all that a conqueror could exact with this great city at his mercy. Sir John Burgoyne says, "The enemy's first point would be London, where success would put an end to the war!" (Q. 766.) *In such circumstances*, it would be better not to have an army at all, than these soldiers in their "places of refuge" at a safe distance from the enemy, refusing to lay down their arms while three millions of souls are subjected to the horrors of war!

In our opinion England has two grand lines of defence only. Shame upon us if the first fails! We have the sea; and we should render it impossible that our sea-wall can be broken. By means of a Channel Squadron and proper reserves, with a complete system of telegraph and light signals, a surprise should be rendered impossible. Why should the Commissioners insist on assuming that our Navy is to be decoyed out of the way or sunk? But should this, our best line, fail, the next is every inch of earth between the sea and London, and every inch of that ground should become a sea of blood before an invader's guns should menace London.

The great metropolis is the only rational base of operations for the defence of the country on land. We have seen what Sir John Burgoyne's opinion is. We must leave the peculiar views of the Royal Commissioners out of the question, especially as we are about to refer to the well-known opinions of distinguished French officers. In an admirable paper read by Col. Adair at the Royal United Service Institution on 11th June, 1858, on "the militia and its defensive uses in the event of invasion" (Jour. R.U.S.I., Vol. ii., p. 379), he points out that all the French projected plans of invasion point to London as their object. Baron Maurice, as quoted by General Lewis, says:

"The movements of the invading forces must be simultaneous and concentric on London. As respects the plan of defence, when the capital is the centre of the national life, the metropolis must not be exposed to the risk of a sudden, bold attack. If Vienna in 1805, Berlin in 1806, Madrid in 1808, had been fortified, the results of Ulm, Jena, Burgos, would have been different; and if Paris in 1814-15 could have held out for eight days, what might have been the effect on events? Is it wise then to establish a number of strong points on the coast? And, as it appears that public opinion will never permit London to be fortified, the best resistance to an invader would be found in entrenched camps, connected by railways, and, in the indications given by Colonel Lewis, namely, at Shooter's Hill, Croydon, Kingston, Windsor, Marlow, and Highgate," &c.

We cannot draw out this article to greater length, important though the subject be. We must refer to Colonel Adair's able paper, and commend it to the study of our professional readers, but especially to the

SUPPLEMENT TO

THE ARMY AND NAVY GAZETTE.

No. XXV. SATURDAY, JUNE 23, 1860. GRATIS.

THE GUARDS ANNIVERSARY.

The two regiments of the Foot Guards, the two hundredth anniversary of whose existence occurs this year, have celebrated the event with great *éclat*. The arrangements of both festivals were admirable, and the result was a success which left nothing to be desired. We append a full report of the proceedings on both these deeply interesting and impressive occasions.

THE GRENADIER GUARDS.

The 200th anniversary of the formation of the First, or Grenadier, Regiment of Foot Guards, was celebrated on Saturday evening by a sumptuous festival, held in the Banquet Hall of St. James's Palace.

The gorgeous Banquet Hall of the Palace, which was brilliantly illuminated, and its walls decorated with the colours, standards, and trophies of the regiment, formed into the most graceful devices, presented a dazzling scene. The great bulk of the company attended in plain evening dress, but the cluster of stars, orders, crosses, and medals, which most of them displayed, unmistakeably betokened their military rank and renown. The monotony of civil costumes was agreeably relieved by the uniforms of those officers of the corps who happened that day to be on regimental duty.

The guests began to assemble shortly after half-past 7 o'clock, and passed through a double file of Grenadier Guards, posted along the grand staircase and corridors of the Palace, into a handsome and spacious reception room. At a quarter past 8 o'clock His Royal Highness the Prince Consort, the Colonel of the regiment, who was to preside, arrived, accompanied by His Royal Highness the Commander-in-Chief, and was ushered into the dining-hall, followed by the rest of the guests to the number of nearly 200, the band of the Grenadier Guards playing the National Anthem.

The company included His Royal Highness the Prince Consort, His Royal Highness the Duke of Cambridge, Sir Richard Airey, Colonel Ridley (Scots Fusilier Guards), the Equerry to His Royal Highness the Duke of Cambridge, the Equerry to His Royal Highness the Prince Consort, Mr. Henry Cox, Sir Charles Yorke, Lord de Grey and Ripon, Rev. R. Browne (Chaplain to the Brigade), Lord Rokeby, Lord Combermere, Sir James Scarlett, Sir John Kirkland (Agent), Mr. White (Solicitor), Colonel Martyn, Sir Edward Lugard, Mr. C. Hammersley, Lord Frederick Paulett, C.B., the Chaplain-General, Colonel Parker, Mr. Dolby, Mr. Lilley, Mr. Atkinson, Captain Hamilton (2nd Life Guards), Lieutenant. Cunninghame (2nd Life Guards), Sub-Lieutenant *Cunninghame* (2nd Life Guards), and the following officers of the regiment:

Colonel Hamilton, Colonel the Hon. James Lindsay, Colonel Lambert, Lieut.-Colonel Wynyard, Lieut.-Colonel the Hon. R. Curzon, Lieut.-Colonel Maitland, Lieut.-Colonel Lord Arthur Hay, Lieut.-Colonel Montresor, Lieut.-Colonel Stuart, Lieut.-Colonel Lord Frederick Fitzroy, Lieut.-Colonel Ponsonby, Lieut.-Colonel Cust, Lieut.-Colonel Cure, Lieut.-Colonel J. H. King, Lieut.-Colonel de Horsey, Lieut.-Colonel Higginson, Lieut.-Colonel Lane Fox, Lieut.-Colonel Randolph, Lieut.-Colonel Cooper, Lieut.-Colonel Burnaby, Lieut.-Colonel Sir Charles Russell, Lieut.-Colonel Hume, Lieut.-Colonel Hogge, Lieut.-Colonel Burrard, Lieut.-Colonel Sir W. Wallace, Captain Barnard, Captain Alexander, Captain J. Murray, Captain Sir J. Montagu Burgoyne, Captain Verschoyle, Lieut.-Colonel Bruce, Captain Bathurst, Captain Anstruther, Captain Hamilton, Captain Clayton, Captain Bramston, Captain Ewart, Captain Ferguson, Captain the Earl of Carrick, Captain Groy, Major Pearson, Captain Malet, Captain Wynne, Captain Viscount Hood, Captain Stucley, Captain Hon. S. C. G. Tracy, Captain Parnell, Captain Smith, Captain Douglas Pennant, Captain Phillips, Captain Johnstone, Captain Hon. Arthur Annesley, Lieutenant Hayter, Lieutenant Viscount Uffington, Lieutenant Hon. Charles Edgcumbe, Lieut. Viscount Mahon, Lieutenant R. Seymour, Lieutenant T. R. Lane Fox, Lieutenant Pakenham, Lieutenant Hon. F. Stanley, Lieutenant E. S. Bridges, Lieutenant Melville, Lieutenant Norton, Lieutenant Fludyer, Lieutenant Farmer, Lieutenant Vyner, Lieutenant Hon. C. Eliot, Mr. Atkinson, Mr. Girdwood, Mr. Blenkins, Mr. Wardrop, Lieutenant Viscount Hinchingbrook, Lieutenant Clinton, Mr. Lilley.

And the following ex-officers of the regiment:

General Lord Downes, G.C.B., Colonel Vernon Harcourt, Colonel Hatton, Sir Harry Verney, Bart., Colonel the Hon. Chas. Lindsay, Sir Ralph Anstruther, Bart., Colonel Hudson, Colonel Hopwood, Mr. H. Oswald, Captain Nicholson, Major-General Stanhope, Mr. John Balfour, Captain Dawson, M.P., Mr. J. Shaw Stewart, Major-General Ridley, C.B., Lord Charles Fitzroy, Colonel Eyres, Lieut.-General J. Peel, M.P., Colonel Thornton, Earl of Sandwich, Major-General Crawfurd, Major-General Hon. R. Bruce, Colonel Brownrigg, C.B., General Angerstein, Mr. H. Compton, Lieut.-Colonel Purvis, Lieut.-Colonel Fitzroy, Mr. E. Jekyll, Sir F. Bathurst, Bart., Colonel Bagott, General Arbuthnot, Mr. B. Powell, Colonel Cartwright, Earl of Sefton, Mr. J. W. Pickford, Captain Munro, Colonel G. Johnstone, Colonel Fletcher, Mr. Chandos Pole, Lord Braybrooke, Mr. G. Fitzroy, Mr. Alexander Mitchell, Mr. F. C. Brooke, General Sir W. Moore, K.C.B., Mr. Robert Bruce, Mr. C. H. Turner, Sir George Nugent, Bart., Colonel Reynardson, C.B., the Duke of Manchester, Colonel Rous, General Sir H. F. Davie, Bart., Lieut.-Colonel F. Davie, M.P., Colonel Dixon, Colonel Johnstone, Lieut.-Colonel Greenwood, Lieut.-Colonel Hatton, Mr. R. Lloyd, Sir H. Fletcher, Bart., Mr. J. Murray Drummond, General Robbins, Lord Blantyre, Lieut.-Colonel Clinton, Colonel the Hon. A. Gordon, C.B., Colonel George Campbell, Lord Grantley, Mr. C. Brandling. Sir Thomas Moncrieffe, Bart., Mr. C. Balfour, Sir C. Rowley, Bart., General Reeve, Mr. C. Lane Fox, Mr. Alexander Kinloch, Lieut.-Colonel Hon. A. Egerton, Sir J. Fergusson, Bart., Colonel J. Reeve, Hon. J. St. Clair, Lord Wm. Thynne, General Fludyer, Lieut.-Colonel Musters, Sir James Walker Drummond, Bart., Mr. G. Fitzhugh, Colonel Foley, General Gascoigne, Sir C. Lindsay, Bart., General Fox, Sir T. Whichcote, Captain Morant, General Sir John Eustace, K.C.B., Mr. Balfour, M.D., Colonel D. Pennant, M.P., Golonel Goulburn, Major-General Wood, Colonel Hon. H. Forester, Colonel Joddrell, &c.

The dinner was provided by the Messrs. Staples, of the Albion. The fine band of the regiment was stationed in an adjoining apartment, and performed a choice selection of operatic music during the evening.

On the removal of the cloth,

The health of "Her Majesty the Queen" was proposed, and received with much enthusiasm.

Lieut.-Colonel Lewis, the acting Colonel of the Grenadier Guards, then gave "His Royal Highness the Prince Consort, our Colonel." (This toast was drunk also amid enthusiastic cheering.)

His Royal Highness the Prince Consort then rose and said:—Gentlemen, I am very much gratified at the kindness you have evinced by the manner in which you have received the last toast. I feel justly proud of the distinction conferred upon me eight years ago, when Iwas appointed to succeed the immortal Duke of Wellington in the command of this regiment, since which I have held that honourable post which not only connects me with you officially, but brings me into intimate, and, I trust, cordial personal relations with you. It is on an occasion like the present that the consideration must be suggested to my mind in its fullest force, of how much honour and distinction are involved in the title of Colonel of the Grenadier Guards. Gentlemen, we are assembled here to-day to celebrate the 200th anniversary of the formation of this regiment as at present constituted. During the last 200 years, which embrace the most glorious period of the history of our country, this regiment has taken an important and distinguished part in the most brilliant events of that history. It has fought at sea and on land, in most parts of Europe, in Africa, in America; and whether fighting the French, the Dutch, the Spaniards, the Moors, the Turks or the Russians, it has always stood to its colours, upheld the honour of the British name, and powerfully contributed to those successes which, under God's blessing, make this country stand proudly forth among the nations of the earth. Gentlemen, I need not recall to you its deeds, for they are all present, I am sure, to your minds; but I cannot refrain on an occasion like this from pointing to some, at least, of the long and uninterrupted list of victories with which the name of the Grenadier Guards is associated. I must point to the celebrated siege and capture of Namur, to the first defence of Gibraltar, to the capture of Barcelona and Valenciennes, to the battles of Blenheim, Ramilies, Oudenarde, and Malplaquet; to the battle of Dettingen, aye, and of Fontenoy; for, although in the last-named field the victory did not finally remain with the Allies, it had been fairly won by the distinguished prowess of the Grenadier Guards. I must point to the capture of Cherbourg, which just 100 years ago looked defiance upon our shores; nor must I omit the battles of Lincelles, Corunna, Barossa, the Pyrenees, St. Sebastian, Nivelle, Nive, and Waterloo, where in the last and terrible struggle with Napoleon this regiment acquired its title of Grenadier Guards, by having vanquished in fair fight those noble and devoted Imperial Guards who, until they were met by the British bayonet, were held to be invincible. The battles of the Alma and of Inkerman, and the long protracted siege of Sebastopol, bring down to our own day the glorious annals of which this corps may well be proud. But, gentlemen, the duty of the British soldier is, unfortunately, not confined to opposing the external enemies of his country. It has been his fate sometimes to stand in arms even against his own countrymen—a mournful task, which I trust we shall never see again imposed upon him. In such circumstances the soldier is upheld by the consideration that, while implicitly obeying the commands of his Sovereign to whom he has sworn fidelity, he is purchasing for his country by his blood that internal peace and supremacy of the law which form the only basis of the liberties as well as the prosperity of the nation. This regiment, originally sprung from the Royalists who clung to Charles II. during his exile, have always proved true to their Sovereign, whether they contended on the field of Sedgemoor in defence of James II. against the Duke of Monmouth, or struggled heroically for five long years in the cause of George III. against his revolted American provinces. Gentlemen, that same discipline which has made this regiment ever ready and terrible in war has enabled it to pass through long periods of peace amid the temptations of a luxurious metropolis without impairing its vigour or its energy, to live in harmony and good brotherhood with its fellow-citizens, and to point to the remarkable fact that the Household troops have now for two centuries past formed the permanent garrison of London. While always at the command of the civil power to support order and law, they have never themselves disturbed that order, or given cause of disquietude, either by insolence or by licentiousness. Let us trust that these same noble qualities may still shine forth for centuries to come, and that the Almighty will continue to favour and protect this little band of devoted soldiers. Gentlemen, let us on our part manfully do our duty, mindful of the deeds of our predecessors, loyal to our Sovereign, and jealous of our country's honour. I give you, then, "Prosperity to the Grenadier Guards, and the health of Colonel Lewis, long an honoured Member of the Corps, and now its able and zealous Commanding Officer."
